[Music] welcome ladies and gentlemen welcome one and all you are listening - what on earth is happening right here on the revolution Broadcasting Network I'm your host mark passio the show is live every Tuesday evening from 7:00 to 9:00 p.m. Eastern Time today is Tuesday October 5th 2010 we have a great show lined up here today and we're going to get right to it I'm going to go through some event announcements first and then we're going to get into our topic of discussion tonight which is taxation in general as a means of control and how this is actually a form of mind control in our ongoing discussion of mind control we've been focused on the monetary system and money in general as one of the tightest forms of mind control that exists on this planet tonight we're going to talk about one of the major arms of the monetary system taxation and connected with that I want to talk about a little a little bit about the the general state of awakening of the people of this planet or I should say the general state of non awakening of the people of this planet however one may be looking at that situation as it stands right now so we could talk a little bit about that but for now I'm going to get right into the event announcements I have three for this evening first there is a conference being hosted by MUFON PA the mutual UFO network of Pennsylvania is hosting its yearly UFO conference Saturday October 9th that's this Saturday coming up it's going to be at the Sheraton Bucks County the Sheraton Hotel in Bucks County that's at 400 Oxford Valley Road in langhorne pennsylvania the zip is one nine zero four seven the conference will begin at 8:30 a.m. and go to 5:00 p.m. admission is $30 for the day here's the list of speakers and their topics John venturi will be speaking about the case for UFOs Jennifer Stein will make a presentation on the crop circle phenomenon peter robbins will be giving a talk entitled an illustrated history of UFO literature Kathleen Martin will discuss the Betty and Barney Hill case Richard Dolan UFOs in the national security state bill burns of UFO Hunters magazine will be presenting and the keynote speaker is Budd Hopkins who will be giving a presentation on the abduction phenomenon so that is the MUFON PA UFO conference just outside of Philadelphia this Saturday October 9th 2010 at the Sheraton Bucks County at 400 for Dollywood in langhorne pennsylvania 8:30 a.m. to 5:00 p.m. admission is $30 for more information on this conference please visit MUFON P a calm that's M UFO n PA dot-com or you can visit Jennifer Stein's website at main line MUFON comm main line M UFO and main line MUFON comm second announcement Monday October 18th truth freedom prosperity right here in Philadelphia presents its monthly documentary screening and discussion night at the ethical Society building 1906 South Rittenhouse Square in Philadelphia these are documentary nights start at 7 o'clock p.m. they usually go until about 9:00 9:30 a discussion always follows them it's usually a pretty lively discussion this month they will be showing the documentary called for liberty here's the description advocating a philosophy of sound money a non interventionist foreign policy strict constitutionalism and individual liberty dr. ron paul inspired a unique grassroots movement unmatched in American history the repercussions which continued to reverberate today and into the future of the American psyche for liberty how the Ron Paul revolution watered the withered tree of Liberty follows this historic campaign from the perspective of grassroots activists and showcases the unique often bizarre yet groundbreaking projects they undertook as they brushed aside traditional campaign methodology so this is about Ron Paul's uh race toward the presidency in 2008 it's called for Liberty it's a good film I've seen it come on out to the ethical society building in Philadelphia in 1906 South Rittenhouse Square Monday October 18th these documentary screens and discussions are every third Monday of the month so come on out get involved in the discussion it's always free never anything to attend uh there is um you know uh voluntary contributions if you want to make a contribution you're welcome but that is not you're not obligate obligated to do so for more information about this group in general or the meetings that it holds please see w w truth freedom prosperity org that's true freedom prosperity dot o-r-g and finally the last announcement i have for this evening free your mind a conference on consciousness mind control and the occult for your mind is a unique two-day conference scheduled for April 9th and 10th 2011 in Philadelphia PA featuring multiple speakers and diverse educational materials for the purpose of raising public awareness of the critically important topics of mass mind control techniques the covert and subversive influences upon consciousness and behavior trauma based and ritualized abuse and the practical mental and emotional healing methodologies available for those affected by these devices the date is Saturday April 9th and Sunday April 10 2011 8:00 a.m. to 8:00 I'm sorry 10 a.m. to 8 p.m. both days the doors open at 9 a.m. both days the location is rubra Hall at 4:14 for 1/4 Green Street Philadelphia PA 19136 peekers thus far Aaron McCallum alfred weber Andrew basiago tower you dozy Jay Parker John Nicholson Larkin Rose Laura Magdalene Eisenhower myself mark passio just added mell fàbregas of Veritas radio Michael Kelley and Suzanne Taylor free your mind a conference on consciousness mind control and the occult April 9th and 10th 2011 right here in Philadelphia for more information please visit the conference website at WWE mind conference calm that's all the event announcements let's do a quick review of what we've been doing and then we'll jump into the topic for tonight as people who follow this radio program may be aware of what this show is ultimately about is the human ability to tell truth from falsehood that's the underlying causal factor for why humanity exists in the current state of consciousness and in the current state of external manifestation the way the world is the way it is in other words it is directly related with the beings on this planet ability individually to be able to comprehend that which is true and real and that which is false and illusory and if you don't think that that's the case it's probably best simply to just turn the show off right now because you'll probably learn very little that is the underlying problem that is taking place on this world if you haven't figured that out yet and what we do on this show is try to help people to understand how to raise one's consciousness and go about the process of becoming better at developing that ability of recognizing truth when it is heard when it is spoken when it is discovered and also recognizing nonsense when it is heard and seen the ability to tell truth from falsehood is the underlying causal factor behind how humanity is fooled and believe me folks its fooled and why Humanity experiences the levels of self-inflicted suffering that it does so that's ultimately what this show is about we analyze all the different aspects of this as you're heard in the intro it has to do with which show has to do with anything that affects the freedom of the people of Earth because that's what this show is also ultimately about freedom because freedom is inextricably tied to the ability to recognize truth from falsehood so we've gone into explorations of human consciousness and the self and the differences between the true self to the higher self and the illusory egoic lower self the self is identified with ego and the physical reality that one operates in but is not the actual self we just become identified with that property of the self and think that that's all that there is the physical side of things we've talked about the structure of the human brain understanding how important the brain is and taking care of the brain and helping the brain to exist in a state of balance between the left and right brain hemispheres how important that is in developing the ability to tell truth from falsehood and to stop being fooled about things that aren't real we've gone into all the barriers to self-realization we talked about the five sensory illusion identification with matter identification with the roles that one plays in the world ego identification we've talked about the education system the prison of the left brain all the institutional belief systems in the world the structure of control compartmentalization hierarchy and now we've been going on an ongoing discussion over many weeks on the the methodologies of controls specifically the methodologies of mind control because ultimately the dominators of this world have to control your mind in order to garner your compliance with their agenda and their plans see evil doesn't walk up to people and say hello I'm evil will you help me carry out my agenda it doesn't work that way evils greatest strength is in remaining completely hidden it does its works in the dark it does its works in the cloak of darkness because if evils plans agendas and methodologies are brought out into the light people can see them for what they are and that's indeed what I endeavor to do on this show as you heard in the intro the show will seek to shed light upon the darkness of this world and this world exists in just about pure darkness there are very small pinpoints of light out there and I would hope that people would look to some of the people out there that do have a little bit of wisdom to contribute and see those people as beacons of light and hope for the rest of it the bulk of this race of beings that exist and dwell in almost complete darkness because the situation is really dire in case you're not really paying attention and don't have a grip on really where we stand okay I'm here to tell you that the situation is worse than what most people think that it is not to discourage anybody not to try to put anybody in a panicked state or in a fearful mode but look at it reasonably look at it realistically for how it actually is we have largely dropped the ball folks and I think we in order to make up that ground really have to start pushing harder and have to start openly discussing these things everywhere at all times because people aren't getting it I don't know what we could open up the phone lines today and talk about where people see this situation where it is where people stand on it but to be honest I'm not very hopeful I don't really see people getting it or waking up I see people going deeper into fear deeper into the trance at least from where on that Philadelphia seems like it's a largely a bunch of extremely dark and ignorant Souls and I don't mean to put the city down you know it's where I'm from but you know you walk out into the streets of this city and it is pure darkness just about so I don't know what the situation is in other places but if callers want to call in and talk about that they're welcome to do so I'd really like to get some people's opinions on that especially in the second hour as I said before going to get into the wrap-up of our analysis of the monetary system in the first hour we're going to talk about taxation let me give the call-in number for the show the call-in number is seven two four four four four seven four four four once again the calling number seven two four triple four seven triple four when you call in put in the call ID number four what on earth is happening the call ID number for this show is eight three five one five once again the call ID number eight three five one five some people um you know I do the show through talk to it's conducted through Skype as the voice over IP technology but the podcast carrier is talking before those out over revolution broadcasting and some people were kind of complaining a little bit that I don't turn on the participation for the the talk shoot program now if one if I did that it would be a jumbled mess of people talking over each other to I earned the chat off simply because to see a whole bunch of text going across the screen while I'm juggling a bunch of things on my screen which I do people don't see I'm the only one here in the studio people don't see the thing the tasks that I do to keep the show running well to bring up documents on the screen I run my own intro music I bring you know I'm doing different technological things here behind the scenes and have an ongoing discussion on the screen while I'm doing those things would be a big distraction so I make the call in number available to people to call in I bring them on the show I love the caller's of the show I love taking calls I'm just trying to explain to some people who have commented that I don't turn on the participation I'm explaining why I don't do that for the call I think if you were running a radio show that was going out over a network you would probably make the same decisions particularly if you had no one else performing the you know behind the scenes tasks dealing with the technologies uh that the show relies upon so just letting people know why that is because some have inquired about it what we've been talking about over the last many weeks is mind control you're not going to control someone at the level of spirit spirit is not something that can be controlled if that which is it simply is you're not going to control that period it's the fundamental basis of reality in that which we are it is uncontrollable if you were to attempt to control the physical body people will recognize very very quickly that they are under external control therefore the most effective form of control is control over the mind to influence the behaviors and the decision-making processes of an individual such that they actually follow your agenda your program believing oh all the while and this is their own thoughts and agendas that these are their own ways of looking at the world instead of something that has been programmed into them and people don't like the word some people insist that this is something that only exists in science fiction and go ahead go on believing that if you want your own funeral folks if you want to believe that okay you can call this by whatever name you want to call it it's mind control that's what it is it exists it is real it is in operation everywhere in the world get over it the sooner you accept that get over that that's the world that you live in and then decide to do something to actually change that situation and the way that situation will become changed is by understanding the methodologies of how mind control works and then alerting as many people as possible to how this works and not only how it works but the fact that they indeed are under these influences these covert and subversive influences upon consciousness and behavior what we'll be doing at the free your mind conference I'll be giving a talk on the subversive usage of symbolism icons symbols regalia words and imagery they're used in military and police uniforms and institutions and how these symbols go directly past the conscious mind work directly upon the subconscious to put it into a certain state of consciousness and the people who are mind controlled by these institutions don't even understand how this works and their owners are mocking them unmercifully right through the symbols that they're used and that they make them wear and if you don't believe it good luck to you it'll never make it untrue so the cop who's listen or the the soldier who's listening you're getting offended shut it off shut the radio off you don't need to listen to this show you know better you know what you're talking about and you know everything so turn it off and enjoy what you got that's my advice I no one should feel pressured or obliged to believe anything that I have to say because it's all verifiable you can look up anything that I'm talking about you can study the symbolism on your own which probably you'll be loathe to do because of how lazy most people are okay and you probably just say well that's your opinion well no it isn't my opinion nothing I'm saying on the show is my opinion they the amount of research and delving into this information and this knowledge that I've done in my life would make you pass out if you even grasped it for an end okay I'm I'm really really sick of people that try to say this is something that I'm interested in here's another topic you know I'm going off on a tangent here before I get into the main topic because in case you haven't noticed I'm a little bit fired up because uh death death forced me to spend a little bit of time around some people that I didn't really particularly want to spend time around members of my own family two deaths in my family last week and being you know the necessity to attend funerals etc when there's a death in the family forced me to have to be around the complete ignorance now and see here's where again I think what I do is different than most people because other people will point fingers and say yes other people are ignorant they don't understand what's going on but I'll bring it right home I'm not talking about anybody else before I talk about anybody else let's bring it right home to where it really roosts and that's right here right here I'll tell you about things that have gone on with me and how ignorant I was in my own past and I'll tell you about things the way they are right now right here in my own with in with my own family members their level of darkness and ignorance and it's not necess ignorant we talked about this many times on the show the difference between nations not knowing something that you couldn't reasonably be expected to know the information it simply isn't available that's called Nations it comes from the Latin neski air neski array to not know to be ignorant of but the connotation of that is the negation of knowledge skill here a means to in Latin and n.e is the prefix meaning to negate or not not to know but that means you don't know something that the knowledge simply isn't present it isn't there it's not in your in your surroundings that isn't the state of humanity that isn't the state of my family members they are in ignorance ignorance means you see somebody sitting right in front of you and you deliberately decide to turn look the other way you're ignoring them it's based on the word ignore it means deliberately refusing to put any attention towards something willfully willfully refusing to take in information that is present and that's the state the humanity is in and I'm tired of hearing apologies about it it is even just mind control folks there's more to it than that what it really is is cowardice it's beyond mind-control it's beyond just not knowing or ignorance it's beyond apathy not caring the ultimate root of why the human race refuses to come out of the insanity that it dwells in on a daily basis is because it will not make the choice in the moment to display any courage ultimately people are enslaved because they're cowards cowards and you want to know who some of the biggest cowards are some of the biggest cowards in the world are the people who mindlessly follow what they're told to do because they won't look at their master in their hierarchy above them in their controlled compartmentalized state where they're kept as a little lap dog and say no I won't follow your immoral orders that's the biggest cowards on the planet you think the Nazi scum who what they did back in the 1930s and 40s in Europe you think those Nazi scum bags were brave people you think they were people of moral conscience and they were brave and they were just you know going forth because they had so much courage to do what they knew was right please they were total cowards that's what they were and that's what the Nazis who are in the United States right now are their cowards cowards you know what they're not the only cowards the bulk of the people of this country are cowards and that's why this country is enslaved along with the rest of the world because it stopped being a brave nation you want to know what the ultimate quest of a spiritual the ultimate goal of the spiritual quest is where illumination really lies folks it doesn't lie in knowledge in lies encourage real courage to stand up to evil to know what evil is and you could even be fearful for your physical well-being because true courage is action in spite of any fear that may be lurking within you that's what it is not the absence of fear it's it's right moral action in the face of fear in spite of fear literally fighting it saying I don't care that this this is present I will go on in spite of it and you know what the Nazis that exist in the United States and our police and there our military and in our judiciary and in our government and in all the other places repeat these little powerless lowlife cowards think that they're in control of people Nazis are the lowest most cowardly form of life that exists on the planet and there it is said for the record it's said for the record just so it's on record another reason I do this show not because I think it's going to change anything or it's going to reach large numbers of people I'm putting my voice on the record so that it is part of the systemic memory of the universe and simply because this show is a monument to truth that's all it is I don't expect it to change a thing the calcified level the tumorous calcified level of ego that this race of beings exists in do I expect them to suddenly see the light and change their ways you have to be kidding but please what I'm really sick of is people who try to tell me that I enjoy doing this that this is my interest that it's not a interest I go out and look for these things I'm interested in this this is the stuff I like to do yeah said before anybody that believes that is so crazy they're so unbelievably crazy that I can't even fathom that level of insanity its impress how crazy you would have to be to think that the people who understand what I understand enjoy this this information or knowledge or knowing what they know is it's borderline torture it happens to be the truth about the world in which we live and that's all that is this isn't my interest it's not something I like or enjoy as a matter of fact ask most people I'm pretty damn bitter over it can even have to do this do you think that I want to be on the air with this two hours of my life tonight where I could be doing something else and here's what I need to do because humanity exists in such a level of ignorance and darkness I need to come on the air tonight for two hours and try to explain to people that to forcibly take the something that someone else has made and acquired with their own hands there the sweat of their own brow under threat of violence is wrong imagine this that this is how crazy is saying dumb and immoral this race of beings has become if people need to do that to other adult beings then I that that's even something and and that's look that as strange or weird and that your idea about that about what taxation is is even weirder crazy that if you think that way imagine that this is where we're at collectively that come on the air and try to explain to people what taxation is at a core fundamental level that it is theft carried out under the threat of violence and that it's morally wrong no matter what you say you're going to use it for no matter what kind of imaginary illusory contractual obligations you happen maybe to believe that people are born into which is all fantasy it doesn't exist it's all just justification for some people want to rob from other people that's all it is that's all it ever has been it's all it ever will be and if you think it's anything other than that you're wrong you are wrong if you think it's anything other than that and it can't be said any simpler it cannot be said any simpler way that's what taxation is fact that I need to come on the air and explain that to anybody is a disgrace it's a disgrace it's a joke a joke is what it is it's it's a joke people aren't adults the occultists of this world who have mind controlled them have put them into literally a state that is akin to emotional and spiritual stunted nasir retarded and that what that word means is they've been made slow their progress has been retarded to retard something means to completely slow down its progress to thwart it or to hold it back and they've done this with religion they've done this with government they've done this with mind-control they've done this with money and that's what we're talking about here the one religion this is even in the freedom movement people people think that people in the freedom movement are so awake newsflash folks the people in the freedom movement are not so awake okay as a matter of fact many of them understand very little of any real significance or true importance they're not really illuminated they're not really enlightened they know a little bit and a little bit of knowledge can be a dangerous thing they are not illuminated people they are not enlightened they see a little bit about how this affects them their world and so they stand up and start making a ruckus they don't really care that this is unjust they don't really care that it's not morally right because if they did they would understand the taxation isn't morally right they would understand that it's theft that the threat of violence and if they understood that they wouldn't get so behind a document called the Constitution that says that this is morally justified for whatever reason it may justify in it because it grants powers oh really it grant the Constitution grants powers that other people don't have Congress shall be able to lay and collect taxes isn't that nice you can give a body of people a natural wall right that other human beings don't have that's something hmm interesting I how they got that ba would be nice wouldn't you like a power like that I know I would get all the money you want hey you owe me 20% of what you just made there pal fork it over and this comes back to the idea of natural law which is the ultimate goal of becoming enlightened this is what people need to understand to know what the truth is and what it is not what do you have the right to do what do people have the right to do what do they not have the right to do it's about rights because it's about right and wrong morality that's what natural law is about and that's why we're in the mess that we're in folks because we just completely ignore natural law principles and we think we can step on those laws and that we can prosper while crapping on them and guess what it doesn't work that way it doesn't work that way because the law that the creator made regardless of what you want to think of that force as I could care less okay but what the universe put into effect what creation itself put into effect is a series of laws that govern that bind that control what happens will we behave in certain ways and if you don't believe that turn the show off now turn it off nothing I say will be of any use to you okay it's pointless to continue if you actually believe there's no such thing as natural law because you're probably a Sol obsessed refer to past shows to understand what Sol obsessiveness okay because if you don't believe that there's any such thing as truth that there's no such thing as right or wrong there's no such thing as natural law essentially you deserve what's coming okay you deserve what's going to happen to you because you're basically saying the creation I don't want anything to do with the laws that you put into effect for our betterment and that's why these laws are in effect and they are in effect regardless of what anybody thinks of them they're in effect and people need to recognize that and get over it and it's not a punishment and it is not some kind of a prison because a law happens to be in effect it is done I talked about this before natural law is in effect for the betterment of the people of the cosmos the beings the soul that dwell in this dimension in this space-time continuum the reason that natural law is in effect is for their betterment it is for their growth and development it is so they can become conscious co-creators with a divine force to place those laws into existence and until we become conscious of them and start to create our reality in knowledge of in accordance with those laws good luck folks as you're not going anywhere but deeper into a prison I know how strange some of this may sound the people encountering this information for the first time and it's because if it sounds strange it's because you don't understand natural law principles you don't know ultimately what right from wrong is there's no such thing as taxation in nature folks it doesn't exist it's the construct of a diseased mind telling somebody that you're going to take whatever amount that they make is wrong it doesn't matter what you're going to do with it doesn't matter why you want to do with the justification see people always say oh what if there wasn't this and we weren't able to pay for this and what if this happened it's always a what-if it's always projecting into the future and it's always justifying the action no justification means it means trying to find a way to make something right and justification implies more than that the connotation of the word justification when I'm trying to justify my actions I know subconsciously or even at a conscious level that what I made doing is wrong and I'm trying to say that it is right I'm trying to put forward the proposition that an a wrong option that is not in keeping with natural law is actually in keeping with it that's what justification is so you'll hear billions and billions of justifications for why we need taxes why it's okay to do this why okay another person doesn't have this right but magically some people can grant this right to another body of people imagine that you can give something to somebody something that you don't have I wonder how that works I'm trying to figure it out I'll let you know when I figure it out imagine I can give somebody a cake that I don't have that I haven't made that I don't have I'll just I'll just go into my imaginary refrigerator take out a cake and give give give something to somebody that I don't have and then I'll acknowledge that they now have a cake that's how it works okay that's how the monetary system works anyway right and this is how people think rights work this stuff people think laws work you can just grant somebody a right a privilege then no other living being has under natural law I can't go up to my cousin and say listen I'm coming over and whatever you made last week better have one third of it laid out I don't care what it was whether it was money valuables possessions food one-third of what you made I'm taking at the end of this week and if you don't do it baseball bat to the head I don't have the right to do that I don't have the right to say if you don't do it I'm locking you up in a cage out in an out in your backyard I don't have a right to say you don't do that I'm gonna smash your house down I don't have any of those rights no individual does can anybody tell me one individual that has any of those rights no you know why because they don't because those rights don't exist nor could you grant somebody that right you could not grant that right to any other living being Oh on the earth or in the three dimensional space-time continuum in which we live period you couldn't do it you don't want to know why because you don't have that right that's why so you can't grant a right to someone else that you don't inherently possess and secondly the whole concept of granting some want to right is ridiculous and erroneous to begin with it rights are self existing you either have the right to do something or you don't have the right to do it period the end you have the right to do that which is morally within the boundaries of natural law you don't have the right to do that which is outside of the boundaries of natural law that's why it's called a right because it's in moral right and it's not wrong to do it it's not a right if it's morally wrong the end but yet we argue over this because people don't know the difference between right and wrong in 2010 adult human beings who are unraised here's another thing folks that I had to hear but I had to suffer through in the ridiculous completely childish Astra theological religion that I had to be tortured with this past week when sadly a couple of family members passed and I had to actually be present at a nonsensical childish sewage religion that people actually subscribe to it's all based on the Sun it's all based on Astro theology people have no idea what the rituals mean there's no idea what the symbolism is about and they're just totally under its mind-control that's what we'll get into that in coming weeks why priests are never in the freedom movement well then they'll never talk about the federal reserve on the gravy train too much with your 501c3 tax-exempt status aren't your father ain't nobody's father the nerve of the clergy of this country and I'm telling you that's it this show is going to get more scathing more raw more in-your-face because I'm tired of hearing all the justifications for people's nonsense and all the excuses the people making defense of these idiots it's all wrong actions justified in people's minds and nonsensical beliefs propped up and say oh it's okay that you believe in this nonsense if you understood the real mystery tradition that underlies it fine wonderful I do I get it I know what real Christianity is I know the original mystery traditions of the Christian religion but 99.99999% of the Christians in the world do not and they don't live those principles and I'll tell you openly I do understand that tradition and I live it now I can say that completely and totally in the open knowing that it's true and knowing I'm not hypocritical about that but how many people could say the same especially the so-called men of God in this garbage organized religion please the things that to have to sit through and listen and the things that people actually believe are real unbelievable you won't hear them talking about the taxation is wrong you won't hear them discussing fractional reserve banking you won't hear them talking about Ussery no doesn't the Bible say that usery is wrong sure it does you won't hear priests talking out against the Fed which by the way I'd like to say thanks to James Yeager who was a phenomenal guest on the show here last week the maker of the documentary Fiat Empire among others he lent up to this show his expertise on the Federal Reserve made one of the seminal documentaries about it but yeah you won't hear religionists and so-called men of God talking out against their owners because they know who their owners are don't you boys yeah like you're the good little lap dogs that you are you know all about it hypocrites pure hypocrites and the fact that this is where people this is what I need to teach people about morality I laugh at this constantly constantly because it's like this is the example of some of the best people that humanity has were in big trouble folks and that seems to be the case because I'm so far from perfect it's not even it's laughable but at least I have the courage to come out and say what's real and what's true and what's really going on with the sorcerers of this world the occultus of this world that own people because they've given their minds away to them but again as I've said it's more than just it's more than just mind control it's cowardice let's bring it right home members of my family apathetic yes ignorant oh-ho and that's really an understatement to say the least but you know what it really is about come on people let's let's cut through it and be real honest about it they know that they're slaves they know what the world is they know that male dominator Nazi scumbags own this place essentially physically and threaten violence against people that don't pay their bosses they know that the world is controlled by a big gigantic mafia ultimately run by a cultists they know deep down they may not know it at a conscious level but they know it at a subconscious level and they know they're slaves in this prison they get it they really get it but you know what it is they have no courage they're cowards and you know what that's the lowest form of life there is and that's what I have to partially agree with the dark occultus of this world the people who act like that and don't have any courage and don't have any will they deserve what happens to them and I said it right there there it said okay it is said and I don't care who disagrees disagree all you want there are people with will in this world that are acting as they say they're gonna act they're acting in accordance with how they think and feel and you know what that's unity consciousness and it doesn't matter whether it's dark unity consciousness we have talked about this on this show and there are people who will violently disagree with this principle the universe does not care whether you come into unison in light or in darkness it will respect unison it's one of the hardest lessons anybody ever has to learn you need to start getting over it folks the universe respects unity consciousness the dominators of this world are all on the same page the good people of the world not on the same page not even close those with good tendencies I should say they haven't really become truly good or truly awoken they may say that they want to see good done they may feel in their heart that there should be good done in the world but do they really act it therefore they're in opposition they're not in unity consciousness they're not in unison with themselves and since they're torn apart that dark force will continue to rule them and that is the perfect example is taxation how many people aren't paying taxes how many people will refuse to work a job where taxes are withheld how many people will refuse to go and do a job under an employee that's going to say I'm going to withhold your taxes and pay pay to the dominator Nazi thugs who think that they own you and who are enslaving you and believe they have the right to do it not many people well you know what I'll never pay you a dime thug never never you'll never get one dime I mean yeah you could say okay taxes are added in to things that you purchase and that may be true but you know what I will net no one will ever be given number a tax ID number I'm not a number I'm not associate attorney number I don't have your number okay you don't have my number okay because I'm out of your mind control garbage crap sewage okay you're not ascribing a number to me and telling me I must accept it and I don't accept your number okay nor am i going to accept the fact that you're going to tell me I'm gonna give you a certain amount of what I earn good luck getting it the only thing you could possibly get is a lump up a lump of dead flesh that's it that's all you can get from me you never have my compliance you'll never have my cooperation you'll never have a penny of support of anything anything that I make with my labor with the sweat of my brow ever ever get back know it know it like you know your name know it like you know your name and yeah there's anger here folks yes and it's justifiable anger truly justifiable anger not false justifications anger can be a very positive emotion and if the New Age movement which we talked about that wants a hijack everything and get people not to take any real action in the world they want to tell you you should never experience anger and it's nonsense when fit you're seeing things in the world that are completely unjust centre and are completely morally wrong angers the correct response then you got to take it a step beyond that and help people to understand what's really going on by studying it yourself to a point where you can convey it to the ignorant and anybody that thinks taxation is not robbery is not fast at the point of a gun I don't know what to tell you I don't know what to tell you you you dwell in darkness you-you-you don't understand right from wrong that's all I can tell you it there's really no other way of putting it if you don't understand that telling somebody else I'm gonna take this much and I don't care what it's for okay you can say oh it does things for people okay wonderful if it's voluntary go for it but once you introduce coercion at the threat of violence that's morally wrong the end and I don't care what you're doing it for I don't care if it's most altruistic reason on the face of the earth see what natural to understand natural law what you need to do and I've said this before you need to understand the world as if it's only you and another person imagine if there's only you and one other person in the world would you have the right to say look you're over there you live in that area I'm over here I live in that area okay and I that's sick I have an infection in my leg I can't forage for food okay but I can still throw this spear okay and if you don't come and bring me food I'm gonna hobble over or crawl over where you're at and I'm going to put this spear through your heart if you don't give me half of what you have is you have the right under natural law to do that you don't you can ask someone to give of their own free will and their own accord voluntarily what they may have but once you coerce it through the threat of violence essentially this implies the knowledge of what violence is people think that force and violence are the same thing and this is another distinction I've made continuously on this show will continue to make because it's unclear in a lot of people's minds violence is the initiation of force that you don't have the right to take so if I walk out onto the street wait for the first person to come down my block and smash their face in with a crowbar that's violence I don't have the right to take that action however if I walk out on the street and someone pulls a weapon and says give me your wallet I have every right to hit them in the face with a crowbar that's called force used when someone is under the threat of physical violence so what is the distinction between the two - anybody with a minimal amount of brain cells to rub together it's left in the world the difference between the two is the initiation of the force and whether it was allowed to be taken under natural law when someone initiates force by pulling out a weapon and saying give me your wallet they don't have the natural law right to take that and therefore they nullify their natural law right to be safe from force being used to to thwart their attack of violence the initiation of undue force the fans themself has every right to do so and this is what the dominators this is what the military this is what the police want people to believe you don't have the right to take when your rights are being violated when you're being robbed they want you to believe you have you must sit back and take it because to stop somebody from physically violating your rights or forcibly confiscating something that belongs to you you have no right to to thwart that attack with force and you know what this is another thing the New Age movement wants you to believe in - and you have every right to fort that violence let's be real clear that's what it is that's what taxation is it's violence be it said louder and clearer I can do that I have a real big mouth a real powerful voice it's violence that's what it is and if you don't think it is you're wrong the end the end I honestly really don't even care what you think about it because it is a specific thing and if you don't understand that it is that thing you're just wrong that's all I'm saying that openly and whoever gets offended by that I don't care because the truth is the truth you don't want to accept the truth you don't want to understand the truth that's on you you're going to be held accountable for how you behave in that instance and then those circumstances and quite frankly I said this before on the show I'm done with the tact I don't want to have any tact I'm through trying to get through to people by baby spoon feeding and there ain't no time for that folks I yell understand you can live in a police state I don't know what to tell you if you don't understand that you're under essentially the nation is under mind control akin to Nazi Germany I don't if you can't recognize that this point I don't know what to tell you the reason people don't come out of it isn't because they don't really understand it from an intuitive level it's because they're cowards and that's what happened in Nazi German folks the people who refused to say no were cowards that's why that happened that's why Stalinist Russia happened that's why every bit a toriel regime happens and populations get cold because their populations became cowards at some point and look that's what happens coward begins with the word cow and cows get led to the slaughter and you can here's the tagline for the show folks get as offended about it as you like get is offended about it as you like this show is about hard-core uncomfortable truths that very few people will even say publicly to any other living being let alone on a radio show that they're posting for the world to hear and you can say anything you want about me because they're saying about me I'm not perfect I don't know everything but I'll tell you one thing one thing I'm not I'm not a coward and I won't go down like a coward I for one am NOT going quietly into the darkness caller from California you're on what on earth is happening hey Mark it's not actually California it's Kevin once again Deb what's up man I don't know why that keeps coming up California I guess like you said it's the routing but that's fine yeah from Philadelphia what's up my friend well I just wanted to mention like you I've been listening to your show like that since it started tonight I keep hearing things I want to just like kind of interject along the way and one of them was you had mentioned a long time ago I forget exactly the type of word that you use to describe it by belief barb had had known it but uh you had mentioned how there is a one all whole complete total rolling state pretty much controlling the entire planet and that was like this one political party called the Nazis spelled n ot s EE F that's right those cannot see correct yes I just thought that was something that uh I felt like you were like missing not in or like saying during all of this and I'm totally in agreeance with where you're at and first of all actually I want to throw out there that my condolences for your multiple losses and even more though for the for the suffering you had to go through it at the the religious ceremonies I I personally believe that religion is kind of meant to keep the poor from killing the rich that's justice original feeling that it was always entrained in them because realistically there are other ideas out there that do not get the same value all thing it's a leak it's a leash around their neck I'd be less be honest that's what religion is it's a leash around the neck of the pets of the so-called elite and that it's right into the world of folks if we get down to the meaning of words we'll understand what words actually are saying to us subconsciously the word religion means to hold back that's what a leash does a leash holds it someone back around their neck and that's what the word religion means and uh there is this other thing that I've noticed that in a lot of films they take ideas that would be really good to get out to the world and then they make them seem really absurd by putting them in say a movie like Batman and having the Joker burn that pile of money well realistically there's a lot of thought behind that he may have acted like this wild dog but the idea of burning all that money is it serious act 2 again of aggression as far as I'm concerned against the the the federal reserve and to process that in a fashion that makes it look like it's a crazy idea is to link it back to with where I'm going with this with the the religion state just made about how it keeps from from killing the rich there was an idea thrown out in the Addams Family movie at where Morticia is talking to Uncle Fester saying we gladly feast on those who would subdue us not just pretty words but as an Addams you understand completely don't you right and there there is something to that like there is like that that whole idea of give me liberty or give me death it's kind of missing in today's society we have become this whole specifically in America no longer they like the land of the free but to do as we tell you and no longer the home of the brave but like ok it's a vision Orange now let's get obviously the terrorists right the school system is a big part of that entrainment religion is a big part of that entrainment where people eat is a big part of that entrainment vaccinations is a big part of that entrainment who knows what what long-term effects things like that have on the brain and it that's what it's all about it's about stunting someone the ìiî the most powerful thing about these funerals this week was not that people had died it was seeing the stunted state that the people in my family who are still five dwell in that's what was the most painful thing I didn't look at the dead that really truly physically dead as the ones who needed any pity or mercy it was the people who were alive in my family seeing adult people that are stunted emotionally mentally spiritually their children their 40 50 60 70 year old children that's what they have done to the people of this country television through vaccinations through the school system through the food it's unbelievable you have to stand back and marvel at it practically and and I like the point you brought up about wouldn't talk about when you brought up the word Nazi it isn't just a political party meaning the National Socialist German Workers Party it when we say the word in English Nazi na Zi which is how we write in the anagram okay it it means not see to not see to not be aware of to be spiritually blind and this is called green language we talk about this a little bit on the show we'll get into it more as the week's go on but this is called alchemical green language and no one has to plan this this doesn't have to be formally structured by anybody okay it works out that way synchro mystically and Kevin I know you know a little bit about synchro mysticism yeah you're out that way in the language because the language is like the living expression of the collective consciousness and the words that we speak work out to tell us things in certain ways so when we say the word nazi' we're saying not to C n ot s EE not C and that's not accidental not actually it's like this dark repressive evil version of namaste right it's like this inverted version of namaste as far as I can see it like that's just the the kind of allegory that I again have come up with on my own just in thinking about all this I see like uh namaste has always been about this like honoring the other person that you see in that of it like you honor yourself of that other person your spirit your true spirit like the one that's truly divine not just this Coryell form but like everything about persons freedom and about their divine right to exist on their own and not be during the worst or taken for granted even it's that's a phenomenal way of putting it Kevin um it's so simple the the golden rule is so simple and how people completely miss it is beyond me if you want to exist and be free and have the right to live your life without coercion yet you won't grant that to someone else and this is what a cop does every day when he puts that uniform on and agrees to go and take something from somebody because they refuse to pay a tribute to his master this is what the people who are going and fighting the legal wars of aggression over resources and foreign lands are doing when they put that uniform on and they want to always say the same thing and it's always the same justification I had no choice I needed to do it I needed the money I needed to pay for my family I need to work my way through the school nonsense nonsense you can't be made to do anything that you truly don't want to do somewhere deep down in your heart in your soul and your spirit that blackness has to exist somewhere in there for you to be so called compelled to do it because it no one's really compelling you you have total control their own thoughts your own emotions and your own actions at all time and anybody that's ever says otherwise is lying there lying and there are coward they're lying because if they do not don't that nobody is making your muscles contracted and hit somebody in the head nobody is making your hands squeeze the trigger you are making the choice to do that and this is what people don't want they don't want the responsibility brought firmly home where it belongs upon the individual patting Tomatoes exactly to the self if it self if the actual person doesn't confront the darkness within them they are going to be forever subject to it that's right and apparently these people love it I don't know I I just get the sense that people love this they love the state of this world they love dwelling in the ignorance that they dwell in I mean they have no desire to crawl up out of this morass of consciousness that dwells all around and they have they seen we see we have no desire to better themselves in any way at least people around me don't I don't know derekjjensen calls it derekjjensen calls it the exploiter Dominator culture right and essentially they are all examples exactly that they're in and even people that are at the bottom of this exploiter Dominator culture that that are being exploited they don't realize they don't understand that that instead of gunning for a balanced fair society and working towards that they instead just want to climb the ladder so that they can then become the oppressors of others it's so bad they want to play the same game that has them enslaved thinking that they're going to come out on top of it as the winner not understanding as you know was put forth in the Divine Comedy by Dante Satan it himself is encased in ice at the center of hell that that even the the the the Dominator at the top of the food chain so to speak is also tormented and is also kept back from what he wants the most you know he loves the heat he puts everybody in that yet he's in encased in a block of ice it's the big joke on everybody even at the top you're still enslaved because the the force is what is enslaving people it is not anything that is there is no highest level of it in the physical domain the highest level of it in the physical domain is still enslaved by the force of fear and negativity and they don't understand that yet they want to aspire to be like Big Daddy you know they want to aspire to be like the father who beats the mother because they look at that as the stronger position of the two it's it's so loathsome it's so lonesome in it it only happens with people that really refuse to look at themselves refuse to understand anything about the self refuse to delve down into the matters of spirit you know that they don't want to understand anything about anything higher than the lowly physical domain because that's their God they worship Mammon they worship the only god of this world and that's that dollar bill that's it I've said it many times then that name is extremely important when you study that all the mythological cultures of the ancient world bill Bell Bell the bull it's that's that's the dark evil God of the world it's all based upon that name and they name the dollar bill after it and you know they name big secret societies after like the Bilderberg Group you know the highest satanic holiday is called belt Beltane it goes on and on we'll get into like some of the symbolism when we talk about the occult in coming weeks in a few weeks time I'll be breaking out a lot of information about occult traditions and we'll be getting into symbolism and analyzing symbolism and meticulous detail because to understand some of the events of the world we have to understand symbolism as well and green language is a big part of that so I thank you for bringing that up to the listeners attention the whole green language of Nazi and azi and Nazi n ot s EE not to Nazi keV it's always a pleasure to talk to you man and keep up the great work because I somebody needs to say this to people and Gautier said boldness has genius power and magic in it so don't let the don't let those guys get you down really like keep up what you're doing you're an agent and FF of evolution keep up the good work please have thank you so much man I appreciate it how do you have a good night man you too all right so it is difficult and it is maddening sometimes and you know I can tend to get a little bit emotional and let that out you know I kind of veiled I wasn't going to get so crazy that I'd be sounding like Alex Jones on this show not that I don't like Alex I think what he's doing is important too but you know sometimes you need to vent color from Southeast Pennsylvania you are on what on earth is happening welcome what do you have for us hi mark its Kristen New Jersey how are you Chris how you doing man good hearing from good mark I'm mark listen um one thing that struck me um I know I keep remember you hearing hearing you say the truth is always simple and I've come to that understanding and that's how I try to figure things out now I keep things simple the book you referenced a while back called the end of all evil by Jeremy Locke yes looks about as simple as it gets and you can't get it in Amazon you can't buy it there I thought that very cheesy old book I've ever tried to get at Amazon and couldn't find on Amazon well there were a lot of Chris Chris I'll tell you what listen what I'll do is and I usually don't do this on the show while make an exception in this case because I think this book is so critical okay I do have a PDF electronic copy of the book okay I'll post that on the site and if the author has a problem with that he can email me and I'll take it down from my site but all being that you mentioned that this week and how many concepts connected with the topics of the show for this week and in past weeks that book deals with I'll post an electronic copy that people can read on their computer or on their you know mobile device like an iPad or a Kindle or they could print so I'll post that on the site for this podcast that will be podcast number 28 and I'll put that in as a related document but I'll continue what you're going to say about the book but you can look for that on my site I think I think for people to understand I think I think most your audience hopefully understands or starting to understand the way you find the truth did you keep it simple they want to make it confusing and going getting you going down these dead ends keep it simple I think we boiled down the rest of my life to this I'm going to do the right thing for the right reason that's simple and that's how that that's how I'm gonna live the rest of my life and right that's how I see it there's no need to make it all complicated and go searching for secret societies all that stuff because the secret the real secret that I found that over the last year and a half is that there's real power in believing so what we give our energy to we give life to in a sense so it's very important that we be careful as to what we partaken like you say you know going to church my prime mom goes to church religiously all the time and I asked her about a month ago I said you know the Catholic Church is sitting on the sidelines while all this immorality takes place and the reasons for it you might if you ask the priest is all these are 501 C tax exemption tax status and we'll have to pay taxes I said to my mom I said well you know this is a woman who's gone to church for as long as either a lot I said where well is that what Jesus would say would Jesus say to whoever budget PI level was when we were good at we're going to do it your way because we don't want to lose our tax status and rate that moment it's crystal clear that it's all fraud and yet my mom doesn't really recognize that I think she comes to that you know the UM the thinking for little old me there's nothing I could do for about it well we have to stop that because if a whole bunch of us you know make the decision to make a stand will change the world but if none of us do what we're going to do exactly what happened in Germany we're going to sit there and watch the atrocities happen and you know once one atrocity happens it makes a mess or more likely because you know one county gets another coward before you know it you manatee is suffering and or you know unbelievable scale understanding the difference between right and wrong and then living that way it is about understanding the difference between right and wrong what we have the moral right to do what we do not have the moral right to do under natural law and then living in harmony with those principles and that is what the book the end of all evil discusses in a very simple way in a way that puts it in a way that most people can understand from the perspective of very simple language that's what struck me as so valuable about that book and why I quoted it on the air and why I think so many people would benefit from reading that book now that being said I have attempted to lend that book to some family members and friends and you just be surprised that people are so scatterbrained and their attention span is so destroyed anymore that people literally can't sit down and read a 90 page book 90 pages of large-type people have a hard time sitting down even for a few hours quieting their minds and taking in a little bit of information you can read a 90 page book and print it in fairly large type in a few hours even if you're a slow reader I'm not the world's fastest reader again I've said that before on the show I'm a voracious reader but I'm not nearly as fast of a reader as I would like to be I have to power through books and use will to get through them you know I retain what I read but I don't read very quickly I'd like to improve that but even for a slow reader you can read a 90 page book in a few hours caller from Southwest Ohio you are on what on earth is happening oh yeah as we move caller are you there forward in this consciousness hello caller from Southwest Ohio having some problems are you there okay looks like our connection to talk shoe is still out so it doesn't look like we're going to be able to get any more callers I apologize for the continued technical difficulties I've had some problems over the last couple of weeks with talk show but well moving forward going back to taxation people want to make claims that because we live in a society okay because we live in a technological world because we live amongst millions of people that it would somehow become justified for a group of people to say we have the right morally to forcibly forcibly take that which we deem necessary to provide certain services and certain amount of equity to the masses of people and what I would say how I would answer that is one being born into a certain geographical region you can believe this all you want but again it will never make it true did not did not grant to any one in existence the moral right to rule over me it did not say I am your subject it did not give them the right to make me subject to them no one simply because a government is in existence is subject to that government this is what a government wants people to believe they want you to believe that you are under their jurisdiction and what that basically means however it may word is that you are bound to their laws even though if you're born into one geographic region there are certain laws if you were born into another geographic region there are completely different laws imagine that one place certain things are acceptable and deemed morally okay to do and in another place if you did those same things you might be jailed or even killed jurisdiction comes from Latin the first part of it comes from the word youths jus it means law or justice just Juris the second part comes from dictator Terry which means to speak jurisdiction to speak the law the voice of the law the word of the law of man's law individuals think that beings born into certain geographic regions become subjected to the laws laid down by the Dominator men of that region and therefore they're bound to obey laws that say you have to pay this tax this tax this tax this tax you need to pay this amount of what you make and if there are people who believe that if you don't do that your freedom may be taken away from you or worse that you may be physically harmed imagine that people go to work every day put on a uniform a costume and actually enforce this nonsense just because someone else told them it was okay to do and they do it because they don't know the difference between right or wrong as an adult and you know what that's one of the most sad things it's one of the saddest things that you could possibly know consciously is that there are adult beings walking around that are completely unintuitive track when I was in the religious ridiculousness that went on at the funerals that I attended there was this notion brought up of resurrection and to my amazement the the utterly ridiculous things that they are talking about regarding resurrection how they have people fooled and hoodwinked about what resurrection is almost made me sick because they're taking a core component of the mystery traditions of the truth of the world of the truth of what resurrection really is and then they're twisting it into a story of Astro theology about the Sun rising to redeem the world each day it's about the Sun coming up over the horizon resurrecting from his dark place you know at night beneath the horizon the Horus zone the zone of the Sun Falcon Horus and then rising up above to redeem the world to bring it new life we'll get into all of that when we talk about astra theology Astro mythology it's all it is what they've convinced people in this particular religion and of course on referring Christianity is that resurrection takes place in an afterlife that you die from this physical world and go into another world where then you are resurrected to eternal life and they actually have people believing this sewage and what it does psychologically is it gets people to be completely inactive it gets them to ignore the evil of this world it gets them to say I'm not worried about what happens here because when I'm dead I'm going to be resurrected and then I'm going to live eternally in a wonderful happy with God well let me tell you something folks the early Christian Church pulled out everything in the original writings of the Bible about reincarnation and in the official Canon that was scripted and approved by Constantine during the Council of Nicaea in the 4th century AD they removed all references to reincarnation and in doing so they got people they got most people to believe that life is about one and out that you're it's one and done that you have one life you live it and then based on what you do here you either go to heaven or hell and then if you're relatively good and you didn't harm people etc etc you go to this place called heaven in which you receive the gift of eternal life I know this is jumping into religion a little bit which we're going to talk about in a few weeks but I want to just bring up this point about Resurrection and of course this is connected deeply to Freemasonry it's connected deeply to Rosicrucianism it's connected deeply to the mystery traditions of Egypt resurrection isn't something that happens in an afterlife folks you can believe that all you want but that's not where resurrection happens resurrection happens in this life resurrection happens in this life or it doesn't happen and the people who think that they're going someplace and that they're going to be in this paradise after one lifetime or something of that nature whatever the ridiculous nonsense they're teaching people in this Babylonian inspired Trinity really Nimrod Semiramis Thomas Osiris Isis Horus God the Father God the Son God the Holy Spirit Brahma Shiva Shakti doesn't make a difference what the names are it's all the same it's all astra theology they want people to believe that essentially what you do here doesn't bear so much upon the consequences of what truly happens to you because they want you to believe that it's essentially weighing whether you live a somewhat decent life and you're going to go to heaven or whether you were a bad person you're going to go to hell but what's left out of the equation is the conception that perhaps you're going to come back here reincarnation that's taken off the books in this religion and it's done for a reason it's done to make people look to an afterlife that's eternal rather than to look and truly weigh their actions in this life whether they were truly moral whether they were truly responsible whether they truly raised themselves to adulthood and to enlightenment see that's ultimately what they're trying to do in people's minds to get them to think that it's one life and out because if people knew that until they really did something to change this horrid reality that they live in that they feel so powerless to change that's another thing that I heard endlessly throughout this last week what can you do woe is us we're so powerless we can't change anything how horrible just like yeah the Nazis couldn't refuse what they were doing we can't refuse what we're doing our soldiers and police can't refuse their orders his urges programmed machine robots right well they may act like it but that's not truly what they are I got to go along because my superiors told me so powerless the feeling of powerlessness this was reiterated over and over and over and over of course cancer was the culprit and I heard nothing you could do about it no cure for it spouting this ignorant and these are people who never even heard the name Royal Raymond rife and you know it's almost pointless to even try to tell them because I mean they'll try to tell you that you don't know what you're talking about cancer cured a hundred years ago we would know about that if that were true oh we would you and yet not one of them heard the name royal rife I wonder how many people even listening tonight have no look him up royal Raymond rife and then tell me about why we're putting people through the barbary of chemotherapy today because it's a big industry that's why and people don't want to believe people are that evil but they are now we would know about it yeah just like you know about taxation being morally right you'd know all about it it's honestly dealing with children ah quite honestly I'm tired of it I'm tired I want to tag out from this garbage I wonder how many people feel the same way and if talk should had it hadn't screwed up again maybe I'd be able to take some calls on that [Music] taking reincarnation out of the doctrines of the church lets people not think they don't have to deal with the thought maybe I'm not going anywhere when I die see because this is much closer to the truth folks I'll let you in on a little piece of deep mystical awareness you know who is much much closer to the truth somebody named Jim Morrison when he said no one here gets out alive most people aren't going anywhere when they die because they didn't get the lesson that this reality had to teach them and they're going to be back again and again again and again and again and again and again until their ego is finally smashed to little bits and they acknowledge right from wrong that they acknowledge there is such a thing they acknowledge natural law they acknowledge their part in either keeping natural law or shredding it to bits attempting to shredding it to bits I should say because you're always bound by it at all times and places and you're not getting out of this prison until you understand how to live in harmony with it the end I mean you could take the show take that sentence shut it off and that's all you really need to understand and this is what I would I would ask them me in all honesty I'll try to throw a number out there just just for giggles I think less than 1000 people on the surface of the earth really understand natural law really understand the difference between right or wrong really are enlightened and really are living those principles I would say less than a thousand people on the entire earth out of seven billion that's the number where that's where I think it's at now maybe I'm way pessimistic but if I had to give a number that's where I think we're at because I mean you know in a room of hundreds of people I see people that have zero understanding and again I talked about this before I have a concept that I call this negative knowledge not only our people are unaware of anything that contains any amount of wisdom not only are they completely unaware of even one concept regarding the true nature of what's taking place in the world and the true nature of the self they have completely accepted completely erroneous beliefs surrounding these notions therefore to get back to knowing nothing they would have to do work to get back just to the point where okay I've let go of all the things that I completely believe that are completely bogus ideologies and now I know nothing would be a lifetime of work for them negative knowledge that's how sad this is what this is what the Dominator occultus of this world have accomplished and I have to marvel at it I tell people all the time the only thing I could do practically is shaped these peoples hand and say well done what a phenomenal job I mean it's unbelievable to me it's almost inconceivable that I literally want to stand back and marvel at it and say absolutely phenomenal job I mean that's that's seemingly where we're at it's amazing it's truly amazing to go back to taxation for a little bit if you want to really get a good idea of how this works in natural law and laughs a little bit in doing so MIT perhaps and you know still learn something I would highly suggest checking out some of the works of one of the speakers the upcoming speakers of the free your mind conference mr. Larkin Rose I would particularly suggest that people go up to YouTube or Google Video and type lark and roses name in its lar que en Larkin lar que en Rose ro se because I believe that this is one of the people that truly does get it to a very deep level and that is a big rarity particularly watch Larkins video called I'm allowed to rob you I'm allowed to rob you and I think that will go a long way toward helping people to understand in very simple terms what taxation really is at a fundamental core level of right and wrong what it means at a core level regarding morality because in this video he describes how people magically gave themselves the right to confiscate what other people have and they call it taxation but in essence it is nothing but theft it's robbery at the threat of violence and how people actually believe this and get mad when you say that's what it is because they believe that you're born under jurisdiction that someone else can claim you're their subject and can force you through violence to behave in the ways that they want you to behave even though you may not be harming anyone else imagine I'm allowed to take violent action against you even though you've committed no harm to another living being because the state told me I'm allowed to robot zombie unthinking Nazi thugs scum actually believe this crap they actually believe this this is their religion because they've been brainwashed to such an extent it isn't even just that they want to act like that folks let's let's call it what it really is these thugs want to act like that that's why the Nazis did what they did that's why the the Gestapo did this that's why the Stasi did this that's why the secret police of Russia and and every other regime you know that's why the Communists in China you know of today of this thug country talk about Nazis the regime of North Korea of today and every other you know the Roman legions of the ancient past the priest class of dark occult orders doesn't make a difference who we're talking about people who follow hierarchy they want to act like a psychopath they want to be they are psychopathic to a certain extent and they are just following their true often genetic psychopathic overlords just following their orders like good little dogs follow orders and that's all they are they're pets you want to know what people who follow orders are they're called pets trained to follow orders that's what you are a pet I mean imagine that's not even a man that's not a man that's not a woman I mean imagine this I mean you even need to be told you don't even know what self-respect is you follow orders that other people give to you and you don't even question whether they're right or wrong and you don't think you're a pet that you're not a kept animal there's no self-respect and you actually think you're some kind of a man it's not what a man is that's what an animal is that's how animals behave kept animals not even wild animals wild animals you try to give them an order they're gonna eat you it's not even a wild animal it's a domesticated animal imagine that this is what these people actually and that's what it altum Utley comes down to their level of self respect is so low is so denigrated that they actually look at themselves as capped animals and are okay with that they're okay with that could you imagine being okay with being a kept animal it's unbelievable it's truly unbelievable but that is what the dominators are the so-called dominators the people who are really just taking the orders of the priests class of the dominators the sorcerers of the world if you will and are who are totally under their mind-control and control of their symbols that's what they are domesticated animals well just so it's stated on the record I'm not a domesticated animal I'm not a wild animal I'm a human being a being a sovereign being undergoing the experience of being human but being is my pure state and no one no one is ever going to tell me that I owe them tribute and that I will be punished if I don't pay them tribute so Hey owners of the Fed hear what I'm saying you don't own me you can think you do all you want you don't own me people who think that you're going to be justified in coming and trying to take my freedom because I won't pay a tribute to somebody who's some psychopath who thinks he's God you don't own me and this is the kind of courage that it's going to take for people to stand up and say no I will not act as a slave you do not own me you will not take what I earn I will do what I want with what I earn voluntarily and I'll be my brother's keeper with it voluntarily if I so choose and if I don't choose then I won't do that and we'll all suffer the consequences as a result but to tell someone they're going to do their you're going to make them do something that they don't volunteer want to be able to do what that they don't voluntarily want to do under their own accord when they still have actually not physically harmed someone else you don't have the natural law right to do that you can think you do all you want you could scribble down whatever damn law you want giving yourself the right to do that it'll never met let you have that right in nature so check out the works of Larkin rose he will be speaking at the free your mind conference [Music] I believe his website is larkin rose.com his videos are up there you could see them on YouTube or Google video as well and I think Larkin is enlightened I think he gets what natural law is he understands the difference between the so-called law of man and what morality is which is true natural law and sadly so few people in the world do understand that distinction and that's why hundreds of thousands of people put on a uniform every day and go do the bidding of the dominators of the world as they're little pets their little lap dog pets and I'll say to them you have no self-respect you don't know what the self is at all not even a little bit you're operating on pure left brain machine like consciousness that is completely divorced from truth and you don't know what right or wrong is because if you did you would take that uniform off and refuse to do that job because you would understand you can never force compliance with natural law you can only educate people about it and you're not doing that work you're choosing to act in fear and then try to control people through physical violence and you'll never change anything like that except for the worse so all cops to think oh it's just some cops it's just bad eh it's a bad Apple here and there and it's just a matter of honoring my oath honoring your oath to act as a physical violent Dominator because you think that's going to make the world better you know you understand nothing little boy zero is what you understand zero because you don't understand natural law you don't really know the difference between right or wrong and you think you're going to put a fire out by pouring gasoline on it you think you're going to add the same polarity to a certain dynamic and you're going to get the opposite polarity you're going to add control to something which is based in fear and you're going to get freedom sure you are good luck with that when you're done running around in that maze in that little hamster wheel like the pet that you are let me know next week we'll talk about how the mass media is controlled and how if you listen to that swill you're never going to get any truth about what's really happening in this world we'll look at how the media is bought and paid for wholly owned little lap dogs just like the other aspects of the dominator freak control system and in all honesty there's some of the worst and lowest forms of life because they're the ones who are lying to you for a paycheck you know in many ways yeah it's bad that these roided-up eight-inch thick eyebrow Ridge no neck control freaks think that they own other people when they ever ever read a book and don't know the first thing about self but that they want to think that they're going to control somebody you know it's in a lot of ways it's even worse when the little petty pseudo-intellectual puts on a suit and tie and stands there like the talking head and he's going to lie for a nice little paycheck I'll tell people whatever swill my owners want them to hear I don't know what form of life is worse I'm out of here for this week's week folks sorry if it was a little bit depressing and on edge but like I said the gloves are off I'm mark passio and this is what on earth is happening my websites what on earth is happening calm I'll see you here next week good night you you

What On Earth Is Happening Show #029

Topics: *Mind Control Methodologies, Control Of Mass Media, Propaganda, Ability To Discern Truth From Falsehood, Alchemy, The Great Work*

[Music] good evening ladies and gentlemen and welcome one and all you're listening - what on earth is happening right here on the revolution Broadcasting Network I'm your host mark passio my website is what on earth is happening dot-com the network's website is revolution broadcasting com today is Tuesday October 12 2010 and tonight we're going to be continuing analyzing the various and multi-faceted methodologies of mind control right here on what on earth is happening this evening before we get into our topic of discussion for this evening which is going to be the control of the mainstream media the control of mass media outlets and just how little real and true information people get to hear and see and read on a daily basis in the controlled paradigm in which we live so that's going to be coming up in just a few minutes on the show this evening I just want to announce quickly that it looks like revolution broadcasting's feed is down for this evening it appears that there was a server issue so they'll be taken care of very soon but for now for tonight the show is live on my site only I have a couple of event announcements that I want to read for events coming up in the Philly area I'd like to thank everybody that was involved with hosting the mutual UFO network conference that happened in Bucks County Pennsylvania this past weekend went very successfully great speakers thanks to all of the people involved for hosting it and for putting that conference on so2 event announcements coming up in the Philadelphia area the first is the third Monday of every month free documentary screening and discussion evenings this is hosted by truth freedom prosperity a great activist group in this area the next one that they have coming up is Monday October 18th 7 o'clock p.m. at the ethical society building that's at 1906 South Rittenhouse Square in Philadelphia they'll be screening the documentary called for liberty here's the description advocating a philosophy of sound money a non-interventionist foreign policy script constitutionalism and individual liberty but dr. ron paul inspired a unique grassroots movement unmatched in American history the repercussions of which continue to reverberate today into the future of the American psyche for liberty how the Ron Paul revolution watered the withered tree of Liberty follows this historic campaign from the perspective of grassroots activists and showcases the unique and often bizarre yet groundbreaking projects they undertook as they brushed aside traditional campaign methodology so it's going to be about how the Ron Paul revolution basically went out in the campaign of 2008 and tried to educate the American public on this philosophy this is Monday October 18th 7:00 p.m. at the ethical Society building 1906 south Rittenhouse Square for Liberty for more information on this group's events please visit truth freedom prosperity dot org that's truth freedom prosperity dot o-r-g and the final event announcement I have is the conference that I am co-hosting coming up in Philadelphia next year it's called free your mind a conference on consciousness mind control and the occult for your mind is a unique two-day conference scheduled for April 9th and 10th 2011 in Philadelphia PA featuring multiple speakers and diverse educational materials for the purpose of raising public awareness of the critically important topics of mass mind control techniques the covert and subversive influences upon our consciousness and behavior trauma based abuse and ritualized abuse and the practical mental and emotional healing methodologies available for those who are affected by these devices the date is Saturday April 9th and Sunday April 10th 2011 10 a.m. to 8 p.m. both days with the doors opening at 9 a.m. the location is Ruby Hall our UBA UBA hall at 4:14 Green Street that's for one four Green Street in Philadelphia the admission price is set very affordably at only $20 per day the confirmed speakers Erin McCallum Alfred Webber Andrew basiago farah your dozous Jay Parker John Nicholson Larkin Rose Laura Magdalene Eisenhower myself mark passio Mel fàbregas Michael Kelly Suzanne Taylor and just added to the bill I didn't even get a chance to put it up on the website yet he was just added and confirmed this weekend mr. Richard Dolan who is going to be giving a unique presentation on the history of mind control and its methodologies really looking forward to that as Richard Dolan is a very distinguished and eloquent speaker so it's an honor to have him join the roster of speakers for the free your mind conference coming up in Philadelphia Saturday April 9th and Sunday April 10th 2011 for more information on the great conference please visit the website at WWE your mind conference calm those are the event announcements for this evening ladies and gentlemen so let me give the call-in number for the show as always feel free to call in at any time please be patient when you call in I know that I could take a little while to get to callers sometimes but I will get to your call I like taking calls I like hearing what the listening audience has to say so please be patient when you call in the call-in number seven two four four four four seven four four four once again the call-in number seven two four triple four seven triple four when you call in you have to put the call ID number for what on earth is happening in so the call ID number for this show is eight three five one five once again the call ID number is eight three five one five no taboo topics ever on this show call in and discuss what you'd like to talk about tonight the main topic of discussion is the mainstream media we're going to be talking about this as a methodology of keeping people's minds in a certain state of consciousness that's what the name of this game is folks if you don't have all of the information that is necessary to make properly informed decisions who knows what people may believe and act upon and indeed that is exactly what is going on and that is what they are doing they are acting in completely uninformed ways because they are not getting the full picture they are not getting the whole story they are getting a limited and slanted view the mainstream media of what is really taking place in their world and this could be one of the most powerful techniques in all of the dominators Arsenal and the reason that is is because it's a constant application of propaganda it is a continual bombardment to the to the senses whether it be read heard or seen whether it be in the nightly news or in certain movies or in radio broadcasts or in the newspapers or magazines that are read and you can go on and on and on books that are published what I hope to do with the show tonight is to explain to people that once again a level of discernment is required in understanding who it is that is giving you accurate information this connects with the main topic of this entire show and that is the ability to tell truth from falsehood again what the show is ultimately about is the recognition of causal factors the recognition of the causes for the effects that we observe in the manifested reality in which we live if we don't understand those root cause of factors we are going to be powerless in understanding what actually creates that which we must experience in the physical reality in which we live therefore the number one thing that we should be focusing our attention on is to develop our ability to tell truth from falsehood if we don't have this ability we are wandering blindly we are creating blindly we are wandering in a desert of completely untrue ideologies as opposed to understanding the philosophical groundwork upon which we are based as an integral part of the whole physical universe that we live in this is one of the laws that underlie creation people have called it many different things the law of cause and effect or the principle of cause and effect people have called this the law of attraction people have referred to this as natural law and indeed it is all of those things and this is something you'll never hear discussed in the mainstream media because these paid propagandists will never tell you that you're the creator of your reality they'll constantly try to reinforce your personal weakness and your lack of power and your subservience to leaders and authorities and people who know better than you experts they'll constantly try to tell you that you don't have the tools to decipher the truth from falsehood you don't have the tools of discernment to understand what is actually taking place versus what is not they'll try to tell you you're completely powerless to know what actually is going on around you and they'll never tell you how important it is to recognize that which is taking place within you so I want to get into a little bit about the more esoteric aspects of this first why they want to control information information is what we are ultimately all made of what you eat makes up who you are that food is information it is decoded by the biological computer that is the body broken down into its constituent elements processed and then it goes into making you who you are at as you are what you eat is true we'll be talking about food and medicine next week we'll be beginning that discussion that will probably be a couple of week long topic a couple of shows at least so in addition to what you take in physically through your body through eating and drinking and breathing the air around you what you take into your eyes and ears is also integral critically important to that which comprises you that which you are made of when we take in information through the senses we are integrating that into our personality whether we understand that that's taking place or not that's simply how it works the brain is like a biological computer if junk goes into it junk comes out of it it gets output on the screen and that that output screen is our physical reality and it is generated it is manifested by that which we to ourselves so it's we need to be careful to exercise discernment about that which we take into ourselves and we need to make a decision as to its veracity its truthfulness how many people actually do that and actively engage their brain to weigh information and determine its truthfulness how many people are eclectic enough meaning they go to enough varied sources of information termen what is real and what is not how many people even think logically enough to determine whether what they're being told is true so that's another thing that will set this show apart I'm not asking people to believe what I say I tell people belief is one of the things that is destroying this world and the people in it the information I talk about on this show is verifiable you can verify this in your own experience and and most importantly in your own experience that's another thing people will tell you is not a valid method for determining truth from falsehood your own experience and I'm here to tell you that's probably the most important way of doing it but secondary to that it's being eclectic enough about the information sources that you go to for what's going on to learn about what's going on and very very few people have developed that ability and one of the main reasons is because they would prefer to sit back and active and passively rather than actively weigh information they would rather passively accept information it's part of the ultimate reason that things are progressing the way that they are in our society most people have been convinced that what is taking place around them is not their personal responsibility and that's another thing that may set this show apart from some others I'm not the one that's going to blow smoke up your rear end and try to tell you that you're not responsible for what's taking place that it's some elite that does this to us and that's not the case that is not the case we are doing this to ourselves because we're not developing the spiritual strength necessary to overcome the lies of these dominators in this dominator culture we're not developing the discernment to be able to weigh information in the balance of our own ability to tell truth from falsehood we're not developing these skills because we're believing the lies that were repeatedly told through the media and through other people around us that we are secondary and inferior to leaders or authority figures and they'll tell us what's going on we should simply believe that and 95% of people in the world or better actually fall into that category they actually do accept that nonsense then it's not up to them to determine what's really going on it's not up to them to determine the truthfulness or the morality of a situation or event or circumstance it's up to them to simply listen to what's being told to them by someone who knows better they're an expert they're an authority figure they know better than me and once we give up that ability that we all inherently possess and it's simply a matter of working with it it's like a muscle if it isn't work with it atrophies we have it everyone has it but it needs to be exercised it needs to be worked with and then it becomes sharper it become stronger less and less manipulation can be pulled on a person who develops this capability and that's this is again the number one thing that I stress on this show the ability to tell truth from falsehood is ultimately what consciousness is it is ultimately what is creating the good experiences that we see around us take place or what is experiencing all the negative consequences of not using that capability not exercising you not developing it not growing so when we look at the mainstream media how many places in this in these sources of information do you even see this concept of truth from falsehood how many places do you even see the word consciousness for example they don't want people even looking into what consciousness is they'll be very careful never to even use that word just like in religion you go to a church a mosque a synagogue how many are using the word consciousness it's exceedingly rare if it's used at all and you'll never hear this used in the mainstream media because they want to dissuade you from even looking into a topic like that they want a passive acceptor of information and again we've talked about some of the more esoteric aspects of this that you'll see the color blue used in news broadcasts this is the color that will entrain the mind into a passive state if it is used frequently enough and and omnipresent Li if that's the color that is the most predominant color in someone's field of vision blue speaks to the left brain I'm sorry to the right brain hemisphere it engages the right brain hemisphere the right brain hemisphere is about acceptance passive simply observing not getting active or involved it is the feminine aspect the receiver aspect it is the receptive qualities of the individual this is why these colors will be used in news broadcasts don't take my word for it just verify in your own experience turn on the eleven o'clock news this evening in your area guaranteed blue is the dominant color guaranteed it's all right there it's all been there people just aren't conscious enough to see it they want you to feel powerless that's the next component in this they want you to think you don't have a say in what's going on they want you to think that there are always others who know better than yourself that you need to simply listen to and accept and I don't tell you you need to accept what I say on this show I say if if you don't want to accept this turn it off and go watch something else or listen to something else I'm trying to help people understand what's going on because I have verified this information in my own experience but no one is obliged to listen no one is obliged to go any further act upon this or do anything with it and that's that's the role of information see if information is enacted upon it's ultimately useless let's see you're in a better position to get people to act upon information that you're telling them if you do a couple of things these are the techniques of the mainstream media you want to put them in a passive state then you want to repeat what you're saying over and over and over and over ad infinitum endlessly that's another technique of mind control repetition you hear something enough times sooner or later you're likely to believe it this is what Adolf Hitler said he said make the lie big keep saying it and eventually they will believe it because he well understood the techniques of propaganda like his propaganda minister Goebbels did Gogol said make the lie big you know the bigger the lie the more it will be believed people are more likely to believe the biggest lies about the deepest things the most cut the most important and critical topics like the nature of how we create our reality or the lie that we don't the people will believe lies about that even more readily than about some simple everyday things that are going on around them because they want that removal of responsibility ultimately it's about people not wanting to be responsible for their own actions hey if they can say I'm not responsible for this somebody else told me to do it I was just following orders like in the Third Reich they're more likely to do that they want the removal of personal responsibility they want to believe oh it's not my information to weigh and a huge amount of information and decide out of it what is true because I've compared multiple sources and I've compared it against my own experience and I've studied and researched and gone through trouble and take in time of my life to weigh this information and decide whether it is accurate or not accurate no because that takes responsibility that takes time which that we talked about on the show is a spiritual currency it is a way that we pay for what we ultimately get in life what we do with our time what we do with our attention and this has to do with what we pay attention to pay attention right there in the expression it's a currency you pay attention will you pay for things that means you get something back in return for your payment and what you're getting back in return is what you ultimately think like what you ultimately feel like and what you ultimately act like and that's what's creating your reality because that's the components of your consciousness the expressions of your consciousness is more accurate so the media is one of the most important arms of the dominator agenda because ultimately it is what is shaping the thoughts emotions and actions of people it is behavioral sculpting it is social engineering what this form of propaganda is the controlled media and it doesn't matter what source you go to in the controlled paradigm it's all controlled opposition doesn't matter whether you turn on CNN whether you read Time magazine whether you read Newsweek or The Washington Post's or whether you watch Fox News or whether you watch ABC NBC CBS or the New York Times or The Wall Street Journal doesn't make a difference they're all controlled sources of information they're all controlled sources and the reason that they're so tightly controlled in the modern world is because they're largely owned by the same people what they want to do is disempower get you not to look at yourself of people in general as the creators of what happens in this world it is not a small group of people it is the masses of people that think the way that they do and accept things the way that they are that is continuing to let this creation go along unhindered as it is without any real positive change or empowerment of the people and the universe is not going to step in and correct this situation we need to step in and correct it do our will through our intelligence and through our care the universe is going to let us have what we create whether it be for our benefit or for our harm it doesn't say no just how it works and people need to get out of their head and simply accept that this is how natural law works it's all about ego people don't want to accept certain ways of thinking feeling and acting will get you certain results they want to think it's just random events happening to them and I'd like to briefly bring up before we go deeper into the discussion of the control of the median and what that what companies actually own what we are largely getting to see here and read I didn't think I was going to bring this up but I think it's appropriate talking about people not wanting to admit that things are worse than they would even believe and not wanting to admit that they're playing a role in creating that because of the forces that they're actually working with and putting out there and expressing and then bad things happen to them and they wonder why they stand around wondering why but they can't go down to the deepest causal factors of it and this may offend some people what I'm about to talk about and here's the tagline for the show get as offended as you like I'm not here to make friends people in case you didn't get that yet in case you haven't understood that after 28 weeks is the twenty ninth week of the show in case you didn't figure out that I'm not here to make friends with people let me explain this isn't exactly popular speech this isn't exactly what people want to hear in case you couldn't figure that out on your own because it lays responsibility firmly in your lap as opposed to pulling the finger in other people's lap and I'm not someone who throws stones I have changed my life in my actions and my views and my thoughts my emotions and my actions my behavior I am a person who has done back so I can say this what would not without being a hypocrite about and I understand that the great work is to explain this information to people that's it that's all it is the great work is to go into the world and explain the truth to people about how they're creating their reality because that's the only thing that's ever going to get people to become conscious co-creators of their reality they're doing it unconsciously and they're saying my god why am i continuing to get this result because you're unconscious of the forces you work with and you're unconscious of how natural law works that's why you're continuing to get the same bad results you're continuing to get and until you change yourself until you change yourself and you stop working with the forces that you're working with and you start working with higher forces in consciousness you're going to continue to get the same results the end the end that's just how it works get over it so one I'm not here to make friends with people - this isn't a popularity contest I'm not in competition with anybody I don't care who listens or doesn't listen I'm going to continue to speak the truth because that's the force I serve I don't serve people I've said that many times on this show I am NOT your servant I am truths servant the end that's it so don't put me up on a pedestal as a guru and don't send on your bound servant either because neither one of those scenarios is the case I serve the truth period the end so let's look at an instance where people bad things are happening to them and yet they still want to remain a tenth pitcher in the journey toward true enlightenment they want to think that they can continue to do the things that they're doing against natural law principles and they want to think they can continue to allow the shirking of personal responsibility in the world and still have things that are good and pleasant and official and friend prosperous and it doesn't work that way it doesn't work that way and this goes to the control or agencies and again we talked about this tons and tons of times I'm going to make a brief interlude here it's connected with the media because it's an event that is happening and is being heard about in the media and I'm referring to the abduction by the Child Protective Services alleged protective services of Jonathan Irish's son newborn child Jonathan Irish is an oath keeper one of the oat keepers of the group oat keepers org somebody who has works in the controller agencies the controller institutions and has taken a note that he's not going to violate the US Constitution because he swore an oath to protect it well why do I say that this is a 10 picture philosophy or ideology I should say well it's because it doesn't go far enough see what I mean by 1/10 picture is in the journey up the great mountain to the consciousness of the gods symbolically up this mountain the mountain is a gigantic thing that needs to be overcome it's all of the ways that we formerly thought it's all of the ways we formerly felt and formerly acted and in that journey most people say wow look at how tall that sucker is I'm not going up there I'm comfortable right here I have food down here I've a place to rest down here why bother I'm not even going to start that journey and that's where most people are at and the occultists of this world that owned this place for all intents and purposes because we've let them own it we've given all of our personal responsibility and power over them and they are ou cultists dark Oh cultists they call those people the dead the dead and this many times on the show will continue to mention it and in coming weeks we will be getting into the occult deeply into different occult philosophies and ideologies but in this journey most people never begin and that's why the occultists call them the dead they also call them the unbe gun meaning the non initiated those who have not even started the unbegotten then there's another class of people who say they know they know they think to themselves they've taken in a little bit of information and that could be a dangerous thing and they say I'm going to start this journey I see the mountain I'm aware that it's there and I'm aware that I shouldn't stay down here I want a better perspective I want a higher view I want to attain higher consciousness then when they start making that journey and they see how difficult it really is and they see how perilous it can become and they see how frightful the view can be because the view from up there when you turn around and look back on the valley below and see the dead isn't a pleasant one it's a brutal one so what they say is you know what I've made it this far I don't want to necessarily turn around and go back down with the dead but I'm not going any further this is far enough and they take out their tent their little tent out of their backpack going up the mountain of enlightenment they set it off they set up camp about a third of the way up the mountain they say this far and no further this far and no further and they think erroneously that that's all they need to do and that they're going to have happiness and peace and prosperity and freedom as a result of their partial journey well good luck to you because it doesn't work that way you want to still believe in institutions that are about based in control and you want to still believe that that aspect can be pumped into the external reality in which you live through you and you can still manifest freedom once again I've explained it with different metaphors that's like continuing to pour a flammable material onto a fire that's already raging and saying watch I'm putting this fire out yeah you'll see it's going to go out any minute yeah I keep pouring the highly flammable material right on top of it that's gonna put it out just wait just wait it'll happen any second any second you just wait and watch and that fire will be put out soon well enjoy that enjoy that rat maze enjoy that hamster wheel that you're going to be going on around in forever forever because you don't want to acknowledge the forces of nature that create what you get you don't want to understand how they work we've talked about these on the show go back and listen to former podcasts we've talked about them extensively you want to keep adding control to a situation which is based in fear that's what the dynamic of control of trying to externally control a situation a person and event that's what it's based upon it's based upon fear you're not confronting it you're not trying to solve it from the causal level you're simply doing some trying to do something about the effect and the law of cause and effect does not work that way and it's literally like I'm screaming to an inanimate object because people are so rooted in their own ego that they're not wrong that's all they're really concerned about they can't let go to say okay the whole control institution and hierarchy is what's wrong this doesn't create goodness in the world this just tries to mask the symptom of badness all the people who are acting in a bad way will round them up or put them in a cage or beat on them or shoot them you're not addressing the causal factors at all it's putting a bandage on a self-inflicted wound that has to do with what that person became because of what they took into themselves namely the garbage that's in the media and in our food and water and then we want to say because they exhibit behaviors that we don't like and then we won't want to be around that we're going to simply just put them in cages and that's going to make everything better well guess what you don't under you don't understand anything about how you are creating your reality zero zero you're completely uneducated about what really creates what you experience and as long as you stay in that consciousness more and more bad things are going to happen to you so get is offended about it as you like I think it's a horrible terrible unacceptable thing that should not be tolerated that someone's child was removed from but this is a symptom another symptom of what people refuse to look at of ignorance it's a symptom of ignorance and this happens for a reason it doesn't happen for no reason or by accident or by chance nothing does we are the causal creators of what we are experiencing and I'm not saying anybody deserves that that's not I'm not using that word I'm saying through what we accept think feel believe and act upon the reality that we are creating external to ourselves which means the reality that we have to experience in the physical domain in which we live and guess why unless you can figure out a way to get out of this universe and if you do please email me and let me know okay that's the universe you're going to be living in because that's the one thing that is that's why they call it a universe the one change and it's either going to be changed into a heaven or a hell and that's up to us we have all of that power to do that it's not something that's happening to us we are co-creators with those forces and those two forces and it's real simple it's a gigantic cagillion dialectic the two forces are love and fear that's it we've talked about this almost too much so please go back and listen to the shows that are based upon these topics the actual polarities that shape the world love or fear and if we're choosing control we're choosing fear that's it period it can't get any simple simpler than that it doesn't get any simpler than that and when you understand that deeply deeply understand that not just skirt it not just hear about it for somebody else when you understand how that law works you take responsibility for what you are creating through those forces personal responsibility and that means if you're advocating control of any kind control period period justifying it for any reason doesn't matter well okay we need to control this person because he's acting like this or because he's doing this or because that's happening you're not getting down to the base causal factors of why people even act the way they do and therefore you're wandering blind and you do not understand the forces that you're working with to create your reality and therefore bad things are going to continue to happen to you and everybody else and it is it look there's nothing to get upset offend it about your getting offended at me for saying this if anybody is you're attacking the messenger of somebody who is trying to come and say you know the reason the people got so sick in yours in centuries past because they didn't understand that there was such a thing as microbes and germs because they couldn't see them until microscopes were invented and somebody going to them and saying look you're getting sick because these things are around you and there's unsanitary conditions and they would actually literally they might torture somebody for saying that in the past now it's common knowledge it's common sense but somebody in the past saying that could have been interpreted as a a witch or you know some kind of a Satanist or a you know a wizard you know oh the what you're talking about is magic that's demons no there's these little germs really they live on your skin and all around you yeah crucify him throw him in the lake with a rock attached to his leg and it's the same thing today because people have established set up rooted beliefs that are wrong by the way their their erroneous beliefs about how the universe actually works and then they stay so attached to that that come hell or high water they're going they're going to live like that they're going to simply continue to do what they're doing and I've tried to dive tried to work with a group like oathkeepers folks I said this before on the show and I'll be trying to be calm about it and explain I've written formal formal letters of introduction sent them emails calmly it explained to them my credentials what I do the videos I produced and put out there and that the presentation that I give and no response and the reason is they want to believe that from their perspective way way down not even a third off maybe on that mountain that journey that that's all there is and they want to think it's all political they want to think it's just a matter of tweaking a couple of things in government and control institutions and then we'll be totally free and you know what you're wrong you don't understand the forces you work with when it comes to the actual true causal factors of what creates your reality you have you have the total awareness of a child comparatively and I get it all offended it bit nuts about a bang on the desk bang on the walls break the doors down in your house it doesn't make a difference because this isn't my information okay come in whoever wants to come and try and attack me I don't care I don't care about my life from my body if I did I won't be doing this I'm speaking the truth because that's what I'm charged to do period the end and nothing is going to stop me of that physical death torture doesn't matter you could torture everybody I know you're not dealing with the persons partially has partial awareness you're dealing with a person who has the eye open you're not going to control me because once that true insight is delivered into the soul of a being their uncontrollable so get as offended as you like it is violent about it as you like it doesn't make a difference it's all meaningless you still lack the information that could liberate you and could for you and could stop things like this from happening but you want to believe in a control institution you want to think that that's going far enough that that's not setting up you know another controlled oppositional paradigm well good luck enjoy what you get and enjoy what you already have and it is offended about it as you like so that's all I'm going to say about that I'm not going to belabor the point both keepers doesn't want to understand the occult oathkeepers that doesn't want to understand that there's a spiritual component to this neither it is police and please see another part of it is they want to they want to accept that this aspect of the new world order from simply a Christian book of revelations paradigm that's the other thing because they're stuck in the exoteric covers stories of religion that's the other thing that's holding them back right they'll talk about the Federal Reserve and the encroachment into the limits of the liberties of people in America but they won't talk about religion as Astro theology they won't talk about that what their religion ultimately is is the Babylonian mystery tradition with a new name it's Mystery Babylon with a new name but no can't accept that and I'm all for living the way that the words attributed to Jesus in the Bible say that someone should live because that's what enlightenment ultimately is about treating your fellow being as yourself well being a controller isn't doing that you can think it is all you wants it will never be doing that I'll tell you that that's the case if no one else will I'll tell you that so people want to think they're going to continue to add a polarity of fear and get something different oh yeah yeah what will get freedom as a result of control it won't happen through proper moral education it won't happen through understanding the truth and developing both hemispheres of the brain such that we can accurately determine truth from falsehood it will happen from letting people believe whatever nonsense they want to believe and then locking them in cages when they act like idiots yeah that's how it'll happen good luck with that let me know how that works out for you and when you're done with that I'll be here to tell you how it really works how about that how about we just make it an agreement and that though our separate ways so that's all I'm going to say about that let's get back into the media and how it's a controlled paradigm because so few people actually own it well hey if you want to consolidate what information people get to see or hear and keep out whatever info you don't want them to hear you need to centralize those sources of information you need to do that by conglomerating them buying out companies creating more and more centralization of power over that information or lack of information as it may be how many companies own what we get largely get to see in here if you don't go to alternative sources and that's the solution to this problem is going to alternative sources of information but so few people even understand that those exists or how to do that or how to search for that information because they've been so dumbed down and they don't have the will it's hard work that's not it's not called the great play folks in case you didn't figure that out yet it isn't called the great playground right it's not called the great vacation it isn't called the great leisure it's called the great work because it takes work to change yourself it takes work to change your mind it takes work to change your emotions it takes work to change your behavior it takes work to take in different information from an eclectic variety of sources to get the big picture and not enough people have that picture not enough people have that picture and here's the main reason the US media landscape is dominated by six massive corporations six massive corporations through a history of mergers and acquisitions they have concentrated their control over what we see here and read in many cases these giant companies are vertically integrated controlling everything from initial production to final distribution I'm reading from a document from a I don't remember what the website is but I will post it in the podcast section this week for with this show here are the six companies that are controlling what most people in the world pretty much but particularly in the 99 the United States get to see or hear General Electric General Electric media related holdings include television networks NBC and Telemundo Universal Pictures Focus Features 26 television networks in the United States and cable net the cable networks MSNBC Bravo and the sci-fi channel GE also owns 80% of NBC Universal that's company number one company number two is Walt Disney Walt Disney Company owns the ABC television network cable networks including ESPN the Disney Channel SOAPnet a and E lifetime two hundred and seventy seven radio stations music and book publishing companies production company such as touchstone Miramax Walt Disney Pictures Pixar Animation Studios the cellular service Disney mobile and theme parks around the world company number three News Corp News Corporation's Media Holdings include the Fox Broadcasting Company television and cable networks such as Fox Fox Business channel National Geographic FX print publications including The Wall Street Journal the New York Post TV Guide magazines Barron's smart money book publisher HarperCollins film production companies 20th Century Fox Fox Searchlight Pictures and blue sky studios numerous websites including marketwatch.com non Media Holdings include the national rugby league company number for Time Warner Time Warner is the largest media conglomerate in the world their holdings includes CNN The CW which is a joint venture with CBS HBO cinemax Cartoon Network TBS TNT America Online MapQuest Moviefone one of others pictures Castle Rock New Line Cinema more than 150 magazines including time Sports Illustrated fortune marie-claire and people company number five Viacom Viacom's Viacom's holdings include MTV Nickelodeon Nick at Nite vh1 B et Comedy Central Paramount Pictures Paramount Home Entertainment Adam Entertainment music and game developer Harmonix Viacom 18 is a joint venture with the Indian media company Global broadcast news CBS CBS corporation's owns CBS television networks CBS Television Distribution group The CW which is a joint venture with Time Warner Showtime book publisher Simon & Schuster 30 television stations CBS Radio incorporated which has 130 radio stations is now the leading supplier of video to Google's new video marketplace you add to that Reuters which basically controls all of the wire services and media that comes over the radio or on television and you have pretty much a complete monopoly over what just about every living mind particularly in this country get to see here and read on a daily basis and if you don't think that that's true you are a naive naive human being start to research owners of these companies and some of the beliefs that they have like Ted Turner who's a eugenicist thinks that there should be population control like Bill Gates you know who basically owns the computing world for the most part and things that people should be basically their numbers should be reduced through vaccinations we'll talk about that in the coming weeks because food and drugs are going to be the next topic of discussion starting next week I see we have a couple callers so let's go all are from Southwest Ohio you're on what on earth is happening what do you have for us checking in from Cincinnati it's Bob mark how you doing tonight hey Bob good to hear from you I'm doing okay I sense some frustration there mark let me say this and we'll just get it off the table mark you're you're part of a fourth dimensional reality okay you

you are encountering obviously people who have not bare ly hit two dimensions and sometimes three on a lucky day yes don't don't even you dude you are so beyond this and I hate to be so a colloquial or you know lackadaisical battle this but I'm just trying to tell you straight up you're four dimensional these people are two dimensional enough set moving on the term social engineering they're trying to re-engineer that term I'm not even going to tell you what they're they're trying to define it as but I want people to remember mark is right social engineering is defined as those tools used by a certain force in society that attempts to shape your reality through your behavior modification and through other I won't I'll let people define it you know look for the real meaning it's on those lines but but don't let them redefine that word they're trying to make it some kind of a term where people are seeking financial information in an unwarranted or illegal manner and that's ridiculous absolutely right so it is about it is about behavioural control that's what social engineering is ultimately about yes it defining or getting in there and manipulating the society and all of its facets you know all the way down to two street signs all the way down to what's in the water system well maybe if we put a little more of this they'll be a little less aggressive how about that and if people don't think that meetings like that don't occur you do not understand the reality we're living in it's five past midnight guys it's late in the game and Mark is trying to tell it and most of us who hear this on a regular basis on the show I know you're out there with me we know this already but there is a vast majority you just do not get it start sharing it with a clarion call letting people know that it is five past midnight we have no time and Marcus is helping to wake us up mark to two things and I'm going to get out of here and let other people talk to you the great work is defined by Mark passio and if I get it wrong readjust me to get to go into the world and share with people that their consciousness is creating and co-creating the reality they live in and that's where's powerful mark thank you for saying that that mark is you already know is the way of the alchemist and Mark is fighting the way of the sorcerer who is manipulating our consciousness and our metaphysical and also now our physical reality on a daily basis this chemtrail Spring has started back up again with a great fervor across the nation on this October of 2010 and I'm angry again mark I can't stand it it's way deeper than what we're even perceiving it as it's more than just spray and poison on us ladies and gentlemen there is a consciousness component to this it's manipulating the whole thing and God bless you mark for keeping this shown here and I've got a question the the opening of the third eye this is a powerful I think this gets to the core of esotericism in some way my being tells me but is this it just a metaphysical reality or does it also take on a physical component this opening of the third eye and thank you mark once again for what you're speaking about it is so powerful and is so on track don't ever forget we we who are listening to you out here and who are conscious and aware and paying our attention to your program don't forget that that that's you who the level where you're trying to move on don't don't keep looking back down that mountain mark do not pay those people any attention if they're going to get it they're going to get it as seeds been planted and move on sir thank you good night mark Bob I thank you so much always a pleasure to hear from you Bob from Cincinnati spawned your question traditionally the third eye is a symbolic representation of the balancing of the left and right brain hemispheres and the coming together of those qualities those functions of the two hemispheres of the brain into a more holistic unified way of thinking and being in the world and that is symbolically represented by the awakening of the pineal gland which is that located in the very center the very physical center physiological center of the brain and the head now what whether there's a physical component to this if there is I would say that it is that gland which is considered the third eye vortex it's considered the third eye chakra okay it's the I'm trying to think of the name of the chakra it is the it'll come to me um but that that chakra centered the third eye chakra is represents when the pineal gland actually starts to become actively involved in sending signals to other areas of the brain so if there is a physical component and it is not just purely a spiritual aspect of spiritual symbology I would say that the pineal gland actually starts to awaken from its dormant mode which it is kept in throughout most of human beings lives that the pineal gland is often heavily calcified it has a layer of calcium deposit literally over the top of the gland however this gland is connected to the brain through a blood vessel and more blood flows to this a gland than any other component of the brain the the pineal gland it looks like a little pinecone and it is surrounded traditionally in most people's brains by a thin layer of calcified deposits people say that this is what prevents it from actively engaging other areas of the brain and opening up the nuts for example say the intuitive capacities of people to be able to bring all this information and then understand in a holistic sense what is happening not only within themselves but in the world that they're living in so that is the physical component to the symbolism of the third eye there is a very very good little tiny tiny tiny book that someone in the Philadelphia area is putting out about this and about alchemy in general it's called better living through alchemy and I don't have it digitally digitally I don't have the digital copy of it as a PDF but it's so good that what I think I'll do since Bob brought this up on the show today is I think I will post it I'll type it out actually actually physically type it out over the next day or two and post it as a document because I think it's so valuable for people to read this document and helping the under man what the process of alchemy really is and what the goal of alchemy really is what it's really trying to create what it's trying to awaken is a more accurate way of putting it now this book is called better living through alchemy it is put out in a couple of esoteric bookstores in this area I don't know who publishes it but what I will say about who publishes it and it is not me or anyone I know okay is that they are an enlightened person and I thank them for putting out this little gem it's about ten pages long not even and what I would say is that this person whoever it may be really understands they really really understand and I thank them for putting this a little gem out to people now um here's what I'll do and I was actually just kicking around this idea thinking about it as someone we brought this book to my attention recently I think I'll make it a contest okay I'll put put this up on the site and to whoever is the first caller who gives the answer to the riddle in this book there's a riddle it's called the alchemical riddle whoever gives the answer and a Donald Kerr how you went about finding it whoever gives the right answer to the alchemical riddle that is contained in the book I will give a free ticket to both days of the free your mind conference to now you have to be able to make it out physically in the Philly area to receive them so if you're interested in that as a prize I'll do a little contest over the next couple of weeks I'll post it to the site of the next couple days whoever can answer the question to the alchemical riddle contained in this little book that is ultimately about the third eye or the one eye as Bob brought up in the as I alluded to earlier to the to the caller the fruit you have to be a caller no email you have to call into the show and give the answer on the air whoever can answer it this this contest will start next week okay you get a free ticket for each day of the free your mind conference one one person free ticket for both Saturday and Sunday April 9th and 10th 2011 in Philadelphia and we'll start that contest here on the air next week okay so we have another caller so here we go callers take precedence thanks for being patient caller from Southeast Pennsylvania you are on what on earth is happening go hi mark it's Chris person are you well I'm sorry about what happened this week I don't know ahem but I got cut off but anyway another great dealer let me write Chris let me address that real quick talks you went out on me for a second time and uh unluckily I am recording all of the content locally I have a piece of software technology that records everything right here so I didn't lose very much but talk should cut out and interestingly before I let you continue it was the second time talks to cut out like this the first time the topic was the Federal Reserve System and the second time the topic was the taxation system I find that highly interesting but good continue yeah I agree um more a couple things there's a movie I find knowledge through movies I guess I'm lazy in some sense but I also like to get the picture of the hidden messages and this one way that hidden there's a movie came out in 1976 called Network and that movie talks about exactly what you're talking about with the media controlling what people believe to be the truth and the dangers as the media grows more powerful the second thing I want to mention is the different different topic is when you mentioned the pineal gland and how has it was involved in opening up the third eye I found addition my research that there's a huge picture a huge statue I think it's the biggest in the world of a pine cone shaped object in the Vatican or near the Vatican and it's called a court this person is called the court of the pinecone and it is the largest statue of a pinecone in the war Rome and this is centered in the outside court outside of the Vatican and the reason it is there is because they are actually paying homage to the spiritual gland the third eye chakra and it is um it is a symbolic representation of the third eye and that is true it is in the Vatican anyone can confirm this by typing into a search online the court of the pinecone yeah I found it very interesting that that would be hidden in a better store at of in the Vatican and also you also find the obelisk instead of the Vatican also interesting as well but that's another story the you mentioned is better living through alchemy um I look at alchemy as a process of in search of spiritualization in other words the increasing your spirituality or at least in our case finding it once again is that our here is that accurate that's very accurate that's exactly what it is really and this little pamphlet or book however you want to look at it it's a little self bound book someone you know bound it with a needle and thread by hand it's really great um they have it over at germ books that's where I got it but I've seen it in a couple of other bookstores in the area and it is just brilliant and it is made with care and the person who made it really really understands the deep aspects of what alchemy is and you can tell that immediately by reading it if you know anything about alchemy and that is what alchemy is alchemy is about spiritual transformation it is about changing the the base consciousness of people and helping to be an assistant in that change and only they could do it Alta mately again you're just an assistant an alchemist is really just an assistant in that process the person is making the one-on-one relationship with the divine creator regardless of what force that happens to be for them in their own analysis and they are connecting with that higher power and then they're using that to go up higher in consciousness but again it is something that the The Alchemist himself is an assistant in that process he doesn't actually do that work he assists in it that's why I said the great work is ultimately putting out this information so that people can have it available for them so that they can help to change themselves you aren't going to change anybody else you can only be influenced for someone else to change themselves and that's what you're doing and we all appreciate can I ask one more question real quick sure this is what you may not have the answer but I've been wondering about this I feel I in the same person in an insane world most people would say I'm an insane person in the same world I know that I'm the same person in an insane world now my question is this if most people in this world 99 percent don't understand what it means to be human or what what spirituality is about and as a result they're going to go through this world again they're going to get back on the ride so to speak I grab actions to us well I hope you've got it off to get back on this ride but do you want any any guesses or feelings as to what happens to the people who are will leave this world aware well Chris uh you know in Freemasonry they consider you know the true mace and a traveler you've heard the expression a traveler or a traveling man and this is this is related to the hope that when people get the lessons that are contained in this world that they go to another place enough maybe another planet maybe another dimension or another reality in which they do not have to suffer in the ways that people seemingly need to suffer in this reality to wake from their trance and I I ask the question and I do I know whether that is true I I don't that is also my hope that that is the case because I don't want to be back here either however some people you know there's this concept in Buddhism of the Bodhisattva the Bodhisattva recognizes that there is suffering in any place in the universe and decides they will come and serve wherever that suffering is taking place so maybe some people make a valve that they as long as there are people suffering here they will come back and be the teachers that are necessary for this place and I often wonder about how many people have made that bow or that you know agreement well I don't know how that's my take on I am you know is you know you get last week and I identify with what you said very clearly that you know this is torture it's torture to know what we could be and recognize what we really are and in that sense ignorance is bliss but I mean see what humanity could be and from the capabilities that we have and and just like we can go 100 miles an hour yeah we're stuck doing 20 you know we're maybe doing 10 miles an hour in a maze the humanity just keeps repeating over and over right it is torture it is measured toward it's a physical torture it's mental torture they want to keep us in a basic state of consciousness they want to keep us with the third eye closed not seeing the bigger picture and it is it is known as the Anya chakra it just came to me a J na Anya the Anya chakra that is what the third eye is called arm and and they want to keep people in a state of spiritual blindness so that they can keep their control going over the people of the world so that they're sitting on easy street not really having to do much and other people are toiling and laboring and then they attain a state of freedom see that don't think that the dominators of this world are just purely malevolent non spiritually aware people that's not true they are very aware of these concepts and they exploit them and they try to hold this knowledge hoard it back hoard it and hold it back from people that's why they've given people religion they know that people understand intuitively and inherently that there's there's an inherent spiritual component to their existence but they need to give them something that's fake a substitute a proxy understand what the word proxy means P ro X Y people hear about this in the internet I'm surfing through a proxy that means you're going through another channel that's routing it around it's going all the way around right and then routing it to get you that information well that's what religion is it's a proxy for true spiritual development they need they need to give you something in disguise so that you'll accept it as the real thing because they can't give you the real thing if they give you the real thing game over you know if cops even cops who think that obeying the Constitution is a good idea if they understand that there's no such thing as authority in the three dimensional space-time continuum and it is only a claim of authority and the acceptance of a claim by people who don't know any better they might actually wake up they can't have that so they got to give these people religion they got to giving things like the Constitution they got to give you things that say okay there's such a thing as individual rights but here's a controller group that needs to make sure that those are protected that's not your sovereign responsibility to make sure that your rights are protected that's our responsibility see how that proxy works yeah it's very subtle it's very insidious religion is very insidious it's giving you something as something else and telling you what's the real thing and it's not the real thing I figured that out I figured out a long time ago intuitively I just figured that religion he's my common sense was what we ought to do I just figure religion was a way to get one man to do something another another man want them to do the other one wouldn't do that's right don't get me wrong Chris don't get me wrong I'm not saying that there is no spiritual truths that can be found in religions I'm saying all of the dogma and exoteric cover stories that go along with the religion are accepted by people and they're believing that to be true instead of going for the gold that is hidden way way way under a pile of garbage you know they're not going for that they're accepting the cover story and yet they're still living their lives in opposition with the true spiritual tenants that underlie all of that nonsense but if they went deeper even into something like Christianity or or Buddhism work or or Islam they went deeper into it right no one's lying the problem is the cognitive spirit crew they're doing the same thing that the media people turn their television or expect to get the truth in the media well people expect to go to church for these priests and and become spiritual or develop their spirituality it's either doing they're looking in the wrong place the exact well first that's right and that's what a Dominator has to do they have to guide you into the wrong place and this is the whole adage called the the cul-de-sacs before the goldmine you know they need to guide you around these cul-de-sacs and get you going in circles so saying oh this is all there is stay in that little cul-de-sac and keep going around in a circle because they don't want you on the true road they don't want you on the true road to real enlightenment which is the knowledge that every individual is a sovereign being under the Creator and there's no such thing as authority does not exist does not exist in the three dimensional space-time continuum anywhere you're not an authority of over anything that doesn't mean you don't have a right to defend yourself if your freedoms come under attack but it doesn't mean you have the right to tell people what they can and cannot do based on the laws written down by a flawed person by or a group of people and that's what a controller is all about it's saying here's what the law is and here's I'm gonna I'm gonna follow this regardless of whether it's true because I get my paycheck and that's where most people's mindsets in the police and military are at they're all about just following orders even the political hook of Dennis and I won't follow certain orders don't understand it isn't your responsibility to protect anyone's rights it's people's general responsibility to grow in consciousness so that they have the ability to protect their own rights and if they ever come under a threat they know what the proper response is in their own experience in their own responsibility we don't need groups created amongst it this is where the whole failing is the whole failing in the system is that people said what we'll do so we don't have to do this is will create groups that do this for us then the responsibility will be off of us and it will be charged to them and that's where you start going into tyranny when that idea crept into the consciousness of humanity and people actually think that's a good idea and it frees you creation of governments and controlling institutions free people from having to do this themselves well guess what I'll take having that responsibility any day over advocating it to a controller because that responsibility doesn't belong to anybody else it belongs to me I understand that it's natural or what some other course some other course but one thing I want to mention I'm going to see David Icke this weekend I think he's another one that gets this stuff that really is enlightened so if any worries that could go either the Nokia Theatre on Sunday starting at 11 o'clock in Times Square in New York City absolutely Chris thanks for making that announcement that's right David Icke will be speaking on the east coast of the United States States for one of the first times he's going to be speaking in New York City at the Nokia Theatre on Sunday October 17th if there's I don't know if it's sold out yet but if there's still tickets and people want to go check it out David Icke is a person who has tremendously inspired me I think he is just bursting with courage to do what he does and this is one of the people who embody courage as far as I'm concerned and I've read 11 of his 16 or 17 books now you just put out a new one called human race get off your needs and I couldn't concur with that sentiment more that's what we need to do and it's got a lion on the cover the lion represents courage I would just like to connect this with media before I see we have another caller caller if you're listening please hold on I'm going to get to you in one moment okay great the people are calling in um what is required here is courage courage to look beyond courage to go beyond the limited scope of what we happen to see and understand in this moment and and to continue to take in more information not in fear but in understanding and in trying to get to a place of wisdom which is doing the right thing with what that which we do deeply understand so this is what people who are doing the work of the mainstream propagandists ultimately don't have they don't have developed courage if they had courage they wouldn't be doing this they're in the state of fear that's the consciousness that even allow them to continue to do a job of a paid propagandist I'm going to go on the air and put a false vision of reality out for people to take in so that they ultimately don't understand how they create their reality imagine what kind of a level of consciousness you have to be at to even do a job like that and that's why they call it television folks here's more green language tell a vision they're telling you a vision about what the world actually is and what it's like and it has nothing to do with reality the actual reality it has nothing to do with it they're giving you their vision of what it is that's disempowering and keeps you under control that's why they call it television it doesn't make a difference whether somebody did that deliberately it's green language it's the language the actual language that we speak telling us things to the subconscious mind all the time they're telling a vision you know they're giving you a vision of reality through this medium and that's called synchro mysticism look it up we talked about it on the show before it's a fascinating topic of discussion it's a fascinating topic to look into and green light holds it holds a Mohammed I'm gonna get guy preciate appreciate your all your knowledge in your effort Chris take care of minute thanks man or by by there's crisp Pennsylvania looks like the other caller off the other call didn't hang in there I'm sorry I didn't get to you um please be patient folks when when you call in I know uh you know people want a voice their their opinions and that you're always welcome to do that on the show I think the callers to this show bring up some of the greatest topics and areas of interest and I've said this before I think I have the best callers in internet radio so sorry to that last caller that I didn't hang in there but that's okay um a Chris brought the movie Network and I think that's a phenomenal movie about the control of mass media um everyone should see this movie it's an older movie I think it's from the 70s it's from a 77 or something like that and network is just a brilliant brilliant movie and Chris was saying he learns from movies in general and I think there is a way to do that movies certain movies are allegories al le g o ry allegory look up that word an allegory is a fictional story that tells a moral tale or lesson teaches a moral lesson and this is used in different occult of societies and orders allegories are very important they are stories which tell spiritual truths so many movies that are produced in Hollywood are allegorical and you can learn a lot from them if you have the discernment to pick apart the symbolism and you know the actual roots lesson that is trying to teach again network is one of them I think avatar was one of the greatest allegories of our time that's why it was so wildly popular a movie that's not going to teach a lesson is not going to get that wildly popular as avatar was Star Wars was another Lord of the Rings these are allegorical movies there's tons of them a book that I'd like to recommend the people to study about the mass control techniques of the media and other institutions and mind control in general is Jim Keith's book mass control which was written in 1999 and Jim Keith has since died but it's a brilliant book that outlines very simply the techniques of mind control and the agencies that are doing this and how the media is controlled there's a lot of information on that it's called mass control mass control by Jim Keith Kei th can't recommend that one enough these big six companies that we've been talking about control 96% of the totality of information that people get to see here and read on a daily basis imagine that it is almost a complete monopoly 96% is controlled by six institutions people think that that is acceptable they are completely insane and that connects with something Chris talked about yes you are a sane person in an insane world not the other way around the problem is insanity is so widespread that the insane believe that they are the same and that the same are the insane I know that's a tongue twister but think about it the problem is is that insanity is so widespread that the insane of the world actually believe that they are okay that they are seen and that the people who have actually healed themselves and become sane in this insane world are the ones who are insane that's what's going on and you're accurate about that Chris it's not the other way around okay so we talked about the ownership of media another thing Chris brought up is the controlled opposition you know people think that they're informed by some of the media outlets they're going to go and listen to oh well you know when there was a crazed skullenbones men in the White House George Bush the left was freaking out you know and the controlled opposers were on MSNBC going nuts on bush now that there's a Democrat in the White House all of the leftists in this controlled fake paradigm of left versus right conservative versus liberal Democrat versus Republican you know all the leftist search saying oh wow how wonderful Barack Obama is our president now now you have the voices rising up of the right like a a reilly and Hannity and Limbaugh you know and even Glenn Beck going back to a certain extent is telling people some truths about what's going on but he won't talk about the Federal Reserve he won't talk about the occult because one the people who own these corporations are controlled by the financial institutions their stocks are traded on Wall Street you know they're totally in bed with these people with these financial sorcerers therefore they're not going to say anything against their owners and that's all these people ultimately are they have owners they're people who are pets they're pets I've said this before it's strong language but it's the truth these people are pets like a dog a lap dog on someone's lap with a leash around their neck boned wholly totally owned and controlled they won't dare say anything against their owners they wouldn't dare so they'll give people a little bit of proof and they'll sell the more religious sentiment but to look at the ultimate aspects of what's going on never you'll never get that on the controlled media paradigm see it's all about getting people's worldview in the darkest place imaginable see though always says this goes connects to a topic this part of what I'm going to talk about connects to a topic that we talked about on the show as another method of mind control it's called worldview poisoning we talked about this many weeks ago and they need to poison your view of what human nature is they need to poison your view of the value of the individual and get you to think that you're a number that your your bank account or the type of lifestyle you live or the clothes you wear the car you drive etc etc ad infinitum and one a million different aspects of how people live they need you to be worldview poison in the aspect of believing the change is possible or where power comes from they never want you to understand it comes from within you they always want you to think power is an external thing you have none of them that other people are completely in control of and that it all happens through control that's what power is so on the mainstream media you'll hear everything having to do with dark aspects of human nature and this isn't what human nature is this is what human condition is conditioning people behave the way they do not because it is their nature but is because they are conditioned in those modalities of consciousness to behave that way through the lack based society the control of resources the control of food the control of information because that's what we form ourselves through they don't want you to know you determine what your nature is by how you form yourself by what you take in to yourself that is made of information food is made of information information itself media what are you going to take in where are you going to form yourself with that's why people are uninformed they are not in word lead form they have not shaped who they are they have not shaped themselves inwardly it's all in the language folks will this will creep into things over many weeks it's all about green language green language understand what the language is saying to you it's encoded right into the words we speak but for you to see it you have to be green and that means green in the mind opening up that third eye not being in the extremes of left brain or right brain left brain being the red frequencies right brain being the blue frequencies right brain people people are acceptors they lay down they accept their passive totally left brain people are controllers dominators we talked about how these color frequencies go to work you watch a sporting event you'll see more red than blue you watch the news broadcast you'll see more blue than red that's just how it works and this is deliberate they know the people putting these things together they know how it works because they're a cultists at the highest levels of the controller the controller's of media at the highest levels and I'll tell you one of the main groups involved is the CIA the Central Intelligence Agency and if you don't think that people in the CIA are shaping the media that we get to see in here you're nuts and if you don't think that CIA members are on the payroll of every major news institution you're crazy read Jim Keith's book he exposes a lot of it there's other good ones out there but this is a great primer the CIA is highly connected with the media institutions they basically control them at the highest levels because they are mind manipulators they are propagandists and they are shaping what people think of not only themselves but other people as well and that's why you'll see murders litter the news you'll see every form of violence you'll see about peer about riots about uprisings about murder about man's inhumanity to man in every way that it can be covered and if they're not feeding you that they're feeding you more fear be afraid be afraid be afraid this storm is going to get you wildfires are going to get you hurricanes coming snowstorm it's going to shut everything down constant constant drip of fear because they need to justify their existence by feeding you horrid views of human nature oh if there wasn't such horrid human nature maybe we won't need government the whole thing if people were angels we wouldn't need government yes you wouldn't need to try to internally control the mind if we were already angels we would already have the control over our own minds that's what government means mind control Newburn re-ment a goober nari meant a to control the mind when you break down the word governments in Latin caverna GU burner Hoover na Rae it means to control a gubernatorial election and then meant a mind to control the mind and that's all this is ultimately about as we've said it's a it's a one of their methodologies of mass mind control yeah well we had true control within ourselves over our minds we wouldn't we wouldn't be under government's control external imposition of violence the initiated use of force which no one has the right to do for what they want to happen initiating violence you don't have that natural law right we've talked about this the difference between violence and force there is a right to use force in certain circumstances it's when your natural law rights are being violated you have the right to use force to put down that rebellion against your rights what you don't have the natural low right to do is initiate force when it is undo when you haven't been attacked when your rights haven't been violated you don't have a right to initiate force against somebody else that's called violence that's the difference between violence and force violence is force being initiated when you don't have the right force is simply using your ability to use physical force when you do have the right big difference between those two things and that's another thing the media wants you to just lay down and accept that you never have the right to use force that that belongs to a subgroup of people called the government they have a monopoly on force and it's not true it isn't true it never has been true it never will be true I'm not advocating going out and being violent I'm saying you have a right to if violence is being perpetrated upon you to use force to put that violence down and you always did and always and still do and always will but ultimately they want to feed you the nollans shaping the perception humans are always bad you have no power and you need us to protect you and that we should be your protector and you should give the responsibility to be your own protector away to somebody else you should give your responsibility to keep morally teach and educate your young about what natural law rights actually are and know the difference between what you have the right to do what you do not have the right to do give away that responsibility to a controller class and then let them protect you as long as they can take whatever freedoms away from you in the process cops'll insist it's not that way soldiers will insist it's not that way and you know what go out right ahead and insist it you're the ones who are ultimately going to pay the ultimate consequence about it you're the ones who are ultimately going to get hurt the worst and you already are because they're soft killing your children we're going to talk about how they do that next week so if you're a controller and you're listening check out the show next week we're going to talk about all the ways you're poison all the ways your children are poisoned what would it take folks what would it take to awaken these people what would it take their children are being taken away from them they're still not awake imagine what else do you need to wake up to the real truth of the matter fluoride in the water apparently has a lot to do with why you're not waking up maybe the thimerosal in your vaccine that you got as a child or that you're given to your own kids go right on ahead stick them stick them with the poison that you're going to inject into them because the media told you it was okay and you didn't research it on your own good luck with that and then people will wonder why my kid is sick why I have a crack life why I'm always depressed why you know why my husband beats me why my wife left me why my kid just got taken away from me keep wondering the Dada let me know when you figure it out because that's the other part of it no matter how bad somebody's life is no matter how bad you know on the completely wrong road they are and how many horrible things are being made happen to them that can always be quelled the controllers the mind controllers can always quell that get me to think it's something else creating it Hitler knew this better than anybody else and I'm not quoting this as if I'm proud of this statement but he's right and it's true I mean you know horrible sick twisted evil freaks can make true statements you know you know it isn't and I'm advocating what he's saying I'm simply saying this statement that I'm about to read is true that Hitler made he said that through clever and constant application of propaganda people can be made to see paradise as hell and also the other way around to consider the most wretched sort of life as a paradise and that's the job of the media folks to convince you that everything is okay when they when they're not dealing you complete fear they'll sell you distraction at every turn who did this celebrity marry you know what's going on in Hollywood oh the game the big game is on that's another part of the media bread and circuses so that you don't see what's really going on around you and this isn't even journalism what is this this is pure nonsense distraction these are child's games and this is a paying attention to complete nonsense like a child it's treating people like a child which is sadly that's what they've become that's what they've been conditioned into and because they have no spiritual strength to combat it because of the information they get to hear and see they keep taking it in they can't get enough they can't get it in fast enough it's like forget sip and you forget a straw they they need like a bucket you know a hose right in the mouth they can't get it fast enough please give me more more and more Gorge me on it anything but look at the self anything but look at the self and your own actions behaviors opinions thoughts emotions don't look at that don't understand true self hood don't understand consciousness always go to the external source and if you can't understand it there go to the distraction poison the worldview get people to think people are all horrible animals need to be put in cages need to be controlled because see if you think that way you're never going to improve yourself enough to teach people the truth and really better them do the process of alchemy you're never going to understand natural law what you really have the right to do and do not have the right to do and you're going to keep accepting this bogus ideology of control and guess what sadly that's the place to police and military against a new world order Iraq that's the place of keepers are at and I'm one of the only people that will come on and say this that you're ten pictures so any representatives want to come on the show you go right ahead and contact me you want me to help you understand this information and teach it to the people in your organization's I'll do it for free I'm not about money I'm about truth do you get in touch and I tried to get in touch with people and they don't want to know what I'm saying they don't want to hear about it you want they want to believe their nonsense religion the cover story not even the true esoteric deep wisdom tradition that can be found once you strip away all the nonsense okay they don't want to know that they want to believe in their astro theological BS okay and they want to continue to accept that control is the answer in whatever form understand true sovereignty no under can't understand true spirituality no under become enlightened no just let me stay in my box I like my box my box is conquerable and I know my words are harsh I'm aware I don't need to be told that my words are harsh and can be abrasive to some people good that's what you need you don't need somebody telling you what you're doing is okay because it's not I mean you know let's have some actual discernment about this the reason the world is still a mess is because you haven't really changed your actions and you really haven't changed the way you think and the responsibilities should firmly be placed upon the people of the world it is not the dominators it is not the occultists ultimately who are doing this if anything their actions should be massively waking up people in larger and larger numbers because it's becoming so ridiculous the things that they do that it's almost laughable and still people don't want to see it because they don't want the responsibility that goes along with seeing it that's what it's ultimately about folks I'm going to continue to hammer that notion on this show because what is needed to deal with that responsibility and this is the thing I'm going to continue to bring in okay this is going to be continuously gone over and over and over okay the real thing that needs to be developed is courage that's what's ultimately lacking that's why people go and lie for a living that's why people go and become controllers for a living they're in fear you can't do that job if you are out of a fear-based modality of consciousness it is impossible therefore once you understand that once you know that these are the dynamic forces of nature that people are working with whether they understand it or not and that's what they're creating with whether you understand it or not once you do understand that these are the forces you're working with you know there is no such thing as an enlightened soldier it does not exist it never has existed it never will exist no soldier in the history of humanity has ever been enlightened and still been a soldier once they reach enlightenment they stopped being a soldier don't you get it zero soldiers are enlightened zero not one not even one blanket statement blanket statement and it's a true blanket statement there are no enlightened soldiers if it doesn't exist that's an oxymoron that's like saying there's single colored chess boards it doesn't exist for there to be a chess board there's a light and dark squares or it's not a chess board it's a square there are no enlightened controllers once you're enlightened you understand there's no such thing as external control over another living being the end the end that's the goal of the spiritual quest that's the goal of being a truth seeker how about you change your name from both keepers to truth seekers and then maybe you'll make some progress in the world and better things would start happening to you and again I don't advocate what's what was being done as a matter of fact it shouldn't allowed to be done people should step up and refuse to allow that being to be taken from their parents by whatever means they need to do it that's what should be done and the people who are allowing that to happen or just as wrong as the people who took it but that community is just brainwashed like any other and they're just going to sit back and let it happen in the Live Free or Die State yeah they're real enlightened allowing that to happen but again there's a reason the things manifest when you start to understand the reasons you'll start to be able to change it because you'll change yourself and get out of the control paradigm that you're under that's called mind control and I don't care whether you don't like the term I don't care whether the term is abrasive to people that's what it is doesn't matter whether you're uncomfortable with it or you don't like it I'm uncomfortable with gravity I don't like gravity well guess why it's called tough that's what it's called tough it exists it's a law it's an operation that's what's happening you're bound by the end you don't say I don't like mind control I'm uncomfortable with dealing that that's real so therefore I'll choose to believe that it doesn't exist doesn't work like that events actually are occurring things are actually happening the truth is actually nullable about what is going on and you can know it if you get out of the poison stream of information that people are taking in get on to some real media read some real books that are trying to tell people about it brave people that that's that's what has ultimately continued the underground stream that is the great work courage brave people who don't care about what has what might happen to them in the physical domain courage is what is needed to go forward will it's a component of will it's the internal component of will courage you have that within then you direct it outward and that's called will and that's the will to seek the truth what the poison extreme of information called the mainstream media owned by six corporations giving you ninety six percent of the data that people get to hear and see on a daily basis what what they are ultimately like is a sorcerer shaman of South America South America there's these sorcerers shamans called brujos and they constantly have to give the drip of the poison to their people that they're controlling if somebody goes to them thinking that they're a shaman that they're going to get advice they're going to get healing you know and in these indigenous cultures there's some evil people that know the methodologies of shamanism the healing techniques the techniques of herbs and with shamanistic compounds and plants and yet there's some evil ones that want it all for their power they want to control people with it so they'll give them certain dissociative compounds one of them is called that aura dat ura doctora and it's a complete dissociative that makes people so dissociated from reality that don't listen to whoever is in a normal state of consciousness that can perceive what really is going on around them and a sorcerer shaman will give people datura on a daily basis and say you need to come back because for you to get by in reality and for me to interpret what's really going on you need to come back to me every day and every day they'll give them more into Torah and that person will take it because they trust them because he's their only ground or anchor to what they think is reality and this happens you can look it up you can study this look up South American sorcerer shamans and the blue flower plant called datura dat ura this goes on now as we speak this is going on and these shamans will just totally take advantage of their community just so they land in a better position in a position of advancement over their fellow man that's why they do it and to do that you have to exist in a consciousness of fear and that's exactly what the mainstream media all of the people who just go to work and read from a teleprompter or read from a piece of paper they don't care about the veracity of the information they don't care what harm it's doing just as long as I get my paycheck that's it how much fear you have to be living in how much of a lack of courage do you have to be have to not say no to doing that job it's not only a disgrace it's something that should be pitied pitied but that's what they are they're the modern-day sorcerers shamans that administered the datura to the masses on a daily basis and in total people come out of that poison stream of information and go onto a stream that is unpolluted which is the alternative media and which is real books that have really tried to communicate the truth of what's taking place in the world reading listening to lectures attending lectures going to alternative sources of information alternative radio documentaries online and that'll be part of when we get into the solutions section we'll talk about how to go about that process how to really search the internet how to use the Internet as a vehicle for gathering true information that can really help and empower well folks will come into the end of the show I want to thank all the great callers as always you guys are awesome next week we'll be talking about food and medicine as more sources of information what we put into our body and how these are basically more methodologies of mind control in the way that they are being used in the modern world that'll be next week for now thanks for listening everyone I'm mark passio and you have been listening to what on earth is happening see you here next week goodnight you

What On Earth Is Happening Show #030

Topics: *Mind Control Methodologies, Alchemy, The State Of Our Food, Nutrition & Consciousness*

welcome ladies and gentlemen welcome you are listening to walk on earth is happening right here on the revolution broadcasting internet radio network I'm your host mark casio this show is live every Tuesday evening from 7:00 to 9:00 p.m. Eastern Time my website is what on earth is happening calm the networks website revolution broadcasting comm we have a packed show for you here this evening so I'm going to jump right into the event announcements and after that we'll go into the contest it's the first contest that we're doing live on what on earth is happening and we will get into that this evening so the event announcements I read an announcements for the philadelphia area all about activism quotes this show is about freedom and ultimately to be free we have to take right action in the world and therefore I want to read problem a couple of off event announcements for events that are coming up in the Philadelphia area if you live in the area try to make it out to some of these local dialog Institute of Haverford College presents the global philosophy forum the consciousness and activity and integral modes of reality a deep dialogue on science and philosophy and quest of the unified field of reality so this is going to be taking place at Haverford College at Marshall Auditorium Saturday October 23rd 2010 from 1 to 6 p.m. and the keynote speaker is dr. Bruce H Lipton Bruce Lipton the author of the biology of belief unleashing the power of consciousness matter and miracles and spontaneous evolution our positive future his talk will be called spontaneous evolution our positive future and a way to get there from here Bruce lifted critical information I highly recommend people check us out the other keynote speaker is Barbara Marx Hubbard visionary futurist and co-founder of the foundation for conscious evolution her talk is going to be called conscious evolution visions of a universal humanity his form is presented by Ashok Don Verdean he is going to be giving a talk called awakening global enlightenment our great evolutionary shift the entire thing for this philosophy forums is called making sense of our great evolutionary shift so that's at Haverford College Marshall auditorium Saturday October 23rd 1 to 6 p.m. has a large donation at the door is appreciated not absolutely necessary so the second announcement I have is the mind/body/spirit Expo that's coming up at Valley Forge Convention Center just outside of Philadelphia this is going throughout the weekend October 22nd to 24th I mentioned this because the keynote speaker is a man who really helped me out a lot in my journey in consciousness and that's Neale Donald Walsch he is going to be keynote speaker at mind/body/spirit Expo October 22nd through 24th at Valley Forge Convention Center for more information check out mind/body/spirit Expo comm Neale Donald Walsch author of conversations with God and mother of an announcement I have is for a ufo-related conference that I haven't asked yet and I've accepted a kind of a last minute thing so that's fine this is called the UFO et Congress 2010 this will be taking place in Bordentown New Jersey at the Ramada Inn and whatever 13th and 14th the Ramada Inn is that ten eight and three that's one zero eight three US highway 206 in Bordentown and jersey the topic that I'm going to be speaking on is disclosure and my presentation is called don't count on disclosure and it is about the deepest reasons for the worldwide cover-up of the UFO and extraterrestrial phenomenon two other speakers are Dennis Roger denne denne okhla from Paris he is going to be giving a talk called UFOs crop circles take an 18 visiting XO civilizations Jacqueline the leaves will be talking on extraterrestrial forces of the light dr. Julian salt from Great Britain will be giving a talk called UFOs ETS and the new world situation Dan Smith having a talk called selling the best possible world and its best possible ending and the master of ceremonies for this conference is Pat J market ilio and Pat is the master of ceremonies and he's hosting the conference and you can check out more information at his site which is dr. UFO not Corbett be our UFO org so I'm honored to be part of that conference and the next two as an announcements go together I'm hosting a conference called free your mind to conference on consciousness mind control and the occult this will be taking place in Philadelphia in April of 2011 free your mind is a union to a conference scheduled for April month and 10 2011 Philadelphia PA featuring multiple speakers and diverse educational materials for the purpose of raising public awareness of the critically important topics of mass mind control techniques a covert and subversive intent fluencies upon our consciousness and behavior trauma based and ritualized abuse and the practical mental emotional healing the technologies available for those affected by these devices the date it's Saturday April 9th and Sunday April 10th 2011 the time 10 a.m. to 8 p.m. both days doors will be open at 9 a.m. o days colocation is rural hall Rugel ha ru ba hall at 4:14 Greene Street in Philadelphia admission price is very reasonable and only $20 per day confirm speakers and we have two new confirmed features for the free your mind conference this week you just added confirmed speaker so far Karen McCallum Alfred Webber Andrew basiago just added mr. Bob Tuscan the owner of the revolution broadcasting radio network they'll be giving is talks about how scarcity affects human consciousness versus what consciousness what become where we to live in an abundance based on abundance based society very critically important topic and what custom we'll be talking all about at the free your mind conference para your dozous another speaker again just added this week John Irvin of Gnostic media he will be talking about psychedelics and Trivium method of education also sticking Jay Parker John Nicholson Larkin rose Laura Magdalene Eisenhower myself mark tracey Oh Mel fàbregas Michael Kelly and Suzanne Taylor that's the free your mind conference a conference on consciousness mind control and the adult April 9th or 10th Philadelphia for more information visit free your mind conference calm connected with this we are doing a fundraiser for the free your mind conference Friday November 5th 2010 at 8 o'clock p.m. in Philadelphia at Liberty's pub on the second floor of the pump liberties is at 7:05 North second tree it's a second and Fairmount in Philadelphia a $10 donation hekkador is requested to support an effort to bring some of the out-of-town sneakers in for the free your mind conference one will be having live music practice fundraiser mr. chip Raymond will be doing a couple of prusik sets and we'll have a 50-50 raffle all proceeds will go to offsetting applause to bring in out-of-town speakers for conference in April tickets for the free your mind conference go on sale Friday November 5th the 5th of November tickets for the conference will be available back conference on raiser at Liberty's on November 5th for more info on conference and the fundraiser please visit www.cancer.gov shoo I am going to unlock the shack on the Wan Jia tashu live program someone from the forum if they're listening through revolution broadcast and confirmed that I am NOT coming in through top stream through my site it looks like there's another problem with talk true I started he showed through them and it immediately disconnected me for some reason so looks like a broadcasting kind of a revolution broadcasting but it looks like we've dropped out a talk show if any want to confirm that either through Skype or through the soft-shoe live program for me please do so that's going to make it difficult to have this um to have this contest go over the airwaves so what I'll probably do is just work it through email and we will determine a winner that way the first email that comes in will be the winner because I don't believe I'm going to be able to take calls on the show because the show has already somehow premature determining who talks true so I apologized for technical difficulties about that's okay because I have a local backup recording right here locally on my computer so the podcast will still make it up there and we're still going out live over revolution broadcasting so let's get into contest this was brought up because last week the topic of alchemy came up on the show and what I wanted to do was to inspire some people to look into the science of alchemy into the occult science of alchemy because it can make an incredible journey in consciousness once you understand what alchemy really is I believe it was Bob from Cincinnati called in last week and brought up alchemy and I decided to little contest and the winner of the contest would receive a free weekend pass to the free or mind conference so I have a couple just you know general small ground rules that I want to ask people to observe for this contest if you don't really want to attend the conference please don't respond to the question to the riddle that is going to go out over the airwaves and has been on my site for about a week please reserve this for people who really want to attend the conference and can attend it ok so if you're you know from the West Coast and you know you're not going to be making you want to make it out to Philadelphia don't bother to respond to this just to prove that you know the answer please reserve this for people who do want to attend the conference and can attend it can be there in April know that they're going to be able to attend it ok that's the only thing I ask so I'm going to give the we're going to read the riddle out over the airwaves and the first person to email the following email address will be the winner of a weekend pass that's two free tickets 140 play or one individual to the free your mind conference in April of 2011 here we go well I'm being told that talk to is responding that the voice is going out over talk show I don't know if I'll be able to take calls so we can try to do that but if that doesn't work we'll go out over we'll take the answers by email or calling them but in case people are able to call in his calling number for the show is seven two four four four seven four four four once again the calling number seven to four triple four seven triple four call ID number eight three five one five you have to put that in after you call the call-in number so that it identifies and routes you through to what on earth is happening once you get the call ID number for what on earth has happened eight three five one five so this is the riddle and I'll give the email address okay let's say if the calls come in we'll take that if whoever's the first caller they can take and claim the prizes they have the correct answer if calls aren't working through talk show we will go to email as an alternative so here is the riddle this is a document called better living through alchemy the key to life and death is everywhere to be found if you do not find it in your own house you will find it nowhere yet it is before everyone's eyes no one can live without it everyone has used it the poor usuall usually possess it more than the rich children play with it in the streets a meeting uneducated singing it highly with a privilege and learn talk and throw it away it is the only thing from which the Philosopher's Stone can be prepared and without it no noble metal can be created people who blindly follow socially accepted values beliefs and behavior are no longer connected in the mystery of this thing and therefore throw it away medieval alchemists frequently referred to this thing and is the cornerstone the builders for God in other words it is something to the Courtin that is not an integrated part of our current civil as a sometimes these informations are only obvious at quiet times when we focus attention on the present moment or enter deep meditation seeking to learn a true nature of reality through alchemists consciousness as a force of nature is to be harnessed and purified through prayer and meditation and then added to the experiment just like a chemical ingredient magic has the power to the Sirians and fathom things that are inaccessible and human reason for magic is a great secret wisdom just as reason is a great public folly within every living thing there exists a hidden star that is good things quintessence one of the symbols for the quintessence is the scar in general terms the star is the truest part of anything the divine thought that gives things their form and being too much reliance on intellect instead of intuition will surely spell disaster for the world we have assimilated the sun's best to endure on earth and it has led to great technological advances with our lunar feminine soul has been pushed away in the process the key to transformation is the union of solar and lunar forces the sacred marriage of the Sun and the moon instead there exists that estrangement between them and correspondingly between our own spirits and souls our intuition lies in our innocence your head must bow your heart this is called better living through alchemy and the assaulter is anonymous however I would make claim that they are also enlightened and the question the question here is what is the key to life and death that is referred to in the first paragraph this entire thing is actually a riddle it is trying to get you to understand what is that thing from which the Philosopher's Stone the lapis philosophorum can be prepared good thing without it no noble metal can be created it is called in this document a key to life and death in the first paragraph and I want to know what that is what is the key to life and death that is being spoken up this document is on my website I can look at it in the news section it is the first recent news item so here's what to do call in the calling number and if you have the correct answer for this to free tickets a weekend pass both days one ticket for saturday one time for sunday for one person to free your mind conference in April of 2011 in Philadelphia in the event that callers cannot call a calling number email send an email to this address what on earth 93 that's what on earth nine three at gmail.com love it on earth 93 at gmail.com I'll say that one more time first person to send an email with the answer to this chemical riddle to walk it on earth 93 the number 93 gmail.com will receive two free tickets to the free remind conference in April I'll be checking that periodically has the show to unfold so that is the contest and hopefully we'll have a winner before the end of the show if we don't it will go to next week so the topic for this evening of the show is going to be food and medicine specifically food and medicine as a technique for mass control we have been analyzing and discussing over the past many weeks the methodologies of mind control and we've been emphasizing how important it is to look at this dark topic clinical made it uncomfortable just did not want to believe that this is going on but the fact of the matter remains that this is what is taking place and it is critically important if we are to emerge from mind control which the vast majority of human species is under in one form or another if we are to break these mental chains and emerge from this state of consciousness dark state of consciousness which we are artificially getting held in through what we get to see in here through the mainstream media reader books and newspapers and magazines etc connected automatically with this is what we put into our bodies that nourishes us for it doesn't marish us as a base maybe the adage that we are what we eat is true but as we talked about on the show last week it's more than that we are what we put into our body in totality meaning not only what we eat and drink and take in in the way of medications or drugs etc we are but we take into our eyes and ears what we listen to what we pay attention to what we watch what we hear so we have to become discerning not only about the sources of information that we pay attention to but also what we physically put into our body it goes what we put into our body is ultimately information we are comprised of information everything is comprised of information and if we put junk in we will get junk out a very simple equation junk goes in junk comes out good stuff goes in good stuff comes out the truth is simple it is very simple to understand not as complex as some people want to make it dominators and controllers want you to think in terms of impossible complexity and cannot be perceived or conceived therefore people won't even be in trying to see truth but the fact of the matter is truth is always simple so we're going to talk about okay problems with our food we're going to look at the dark side of this so gonna uncover things that are going on with our food it fundamentally hold us back as a species and pave the way toward more control to pave the way toward more ignorance I paved the way scored more apathy in our society and food has the power to do that I should say we have the to let that happen or to stop it from happening and that could change for the better but he saw what we choose to put into our bottom and this is one that most people have a relative modicum of control over in their own lives thus far and he still do now if we're not careful that could change for the worse what we get to choose that we eat and drink you know another component of this is the air we breathe we have not that much control over that and how we pollute the air from industry through transportation forms that we use and through the chemtrail phenomenon if anybody listening has not researched I would highly suggest that you do so and look at the types of toxic particulates that they're spraying into our atmosphere so that's something we don't have too much control over but I'll touch on it in this show today but in a future show we're going to expend a topic of weeks on this topic and we're at our time unfolding it because this is a critically important topic of research and is critical to understand if we're going to understand how we build ourselves into better human beings and how we do that by making higher consciousness choices about what we take into ourselves and we can only do that once we understand that essentially everything is made of information including us including that which we hate to go to our mind that would end up which we put into our body through our food the first the author of modern civilization have talked apiece this is the Greek historical figure from which the Hippocratic Hippocratic oath which doctors still take the no harm his named his name Epocrates he said let buy food be thy medicine and medicine be thy food so he had a profoundly deep understanding of what actually generates health and well-being sadly in the modern age most people not all but most uncle of our species have gone wildly off the track now what generates health and we have to get back to these simple fundamental principles as espoused by someone like Epocrates what we need to generate our health to be our medicine to our guys in good health and simply the foods that we choose to eat or correspondingly buddy and a huge profound level of ignorance of balance in our society about what good food is a huge level of ignorance abounds about what levels of toxins we can safely take into ourselves and not affect our minds and our judgment and our consciousness in general that needs to change the only way that's going to change if we understand what has been done to our food supply that was taken on a daily basis and I'll tell you what a lot of a big portion of the freedom movement is not on to this information I see a lot of people not eating very healthily in in the freedom movement there are people who have partial pictures of the whole dynamic that's taking place and you know I harp on this here it's something I'm not quiet about I think it's a dangerous thing it's not a good thing but have a partial picture I think more people need to research a whole lot more and go a whole lot deeper now people in the freedom movement you know have a very partial picture a lot of things a lot of things not just about food now I talked to activists in the freedom movement and they don't want to acknowledge that they're both is something that is real and they're hitting themselves absolutely kidding themselves well they have an attachment to certain police systems and you know you bring up food to some people and they have attachments but they don't want to continue to eat what they've always eaten and think that has no bearing on consciousness and it does it most certainly does and we'll talk about why food has carrying on that and this is totally connected with structure of the brain which we talk about on the show numerous times past shows come we don't have the quality nutrients answering car body and our first start Oh mind body system general he's significantly imbalance of brains specifically the neo cortex of the brain such as a part of the brain that really needs proper nutrition to function properly at the executive command center of the human brain a higher rational thought processes the higher mind functions talk about the components of the neocortex go left and right plane in their brain functions and we also talked about in previous shows what happens when the neocortex becomes dysfunctional when it comes imbalanced toward one brain hemisphere or the other what results go back on it has Cod cast and listen to that but essentially destabilization of the neocortex means that our behavior is going they fundamentally changed for the worse as a result Oh destabilization of higher thought functions of the brain we will revert into reptile mode reptilian brain they are complex which is base consciousness survival mimimi thinking okay pure ego selfishness is hoarding but caring about your fellow human beings acting like a psychopath considering personal survival the only thing that's of any importance screw everybody else complete ego identification complete identification with the physical and the material no thought of morals and higher awareness or consciousness mostly due to left brain and balance that type of behavior and dysfunction Gouri bringing balance does the opposite but just as much damage and that will create a slave like mentality go along to get along don't challenge don't question authority to come hostile and the food that we eat so unbalanced people to both of these states of consciousness not just one or the other or both if we're not eating the right foods if we're not eating nutritious foods that are to avoid of toxins toxicity of our modern food chain something we're going to discuss extensively today so I'm going to check in all my email see if anybody has answered the alchemical riddle we have we have a attempt ok so here we go let's see okay we have an answer from c j d okay CJ d says thank you very much for your show when you say look we'll have a lot of it and the rich not much and the make value of the privilege throw it away it makes me think both time and love but when you value money over people or over or over intellectualized rather than use your instincts and heart but if you want only - I'd have to say time okay booth great answers but unfortunately incorrect there is one correct answer I'll just say that it is a one-word answer that's the only hit huh get out and try C is luck the correct answer that is not what the key to life is in the riddle is about and it does look like we're not getting calls coming through the switchboard today I apologize for that folks it's been a little bit of a trying time with Pashu recently but try to work out the technical problems but email is still a way to go looks like we have another answer coming through Paul says I want you to venture an answer to your riddle I say the answer is one or more or all of the following love exceptions laughter innocence thanks Paul okay thank you Paul great attempt it is not any of those those answers but also a great attempt that is not what the key to life and death is spoken about in the outhouse Chemical riddle called better living through how come he is so we have two really great attempts there but not the correct answers to the alchemical riddle once again I just want to give out the email address or the okay to take thumb answers to this through email today since unfortunately Paul Shu is not giving me a is not allowing me to take calls through the switchboard so an email address email who put in an answer an attempt to answer at this alchemical riddle the prize for which is two free tickets to the free your mind conference in April the email address send your responses to send your attempt at answers to is what on earth 93 at gmail.com luck on earth 9 3 the number 93 at gmail.com all in a few more minutes all except some more emails and see if we have a winner but good attempts see JP and Paul so thank you for your responses ok let's get into some aspects of our food and food chain and what this is doing to human consciousness the first thing we have to understand about the very toxic and poisonous aspects of the foods that we eat gar most conventionally grown produce uses large amounts of chemical it has besides and fertilizers to grow the food the way that they grow it crops car screen to keep pests away from eating them and cutting into the farmers profits and yields every largely do this what conventionally grown fruits and vegetables and grains with chemical pesticides which is he'll tests that's what they do that's why they're called pests sighs a little bugs and other pests a evening across their grown tech farmers but they have a toxicity to goes into the food that we then consume and for people that think that you're going to take fruit or produce and you're going to wash it off and that's going to rinse away all these pesticides it doesn't work that way when something is sprayed chemically it becomes systemic to that food now what that means it is it becomes distributed throughout the food so it doesn't make a difference if you wash it it is systemic meaning is everywhere within the food when you're eating it it doesn't make a difference if you take the skin off if you wash it none of that matters it's completely distributed throughout systemic so that's one thing chemical pesticides chemical fertilizers are used to make soil turn over faster and replenish the nutrients of the soil that are depleted it causes a way the crops are grown yet you're going to use natural organic farming techniques crops will need soil that crops growing will need to be given a certain amount of time to turn over and then become nutrient dense again this is often accomplished by rotating crops which often is not done in conventional farming techniques this is a reason why organic farming is so important and choosing organic foods is so important that's the solution to this we will get into solutions a bit later but I want to emphasize the problems with our food first and the reason I'm doing that is not to be negative not to inspire fear it is to educate about what is going on with our food that's it we want to become better we want to improve our bodies our health and our minds we need to get actively involved in changing how our food is grown and produced and sold and we do that by voting but what we purchase as far as what we choose to eat we know the supermarket or the grocery store or the farmers market food so food producers will listen to what people want we'll vote through them you know we'll vote through what we spend our money on and if we don't buy garbage we'll stop producing garbage so that's part of the solution is choosing the right foods and that's how you'll get producers to hear this is what people want it's slowly changing you see more organic produce and products from supermarket shelves but it needs to change drastically more so chemical fertilizers we are big part of the negative aspects of the foods that we put into our body and how toxic they are and how damaging dignity to help into consciousness so again I say I bring up negative to make a diagnosis we talk about that word on past shows if we're going to correct wrongs if we're going to make changes for the better we have to look at the negative negatives cannot be pushed away and ignored it needs to be faced and confronted then we this is how we make big diagnosis about what is telling us things that are wrong with our society but we know we can see there's a lot of wrongs but so few people get down to the core the causal factors and that's what this show is all about so making a diagnosis if we bury that word down it's Greek roots the atom ology of the word goes to the Greek Diaw in Greek I a means through or by way of through by way of okay gnosis in Greek means knowledge so by way of knowledge we will make a diagnosis we will find out what is wrong then we're in a position of power through that knowledge to then take appropriate action to correct it wrong and that's called wisdom wisdom is what you do with what you know it's applied knowledge for the right reasons okay so chemical fertilizers that goes hand-in-hand with chemical pesticides and he's become systemic to the food that's the critical thing to keep in mind about that aspect of it so when we look at what generates health what we're focusing on here what generates health what we put into our body in mind kid what we're feeding ourselves with what we become if food is laden with chemical pesticides and fertilizers or putting junk information into our minds ultimately because this is what is nourishing the brain and the active thought processes we put low quality information in the capacity into ourselves we are going to act in a low-quality fashion our behavior is going low quality and pace the next component and I have a laundry list here ok I really really was hoping this paper haulers today because they could bring up more topics of discussion but unfortunately again it doesn't look like we're going to do that I opened up the chat forms on the talk show live program it doesn't look like that is coming in let me let me expand my screen here and see if I'm able to get anything from that let's see I'll take my pace table now the tip shot okay looks like the tread is working if anybody is still in the top shoe live forum for my show through talk-show please type something into the chat so I know that it's working through the guests in the room people can do that I appreciate it because we can take some calls some questions that way and give comments from people that way today let's it looks like it allows that is turned on if anybody can get into the forum if they're hearing what I'm saying please do so see if it works if you want to chime in on the show today email what on earth 93 at gmail.com we could take some some comments that way and it contest is still ongoing for the alchemical riddle that is the first news item on my website it looks like we have another attempted answer okay our mark attempts the answer he says a classic mark Paseos style answers through the riddle and his endlich answered his care with a capital C a great attempt arcs arc but that is not the answer to the alchemical riddle it looks like we're going to have a tough one with this one and that's good because it will get people thinking and that's the whole goal of this really tis and dig down J's could really try to get to the core of this you know the key to life and death the only thing from which her lapis philosophorum may be prepared care is a phenomenal answer it is very important it is it critically important ingredient in the alchemical equations but that is not the key to life and death it is something that in many ways needs to be even more deeply treasured as deeply treasured as hair where the capital C must be it is the generative principle and to go hand in hand with that originally the Pope that I think really encapsulated what I'm talking about with food and people would say oh how can this possibly connect him with food well our Clark can his attempt to answer really demonstrates this because what we care enough to do is what we are going to manifest in the world and that makes perfect common sense but we don't care enough to change our diet we don't care about enough about ourselves to change our diet I mean what does that really say for our self-respect level no care has everything to do with what I'm talking about with food we have to care enough about our own bodies our own mind-body connection we have to care enough about the practices that are used to grow food we're talking a little bit later or maybe even next week about the processes that take place on factory farms and what we do to animals and boy oh boy is whatever connected with care with a capital C so I'd like to just briefly read a couple of quotes from Foucault tome it's called the Rosicrucian Cosmo conception by the Rosicrucian philosopher milk kind L and he talks about care in one of the sections of this book it brings up some of the positive aspects of occultism and again we'll talk about this as the week's go on we will whole sections a whole shows devoted to different occult principles and schools of thought just briefly I'd like to read something from that time though he says in his book the Rosicrucian cosmos conception that the ignorant use of the generative force it is primarily responsible for all of the pain sickness and sorrow that we experience that is so profound and what he means by the generative course is care care with a capital C that's the generative principle what did he call the faith or binding principle from all of the hermetic principles and the core of course this is a highly prized concept in Rosicrucianism as well so the ignorant use of the generative force is primarily responsible for the pain sickness and sorrow that we experience constant any truer words have ever been spoken what we care about is what we experience what we do not care about and choose to ignore we will experience it in a different form especially if the universe is attempting to call those things to our attention and we are willfully ignoring them sadly this is what is happening with the sickness and pain and sorrow that he would undergo through the physical illnesses that they experienced because of what they choose to eat they are not making a higher consciousness informed decision about the foods which they take in in our bodies I'd like to read another short quote from this author where he talks about terror and innocence and wisdom so he's basically talking about which we pay attention to and this has everything to do with food believe it or not in the aspect he's talking about here yes it's about something higher but this can be applied to the choices that we make when it comes to what we put into our body he says that innocence is not synonymous with virtue with a capital v through virtue innocence is the child of ignorance with a capital i but and could not be maintained in a universe where the purpose of evolution is the acquisition of wisdom to attain that end a knowledge of good and evil right and wrong is essential also choice of action is essential excuse me what if having knowledge then choice and ranges himself on the side of good and right he cultivates virtue and wisdom if he succumbs to temptation and does wrong knowingly he fosters vice what he's talking about is willful ignorance it's willful choosing of that which one knows to be wrong and I bring this up deliberately on this show because I see this all around me and it's a painful thing to talk about because it affects members of my own family and I'm not somebody that is going to just hold back personal things you've heard me talk about you know family issues before on the show I like the green thumbs right so where they roost okay and the whole Panther not not be afraid to air things out and explain to people these problems the consciousness exists right in my own family with people that I care about and they persist and they want they for some reason want to suffer more and want to choose the wrong didn't want to continue to it's half of ignorance because they're so rooted in and attached to the way that they do things and I don't want to say the three biggest words the three most powerful words and everything honored by the human voice and that is I was wrong the ego has bound them so completely that they would rather choose ignorance sickness sorrow pain suffering unto death if it comes to that rather than in it they were duped they were deceived that were simply wrong but he simply didn't have the information and they don't want to look at new information and then use their will to change the behavior it is it has largely been conditioned out of them and this is completely connected to the out chemical key to life and death one of the reasons that the will has been taken out of them is because this thing has been also removed and thrown away so there's another hint let's check the email and see if anybody else saw has come up with a correct answer no other no other time so far I'll give thee you know address again if anybody has an attempt to answer the alchemical riddle on the news section of my website what on earth is happening calm it's the Earth's news item it's called better living through alchemy and is a riddle surprise to answering the question what is the key to life to death that is spoken about in his doctor the prize is two free tickets to the free your mind conference in April of 2011 in Philadelphia please only submit an answer to the questions if you want to attend the conference and you have the capability of attending it please don't give the answer and let people who you know would have been able to attend how they give them the correct answer I don't want to give it out over the air and then the person Bach of ten in the answer out over the air and then that past person not attend please only answer if you want to append and can attend this conference in Philadelphia in April and if you get the right answer to a question I will send you I will get your mailing address through through email and I will send you two free tickets okay continuing with food and why this has everything to do with care and attention because we have to become aware of what's in the food that's harmful and often toxic their choices and then we have used that knowledge to change our choices that's how this process works and no one said it was easy word easy is not being talked about here okay simple yes because this information is available and only through a minimal amount of seating not even that arduous seeking right just wanting to improve yourself having the desire to improve your body-mind connection see I'll tell you a little anecdote here folks I was not always the most healthy year in the world and that's the biggest laughable understatement I think I have uttered on the air since eyes are doing this show to say that I was not a healthy eater and the past is big belly laugh of an understatement okay I ain't sewage I eat junk I tons and tons of sugar i tons and tons of fatty meats and red meat okay tons of white refined flour and dough and bread pretzels and potato chips and snack foods and fast foods and you know when these triple burgers with extra cheese okay I mean my diet was horrendous horrendous is not even the word an atrocity atrocity now to go from that to the organic vegetarian diet that I eat now is 180 degree rehearsal it's like a completely different person emerged when I started eating differently and I'm going to tell you some of the sources that I look into the change my diet I'll post some movies to the site will throw some some documents perhaps and put you onto some authors and and presenters who can explain just often who are doctors and scientists in their own right you could explain it high level terms what is going on with our food chain and one of the people who really helped me many people don't like him but I think he's a phenomenal person and he has really opened my eyes to what goes on in food and pharmaceutical industries was Kevin Trudeau you know the author of sexual cures they don't want you to know about one of the best books I've ever read on the top of the food I think another person who is indispensable toward my understanding the food was Russell Blaylock neuroscience neurosurgeon actually I should think Russell's laylock Ian crane helped me become aware of certain things the dr. Rima label and there's many others we can go on and on and I'll give some references later in the show we're at the top of the second hour unfortunately it doesn't look like I'm going to get calls through the top shoe to the talk-show switchboard so it looks like the top shoe chat is working and you can send emails - what on earth 93 at gmail.com to make comments and suggestions now I have a laundry list of things we're not going to get all into them tonight we will probably go into the second week on food alone and this is such a gigantic topic the whole show can become the office look at chemical pesticides and fertilizers preservatives that are added to food this is largely done to keep food on shelves for longer periods of time and these are chemical additives someone just recently did a time-lapse movie McDonald's french fries he taught McDonald's french fries didn't need to put them on a table in time-lapse photography comprised for a six-month period of time and at the end of six months the prize looked exactly like it did the day he purchased them and you people can get natural but this could possibly give you something like that is good for you it's not even food anymore natural food spoils to taste you don't know that you can't meant to stay permanently the way that it is and second left something's got saving you right there on the spot for you eat what would it need you save like that for it shows you how much chemicals are in them there's no reason for McDonald's fries the stick sticking up over that's going to be on the shelf for six months but being serves you right there when you walk into that garbage facility but you know it's amazing six months and the fries look exactly as they did they did they were bought and people oblem these things down I used to well I don't I don't talk about things that I haven't changed on myself I've made this change people who are not eating right it just changes just a matter of willpower it's a matter of a little bit of knowledge and then largely it's a matter of turning on the will you have to have a tool in your arsenal willpower it can be that's handy dumb will it be chosen that's up to you if you understand it's the right thing to do that's a first step that sorts hair comes into equation then will has to be exercised so if you want it become better if you want to change your diet and care acknowledge part about it is what I'm trying to contribute to like giving you information about what's in our food now and then we'll have to exercise and these are the three components I'm gonna type something to people in the chat forum just asking people if anyone in the forum wants to take a shot at the alchemy riddle let me check my email address again and see if there are any other attempts it looks like there are okay ladies and gentlemen we have a winner Dianna Smith hello Diana I'm familiar with Diane I know I know her Diana Smith has the correct answer to the alchemical riddle he is the winner of the 2 to d4 your mind conference Ayanna Smith you get a weekend pass to free your mind I'll email you and give you the I'll let you give you give me your billing address so I can send those out to you after November 5th ladies and gentlemen the answer to the riddle called alchemy the key to life and and I'll just read the first paragraph of this event before I give the answer which was given first by Diana Smith wrote Philadelphia key life and death is everywhere she found but if you cannot find it in your own house you will find it nowhere yet it is before everyone's eyes no one can live without it everyone has used it the poor usually possess it more than the rich children play with it in the streets compete and uneducated but seem it highly for the privileged and learn often throw it away that is the only thing from which the Philosopher's Stone can be prepared and without it no noble metal hands it created the answer which is correctly given first by Diana Smith is imagine the imagination is the key to life and death it is that thing from which the Philosopher's Stone can be prepared and we cannot imagine a better outcome we cannot create one if we cannot imagine a different way of being we cannot make that way of being to come in series were in our world this faculty cope humanity has been devastated in our current civilization it is hounded out of our children mercilessly through the so-called education system which we talked about weeks ago it is indoctrinated out of our youth and that is why we are stuck in the rut of consciousness that we are so excellent job Diana I will be emailing you after the show that your address and I will send you two free tickets to for your mind after on November 5th the tickets go on sale November 5th so shortly thereafter I will come in the mail to you well done imagination folks that's it that's what it's all about so that is handled and let's get back to our discussion on food chemical pesticide chemical fertilizers chemical preservatives processed foods the way that foods are generally process often rob them of their nutrient values more the more processed a food is the less nutrient dense it becomes that's why staying away from prepackaged foods see that there's no they'll try to sell you on this for your convenience but eating fresh foods you need to be packaged okay kept in containers it what is so much healthier choice and eating process and prepackaged foods none of this I'm saying is to be so 100% gung ho I think you are paranoid about everything you put into your but that's not what I'm saying here I'm saying start changing the way you look at food start changing your awareness of what's in food do some research then start changing slowly what you eat and off of bad foods and on to organic foods and also prepackaged foods off of foods that are chock full of preservatives goods and process heavily fresh organic foods are the key so processing and freeze packaging often sold to us for convenience sake coffins not good let's put into the body there are nutrient deficient foods colors and dyes added to food especially children's foods I'd like to take the time of neatly design carbs my girlfriends are for Halton compiled this list went through and thought of all this whole laundry list of components of everything that is being done to our food go over the last day and she did a great job helping me to compile this and I you know will go through this list and I'm sure listeners will bring up more topics so today we're going through email and the cat session on the talk to live board because the call-in function does not appear to be working if anybody wants to try to call in go right ahead but I think you'll confirm that that function doesn't seem to be working you can try it and we can see what no one seems to have called in thus far so I don't think that that is working properly to email address if you want to chime in on the discussion in which is what on earth 93 at gmail.com then we had a winner to the better living through after the riddle and that was Diana Smith from Philadelphia so great job Diana the answer was imagination going back to the discussion about food dyes you know you look at packaging you see this guy cover that dye color all artificial and chemical additives change the color of food to make it look a certain way it's all unnecessary all harmful these are things that are harmful to the closet funk did not need something in our diet chemical pesticides chemical fertilizers chemical preservatives processed foods daddy dies tonight bleaching the process of bleaching this is done through sugar flour even eggs are released white I was telling a friend eggs don't come out of chickens white you come out of chickens around certain chickens lay eggs with like a bluish hue or hint to them but eggs don't come out of chickens white they are ever bleach to become white like that people associate the idea of things that are white with purity and as far as food goes not nothing is farther from the truth you know white flour white breads white sugar refined sugar these are all things that are not good and have low nutrient value white were flying refined flour is completely nutrient it's void of nutrition white refined sugar has no nutritional value that brings us to the next hop sugar excessive amounts of sugar refined white sugar in tons of the guns of foods we been even worse than that high fructose corn syrup some were just shined in on guys and said red dye causes a neurologic neurological allergy this person has an autistic son and becomes Moody and withdrawn whenever he eating something with the red dyes in it absolutely it looks like we're getting some callers in let's see if we cannot take call here Cornell Horning the Ryan you're on Warner to Japanese how are you yeah I was just asking the palm for you great thought I want to commend you I'm Durbin on the sofa floor and you're right on my alley I'm Al and I really agree with everything you're saying great it looks like the talk-show home continues online it did look like it was working earlier I got a couple of error messages through the switchboard and now it looks like it's back so the phone number again since we're into the second hour Brian did you have something something else or was that all you wanted to say because I'm going to no I just want I just I just wanted to help you with the phone chat you know I also I wanted to commend you for what you're doing to give you a lot of credit young people not eat right I thank you very much thanks for calling in and attesting that out for me and thanks for the kind words you have a good day okay so it is the calling function seems to work in again the calling number seven two four four four four seven for or for the hall ID number eight three five one five once again the call in number seven two four triple four seven triple four call ID number eight three five one five you're listening to what on earth is happening I'm your host mark passio my website what on earth is happening calm the network's website revolution broadcasting calm here we go let's caller you're on what on earth is happening we have worse hello mark Kevin actually I just got the call and in touch base and mentioned that yes phone system was working as well and specifically to mention that I was actually the gentleman who probably would have typed into your chat to out I mean the autistic son and how typically when guys become a serious detriment to his cognitive abilities and so we have completely eliminated them they and who as I mentioned in the chat give him almost what seems to me like a neurological allergy of source for lack of a better word turkey becomes moody withdrawn and more specifically and most frightening for me is his Cod he sometimes Gladys becomes violent because his cognitive abilities are not functioning properly it's almost like I don't know it's I know he doesn't get exactly he didn't lose at anything like migraine headaches but I know when I personally go through those sorts of things reminds me very much of that sort of mentality in him right right that's amazing and I'm sorry to hear about his condition I would I think I was aware of that previously yeah it's it's terrible some of the things that you're putting into the foods and expect children to eat in particular and denied foods are a huge thing in children's food and it's just well you know this corroborates it that this is toxic and it is detrimental to proper brain function and we gotta get our kids off of this stuff and get them on the natural holistic you know organic foods definitely all certified to me and much more appropriate for him for sure and it has it has health definitely losing that from him Derek I'm hope somebody will accidentally even just give him a red lollipop pen for literally hours if not sometimes days we've had it really bad at one time he just jumped was despondent or or angry as in a very strange fashion it's almost like a it's almost like how I personally like and in a moody lack of sleep but definitely much more you know there seems to be a second nature to it I can't explain it and it seems like it's all we gave him his first couple sets of shop pro/con but when she got his three-year shots whatever it was then for the end towards the end of two years shots it was he got a groovy shot on one on one little needle and ever since then like wearing those during the first couple of months then he definitely were going through scene types of issues and it just a while to figure out what's been going on I I don't think we didn't have known it if we hadn't gotten him the early intervention care through this cool as cause we sent him to school so early through a Montessori charter school in Philadelphia we were at really lucky that we got that information when we did it and we able to correct things and have tailored his entire life away from anything that would further exacerbate any of his what's called PDG and os a mild form of autism essentially it's pervasive developmental delay not otherwise specified so as as much as I understand the science behind it or lack thereof at this point because they can't give enough information attention that not otherwise specified part right of the 1000s of pdd-nos but specifically what really kind of messes everything else is that he has this ability to be a very willful child it doesn't want to give up as well and so schools often have labeled him as being let me get aggressive or yes oppositional and defiant correct yes yes and to the point that it's a new disorder that there these are psychiatrists are diagnosing you know and there's their solution of what actually please drugs their solution is drugging the children you know putting them on these the speed is essentially what it is these forms of amphetamines that basically make the the synapses in the brain goes so haywire they become like zombies okay yes that will not be happening like that I'm he will not be seen those medication he is fortunately in a very good school right now in such a way that realistically all of you added health care now giving him could in theory make him have to be a better stranger this films and I'm not going to say that I like many is it but specifically how it started let me end all of the problems with autism that he has at this moment in time are all things that are correctable through speech therapy and in going through the speech therapy that he is currently in it is actually going to set him up in such a fashion that he will wind up by the time he's done done through it all in a position where he actually shot committed is better off than most people because he will have a lot of the aspects of autism that are actually really good for a human person like Asperger's psychotically and then since we have gotten him over the difficult humps he will have those good aspects as Bella's being a normal kid so I'm strangely thankful is what it will be in a very long run and it is not something I recommend that any parent as metaphor study videos too far as to say that realistically at this point I'm considering medical technology as is at least my paranoia thereof or I personally would never allow any kids ever get another shot as such ever again and if I ever do have kids like their cousin those odds you have this opinion delay when you're not yet this will be the topic of this probably in a couple of weeks I'll probably extend talking about food over next week and then the following week we will get into drugs medications we'll get into the whole pharmaceutical industry treating symptoms instead of going beyond the root causes through drugs and surgery we'll get into vaccines flu shots HMOs and insurance companies and one of my most you know floral topics of discussion which is key antidepressants people who know me know that that's one of the things that I am stand out against most because of what they basically should be emotions which is one of our greatest gifts that we possess as humans human species and the SSRI drugs we'll talk about also and yeah this is what they want to do with kids they want to diagnose disorders that don't really exist make up new things so they can sell them more drugs shoot them up with more shops and let them talk on drugs that they don't need that that largely you know even if it is some sort of an imbalance the thing 'try is through the change of diet changing the getting them off of garbage foods and onto a good healthy organic diet you would be amazed at the level of improvement in behavior and cognitive function that children will experience when their diet has changed for the better we don't need to cut up on drugs you know and I highly recommend the movie generation rx I'll bring that up this weekend week after that's a great film that discusses this very topic so have them you know sorry to hear about that trouble with your son he's a great kid you know I've met him and he's wonderful I hope you know you work that out and not keep going forward getting them onto the right foods and please will improve very much keep up great work I really love your show and god someone is actually saying this year everyone thank you so much take care just always you know even more painful to hear about when children are suffering because of this and you know that's another thing I mean we need to do this not just for our ourselves but for future generations to come so you know people are bringing up different things I'm going to go on in the chat hole get to that I want to talk a little bit about quick cytotoxins okay we talked about refined white sugar this isn't a lot of things and high fructose corn syrup which is increasingly added just about everything and these can track by exciting toxins have taken in large enough dosages but artificial sweeteners man are these things to stay away from these are categorized as excitotoxin by many neuroscientists and neurosurgeons from what they do when they hit the brain is they actually open up barriers in the blood-brain barrier they open up the blood-brain barrier so the toxins that can normally would be filtered out of out of the blood system through the blood were not being able to pass through the blood-brain barrier get into the brain can become neurotoxins this is a class of chemicals that is known as excitatory neurotransmitters excitatory neurotransmitters that are otherwise known as excitotoxins okay ii xci tio tio Xin s excitotoxins and this was the whole category of artificial sweetners NutraSweet aspartame sucralose Splenda you know equal you name it all the packs of of pink blue and yellow garbage that's what I'm talking about here stay away from that stuff it is damaging to the nervous system to the central nervous system absolutely and connected with something someone is talking about somebody said what is good for anxiety well what one is to get off of toxic poisonous foods and gassin atleast don't drink or eat anything with artificial sweeteners in it because that will give things to the nervous system it will not want happening okay it opens up the blood-brain barrier it gets nicklaus things into the central nervous system it will ordinarily be filtered that's what it's so those options are okay it will make people jittery it will make people have headaches this is shown connected with migraines it cytotoxins and artificial sweeteners it will reduce cognitive function and ability to concentrate a whole host of things go along with that there are natural things that helped with anxiety like st. John's work has been shown to be a little bit effective you've got to watch what you say if you can't take it with any kind of a MAO inhibitor mono amine oxidase inhibitor and again I'm in no way providing health advice I'm not a doctor okay I'm not a scientist I've researched these things I would HIGHLY encourage you research these things don't take my word for any of this you do your own research when it comes to this and then you know read studies read reports understand what other people are saying about because I would highly recommend people look at Russell Blaylock to work specifically on artificial sweeteners as neurotoxins he wrote a book called excitotoxins the taste that kills is what his book was called I recommend people read that I recommend you watch the video of the same thing he has a video out on Google video maybe I'll post it with the podcast today I see we have another caller so let's go to the phones here we go caller from Southeast Pennsylvania you're on what on earth is happening hey how you doing mark right yes how are you good can she walk outside I was in the chat what signal um I don't I don't have a question with the you know large the topic tonight Perseids I matter go right ahead okay so um I stumbled upon this you know this what's going on only a couple months ago can have my accident actually because I actually wanting to download a movie the most dangerous time in America and facility squished it to Cooper documentary but um yeah can rightfully so I think women called me but and I'm so anyway when I saw what he has predicted in his toon masked out of the world okay completely new something this was strolling here and that's what saw his whole thing I'm just two months later to him down yeah deep deeper we go I go and and I just tell you all this is why no and friend and he says I just I have no idea what to do with this burden as well or or for that management finding anyone that would even share this opinion I mean he did close to understand you kind of actions because I was looking at need up something else and then anyway so my question is what is one pickle burden of information you know I'm in the Chester County area but anyway that's my question experiencer I struggle with the same thing you know you know it is burdensome one once you a larger picture it can be a burden the-the-the the tasks that we have basically assigned ourselves by taking on this knowledge is to disseminate it as widely and as freely as possible and to make ourselves available as conduits of information and that is what the great work is as I talked about briefly on the show last night and the caller Bob from Cincinnati reiterated and brought up the great work is to understand these truths and then speak them the universe is spoken into existence the reason that we're in the mess that we're in is that the people with the really poisonous worldview and way of being and way of living in the world have propagated it unwaveringly through their voice they have continuously to go down and reinforce this message of deceit and it is our church to undo that his heart s to combat that with a voice of truth and I struggle with that myself I want more people to pay attention I'm tired hearing anion tired of hearing ignorance being spoken all around it is pendulum so fight it to the bitter end on us do it they don't want you know the ego is the most powerful thing that is holding these people where they are you can't break this question if I can ask you this what I get a lot is okay well what are we supposed to do in what are what are you going to do and then you probably heard that so what are we supposed to doing what I would say you have to understand the the totality of the big picture the the tapestry of all of this information as it pertains the what's going on in the world and how it affects our lives on a daily basis and then put it into a format that can be readily understood by other individuals and then share that information with whoever will accept any part of it that's what there is to do unfortunately that's it this is an information war that's what it is it's very accurate that term what changes us is information connected with that it has to care enough to take it in it has to be will enough to change and we have to care about it we have to change the quality of our attention and help others to change the quality of their attention and then we have to use the core will to pretend you to do the right thing and it's not easy I guess enough is enough to make a dent and seems like just hours of they are not on fast court you know oh they motion they know that there's an awakening happening and well aware of the collective consciousness of humanity is on the rise in general and that's why they're scrambling to try to keep their power you know but this is them scrambling to try to move their agenda in the fast forward mode keep the power they already have non-classical increase it more but to hold on to what they have because people are becoming aware that they've been played and they're waking up to that fashion they're starting to take action and do something about it that's the worst nightmare especially if that begins to happen in any large numbers that he's been doing he take me in info but then disseminated as well you have to get it out you have to be much more pressure release valve take it in come and put it back out there okay glass good question heap and it is a little pressure you know and that's what I said a lot of people you know a lot of you keep learn and learn and learning but you're not putting that the info out there they're timid they don't want to skip it you have to spigot that's what it's all about change happens through how we use our voice and our will so got your other question I'm sorry okay they find other people to am nearby or wherever because doesn't seem like that's an easy thing to do it is but what you already mentioned meetup.com is an excellent resource for that you know you could type the topic that you're interested in and want to learn more about it into meat off and that will lead you to other people to have similar interests in ways of thinking so that's a good resource there's a group in cart are you in the Philadelphia area or you outside outside of this region yeah in the genican area okay truth freedom prosperity is a great group to become involved with there you know they do these documentaries that I usually announce every third Monday of the month of the ethical Society that would be a good resource the end the federal group that that has well you know generally organized through truth freedom - oh sorry but end the Fed you have the testicle Science Foundation of Philadelphia that is in the free energy and the whole you know control of energy and let a lot of people into this house but you know interesting the big picture for example I was a David Icke this Sunday in New York City at the Nokia Center and we sat next to a gentleman we just happen to get another conversation with him and asked what got you into all of this what got you into David Icke all of this material and he just answered with one word Tesla and we happen to be serious to him and that's a foundation that I work up in the Philadelphia area he said I was interested in alternative forms of energy I started researching the best way and that opened up the whole can of worms when I understand why you suppress his technologies and I was like wow that is truly amazing and synchronistic that would lead that person there and he was from Milwaukee so um just amazing would have ever made that connection yeah what will be someone's into I never know what that end point will be you know some for some it's food for some it's energy for some Athiya hope to some it's politics for some as UFOs you know there's a million different end points tell you one of the things that got me into all of this believe it or not looking into the UF going the crop circle phenomenon when I was young I mean I was ravenous for information about this and they'd open up one to another to another and to another to another you know being involved in the occult myself when I was younger that you know really had a profound in second how me see what the real power structure was so so you truly believe this depressed and the composition vpu times any danger and here's allows you to feel like they're going through stage you know your flood type of situation but you know the whole thing is a false flag thought that 9/11 was a big false flag that's just the fact of New York City and America in general and Western civilization as a whole if you want to take it to its extreme wait until they try to pull a cosmic false flag okay and we shouldn't be fearful about that we should be helping to understand what caused by terrorism what false flag events are okay and making Chloe without to try something like the how easy would it would be very easy they would have to project through some form of holographic technology which is already very involved in the civilian sector imagine where it is in the military sector okay and for just a harbor super says they have they already have you know this type of a I ignite were not surprised me wonder if they projected a hologram in the sky and detonated a bomb on the ground below it people would freak out and be ready to hand over all their freedoms practice from the deadly aliens does that right other people's attention absolutely absolutely it needs to be mom look nuts right Walker that's the only problem I'm not saying that all extraterrestrial beings or extra dimensional things whatever the case may be or all and Evelyn that isn't the case there's ranges of consciousness and their domain as well and some may be prevalent toward us I'm a big malevolent for us and you have to be discerning about it and understand it's not just one thing happen it's something I've talked about much on the show or in my presentation because I don't think that is is what I talk about is something that I have come to a comfortable level of knowing that the way that is actually unfolding so I kind of leave those friends because I don't this heart from people looking and I definitely think these are areas of tremendous interest and you can really gain consciousness by looking into these areas I'll tell you what as an anecdote the group that I work with in this city you know people may - weirded out by this people may think that this is a very appropriate people may take it strange but I work with all these different groups highest consciousness group that I work with the UFO community particularly the discussion group that takes place in books on the second Thursday of every of every month and I never missed it group I may miss a special meeting here and there I may miss a survive and thrive another group that I go to here there I may miss a uh you know truth freedom prosperity meeting I don't miss those discussion groups with the UFO community because this is the group that is taking me in the big picture they're seeing all the interconnectedness all the different things that are going on and where's that under that group feeling invigorated jerm books it's a bookstore in the front of the on Frankfort Avenue in the fish town section of Philly and they have a discussion group on UFOs extraterrestrial phenomenon crop circles just the general paranormal and unknown in general you know it varies all it goes often to different tangents and get into the political discussions discussions about freedom discussions about consciousness you name it it's discussed there they see the interconnectedness of all of this and I've come out of their feet it's the only group did I come out of I have dealings with in this region but I come out feeling truly invigorated and I'm not afraid to say that and I say that to all the people who participate in there I love going to that group with you guys taking part in it I think it is the group that is the most advanced in consciousness in this whole region it's song exactly yes sure it collective on agreement were after what this New World Order mission is the cement that's what is attacking it's there's so many things it depends on which new world order you're talking about you know is it the new world order that is in the record to block out the light or is it the new world order but seeing a reference to bring in the light and if it's a new world order that you're talking about the block outside like a dark new world order agenda well their end goal is the total enslavement of whole life they want all life they enslave can be completely miserable and under total dominance and it's the difference I talk about this but there's only really two forms of rulership or state of consciousness there is monarchy and there is anarchy that's it there's no in-between all the in-between states are illusory okay now both of these states of consciousness or real ultimate states of rulership are real and I'm going to shock everybody I believe in and once both of them not just one of them okay you have to understand the distinction between these two states and their internal and external manifestations see monarchy right is one rule anarchy is no rule at all those terms mean one ruler and no rule okay when there is in eternal anarchy meaning that pain does not rule the kingdom of itself they do not know thyself so they have no rulership over their internal Kingdom they don't understand the components of their consciousness and how they manifest the reality that they experience that person is in internal Anarchy being they do not possess self rulership they are not a sovereign okay they are not monarch of self the one ruler of self king or queen but internally of themselves the only thing you're allowed to be ruler of okay there will be eternal monarchy and it will be a force that wants to rule over that baby as the one it's one ruler and monarch ruling over the anarchists being and because they're in the state of internal anarchy so the more of us are in internal anarchy a more than the closer we're going to rest or external monarchy which is tyranny which is external tyranny is what it is now the more of us are going to come true Vonn arms and see there's adult connections to this folks that's why the monarch program is called what it is they want to usurp the true monarchy okay they want to usurp that transformative process the monarch caterpillar becomes the monarch butterfly a process of spiritual transformation is resonated through that transformation of the caterpillar into the butterfly therefore the monarch mind control program it's a joint project between intelligence agencies and occult organizations okay they usurp that name and make it their own okay we need to become internal monarchs rule the kingdom of the self but in that Kingdom there is only one ruler each individual and when that happens each individual becomes an internal monarch the one ruler over the kingdom of self a sovereign being a king a sovereign king a sovereign Queen over their own consciousness then there will result external energy it will be ro rulership over other individual beings that is what the great work is to make that process of transformation happen the beings on this planet and it's the hardest work there is to do anywhere in the universe and welcome welcome to that work can I and I appreciate very much and just have all that grand all that we attract we have a family and kids and and all that we thought to do and pursue and prepare for it's like all now what did we just keep going on this on this road or much of it was false we just continue on with the false assertions oh yeah even me even directing my kids or whatever we plan to do and future doing at this point seems like a lot of willpower but more than anything else courage courage is the internal quality that when directed outward becomes a will and to unify that okay that process we need to combine it with intelligence or a higher level of awareness seeing things from a new perspective and with the care to want to do it you have to care when the Capitol see to want to do great work you have to want to do it not just because it's a result in something better for you or even somebody else you have to want to do you know in your heart it's the right thing to do the trick there sure there's ultimately what this is all about and that's where you can find you know the will and the courage to keep moving forward that's why is courage as I become and I become discouraged man I'm I'm not a shiny happy person believe me anybody that knows me can tell you that okay I am I am discouraged in a lot of ways we're what people are choosing they continue to choose here over the force of expanded awareness consciousness and love and I see the decisions that are made people are totally self detrimental and self-punishing itself torturing I don't understand their decisions to do that but that doesn't mean I'm going to give up even if I go down with the ships not giving up I may not succeed but I broke I I haven't failed so you know I want to thank someone last night straight for giving me a pep talk on this because I was pretty discouraged and she said look you haven't failed if you try your best at that you know and then I ended his talk with this as well it was very synchronistic synchronistic like ended his talking this person did not go or hear the talk and then she said to me yesterday the same thing he ended his talk with but if we have tried our best we haven't failed even if we haven't accomplished the goal that we think we need to accomplish right the work is done within that's where the great work is accomplished so we create that new world order happened within knocking their external horrible torturous slave enslaved new world or we want to make a positive enlightened new world order happens that happens once we make that world happen within and that's what was referred to as the kingdom of God have any faith in any political figures at all at least resonator Ron Paul I believe that Ron Paul was a good man I believe that he has morals and he has principles and he sticks to those principles I do not believe it is going far enough and I don't believe in representative government no one represents me vice presents me no one is my representative no one we presents from which I am I present that which I am through my consciousness to my thoughts my emotions and my actions so I don't think representative government is the way out of this that's a you know we could be a stopgap toward a higher level of truth and toward making a better world happen if we revert to the some of the constitutional principles that were enshrined in our founding documents in this country but it's not far enough by any stretch of the imagination see we need to employ the imagination go much farther than that and to understand this concept of internal rulership that there is no Colonel Hoover sugar Authority but the authority that is talking about in the Constitution is also illusory and does not exist so we have to go far beyond the ideas that are even enshrined in the Constitution and go down to natural law principles which I talked about over and over and over on this show and understand what the actual natural laws of creation are and there is no one between us and creation and the creator itself whatever you happen to convene force is that we are sovereign beings here we have to recognize our sovereignty and then use our courage and our will to actually live that way and it's not going to be an easy task the force of fear is constantly pushing against it wants us enslaved you have to stand with courage against that force and factionless register that more than that assessment methodology we're not a converter option once you reach a certain level of awareness this is enshrined in d3 degrees of Freemasonry the main three degrees C which were a reflection of the entire journey of the free Masonic gurney at first degree is the enterprise who comes because he has opened his heart okay he is he has cared enough to better himself the second degree is about the fellow craft which is also about care but is it starting to open up a game more wisdom and knowledge and not being able to see what's around the corner in trying by the symbol of the spiral staircase but then third degree Mason has enough knowledge where he now take the trowel which is a symbol of spreading cement or spreading the idea that there is only one human family and morals need to be cemented in pretty stuttering that human family into oneness into a state of oneness and that is the third degree when you have mastered yourself that's why it is called being entered in the first degree gene clean past in the second degree and then being raised to a state of mastery in the third degree now that doesn't mean that the people oh that initiation those initiation ceremonies really understand that or are really truly raised as I briefly alluded to on past weeks of the show but we will go deeply into bats and Balaji and that that occult symbolism when we talk about Freemasonry and other occult schools of talk in future shows I want to thank you for calling in and just great questions really really thought-provoking and just keeps tips keep going keep staying the course keep traveling keep going forward towards the light and it's not easy I'll tell you I struggle with it myself no means am I in any way perfect in any of this believe me okay thanks for anchoring that long appreciated so let's listen to value take care right now in Germany in no way am I am I you know I I joke around with my friends and with you know my girlfriend say you know god help us if I'm one of the better examples of what we have out there because that that's that's bad news situation if you know if I'm long the cutting edge of where we really need to be you you it's a bad example overall of what the bar we want to really set because I fail in a lot of this okay the point is who your best keep going forward don't it's never accept where you're at there's always another step take you know it's a process it's a process all right so it's great ain't no problem we got off the top of the food a little bit but not a problem at all there are no taboo topics here you can call in talk about anything you want to talk about here on another caller from Southeast Pennsylvania you'll be the last caller for this evening you're on what on earth is happening what do you have for us Haymarket Sarah get down okay Eric how you doing my friend now I'm still going to have this radio show us as much as my eyes were open you have española open my eyes my mind much further and realizing more and more how far down the radical we really are I mean it really does seem like most of society really dominate their little tree hole and I mean they they just don't really understand cuz I wrote a list here because I know you're almost out of time I wrote a list like ten different things that I could've just the problem here I just want you to list really quick and you just take upon the black preparing that word prozac aspartame the monetary system the means do you mean like drama shows just overall insanity there's a lot of this or historical references or making lame excuses for why their lives are the way they are okay can act for parent that's complete terrible parents about that it don't really teach their kids how to survive on their own or themselves in the school system any doctrine Isha system for the city system brainwashes our children and I mean I could probably write a list of God maybe few hundred things here that are the problem I mean isn't a lack of ugly but there's this thing you know hope for the best expect the worst and should expect the worst because I see things getting much much worse as we progress here things are going to get Hera you're going to get tight it's going to be it's not going to be easy okay but I think if we pull together to share what we know and and D examples don't put other people up on pedestals that's that's that's one of my main messages you know we went to see David Icke people come they hear what he has to say oh would I like that up on a classical he's speaking his truth he's speaking the truth of what's going on they like him do he's doing you know get out there bring this information forward it as many people as will take any part of them and listen and change even a little I told we have climbed forward laid our case for calling in there have a good night thank you Mark I appreciate a brother you got up soon ladies and gentle you've been listening to what on earth is happy

What On Earth Is Happening Show #031

Topics: *Mind Control Methodologies, The State Of Our Food, Nutrition & Consciousness*

[Music] welcome ladies and gentlemen you're listening - what on earth is happening right here on the revolution broadcasting radio network I'm your host mark passio my website is what on earth is happening dot-com the network's website revolution broadcasting com this show is live every Tuesday evenings from 7:00 to 9:00 p.m. Eastern Time we have a packed show lined up for you here today we are going to continue the discussion that we started last week about food food as a methodology of mind control through the destabilizing of the body and the mind-body connection that's what we're going to continue to talk about here today and in the coming couple weeks this is such a big topic it's such an important topic it touches everyone everyone that eats that is as far as I know that's everyone on this planet and you know not to belabor the point but and make this a show about food but this is such a critically important topic to understand and to really grab the reins of because it is something that we have within a modicum of our own control what we eat what we put into our bodies when we understand just how important that is this topic becomes one of the most critical topics in the entire world particularly when as it relates to human freedom and what I'm going to try to do over the next couple of weeks is really help people understand how the topic of food and the topic of human freedom are in Ex trick ibly interwoven so that's going to be the topic of discussion here this evening hopefully we'll take some calls from the audience as well well to do before I give the callin number for the show is read a few event announcements for events that are coming up in my area the reason I do this at the top of the show is because it's all about action folks that's what it's about it's about taking action it's about taking right moral action in the world that's what the great work really is and therefore I like to highlight some of the events they're taking place in my neck of the woods so here we go the event announcement the free your mind 2011 conference fundraiser this is coming up in less than two weeks next Friday not this Friday coming up the following Friday November 5th the 5th of November 2010 at 8 p.m. at liberties in the Northern Liberties section of Philadelphia Liberty's pub liberties pub is at 705 North 2nd Street that's basically at second and Fairmount streets in Philadelphia there will be a $10 donation requested at the door the event will feature a live musical performance by the the folk guitarist and songwriter chip Raymond and there will be a 50/50 raffle all proceeds for this event will go to offsetting the cost to bring in the out-of-town speakers for the free your mind conference in April I'll read a bad event announcement in a couple of moments tickets for the free your mind conference will also be going on sale on November 5th 2010 tickets for the conference will be available at the fundraiser for the first time anywhere the people who attend this fundraiser in Philadelphia will have the first chance to purchase tickets for the free your mind conference and there is limited seating available at the conference there is only room for approximately 200 people we're going to print 200 tickets for each day and once they're gone that's it because there are you know fire codes for the building and we are going to sell that building out we are going to sell this event out for certain so that's the free your mind conference fundraiser Friday November 5th 2010 8 p.m. at Liberty's second and Fairmount $10 donation at the door live music and a 50/50 raffle all proceeds go to the cost for bringing an out-of-town speakers for the free your mind conference next event announcement the UFO et Congress 2010 November 13th and 14th at the Ramada Inn 1083 u.s. highway 206 North in Bordentown New Jersey this is a two-day event hosted by Pat Market ilio also known as dr. UFO Saturday the event starts with a 9:00 a.m. registration there's a 10:00 a.m. welcome speech by Pat who is the master of ceremonies for the event the speakers Venice then okhla will be talking about UFOs crop circles and visitors from extraterrestrial civilizations dr. Julian salt that will speak on the global crisis and the New World Order's present situation Dan Smith his topic the best possible world and its best possible ending jacqueline de leeds ET forces of light will Allen and a special guest the topic proof is in the pictures UFOs over DC and UFOs filmed by astronauts those are the speakers for Saturday for Sunday a 9:30 a.m. registration and then a welcome speech by Pat Market ilio at 10:00 a.m. I will be speaking at this event very honored to do so I will be giving a talk called don't count on disclosure about the deepest reasons for the worldwide cover-up of the UFO phenomenon mr. bill Weber will be giving a talk called 1930s German flying saucers butch witkowski his topic underground bases and human mutilation investigations Tim Heckman will be discussing area 51 Joel Dean will talk about UFO abductions and sightings the directions to get to the Ramada Inn in Bordentown take the New Jersey Turnpike to exit seven then take route 206 north about a quarter of a mile and the Ramada Inn is on your right free parking is available convention cost is $135 for the weekend if you register in advance at the door cost is $75 per day for more information about this great conference please go to WWF o RG x dr u fo RG u fo ET congress 2010 next the end of the Fed rally I believe they're doing another fed stock rally where they're going to have concerts on the lawn at Independence visitor center this is going to be happening on November 20th at 11 o'clock a.m. in Philadelphia first component of this rally is at the Federal Reserve building at 6th and arc streets then everyone will be there'll be some speeches out outdoors at the Fed building and then they'll be moving to the lawn at the independence Visitor Center at 5th and market where there will be more speakers and a concert for more information about this event please get involved the Federal Reserve lies at the core of the erosion of our natural god-given freedoms in this country and throughout the world it is one of the chief organizations that is attempting to destroy individual sovereignty and freedom and you can check out and the Fed dot us and for more information about the local organizers in Philadelphia go to truth freedom prosperity org truth freedom prosperity org finally the big event coming up in Philadelphia in the first quarter of next year the free your mind conference a conference on consciousness mind control and the occult free your mind is a unique two-day conference scheduled for April 9th and 10th 2011 in Philadelphia PA featuring multiple speakers and diverse educational materials for the purpose of raising public awareness of the critically important topics of mass mind control techniques the covert and subversive influences upon our consciousness and behavior trauma based and ritualized abuse and the practical mental and emotional healing methodologies available for though was affected by these devices the dates are Saturday April 9th and Sunday April 10th 2011 the time 10 a.m. to 8 p.m. both days that's the program the doors will open at 9 a.m. on both days the location is rubra hall ru be a hall at 4 1 4 414 Green Street in Philadelphia PA admission price is $20 per day the confirmed speakers for the free your mind conference thus far Erin McCallum alfred weber Andrew basiago Bob tuscan farah your dozous jaan Irvin Jay Parker John Nicholson Larkin Rose Laura Magdalene Eisenhower mark passio Mel fàbregas Michael Kelly and Suzanne Taylor and we are still in negotiation with some other speakers time will tell about how many we fully confirmed we'll have live at the for your mind conference that will also have to do with how well we do with the conference fundraiser and new speakers will be announced over the coming weeks the free your mind conference April 9th and 10th 2011 in Philadelphia for more information visit the conference website at WWE your mind conference calm those are the event announcements for this evening let's jump right into the topic which is a continuation from last week and as I said last week I prepared a laundry list of aspects through which to talk about this problem and that is what we will be doing in this portion of unfolding this topic about food we'll be talking about what is wrong we will be talking about the problems with our food we'll get into solutions at another time we will be discussing some solutions as we talk about some of the problems but mostly this is to alert people this portion of talking about food ok it's to alert people who may not be aware of some of the problems that are currently present in the food that we buy and eat and I'll tell you something there are not as many people who are conscious of this as we might think some of the people who are aware of the problems with our food it is not as widespread knowledge as some people may think and this is why I'm doing this portion of the show because I see with my own eyes some of the types of diets that people have in freedom movement itself and it is uh it is an ongoing issue knowledge is the first part of it and then willpower is the second part of it because all the knowledge in the world without the willpower to put it into proper action is useless knowledge is not power contrary to the popular saying the application of knowledge is power that's wisdom if knowledge is used in a way that can support our ongoing evolutionary development to higher states of awareness and consciousness then it becomes wisdom and that's when it is power that's when it becomes powerful knowledge in and of itself is simply a potential and that's what this show is about it's to put that potential power out there for people help them to understand some things that they may not currently be aware of and then they are in an empowered position to take right action in the world with that knowledge so last week some of the aspects of food that we covered were chemical pesticides and fertilizers that are used to grow crops and how dangerous some of them are many of them are preservatives that are added to give food longer shelf life very very poisonous substances that are added as preservatives to our food we talked about food processing pre packaging food in the name of convenience but essentially robbing the nutrient value from that food and more of the food is necessitated to basically make up for the lost nutrient density of the food when it is heavily processed we talked about chemical dyes and bleaches that are used in foods to make it look more attractive um we talked about excessive amounts of refined white sugar white flour high fructose corn syrup we briefly mentioned excitotoxins artificial sweeteners these are Splenda or sucralose saccharin of course aspartame which was originally developed as a nerve agent yes that you heard me right it was originally developed as a a neurotoxin nerve agent a military application and then since that didn't work out for the company Searle pharmaceuticals they decided to market it as an artificial sweetener and that's a true story you can research the origins of aspartame now what I didn't mention last week were the alternatives to artificial sweeteners that people should be aware of and there are some good ones there's agave there's raw honey now if you're watching your blood glucose levels I myself am diabetic I have type 1 diabetes which is a juvenile form of diabetes my pancreas does not create necessary insulin to take the the carbohydrates out of the bloodstream and into the cells so blood sugar builds up in the blood this is a for my condition of diabetes um it was a latent onset they call it adult onset juvenile diabetes some people refer to it as a type 1.5 but essentially it's a form of type 1 diabetes so I have to watch the carbohydrates that I take in and sugar that I take in so a natural alternative to some of these artificial sweeteners is stevia s Tevi a if you haven't heard of it check it out look it up it is a natural herbal sweetener stevia so that's an alternative to these excitotoxin and yes that is what they are neuro scientists have categorized these substances as excitotoxin these artificial sweeteners like aspartame sucralose saccharine etc they are a category of compounds referred to as excite excited excited or neurotransmitters except I'm sorry excitatory neurotransmitters you look up that term that's basically what an excitotoxin is classified as sight scientifically it they are excitatory neurotransmitters that's the class of compounds that artificial sweeteners are generally classified as by neuroscience excitatory neurotransmitters look up that term and if you look up who some of the funding is is provided by to do some of the research on the health effects of artificial sweeteners you see that all of whenever you look at a research that has been funded by the organizations that use or manufacture these compounds these dangerous chemicals you'll see that the results always magically turn out to be safe that they are considered safe for human consumption whenever an independent investigator E agency or scientific team does the research on these compounds you see that they always find many health detriments that are caused fundamentally connected to these chemical compounds so stay away from the chemical artificial sweeteners you're not doing yourself any favor by not using a sugar although refined white sugar is just as dangerous in many cases if a lot of it is used switch to raw sugar turbinado cane sugar turbinado cane sugar is a great alternative again if you're watching your sugar intake in general or if you're diabetic stevia is a great alternative some people use xylitol as an alternative sweetener as well so those are the excitotoxin of the artificial sweeteners I posted a great video on my website in the podcast section about excitotoxin by dr. Russell Blaylock leading neurosurgeon so moving on trans-fats is something we didn't really mention much trans-fats groove the arteries around the heart making cholesterol lodge in them cholesterol would not ordinarily be a problem people think it's a dangerous substance it isn't the body would normally handle cholesterol fine there are a few things that create problems with cholesterol lodging in the arteries this is the grooving of the arteries of the heart this is caused by the intake of trans fats so homogenized oils you want to stay away from homogenized oils a modernized vegetable oil any kind of homogenized noodles this is a trans fat and it grooves the arteries it creates heart disease doctors are so concerned about cholesterol levels cholesterol would not be a problem if it were not for a few substances and processes that are in our diets trans fats being one of the biggest the other thing is chlorine intake and almost all municipal municipal water supplies have chlorine in some form added to the water supply the water reserves that we drink if we drink tap water and that we bathe in if we bathe in you know a normal house water that comes into our indoor plumbing without any filtration done to it so chlorine in water is extremely dangerous and this is whether you're bathing in it washing your hands in it anything chlorine gets into the skin very quickly goes through the pores drinking it is the worst thing to do but we bathe in this stuff we breathe in the vapors from it I know you can tell in Philadelphia for sure there's tons of chlorine or chlorine derivative in our water supply this creates arterial grooving as well Cory grooves the interior lining of the arteries therefore creating heart blockages this is why heart disease is so prevalent in the United States it's the number one cause of death in this country so trans-fats stay away from try to stay away from chlorine if you could afford whole house filtration systems do it if not colder showers are better than warmer ones because doesn't create as much as much vaporization of the water definitely get on to purified drinking water instead of drinking tap water which brings us to one of the next things fluoride in the water supply fluoride is a poison it is a derivative of a byproduct actually of the aluminum manufacture industry yes you heard right if you're not aware of this fluoride in our adding to our drinking water in most municipal townships has fluoride added to it this is a poison it's used as the main ingredient in all forms of rat poison it was added to prisoner prisoner of war drinking water to keep them docile in prisoner of war camps and other concentration camps because it basically calcifies the pineal gland it destroys the will to resist it basically destabilizes the thought processes it creates imbalance in the neocortex you're on a lot of fluoridated water critical thinking is going to become more difficult resistance to any kind of control is going to become more difficult wanting to stand up for yourself wanting to take personal responsibility is going to be slowly bred out and this is done by design this is done by social engineers that know what this compound is capable of doing to the brain and people think oh they wouldn't do that they think it helps your teeth nonsense nonsense they know exactly what it does maybe not the the dumb people the unread people who are just following their orders and adding this stuff because they get a paycheck who don't care as long as I get a paycheck I'll do whatever I'm told add whatever poison I'm handed into drinking water and ultimately they're responsible they're the people who are responsible for doing this because if you didn't agree to do it it wouldn't get done and that's another reason this I talk about this all the time that's a reason to show you know isn't very popular with people who don't want to hear that the answer to all the problems of the world is personal responsibility because I'm not the person if you're going to listen to this show to hear blame placed on the elites you know and that this higher class of controllers that controls everybody's waking actions you're not going to get that on this show yeah they're manipulators they manipulate things they try to keep information out of people's hands but you know who does that ultimately we do we take the actions that they tell us to take we keep we sanitize the information in the media and in the schools because we want a paycheck see that's how it works and that's horribly unpopular right there speech like that what I'm saying horribly unpopular no one wants to hear that then we're the ones who does this to ourselves they want to hear it's all something that's out there out in the external reality you want to know who your enslaver is look in the mirror that's who your enslaver is we get out of those modes of thinking and get up to a higher level of consciousness that situation will end because we'll stop enslaving ourselves we'll stop doing actions that are ultimately immoral and wrong and one of the best ways to start that process is to stop eating poison when we get on the healthy food we start building our brain in a better way and that helps us to make more informed decisions and choices about what we do and how we act in the world that's why food is such a critically important issue okay they need to control people's minds and they need them softened up in order to do that so if they can get them destabilized and in a complete state of imbalance by the junk that people put into their bodies and man I'm telling you yeah I need to look no further than Milan family some of the things Oh the diets of people in my family i I mean I don't even know where to begin don't know where to begin chocolate-covered marshmallow treats you know candy wafers no those are those thin wafers with the cream in them yeah they love them they eat them up juice drinks chips with tons of hydrogenated vegetable oil peanut butter with hydrogenated vegetable oil white bread real high nutritional value good stuff and wonder why they have no will to resist can't pay attention for any length of time smoking two packs of cigarettes daily drinking eight cups of coffee with six spoons of sugar in each cup of white refined sugar or artificial sweeteners and then wondering why you can't think straight why you can't pay attention why you have no will to resist it's a it's a mystery I can't figure it out what a mystery so let's move on to something else oh we talked about okay the trans fats that's one of the things that grooves the arteries chlorine is another the third thing is a homogenized dairy okay this is an unnatural process of homogenize a ssin and it also creates problems with the artery walls it also will create gluing these three things in conjunct if people stayed away from these things 90% of heart disease would disappear and your doctor won't tell you this folks because they get no nutrition training they get no nutritional training in medical school you know they're convinced that the body is purely a computer there's no mind-body connection and they won't tell you that what you put into your body based on what you eat and drink is basically what generates your health a simple truth so simple it's almost comical it's all as you can almost laugh hysterically at how simple it is and yet people still don't get it you are what you eat at least the body computers part of you and and make no mistake I'm not claiming when I use the word body computer that the body has a component of it that acts like a biological computer in no way am I saying that is who we are I'm saying that is a component of the of the body a component of who we are okay that is a component of it it is one part in the holistic um whole that makes up our physical makeup in in the in the 3d world okay the body is not simply a computer it is more than that because it is connected to the mind it is connected to higher states of consciousness and awareness it's connected to spirit ultimately so these three levels work as one they work in conjunction with each other spirit mind and body body being the lowest level mind being above that and then spirit being above that but again in order to control that middle layer that mind component that exists between the body and our true spiritual selves the higher self they need to destabilize the body as well if the body is working in good functioning convicted condition and there is proper brain health it is much more difficult to manipulate and control the mind therefore food is one the most powerful weapons in the arsenal of the manipulator who wants to exercise mind control over a population I mean this logically follows the mind is the lair they're going after they can't control the spirit impossible it is uncontrollable because it is the base essence of everything that is so if they ultimately want to control the body they have to control the mind which is the layer that acts as a buffer between body and spirit and the best way of doing that is to attack the body and destabilize the brain is the levee geological layer that acts as a liaison between mind and body so that's what it's all tomorrow die--and in our food chain and this is by design social engineers psychopathic social engineers understand perfectly how this works they understand this because essentially they are a cultists and they are utilizing knowledge that is essentially the most ancient forms of psychology the study of the human psyche that has have existed and it have been tested out for Asians through different networks of occultism and secret societies if you don't believe that you're extraordinarily naive this is something that the freedom movement oftentimes will not look at they want to think it's all political they want to think it's only about hey who can we vote in to represent us and they'll fix it they'll make it all better you talk about the occult with these people they don't want to acknowledge its existence like little frightened children I call them the tenth pictures I'm going to take my tenth as I'm marching up this mountain I told you I would go all the way up to the peak to the summit with you and you're trying to show me something that exists way past the mid level of the mountain and way up near the summit area and I don't want to go that far I'm taking my tent out of my backpack I'm setting it up right here maybe a third or half way up the mountain and that's it I'm done the tent pictures let's pitch my tent halfway up the climb to enlightenment and say this far and no further well good luck with that good luck with that let me know when you're done with that and I'll be here explaining you what's really going on in the world okay because if you want to ignore the occult aspect of this you have a partial picture and that's the most dangerous thing there is is somebody with half knowledge half knowledge I'll I'll listen to part of it and then I'll just discard what I'm not comfortable with with no investigation Einstein and said the that that condemnation without investigation is the epitome of human ignorance condemnation without investigation is the epitome of human ignorance absolutely true people don't want to look at things they want to make up their mind their mind is already made up some people don't think mind control exists in Isreal right in the freedom movement they'll tell you there's no such thing totally asleep anybody that thinks this is totally asleep you've woken up to a tiny tiny tiny fraction of the reality you're embedded in and good luck staying there frightened child frightened little boy or girl and again this isn't a pup this is not a popularity contest folks I don't come on the air to tell people what they want to hear or make them feel comfortable I don't come on the air to scare people either I come on the air to tell people what's going on and to empower them if they really want to make a change that they really want to understand the causal factors that has created what we call the human condition and how to get out of this condition and into a better one that's what I come on the air I'm not here to make friends I'm not your guru I'm not your buddy okay I don't do this because I I think doing this is going to make me a lot of friends in case you haven't figured that out so to get back on on the topic of food okay yes this is social engineering this is by design people are being poisoned by design it's a hard thing to accept that's a difficult thing for most people to swallow but that's what's going on because a tiny fraction who's controlling all these industries and who's controlling government is controlling finance they know what they're doing and they're calculating it very deliberately they know how this mind body spirit connection works and they're out to destabilize the body attacks on every front on the body the front lines okay so the three things that create arterial grooving trans-fats essentially hydrogenated oil stay away from margarine halt margarine is pure poison pure poison and in the past they would tell people how good it is how great of a substitute for butter it was do not buy margarine it is poison all of it it creates heart disease and it's still on the market this is still being sold all right trans fats chlorine in our water that we drink or showering and homogenized dairy you're going to eat dairy try to eat raw dairy raw milk raw cheese live enzymes still in it that are not killed in the pasteurization process or the homogeneous ation process homogenous Asian is not good for you okay let me briefly talk about another form of excitotoxin monosodium glutamate MSG this is a taste enhancer this and other taste enhancers are also excited toxins they are excitatory neurotransmitters MSG monosodium glutamate it's a it's a poison is what it is and they add it to the food because it basically ignites on the surface of the tongue and makes everything taste better a taste and answer okay that's why they add it into food people get addicted to things with MSG in it because they're there they're getting a rush like a drug when it first hits them that's how they're making food taste better adding these taste enhancers like MSG msg is an excitotoxin stay away from it um the entire fast food diet McDonald's Burger King Wendy's etc and I talked about last week how I was hooked on this junk okay listen I'm no perfect being I never claimed to be a perfected Bing I've claimed the unenlightened person but I'm not I'm by no means perfect the two things are completely separate and different from each other I don't think anybody in a physical body is perfect or going to be if you're here you're not perfect there's room for improvement okay so my diet man I mean I can't even barely fathom what my diet used to be like compared to what it is now I can barely fathom it I talked a little bit about that last week it's comical now when I look back at the radical transformation I used to eat at all these fast-food places and I mean a lot multiple times a week and I mean big quantities of it super-sized nope like in the movie supersize me you know two Big Macs you know not one wasn't good enough I was overweight you know probably by over thirty five forty pounds I weigh right at the 200-pound mark now and that's right about where I should be for my size and bone density but I was up there you know pushing to 40 at one point and you know I ate at these fast food restaurants constantly high extremely high fat extremely high calorie caloric intake trans fats processed food excess of sugar excess of white flour excitotoxin high fructose corn syrup you name it that this is a poison culture stop giving your money to these places that isn't food it's sewage and there are people out in the freedom movement that beneath this junk they still eat this junk they have not been turned on to the information about what's in our food and what we should stay away from again I talked last week a little bit about the gentleman who really helped turn me on to a lot of this and that was Kevin Trudeau we've been talking about this for years and Kevin Trudeau is an occultist and I would venture to say he's one of the good guys he is what he is waking up he is you know largely woken up he's got a great sight I think he's got a great radio show I value Kevin Trudeau's information his book natural cures really helped set me straight about what was it in our food and what not to do and what to do so I sent a personal thanks to Kevin Trudeau for his great book natural cures and there are others Deepak Chopra actually he talks about food in some of his material he talks about of the Ayurvedic the Vedas information about food and diet in some of his work and that helped help me to understand some better dietary practices as well so continuing on let's look at a genetically modified foods done so that crops can grow bigger done so that fields can turn over quicker even though they're depleting the soil and the nutrients of the food Santo you know check out the world according to Monsanto to understand their mentality about GMO selling a roundup pesticide and then making a seed that is Roundup Ready or resistant to this pesticide and then get cornered into using that seed because nothing else will grow in the field so this is insidious farming practices all centered around genetic modification not leaving nature's plan alone trusting that nature has provided what we need in our diet but getting in there and tinkering around with the genetic codes of nature and thinking we're going to do something good for ourselves as a result let me tell you something I don't talk about it much in my material I will if you come and see me at the UFO et Kong Congress what genetic modification is a big part of the problem that's going on here folks and that's all I'll say about that but if you want to hear more come and check out the UFO ET congress in Bordentown where I'm speaking on November 14th genetic modification is not something we need to be doing when it comes to our food it creates more problems than it solves if we engaged in smart organic farming practices we can feed the entire world 20 times over and this is proven so look into genetically modified organisms GMOs again a lot of this information it's thrown out there so you can do further research on your own I'm not here to tell you what to think I'm here to put out what I have learned about what is actually going on in the world that's why the show is called what on earth is happening with no question mark I've understood that this is what is taking place view research it and understand what I'm understanding you can come to some similar conclusions and similar understandings if you put the work and do the research hey you can just believe me if you want I don't recommend it think you should believe anybody I think you should do your own research and come to your own conclusions so how about antibiotics that are added in milk and injected into animals as a result of the horrible factory farming practices that are engaged in we could do a whole show on that growth hormones antibiotics added to animals we want to be form up quicker you know bigger and quicker and then when we pen them engage them in the most inhumane vicious ways and they get sores and and illnesses as a result of their cramped quarters then we want to inject them with antibiotics it's ridiculous look we could go on and on talking about that and that's extraordinarily depressing it's an extraordinarily depressing topic if you look up factory farming and watch some videos about this believing you'll need a strong constitution to even watch what is done to the animals that we think we have a right to do this - I'm not going to get on to you know preaching about not eating meat or anything like that I've chosen to be vegetarian the reason I've chosen to be vegetarian is because I don't believe we have a right to do that to other sentient beings and that may sound crazy and out there and far-fetched to some people even people in the freedom movement but I'll tell you what how I have come to understand the karmic forces work in this world karma or the law of attraction essentially the law of cause and effect that is the principle of cause and effect is that which we do to other life will be done to us very quite simply that's how the universe works the universe is a gigantic mirror what you put out into it is what you get back from it and people will kill and die to avoid that being true to ignore that and guess what that's natural law it exists it is in operation it has been in operation since the dawn of creation and will be in operation until this universe is no longer here which is going to be a long long long long long long time so from the beginning to the end of creation this natural law is in effect what we put into this place is what we get back from this place so I recommend people to if they have the Constitution to do so watch the documentary called earthlings and hit i just opened the whole can of worms here folks for anybody that dares to do it i'll try to post a link in the podcast section you deserve a gold medal if you can get through this whole thing I have thousands thousands of documentaries and movies in my collection thousands okay Earthlings is the one documentary that I have watched that I will never watch again I will never sit through it again I watched it twice I watched it once and was so horrified and dumbstruck that I said I can't even fathom what I just watched and so about a week later I watched it again for a second time and that was it I think it hammered the point I'm making here into me which I won't be labor but I'll just say what we do to other life will be done to us period now run away from that all you want but that's a true fundamental principle of the universe that is natural law and you won't escape from it you can run and deny it and ignore it all you want for as long as you want in his many lifetimes as you want and it will always be true I fundamentally understand that it took a long time for me to understand that it took an unimaginable level of suffering for me to understand that but I happen to understand that now and so that's all I'll say about that but should if you still make the decision to continue to eat other sentient beings then be aware that they are injected with dangerous growth hormones and antibiotics that basically go enter our body and then build up resistance II to bacteria in us when we take excessive amounts of antibiotics this is what happens so that's getting into us in many ways it's getting into us three to meet the people it's getting into us through I swear excuse me it's getting into us through our water supply as well I briefly touched on homogenized and pasteurized dairy products those are some other things to basically stay away from um another thing I wrote down here is deceptive labeling with food products see it's not just what's in the food we it's how its labeled they're not even telling us the truth about what's in some of these products there's no truth in the ingredients list they're starting to rename things they want to rename high fructose corn syrup as crystalline fructose as if you know that makes it something other than what it is they want to sell people on the idea that high-fructose corn syrup because it comes from corn is somehow a natural product that is added to our food excuse me and nothing could be farther from the truth this is a this is a manufactured chemical process additive to food and it is something that definitely destabilizes the the critical thinking of the human brain when it is present in the in the body and high enough levels and most people are are sucking this stuff down you know with soda that they drink I was on Bob Tuscon show this past Friday and we talked about food we talked about how some of the worst diets that you'll ever see are in um police I mean you just look at how police eat when they're out in their patrol cars on the street and wonder why they think and act the way they do it's not no surprise I was telling Bob I was in a CVS Pharmacy parking lot a couple of days ago and I saw cops sitting at a Dunkin Donuts next to it eating a powdered jelly doughnut you know and drinking a big you know 32 or 64 ounce soda one of those are like 7-eleven style big gulp cups you know great great for you you know really good for the health of the brain I'm sure it'll go a long way and how to act responsibly and morally right so deceptive labeling is another thing we need to watch out for one of the things it's a good example of how they'll they'll package bread you know they'll packaged bread and say oh you know whole grains made with whole grains and the whole it's basically white bread that's then you know dyed or you know has some grains sprinkled over the top of it to make it look like the whole loaf is baked with whole grains or you know whole wheat and it's not it's you know it's a deceptive practice when you see made with you have to look at the ingredients label and see how much of that is in there you want to basically look for organic it's the whole product as being all organic all the ingredients when you read the label Organic stay away from things with a lot of flour I like zekiel bread it's made with pure sprouted grains if you're going to eat bread try it I try to limit down total amount of bread I eat period because you know it's a very carb heavy and I watch the intake of carbs but um sprouted multigrain bread is much better for you I like flourless bread these are heavy Hardy loads of bread you know they're not light light bread basically means very little nutrient value so Hardy or loaves of bread you know made with pure grains organic grains sprouted grains or what you want to look for we talked about Monsanto and GMO and roundup roundup has been linked to genetic damage it has also been linked to endocrine system dysfunction documentation is available for that if you look up roundup and genetic damage um another thing I have here on my list is you know picking fruit a very soon too soon that isn't even right ripen and then they artificially ripen it because they want to ship it quick they want to know they know it's going to be out on the road they want to get it out there in order to transport it quicker right pick it faster and ripen it artificially and that's why there's such low quality of produce in a lot of places even if it is organic you see that practice you use now they don't artificially ripen it but sometimes they pick things too too soon because they want to get it out there and transport it let's see what else we have here okay so some of the documentaries that I mentioned food Inc I posted a link to that actually for a trailer to that that's available on Netflix um for people who have access to that you can check out Food Inc Food Matters I believe I posted that on the website the future of food the fluoride deception I will post the link to that this week since we talked about fluoride in the drinking water the Russell Blaylock who gave a lecture called excitotoxin the taste that kills named after his book of the same title this guy is great he is a neurosurgeon and neuroscientist who is really telling the truth about artificial sweeteners and I really commend Russell Blaylock he also talks about how they destabilize brain function he gets into the whole chemical dumbing down of the masses he really speaks the truth Russell uh again an invaluable resource everybody should really check out the work of Russell Blaylock BL ayl Ock Kevin Trudeau again his name is T are you DEA you Kevin Trudeau he wrote the book called natural cures uh if you google his name you'll get a whole bunch of stuff that's negative about him about him trying to engage in unfair business practices I've ordered things from him and I've always gotten in a timely manner exactly what said was going to be shipped I'm not really sure about some of those things I don't know if maybe his operation was a setup in in a much worse way in the past and he had problems but all my dealings with him have been fine so um specifically don't judge somebody by what you hear about other people saying about them okay you hear their own words don't check out Kevin through those website and his radio show he has his own radio shown uh you know gauge him by the information he puts out into the world and I think you'll see it's it's excellent information um so that's Kevin Trudeau generation rx we'll talk about this a little bit next week because next week I'm going to get into the drugs component of this okay so we'll look at pharmaceuticals in the pharmaceutical industry a great documentary to check out about that is generation rx I mentioned today Monsanto this a big uh agriculture giant that engages in horrendous business practices and horrendous environmental practices check out the documentary the world according to Monsanto and finally another documentary I recommend but not for the faint of heart I'm giving a warning not even a disclaimer an outright warning this this documentary can really wake you up to a lot but also again you better have a strong constitution if you're going to sit and watch this entire documentary it's called Earthlings Earthlings as in people from Earth beans from Earth okay earthlings and if you can get through this whole thing more power to you again I watched it twice just a hammered into myself and by the end of the second time I watched that I was literally curled up on the couch practically in a fetal position that's how that's how disturbing this documentary is and when you see what humanity has become when you watch this video when you see what the real inner demons of human beings how they express and this documentary will show to better than no other but don't say I didn't warn you if you want to watch it you'll become more enlightened than you were about what's done with our food and you just think we are consuming that energy you don't think that that's an energetic vibration that then goes into what you're eating you have no idea how the universe works none and I would suggest you're also very naive watch earthlings see what's done you know meet your meat so to speak you know see what what is actually done to the food that we that we think you know we believe we have a right to do this and know that that's the energy that you're eating no you know I'm not going to tell anybody become a vegetarian I'm going to say look at what's done as far as animal practices and factory farming techniques are concerned and then you make a decision about whether that's what you want to contribute to if whether that's the consciousness that you want to contribute to and I would suggest we are tend animals because we do this one of the reasons is because we do this to other living beings and I think will continue to be penned animals until those practices stop but that's that's just me you don't have to believe that you don't have to accept that I forgot to give the callin number I get ahead of myself sometimes I call in at any time I'm sorry I apologize for not giving the call in number the calling number for this show is seven two four four four four seven four four four once again the call in number seven two four four four four seven four four four when you call in you have to put in the call ID number for what on earth is happening the call ID number is eight three five one five that's eight three five one five the call ID for this show we're into the second hour now and we've been talking about food as a methodology of mind control that's what we have been discussing over the last many weeks on the show methods of mind control this is methodology number nine out of 14 overall popular methods that are used by dominators controllers manipulators they have multi-faceted techniques which they use is to get into our body-mind computer system so to speak and hack it so that they basically are controlling us from a fundamental level a level of mind-body connection that most of us are unaware of this is subtle manipulation in many cases and is done without the awareness of the person being manipulated or controlled at least at a conscious level they're not aware of it that's what this show is about is about bringing these methodologies to people's attention so that they can empower themselves and take methods to put to steel themselves against these techniques this is about empowerment it's not about fear you have to strike down fear you have to have courage to look at what is taking place this isn't negative for the New Agers out there this isn't negative it isn't negative to say hey a storms coming you better you might want to batten down the hatches that's preparation okay it's awareness and it's then taking proper action in a state of awareness and that's never negative that's never negative I'm not saying you know totally constantly be paranoid about the worst and constantly be on you know guard about being poisoned at every turn I'm saying this is a deliberate thing that is done with our food for a specific reason and once we become aware of it we are empowered through that information to take the right action but only when we take the right action have we really empowered ourselves you couldn't no and not do this and again I used the comment on the show the saying by the the Taoist philosopher Yong Ming who said to know and not to do is not to know if we don't convert knowledge into action it's useless it's meaningless it carries with it no power it becomes power in the action stage which is the male principle we opened ourselves up to knowledge using the feminine principle of receptivity of opening our minds that's the feminine principle but then proper moral action in the world is the male principle that has to be employed once we have the knowledge and I'll tell you what there are so many people out there again I can go right back we need to go no no further than members of my family and I know I talk about this a lot because you know what why what why talk about something that is farther outside let's use the closest relation relationships that we have let's let it hit home okay before I talk about any body else the first person I talk about is myself did I do this well the answer is yes I did make this change I did make this fundamental shift in awareness in awareness and action I made that paradigm change that shift in consciousness when it comes to what I'm talking about so then before we go anywhere else farther outside of you know my circle of acquaintances let's look at members of my family who I've brought this to the attention of have many of them change what they're eating and drinking absolutely not maybe it one or two but the vast majority even if they know this bill and they'll say yes I know I know what's wrong with the food because they're so conditioned to want to taste they just it's like a little child I know that's bad for me but I don't want to give up the taste that I'm so conditioned to have bombarding my tastebuds I'm used to having this kind of food in the house at any time that I want to taste this kind of this kind of taste I don't want to taste something different I'm used to this it's all fear-based and it's all self imposed toward torment if this is self-imposed suffering people who have health conditions heart disease cancer still eating the same junk and you people will ask well how could this be because their world is destroyed they do not have the will to change the will is destroyed through the food they eat it just catch-22 it's a vicious circle I don't have the will to change the food I eat because Milo has been destroyed by the food I eat it sounds comical if it weren't so sad the other component of it is what they take in through the media every day of their lives what they take into their eyes and ears and that's the other component of this we talked about in that and past weeks on the show these two things go hand in hand what we pay attention to what we watch what we read what we listen to what we discuss what we talk about all of those are connected fundamentally to what we put into our body because it's not just what we put into our body it's what we put into our body and mind so the media and the food that we eat they're completely intertwined if anybody wants to call in and chime in on any of this the call-in number seven two four four four four seven four four four once again the call-in number seven two four triple four seven triple four good call ID number eight three five one five call ID number four what on earth is happening on a talk-show network is eight three five one five hey I'll take a very small break here to inform you about a couple of things before we get back into the topic of food and hopefully a couple of callers okay um a couple of things more likely than not this isn't a confirmed thing yet but in the next couple of weeks I'll have more information on it this show is going to be moving to a new timeslot I'm going to be going back to 8 to 10 p.m. Eastern Time so instead of seven to nine the show will be going to eight to ten that is not confirmed yet we're talking about that bob has brought this up to me the commander in chief here at revolution broadcasting so we're trying to work out something different with our schedules because Bob's show is normally on in this timeslot 7:00 to 8:00 p.m. so we're going to move what on earth is happening to 8 o'clock p.m. Eastern Time that's coming up it is not 100% confirmed yet that switch will not be happening for a couple of weeks at least but you know stay tuned I'll have an announcement on that short the next thing I wanted to do is give people a little sneak peek of a radio commercial spot that I just prepared for the revolution Broadcasting Network now I'm going to try to play this back with the software that I use to stream audio let's see how well this goes I just made this and submitted it to the network this is the new 30-second spot that will be running on other shows on revolution broadcasting here we go freedom man that's what it's all about what on earth is happening mark passing consciousness mind control natural law your calls real solutions were true freedom what on earth is happening with mark passing up Tuesday nights at 7:00 p.m. Eastern on revolution broadcast [Music] there you go probably have to change that to 8:00 p.m. Eastern within the next couple of weeks once the announcement for that is made but that's the new 30-second radio spot it's going to be airing on what on earth on revolution broadcasting and basically just wanted to do something real quick to highlight some of the topics that we talked about here on what on earth is happening so going back into the topic a couple of things that I want people to be aware of when it comes to food and things that are going on in government when it comes to food if you haven't heard of this it's something that you should definitely look into and research it's called Codex Alimentarius now big word there okay this is spelled CE o de X codex okay that means code in Latin Alimentarius al I M en ta RI u.s. that means food so this is the food code the code of food okay Codex Alimentarius alright this is legislation that is basically now making its way through the European Union that is what its ultimate goal is is to outlaw nutritious foods it is to classify nutritious foods and the vitamin and mineral supplements that people choose to take as drugs therefore they will be completely regulated and controlled by the government of the European Union and this legislation is being proposed for the United States as well because once they pass it in a national super block like the EU then it will come under treaty and regulatory commissions and trade regulation in the United States so they will try to pass similar legislation here Codex Alimentarius to researchers that you should check out their work when it comes to Codex is Ian Krane I am Krane CR am ii ian crane and another is dr. Rima labo our IMA labo is l AI bo w check out their work about Codex Alimentarius maybe I'll post some lectures in the podcast on the podcast page with this show for people who aren't aware when I podcast this show meaning when I post this archive of each show that I do okay it's recorded and then I post it on my website on the website there is a tab on what on earth is happening there's a tab in the main section the main menu section called podcasts if you click that tab you'll see all of the shows are archived on that page you can listen to them or download them from there you could put them on your portable digital music player uh these are completely free no registration or membership is required to download these or listen to them okay and with each show I post a related section so there is a related documents related pictures every week there's related pictures some some days when I talk about a document there'll be a related document some days when I talk about videos or documentaries I'll post related videos so you can go there and those are resources that you should employ again these are confirmations these are corroborations of the information that I am presenting on this show so avail yourself of this information I don't post it for my health I post it so people can go and branch off into different topics of research and and do your own research that's what it's all about I see we have a caller here we go caller from Southeast Pennsylvania you are live on what on earth is happening from Southeast Pennsylvania you're live on what on earth is happening are you there all right going once going twice gone all right I don't know whether that's a technical problem where they just got cold feet but if anybody wants to call in again the call in number 72 for triple for seven triple for and the call ID eight three five one five let's look at um another piece of legislation okay Codex Alimentarius is something that is proposed in the EU and again they want to bring this over to the United States it would be totally stringent regulations on vitamins minerals and basically it would make the it would make all the the supplements dietary supplements in - it would make them classified as drugs so they would have to be they would be treated as controlled substances now one of the things we're going to talk about in connection with food as I'll get into next week is drugs in general being controlled substances I think that's a ridiculous idea I think there shouldn't be anything called a controlled substance I think what we put into our own body is our own responsibility personal responsibility individual responsibility there should be education about substances there should be responsible use of substances based on freedom of choice but controlling drugs deciding that what you can and cannot put into your own body ridiculous and anybody that really accepts this notion doesn't understand what true freedom is they certainly don't understand what true responsibility is and people say oh but how people would act if they got on things yeah yeah maybe people would act irresponsibly if they took a substance and then acted crazy while on it but then they shouldn't be held accountable for taking that substance and then acting crazy while on it personal responsibility and accountability for one's own actions you want to drink tons of excess excessive amounts of alcohol and then beat your wife you should be held accountable for beating your wife if you want to smoke excessive amounts of marijuana and then go try to operate machinery and hurt yourself well you're going to be held accountable for it know if you want to smoke a you know angel dust and then go try to drive a car you kill somebody you should be held accountable for killing somebody with a car but that doesn't mean you shouldn't be allowed to choose what substances you put into your body why because it comes down to a fundamental fundamental principle of ownership who owns the body do you own your body or to someone else on your body well if you own your body only you are responsible for what you put into it if someone else owns your body they can tell you what you may or may not put into it I happen to fall on the former side of that equation and think I own my own body I don't think I know my own body uncertain of it I'm absolutely 100 percent sure that I own my own body the body is my vehicle for the expression of my consciousness in this reality therefore I own it I'm the steward of it while I inhabit it while my spirit inhabits this body I'm the steward of it aka the owner of it therefore I get to tell me what goes into my body and what does not that's what freedom is that's what personal responsibility is people want to hand that over to somebody else and say you make the decision over what's okay for me to put it in my body it's all it really comes down to people want to run away from personal responsibility another so getting back to government regulation that's what led into that and we'll talk about that next week we'll get into psychedelics a little bit maybe also when we get into the medicine component of this okay that that'll be for another week the House Resolution 875 look into that piece of nasty legislation that's circulating in the United States Congress hr8 7/5 disgraceful legislation that wants to try to ban organic gardening for personal use control all sources of food control all sources of sub dietary supplements absolutely absurd reclassify things as drugs these people have a god complex their power their corrupt power has gone to their head and they think they're God that's what this is all ultimately about you want to know what it's about that's it right there in a nutshell controllers think they can get away with anything because they make laws and hide behind laws and think they're above the very laws they make and they think they can dictate to the people of the earth as God's just as an aside I see we have a caller caller please hold on I'm going to get to you in one second but just as a brief aside when it comes to lawmaking there's a law going around in New

York City that wants to try to band used book sales that you're not allowed to resell a book I mean this is the beginning of book burning essentially and they're going to do it through bureaucracy through legislation want to tell you you can't sell a book to another person the stores can't sell used books only books that are printed now because they want to remove some of those out of print books to have a lot of valuable information in them from public circulation it's just another power play to control information and imagine that there are people who would even entertain this notion and vote on it there's even worse there are cops that would go in and and enforce this nonsense imagine this imagine how dumb you would have to be to enforce a piece of nonsense like that how shut down your consciousness would have to be yeah that's what jelly doughnuts and tons of diet soda will do to a human brain and you know say it's just quite sound caustic about the way I worded I really could care less okay this is why food is so important because you have brain damage Neanderthals it would go and actually do that for a paycheck I'm going to prevent you from selling a used book really really this is this is what it's come to for real I don't even know what to say about it I'm speechless caller from Southeast Pennsylvania you are on live on what on earth is happening what do you have for us I markets pres Chris how are you good mark mark listen um I did watch that video Russell Blaylock with the excitotoxin so I found out very informative and somewhat somewhat scary the thing I want to mention and you kind of touched on it with the House bill there's this legislation it is you know very close its close for the people think there's that there's a Senate bill at spot 10 I noticed when I started talking about products element areas about six months ago people thought I was crazy and I try to tell them you know it does exist they are holding conferences every year and yeah I just got like blank stares yes yeah I mean they don't want to believe that this is what it has come to they don't want to believe that this is what's taking place right under their nose I mean this is a publicly available you go right to the government site I'll post the link to HR 8 7 5 right is I asked my mom because I was trying to feel out what was going to take to wake the gentlepeople up I asked my mom this is a while ago I said if they if the government says that you can't take your vitamins or that nutritious food is is a legal world or regulated are you gonna stand up on your hind legs then and my mom said yes she would I'm saying ok so there's the line if they go that part maybe that's the line but you know I tell I tell my folks about the aspartame the problem is this yeah that stuff's oh so damaging to your brain I think your blood brain barrier and it's addictive so they're hooked or anything by it any kind of diet soda anything like that diet yogurt anything diet and they leave a quart aspartame anymore they called phenyl alanine because they try to hide it just like you're selling out the crystalline fructose they try to hide what it really is and you know and they call that MSG hydrogenated or nora or whatever it is and if they're trying to trick people so they can and now I'm hearing I'm also hearing now that you know they're just say we're not going to disclose what's in stuff anymore oh yeah that they don't want to have to list the poisonous ingredients that are in food on the label on the ingredients label and this is why you know we should hold people's feet to the fire about insisting that this is on the food labels of the food we purchase Annie we have to know what the ingredients are what we're buying that's how we can make informed decisions and ultimately this power to change what is put into our food lies with the people who buy this because if they don't buy this junk the manufacturers will have no choice but to stop making food with this junk in it it's although voting with what we purchase to eat and people keep going to the same stores and keep buying the same sewage they're going to keep the manufacturers are going to keep making things with the same sewage in it it's the same vicious circle that you noted that in the media it's the same thing with food I mean like you just said the food is taken away their will to stop eating the bad food yes exactly obviously I don't hate break that cycle I think it's an act of God that breaks that cycle because I talk to people my family and no one listens to me at all and I'll see some of the stuff I read about like this can't be true and then you're looking like it is true it's so far out there that even you know you can't believe sure I expect them to believe it's true but see my folks always the older generation they they believe the government's going to protect them they believe that the FDA is going to protect them and look out for them well that's a bunch of that's a bunch of garbage and it's just the opposite and I pray my mommy because when you when you start worrying about your government that's when you're going to wake up I totally look at you if you guys are not worried about your government that you have nothing to worry about Mike but if you if you're if you don't concern about your government maybe not looking out for the best of you now you might have some concerns that you might want start looking into Chris I'm going to tell you what basically does get people out of that cycle and it's really the only thing that can get someone out of that cycle and that is the admission to oneself of the three most powerful words that are ever spoken I was wrong that's it you have to look at the availability of information like like David Icke said on last week last weekend in New York City the best way to start is with a blank page you have to give up your assumptions of what you think you know start with a blank page and then start doing your research and don't bring any of your baggage in with you when you do the research watch read listen and you have to take in information from an eclectic variety of sources this means very wide and varied that's what eclectic means all over the spectrum basically okay you have to take in information through an eclectic variety of sources then you have to weigh all of that information and come to your own conclusions about what actually is and the only way you can do that is if you put the time in you put the attention in and you then weigh that information in the balance in a critical way and then you can say does this fit this visit conclusion I have come to fit with my formal way of seeing the world my former perceptions and if the answer is yes then go right ahead go eat your junk okay go eat the sewage in the excitotoxin x' and the high fructose corn syrup and the trans fats and enjoy the state of health that you garner as a result of eating like that and enjoy your frequent trips to the hospital in your older years you know and enjoy you know the surgeries that you'll need and the medications you'll need to be put on and the amount of money that will cost you enjoy that but if it doesn't fit in with that former worldview that you held then you have to say something to yourself you have to say I was wrong and that's the beginning of coming out of that cycle once that admission is made then and only then can you really employ the will to change your behavior and change your diet and the reason this is so important is because this thing diet what we choose to put into our body is still this day is still largely within our own ability to control and if we don't do things the whole people speed to the fire to keep you know the availability of nutritious food the availability of dietary supplements etc of clean sources of water we're going to lose that ability to maintain a modicum of control over what we put into our body that's why this issue is so critically important event of that thought process is opening up to the idea that you may not have all the information and you may be wrong about what you currently think about how you eat like Chris yeah they made that point one of the documents you put up I think was Food Inc where they said they gave me example human growth hormone how the public stood up and said no we're not putting up with this and pretty much put that that issue to rest and and you're right I mean as long as we're not going up to point on the road we're getting to that point we will we will be able to vote with our dollars and if we say we don't want it then then we won't you know we won't buy it but you know and not to come up with something else but you have to keep trying and I'm sure they will but if we go too far down the road we become into that vicious circle like you're talking about where we'd all the ability anymore to discern it's funny you mentioned the I was wrong because that to me is a prerequisite to have the blank slate you have to be able to say that and I was sort of someone last night about that on the phone and I said what was it that Fonzie could never say on the happy days you can never say these three three words right and I was a lesson and of course the gut that dope I was talking to he didn't understand what I was saying but he's asleep as can be but I said he couldn't say I was wrong because that's the hardest thing to do but I've done that I've done it with these I think I would provide full of yes but no I Bradley for 42 years of my life and then pick up the pieces and learn the remainder then we'll just keep it system no I'm right I'm right Norma and then suffering as a result that's right that's exactly right that is just a brilliant point right there that's what it's all about yeah he could Fonzie couldn't say I'm sorry the words just couldn't come out of his ears really it couldn't say wrong I thought that I thought I was ready propria because it's not easy to make you're wrong but you know what if you're going to move on it start over you have to do it and we don't have to do it I mean at some point I take a lot of people were to say they were wrong when they start seeing the tangible effects of their their being misled right right right even sometimes they won't then they'll go to the grave you know I can tell you members of my family have cancer have contracted cancer you know had parts of their body cut out and still won't change their diet walking around with hernias because they're overweight walking around with all kinds of heart conditions and diseases or I could say is in judgment iPad of sound I'm sorry I'm sorry I like to say if you're at that point you'd pretty much give it up oh yeah you don't have any software respect for yourself you know there's no suction little well there you just say oh I've done this this far I don't care what I do to my body you know let me let me tell you a little anecdote okay and this connects in a little bit we're going to talk about next week I'm a psychedelic Voyager I have been in the past okay psychedelics are something that I used as a tool I've convened with certain consciousnesses brew psychedelic mediums shall we say okay I think that's every beings birthright they choose to enter that space now while communing with the psilocybin mushroom one day in the past and this is when I was not eating so well let's just say you know that's an understatement okay the psychedelic voice in the throes of the psychedelic experience basically said stop neglecting the body the body is not to be neglected in this equation the body is important the body is needed this is an integral part of the whole that's what the voice of that of that communion said and that is what psychedelics are it's a it's an active form of communion entheogenic compounds we'll talk about this a little bit next week but I'd like to just share that as a personal experience that that communion the voice of that communion basically said what you're doing with the body is wrong stop ignoring it you know a little bit about the spiritual side of this about the mental aspect of it but you're largely ignoring the body aspect of it you know this this information about food came to me the latest in this awakening believe it or not I wish it were the other way around I wish I would have woken up to this early in the process of awakening but the food connection about how they destabilize the mind-body connection that came to me as one of the last pieces of the puzzle believe it or not probably would have been easier for you because you would have been more predisposed to take any information at this faster yes that's right well Chris always a pleasure to talk to you thanks so much calling in what do I say mark because I am NOT a 10th pitcher I'm going to the top of the mountain or I'm going to die trying you can take that to the bank well I salute you for that man and we'll be going there together my friend all right thanks Mike you take care you too man good night all right here we go another caller on the on the talks to live forum as guest number six you are on live on what on earth is happening what do you have for us Culver guest 6 are you there looks like you called in but uh you're having our problems call back in going once going twice gone okay uh I was talking about this with a friend earlier um the caller's that we get into this show again uh always amaze me always surprise me and I'm always delighted because I think we get the best callers into the show than any other um show on the internet or on alternative media period as far as I'm concerned um it's just great to see and you know it's great to see people really opening up and really deeply deeply integrating some of these concepts and some of this information let's see okay um I have a few other things about food and then like I said next week we'll get into the pharmaceutical industry and how they're really creating more problems than they solve putting people on these artificial chemical compounds that we call drugs and not telling them about how so many health disorders can be cured and basically solved by bringing the body back to balance with the food that we put into our body and it's so sad that these fields are so disconnected that medicine is so disconnected from nutrition these things need to be hand in hand and yet they are dichotomized again the first doctor of Western civilization Hippocrates the Greek um the Greek doctor who the Hippocratic oath is named after Hippocrates said let by food be thy medicine and my medicine be thy food and this is a fundamental principle that people should be living by today in the modern world but sadly so few people are I go to family's houses and I see tons and tons and tons of medication piled up bottle after bottle after bottle taking 18 19 20 25 pills a day it's unbelievable unbelievable let's let's run down a list again and just see if there's anything I still want to cover I want to again thank barb for helping me compile this list because I knew there was so many things that you could get to about talking about food that this could be a whole show in and of itself and there are many people this is what they talk about on their show and do a whole radio program centered on this because it's such a big field and it is so important to what's going on in the world we talking about deceptive labels we talked about GMO we talked about the legislation that they're passing I mentioned some of the documentaries look on the look on the podcast for this show for some new documentaries this week that I'll post links to as many as I find that I mention here tonight let's see um yeah next week we'll talk about unnecessary drugs that people take that can be solved with natural remedies surgery it's another thing that is sold a lot of times there are that are unnecessary surgeries because these are the two main selling points for hospitals and doctors they want to sell you their main products and their main products are drugs and surgery that's what that's what they're there to sell vaccines and flu shots we'll look at and we will look at antidepressants the SSRI a classification of medications this is these are selective serotonin reuptake inhibitors and I have a lot of information that I want to share on those and what they basically do so that'll be next week let's see if I if I skipped over anything on the list here um people should take a look at the movie supersize me that's something that came out a couple of years ago of a man basically lived on McDonald's only McDonald's food only for months and basically wanted to see what would happen to his physiology to his overall state of health if he just ate nothing but McDonald's food for a month and it's an interesting documentary Super Size Me something we didn't talk about yet is you know I talk about organic locally grown food as being one of the solutions to this mess that we've gotten ourselves into when it comes to what's in our food yet look at how overpriced some of this food is and this is also by design no we can't just think that some of these people who own these supermarket chains are you know such wonderful humanitarians because they're offering a better dietary choice and a better selection than our conventional supermarket these people are largely in it to make a profit and the ridiculous way that some of these organic foods are overpriced are just locking so many people out of doing what's right because they can't afford it especially people with larger families that that have to really really worry about this stuff because they're feeding children not just themselves but you know Whole Foods is no angel you know for people that shop there I love the store I think it's great I shop there some fun but there are no angels you know they're jacking up their prices to ridiculous levels because they know that they can charge a premium and get away with it because they know organic whole food is in demand they know people fundamentally recognize whether it a conscious or unconscious level that something isn't right with the food that they're traditionally they've traditionally been getting they have to eat more to get the same amount of nutrient value that their the nutrient density of their food is completely depleted that there's toxins and additives and preservatives and chemicals Laden throughout their food there are people who know about this and when they go to an alternative choice like a Whole Foods they find it you know they have to pay twice the amount that they were paying for conventionally grown foods which is ridiculous because they they're using practices that are actually not as difficult and not as time consuming and not as uh you know dependent on so many other variables to do it it's a more holistic and natural way of farming I don't see why that would cost so exorbitantly much more than conventionally grown food I guess it's because of the bulk that it's done in because it's done at a not as not as large of a bulk production rate but still I mean if you look at the profit margins of a place like Whole Foods come on I mean its rape is what it is Trader Joe's a little bit better the selection not quite as good as a place like Whole Foods I don't know if you have these in the area the country where you're at but we do in uh in Pennsylvania and I think Trader Joe's is a great store I think they're a little bit more in keeping with a little bit fairer pricing ranges than someplace like Whole Foods but if anybody wants to call it and bring up some names of other places where they shop that might be a no chain that other people can look into in their part of the country feel free you're welcome to do so so pricing I mean that's another thing that keeps a lot of people out of this that they want to shop for convenience and price and because organics aren't omnipresent they may have to travel a little bit further people are are you know loath to do that sets their normal routine their normal schedule I had to drive two blocks to go to the supermarket now I have to drive twelve or twenty be surprised you would be surprised at what turns a lot of people off to do things that they know they should be doing but they want to just be lazy they want to take a shortcut you know it's the same thing people think they're going to get to the goal they're going to get to the the pot of gold at the end of the rainbow and they're never going to learn about any of this stuff it'll just magically happen magically the world will suddenly magically transform itself you all have to do any deep reading you won't have to amalgamate large quantities of information and and weigh that with your own critical thinking capabilities oh no it'll just happen magically on its own you'll just you'll just wish for it and then it will suddenly take place you know this fake notion of the law of attraction think about what you want then magically comes to you and we'll all the traction doesn't work like that folks if you believe it does you need to get off the New Age drug that you've been taking because that's not how it works it's about wills that's why the dominators and we've talked about this before that's why they're so successful they have the will to do what they're doing they think feel and act as one they're not in opposition and people don't want to hear that they don't want to study the occult oh yeah will magically get out of this prison that we've worked ourselves into and none of us will have to learn anything about the occult right sure you will sure you will caller from Ohio I know who this is you're on what on earth is happening do you have for us hello mark how we doing tonight it's Bob Bob how are you good to hear from you good good hey I didn't know if you brought up the topic of irradiated food I did not thank you that is something that I glossed over but definitely they are irradiating food to try to kill microbes and bacteria and what this is doing is changing the fundamental cellular structure of the food that we eat and ultimately that comes down to changing the fundamental structure of our bodies because we are what we and it is also robbing the nutrient value and it is also killing live enzymes that are necessary in the food for us to take in as nature intended it so yes very very important information thank you Bob for bringing that up something I missed definitely oh that's my pleasure mark excellent topic tonight yes ladies and gentlemen don't forget that the just as mark very eloquently pointed out the the idea or what is sold to us as the public is that we're going to protect you from all the harmful bacteria and virus like things that we like to put in your flu shots but instead we're going to protect you from that in your food but what they are doing is exactly what Mark described they are killing every bit of nutrition inside there they're erasing it there it just imagine it being on a a white from a colored piece of fruit to a white pale opaque piece of fruit and that is where we're at it but it still looks that wonderful painful pinkish hue at the grocery store you know those tomatoes that have never seen the light of day what what garbage I am putting in my system and you you brought up mark that it is very expensive to switch over to an organic diet if you can even find true organic food food is labeled these days organic and it is not organic so people have to do more homework to get to what is really a new brought up Ezekiel bread thank you Mark if you dark could post on your site some recommended you know items or chains or what-have-you or food food categories and the different kinds of brands that might be good for us to check out I know I need that information and thank you market and one last thing mark yes next week if when you're going to touch on psilocybin and the sacred mushroom because ladies and gentlemen we've been bred sorry we've been indoctrinated in a culture that the mushroom the the magic mushrooms so to speak all that's that hippie drug it could be farther it could be no farther from the truth this is a sacred mushroom that was part of our reality in the ancient days which is washed of our culture now they put drugs that are horrible those are the true compounds and our first the worst psychedelic I'm talking about the Holy Communion as Mark participated in with the spirit this is the manna from heaven that would disappear quickly in the sunlight underneath the pine trees this is where Christmas has gathered around even today the Catholic garb will show the priests in gold regalia with red shoulder boards and white decoration because it represents the sacred Amanita muscaria look up John Allegro the sacred mushroom and the cross he was Britain's chosen scholar to go to the Israel in the late early early 50s late 40s to be the first British subject to look at the scrolls to looked at them up close and he transcribed a magical cult that was around Christian and that was the cult of Christianity and that we later the Catholic Church I might say and I don't want to bash anybody's religion but this was the culprit in this mess they stamped out the cult of the mushroom and mark I am so looking forward and we know why because only the priests can you get to God right only the taker of the mushroom can talk to God right they took that away from us if we're gaining it back as we move forward we are taking that back into our Arsenal into our own personal medicine cabinet because the medicine is coming back to true medicine of the shaman of the Indians we're an even our culture of from long ago we're taking it back mark thank you for this program and I'm so looking forward to next week's show as well Bob thanks so much as always appreciate it good night mark night absolutely there is a reason that they basically turned communion into a dead thing religion turned communion into something that is inert it does not react with us that does not commune with us it is just something that is consumed and it is a symbol only now in the past community was an active thing it actually changed consciousness to show you the higher level of consciousness that was available to you then it brought you back down to the level that you are at to show you this is your work your work is to integrate that level of higher awareness into your life here and now and that's what communion is supposed to be if we break down the word communion into its etymological components so we do the etymology of the word see om the root in Latin means together to bring together d om and then you neo nu I mu ni o nu neo you near a in Latin means to strengthen or to build so to come together in communion is to strengthen to become strengthened together or to build together that's what communion is that's what a true community is people who come together to strengthen each other and to build together builders right in the word it's right there in communion but sadly the active component of true communion of the mystery traditions throughout time the true positive mystery traditions has been relegated to an inert substance a piece of unleavened bread the mushroom is a sacred communion that's what it is and it should be treated as such with that kind of reverence that goes along with something like that because it is something that is truly capable if used in the proper context I into no way advocating to play around with these things and let's know they're not even things they're beings don't play around and play games with these consciousnesses because you get stung hard to not gently either you go into that and ego guaranteed you're not coming out in too much ego that's why people who were really gullet don't want any dealings with this they want to stay in their ego state you know they wouldn't dare commune with the the the higher mind of the suicide mushroom because it would do a number on them believe it it would it would break down that ego real quick but that's that's what that's what it is and we'll get into that a little bit next week when we talk about drugs and we'll look at alternatives to those things you know particularly when it comes to the psychological community what the things that psychiatry is doing putting people on on different classes of psychoactive compounds artificial psychoactive compounds is ridiculous so we'll look at that coming up next week thanks Bob for bringing that to the attention of the listening audience so we've covered a lot of ground here you have a couple minutes left I want to just remind people please keep an eye out the show may be changing time over the next couple week we may be going from 8 to 10 p.m. so keep that in mind check it out the website as Bob said as Bob asked I will try to do my best I'll try to post some links to some better food stores better places to shop some things to be made aware of some of the things we talked about on the show tonight I'll post links to documentaries for people to check out avail yourself of these reefs go up to what on earth is happening comm check out the podcast page and you'll see the related documents and video section photo document and video section posted there with the podcast so um I think that's it we'll call it quits here for tonight and again next week's show we will talk about drugs the pharmaceutical industry and the industry of the treatment of disease not going down to the causal factors of disease of imbalance but just treating the symptoms of the disease we'll talk about unnecessary drugs and surgery as being the main products of this industry we'll get into vaccines and flu shots which are is a real big hot topic going around especially nowadays we'll get into HMOs and insurance companies will talk about antidepressants and we'll also talk about psychedelics a little bit so that's all for tonight we'll see you here next Tuesday night same time 7 o'clock p.m. I'm mark passio you've been listening to what on earth is happening right here on the revolution broadcasting internet radio network good night everyone you

What On Earth Is Happening Show #032

Topics: *Mind Control Methodologies, Drugs, Pharmaceutical Industry, Western Medicine, Anti-Depressant Drugs, SSRIs, SNRIs, Psychedelics, Enthoegens*

[Music] welcome one and all you're listening to what on earth is happening right here on the revolution broadcasting radio network I'm your host mark passio today is Tuesday November 2nd 2010 my website what on earth is happening dot-com the network's website revolution broadcasting calm today we will be simulcasting live for the first hour of the show on Liberty radio live and first amendment radio I'm simulcasting in the normal slot that Bob Tuscon does is truth be told show on these networks and Bob is on assignment for this evening so I'm filling in for him in those specific positions simulcasting on Liberty radio live and first amendment radio so we have a jam-packed show again for you tonight and this show is probably going to go all over the place I have so many things to talk about so much going on um I want to jump right in with the event announcements and I have a whole lot of them because it seems that November is going to be a huge month for activism particularly in the Philadelphia area and again I do these event announcements to start the show because I think the critical thing to emphasize here is once you start to become aware of some of the topics that we talked about on this show the main thing to keep in mind is that action is required to know is not enough we have to actually convert our knowledge into wisdom which is actually taking proper moral action in the world with the knowledge that we currently have therefore I always am going to talk about activist events in this on this show I'm going to bring up things that are going on and particularly in my area okay because I the show from Philadelphia so I want people in this area to become aware of what's going on in this area in relation to what we talked about here on this show this is the cradle of Liberty okay this city this is where it all happened 230 years some odd years ago and this is where it is happening once again so there's a whole lot of events I'm going to get into here on the first is a sign waving rally for Ron Paul now again today also happens to be Election Day and one of the first things that I would like to say is that if anybody went out and voted today congratulations you're under mind control enjoy voting is not the answer it will not be touted as one of the answers on this show it is as they say trying to choose between two evils and that never works that just gets you more evil the saying in the United States goes it doesn't matter who you vote for the government still gets in and that is exactly how I feel about it I give do not give my consent to be ruled or represented I present me no one else presents or represents me therefore um I think the whole thing is a charade it is a puppet a selection you're you're picking between the the puppets the hand puppets they're going to be worn on the hands of the global elite while they basically rein everybody else in so voting you can keep it as far as I'm concerned however some people think that they don't mean to bring them true freedom that's going to be a solution to the problems in consciousness that we're experiencing good luck with that so the first event the revolution continues November 5th sign waving rally for Ron Paul this is going to be in Philadelphia on the South Street bridge over i-95 this is it and South Street in Philadelphia PA from 3 to 7 p.m. so if you're into Ron Paul's message which you know I certainly am into most of his message I think he's a an honorable person I think he's a good man I would like to see him go deeper in some of the things that he brings up I would like to see him talk about 9/11 in an honest way however in general I think he's a good person and I think he is doing a lot to educate people about the general philosophy of Liberty therefore I think people uh you know could get out and meet some like-minded people on an event like this so that's November 5th this Friday the sign waving rally for Ron Paul front and South Street in Philadelphia 3 to 7 p.m. now the next big event before I get into this I'd like to welcome our listeners who are listening in on Liberty radio live and first amendment radio I'm mark passio and this is what on earth is happening I am filling in for Bob Tuscon who usually does truth be told in these in this time slots on these two networks I'm simulcast in my show tonight for those of you who just joined us Bob is out on assignment and I'm filling in for him in this time slot okay so the next event announcement but I want to bring up is huge I mean this is one of the biggest and most important things going on in this area this month the conference fundraiser or free your mind 2011 this is a conference that I am hosting in April and we're doing a big fundraiser this Friday night November fit okay 8 o'clock p.m. November 5th at Liberty's pub Liberty's is at 7:05 North 2nd Street that's its second and Fairmount essentially in Philadelphia there will be a $10 donation requested at the door the event will feature the live music of mr. chip Raymond it was a incredible singer-songwriter in the folk music style and a 50-50 raffle all of the proceeds for the free your mind conference fundraiser on November 5th will be going to offsetting costs for bringing in out-of-town speakers for the conference in April tickets will be going on sale at this lawn raiser for the first time so people will have the first chance of purchasing tickets for the actual conference so they'll be available there for more information on the conference visit free your mind conference calm the next event I have event announcement I have is for an event that I will be speaking at this is the UFO et Congress in Bordentown New Jersey this is hosted by Pat Market ilio every year this year it is happening on November 13th and 14th at the Ramada Inn in Bordentown the Ramada Inn is at 1083 u.s. highway 206 north in Bordentown New Jersey here's the speakers and the event lineup Saturday there's a 9 a.m. registration this is November 13th the doors are at 9:30 there will be a 10:00 a.m. welcome speech by the master of ceremonies Pat market ilio the speakers Dennis denne denne Okla UFOs crop circles and visitors dr. julian e salt the global crisis and the New World Order's present situation Dan Smith will be talking about the best possible world and its best possible ending Jacquelyn the leaves will be giving the lecture called ET forces of light Will Allen and a special guest we'll be talking about UFOs over DC and UFOs filmed by astronauts this talk is called the proof is in the pictures so that's for Saturday November 13th the second day of the conference November 14th Sunday a 9:30 a.m. registration a welcome speech by master of ceremonies Pat market Illya at 10:00 I will be speaking at 10:00 a.m. my lecture is entitled don't count on disclosure mr. bill Weber will be giving a talk called 1930s German flying saucers butch witkowski will be talking about underground bases Tim Heckman will be discussing area 51 and Joel Dean UFO abductions the directions take the New Jersey Turnpike to exit 7 then take route 206 north about 1/4 of a mile and the Ramada Inn is on the right hand side free parking is available advance registration for this conference is $135 for both days at the door cost is $75 per day for more information on the UFO et Congress 2010 visit WWE forg dr UFO 0rg the next announcement every third Monday of the month this month November 15th at the philadelphia ethical Society at 1906 South Rittenhouse Square the activist group truth freedom prosperity will be posting their free documentary screening and discussion night every third Monday of the month at the ethical Society start time is at 7:00 p.m. a documentary will be screened followed by a discussion for more information on this visit truth freedom prosperity org also hosted by truth freedom prosperity the end the Fed Philly rally in Philadelphia November 20th at 11 a.m. at the Federal Reserve building sixth and arch streets and there will be some speeches followed by a March at the Fed building for more information on this go to end the Fed got us or truth freedom prosperity org I will be giving a special one-time lecture coming up at the end of this month November 28th at a group called survive and thrive it's a a survivalist group in the Philadelphia area this is hosted by my friend Fernando salgueiro and I'd like to thank him for helping put together the fundraiser at Liberty's he is hosting a basically a seminar about sovereignty and natural law as part of this survival group that meets monthly at also at Liberty's so this month the meeting is called sovereignty understanding its role and your ability to use it this is November 28th at Sunday November 28th at six o'clock pm at Liberty's pub which is at 705 North 2nd Street in Philadelphia my talk will be on natural law and sovereignty I will be giving a special one-time presentation on natural law and sovereignty and survive and thrive for more info on this go to meetup.com and in the search type in survive and thrive Philadelphia survive and thrive Philadelphia to get more info on this group and finally the last event announcement I have free your mind a conference on consciousness mind control and the occult this will be taking place in 2011 Saturday April 9th and Sunday April 10th I am hosting this conference along with some other dedicated people from the Philadelphia region for your mind is a unique two-day conference scheduled for April 9th and 10th 2011 in Philadelphia featuring multiple speakers and diverse educational materials for the purpose of raising public awareness of the critically important topics of mass mind control techniques the covert and subversive influences upon our consciousness and behavior trauma based and ritualized abuse and the practical mental and emotional healing methodologies available for those affected by these devices which as I've said many times is pretty much everyone on this planet if you don't understand yet this far in our team that the main problem that we are facing in this world is mind control and the manipulation of perception you have not figured much out yet folks that's what it's all about that's what the entire thing is about if you think it's all political you haven't figured it out if you think it's all about monetary and financial situations you haven't figured it out if you think it's about just greed or just corporatism you have a long way to go down the rabbit hole folks because it's about way bigger issues than that it's about consciousness it's about mind control and it is most certainly about the occult and this is something that very few people have little or any knowledge of and we're going to try to educate some people at this conference so there's about 200 tickets available for each day it's not a gigantic place not a gigantic room but it will comfortably hold about 200 people tickets go on sale on November 5th the location is at ruble all are you be a hall for 14 Green

Street in the Northern Liberty section of Philadelphia admission price very reasonable only $20 per ticket per day.the confirmed speakers Aaron McCallum Alfred Weber Andrew basiago mr. Bob Tuscan owner of revolution broadcast Farah your dozous John Irvin Jay Parker John Nicholson Larkin Rose Laura Magdalene Eisenhower just added this week new confirmed speaker not even up on the website yet I'll be doing that this week adding his profile to the website mr. mark motika I will be speaking at this event mark passio mr. Mel fàbregas of Veritas radio Michael Kelley and Suzanne Taylor so we have 15 burn seekers we will still be adding a few more speakers in the weeks to come this is free your mind a conference on consciousness mind control and the occult for more information visit let's jump right into our topic for tonight before we do that I'm going to give the call-in number for the show calling number seven two four or four four seven four four four once again the call-in number seven two four triple four seven triple four when you call in to the talks you call the number you have to put in the call ID number for this show the call ID number is eight three five one five that's eight three five one five I see we already have a caller waiting on the line here we go Kevin from Philadelphia you're on what on earth is happening what do you have for us Kevin are you there all right you're unmuted so if you're there go ahead okay going once going twice gone I'll try you again not hearing anything looks like having a problem a attack problem there hopefully that'll get cleared up but anybody wants to call and feel free to call in at any time there are no taboo topics on this show feel free to call in and talk about whatever you like the topic for tonight however is going to be our continuing discussion on food and medicine as methodologies of mind control this is the ninth out of 14 methodologies that I will be covering during the course of this radio show on mass manipulation techniques and strategies they are multifaceted they attack different areas of the psyche of the personality of the body mind complex and one of the biggest and most targeted and most focused attack is the targeting of the body-mind connection through food and through substance meaning drugs so that's what we'll be talking about on the show today we've been having this discussion over the last several weeks and I will try to wrap it up tonight we may go another week on this topic but if we get to the basic things that I want to talk about tonight we'll move on into a the 10th methodology of mind control next week so what we've already discussed regarding this topic is fairly expensive we've talked about chemical pesticides and fertilizers in food we've talked about preservatives added to food to give them a longer shelf-life we've talked about the endless processing of food for pre-packaging and so they could sit on shelves basically for we've talked about adding additives in food adding taste enhancers adding chemical dyes and other things to make things food look different look more attractive we've talked about the excessive amounts of refined white sugar high fructose corn syrup refined white flours we've talked about the artificial sweeteners excitotoxin and that yes that is what they are excitotoxin artificial sweeteners things that basically open up the blood-brain barrier to all kinds of other free radicals in the blood and the brain we've talked about the dangers of trans fats how these basically groove the lining of arteries around the heart we've talked about fluoride in the drinking water and how this is used to make people docile and to basically shut down the deeper sense of awareness that is part of the the higher levels of consciousness and psyche that are open to us if we strive for them and how fluoride basically cuts us off from that or helps to cut us off from that it certainly goes a long way toward that goal we've talked about chlorine in the drinking water and how this will damage the heart we talked about msg and other taste enhancers we've talked about the fast-food diet that basically has very little nutrition but super high calories and starch and sugar we talked about genetic modification of food the horrific inhumane practices of factory farming we talked about antibiotics and built and meats we talked about growth hormones injected into me we talked about Hamada the dangers of homogenized and pasteurized dairy the deceptive labeling on food you know some of the companies like Monsanto the one a patent life and basically you know make it almost impossible for organic farming we talked about oh-ho STUV issues I mean we can go on and on Codex Alimentarius HR 875 and other oppressive draconian legislation when it comes to food and organic gardening what I want to shift things in and you go up and listen to the podcast section my podcast all of these shows their podcasters on talked to and the podcast on my website what on earth is happening calm you just go to the podcast tab all the previous shows are podcasting all the topics are listed and then there are associated images associated documents associated videos etc on on the podcast page so you can do your own research on this and it is an expensive amount of material that is actually posted there what we're going to shift gears toward today is to talk about drugs drugs is going to be the main topic and we're going to talk about the pharmaceutical industry in general I want to read a quote that is going to set the mood I guess you could say for this show and this is a quote by Thomas Jefferson Jefferson once said was quoted as saying if the people let government decide what foods they eat and what medicines they take their bodies will soon be in as sorry a state as are the souls of those who live under tyranny I'll read that once again Thomas Jefferson once said if the people let government decide what foods they eat and what medicines they take their bodies will soon be in as sorry a state as are the souls of those who live under tyranny Jefferson understood this body mind connection he understood that it was all about a concerted attack upon the body-mind connection in order to destabilize the body and therefore destabilize the psyche once that is done people would be willing to basically believe anything they don't have the critical thinking capability that is fostered by a healthy body and is fall stirred by the proper nutrition that is critical for helping people to think at all let alone properly let alone critically so that's what this is all about the pharmaceutical industry wants people to believe that only drugs have the capability of generating health that it is not anything about the nutrition level that you other the the quality of nutrition you take into your body through your foods which is basically almost entirely what Health generation is about they want you to accept the notion that you need medications to be healthy and this is completely untrue you do not need pharmaceutical grade drugs to be healthy there are many people who will insist that this is true enjoy banging your head against that concrete block because that's what you're doing by refusing to accept accept that what generates health is what you do and do not put into your body 3 the foods you eat what you drink and what you take in as far as information goes as well because it is not just about what you take in physically through the body it is what you take in information wise into yourself into your psychological makeup that also generates health it is also about your condition the lifestyle you are living whether you generate health or destroy it and we are largely in control of this still you can largely choose what you put into your body still okay that may be slipping away as we speak with draconian legislation such as HR 75 and international legislation like Codex Alimentarius that is rapidly politicians are rapidly attempting to adopt here in the United States we talked about that a little bit last week and I posted some videos that are appropriate to these topics what I want to ultimately get at tonight is what the pharmaceutical industry what their aims really are I want to get it with the HMO the health maintenance organizations so-called what their aims really are I want to talk about the products that these psychopaths because let's face it that's what they are people who only care about themselves don't care about what they're doing to anyone else if you think they care about you you're extremely naive we want to talk about what their goals are what their aims are and the main products that they peddle and how to be discerning about this and understand it they are not there to help us they are there to profit from us and I want people well because that means the end of the gravy train for them they want people to continue to be sick and people think oh people don't think like that oh they're not in it for those reasons they can't possibly be that it's a very ninety position to take if anybody's still out there still thinks like this I know there are tons of people out there who still think like this you know who's out there that still thinks like this people that work for these companies because they can't possibly be doing anything bad or evil to other people they can't be participating in anything like that if they were doing something like that they would know about it wouldn't they they would know that that's what it's all really about would they really see more people are under mind control than anyone understands it's not about who is even under mind control it's about who is not under mind control there are so few people that are not under some form of collectivized trance awareness that it you can count them on one hand correct people who are part of a system that is hierarchical and compartmentalized never want to admit that they may be part of something that is detrimental to other human beings because that would mean they are unwittingly taking part in something that is immoral unethical and dangerous is love the true connectivity from Allah [Music] disconnected from living light because they have a few moments of advertisement there I'll reconnect to them in a few minutes after their ads have run so we can continue talking about this through the ad break all right I see we have another caller here Eastern North Carolina caller from Eastern North Carolina you are on live on what on earth is happening what do you have for us this evening this is my first time hearing you a great show I'm listening to you from Liberty Live and I mean I totally agree with you with I mean the food and the Medicaid I mean the medication I mean the food to the point where people are losing the taste of what natural food is we're being conditioned to eat the synthetic food and nothing else as far as the medications what's interesting that the next generation of anti psychotropics are glutamate suppressant and coincidentally all our food is full of glutamate yeah and and there are their main agendas of is of course is I'm getting everyone with a diagnosis which the current dsm or it you know the current psychologists like ecology you can anyone can get diagnosed and so a medication and as far as any type of therapeutic counseling and education the system is moving so fast it's not allowing for this type of work and therefore we're just the only thing that can be funded and the resources available are the medications and I got to tell you I work in the industry people are getting injections of the newest type of psychotropics these things cost for five hundred dollars a pop and Medicaid funding it on another topic which I've just come to and I want your opinion on it or I've been recently into livery radio live and the Jesuit conspiracy and what's your take on that there is an incredible cross over of interconnected secret society networks looking at them in isolation people often get into the the notion of thinking that it's all one thing it's all the Jesuits it's all the Freemason Masons it's all the Zionists it's all this group or that group it is Acker also go paths come together and work together that's how they get protection okay that's how they insulate themselves from the general population which has a conscience I'm going to reconnect briefly to uh Liberty live okay we're back on Liberty live those in that in that fell on earth is I'm sorry this is Mark Pass you from what on earth is happening simulcasting on Liberty radio live in the First Amendment radio I'm filling in for Bob Tuscon who usually does his truth be told radio show in this time slot we're on the air live with a caller here from North Carolina the topic for tonight is food and medicine you want to call in the calling number is seven two four four four four seven four four four seven two four triple four seven triple fours the call-in number the call ID number when you call into that number you have to put the call ID number for this show in its eight three five one five you're listening to what on earth is happening on your host mark passio my website is what on earth is happening comm so caller we were talking about basically uh people losing their sense of taste for natural foods and how they're just conditioning people to eat all this artificial synthetic stuff you also have then we had shifted gears a little bit you had talked talked about you are you know basically new to some of these radio networks and you're hearing different topics being discussed and you heard the topic of the Jesuit conspiracy this is the Society of Jesus this is uh connected with high levels at high levels connecting with the Vatican it is connected with other secret society offshoots and intelligence agencies at very high levels my response to you was it is not one group that is orchestrating and manipulating people throughout the world it is a interconnected group of secret society networks they overlap they have cross connections with each other to research this as a labyrinth okay it is labyrinth II mean to actually try to research all of the different interconnections I myself have experienced in the dark occult I spent years of my life in dark occult organizations well this is something I'm not yes good that you go into that topic because I guess the bottom line is is is is this evil being run by Lucifer or is it being run by people and and the the counter to that is do we as people you know try to change the political system economical system or is is it true what the Bible says and that God is coming and is this actually the whatever the real conspiracy to redirect people on that if you want to call it Jesus is comin and God is coming yeah well I personally don't hold out hope for a savior I believe that if we're going to change our situation and the conditions in which we live we will need to use our intelligence our care and our will in order to do that those three forces United are really what enlightenment is all about bringing those forces into unison with each other and becoming a person that as you think so you feel so you act that's what this show is all about that personal responsibility that is going to be the solution to the problems that plague this planet if we are to enact them and reach that solution it isn't going to be waiting for some external Savior to come and rescue us from what we have done to ourselves I have many reasons but I agreed I am totally in agreement but there if I have got I feel like I have gone beyond this level where you're right if you have to go through all the occult information you have to go through the dark side and then if there comes up to a point where you realize it's not about external there's an internal connection your personalized connection to God to source and his fundamental structure and obviously I'm not a Bible preacher by far but I'm just trying to make this point that um possibly our personal connection to this higher source and it's fundamentally with the prophets and Jesus and I'm telling of Lucifer running the planet and coming back this is also true I agree yes always is all about making a personal connection with the divine source of course that's what it's about that is the higher self true self what what is talked about as the universal unified field of consciousness yeah and what's interesting is all the all the new-age or lossless just call I mean just four concepts like the Jesuit conspiracy the New Age the different religions that in some way it's it's redirecting you from this personal connection with source the actual architecture of this matrix the the key to getting you out I agree yeah and that's what the food and the food and medication is all about they want to destabilize the body-mind connection because that destabilizes the mind spirit connection well they're changing that's it one the level if you don't keep people in the level of body consciousness only I was nice I mean consoling with you the thing that would add to add to that is just the they are in such a hurry to change the genetic code why are they in such a hurry to change the genetic code of this planet it seems that there's something more and of course I understand you you read you know you're very studying the dark occult it's if there is such a hurry to change the genetic code there is something much there's something divine going on they are trying to absolutely break the connection it seems like they're worried about um one person may be activating I think so again um it's just I think DNA is a living language that we all carry within us yeah and if they can be stabilized that they can get people rooted and trapped in the body level of consciousness and if you can get them trapped in identification with the body level of consciousness you have them exactly where you want them because that's what they're going to be identified with and therefore they're going to be existing in fear that's what they ultimately want they want to destabilize the body-mind connection to put it into a vibratory state of fear and that's the force that is holding all of this together that's the force that is basically oppressing the the minds and spirits of all the things of this planet fear that's what has to be conquered and courage is there force that we need to use to conquer the force of fear agree that's what enlightenment is all really about the ultimate end goal of enlightenment isn't he isn't even knowledge that's a that's a am a break you know a a means to the end but the actual end result is courage I'm going to reemphasize that over too again as the week's go by on the show because that's what we are ultimately trying to build is the courage to break this spell over this planet and sadly not that many people are at that level of courage to speak out and to teach this and to really understand it well enough that they can speak it to others and help other people to get to that level of courage and awakening but that's that's what it's altom utley about now I'd like to say something about what you said about Lucifer yeah I think it should be stressed that this word simply means light bringer it comes from Latin Lucas and Fairy looks means light in Latin and fairy looks loose Luke Lucas is light and fair a fair Oh fair a means to bring like two fairy something yeah and that's all it means now there are two aspects of the Lucifer a symbol this is a symbol I like to not even look at as a an entity so much as a symbol the entity that we're really up against is fear that's the force that is really at the highest end of this agenda and the beings that are doing the work the dark the dark work are actually doing this in the service of fear because there's severe though but while I fear of what fear of exactly what is it we are surviving there they are fear of death of non-existence they right they are right find the body they are identified with the physical or as ego based consciousness consciousness that is purely rooted in the physical and the material and because that Institute's so much fear the response in the fight-or-flight mechanism exactly all that living is to control control control control is the answer have more control so that I am I'm that one never wanting for anything to never don't know the outcome I can't possibly you're all you're doing X and you're doing it you're doing an excellent job of describing the level of the body and what happens when you when you finally when you break beyond that fear of that instinctually R but you're talking about death in the body and the instincts we get on to another level of fear and this is and I'm trying to stress this because I've been pursuing this for a long time and I've come to this realization it there is an actual architecture of a divine structure and I really believe that the Bible is telling the truth and it has been so it has been so suppressed that when you get beyond this when you go beyond the knowledge you understand you you realize you are the personal divine person and what they say that God knows as many hairs on your head and there is a looser further is a being you know there the tip of the spear of whatever you want to call negative energy there's a tip of the sphere of this positive energy and there is the structure and this whole Adam and Eve and temptation and the second coming I mean I think it's all true ok I mean you know like I said they're they're different takes on this I personally I don't I'm not saying there aren't like other dimensional consciousnesses and possibly you know spiritual entities that have some type of vested interest in what is going on here maybe there are there are angelic consciousness that are trying to help us out there are a monic consciousness is the one who draws down into a lower state of consciousness it's the whole idea that basically all of existence is moving in an evolutionary progression towards something bigger towards something greater towards something more unified and it's all order for our businesses that are like straggler consciousnesses possibly from other cycles or dimensions of existence that want to keep people rooted down they want to keep people in base consciousness perhaps because they may feed on that type of energy this has also been postulated in the research community that these other types of entities feed on certain kinds of energies that are only generated by fear it's like I've annoyed the on stir zinc touched on this allegorically you know it was a movie about children that you know monsters go into their bedroom and you know make them scream in fear and then they collect the energy that comes out of that best fear we're verifying their quench look at our vampire culture I mean we are just in love with vampires and horror and it's like we've they've been they've been creating this entertainment or as all it is as pornography and snuff films it's like the island a lot of violence desensitization they want to desensitize people this objectifies people it puts people in a predicated state okay it disconnects people from understanding that they're one and they basically have the same you know desire the same needs etc and that they're all in the same situation together that's what they need to do violent video games do that you know and this goes hand-in-hand with again the main topic tonight is food and medicine and how this destabilizes the mind-body connection particularly drugs and what they want to do is get these younger kids on as many drugs as possible like you were talking about earlier they have these different diagnoses now that anything can be diagnosed with some kind of a disorder and prescription drugs you know a prescribed for it this is ridiculous the psychiatric community is criminal in doing this particularly the children of a great documentary to check out about that how they want to get kids hooked on drugs earlier and earlier you know dad knows all kinds of different disorders like attention deficit oppositional defiant disorder etc etc is um it's called um generation rx I don't know if many people have seen it but it's an excellent documentary on the drugging of the youth and how this has become you know a lucrative business essentially the pharmaceutical industry doesn't care one bit about these children they care about the profits and that's what they're answering to they're not answering to the health and well-being of the constituent of not all name serve they're serving the bottom line because it's a company and they're their main goal is to increase profit and they cultivate what what helps motivate them and progress them through this time is that they cultivate their empathy because they think this is they're saving us or saving our culture because there's no other answer but what's really happening is our culture is moving so fast that we can't get into homeopathy homeopathy takes time it takes a lot of energy work but we are in such a quick fast mode and diseases are so powerful that we are we've become addicted and reliant on the pharmaceuticals and I mean I I mean it we're right around the corner where if we don't get a vaccine I'm sure we'll be eliminated I mean I think it's I think it's only been God's grace that's kept us around for this long but yeah yeah I think there's definitely uh forces of good that are like like you said are kind of that are helping us to get through this gauntlet if you will of all of these different things being thrown at us because yeah look at the the swine flu largely being rejected many people rejected that would not take it that's another thing another attack on the body is vaccines and uh and um Hulu shots which I want to touch on tonight as well caller you raise a lot of great points I want to thank you for calling in also to let you I'm going to let you go and I'm going to touch on something that he brought brought up which was time so thanks for calling in calling in the future hope you'll be listening check out my website what on earth is happening calm got it bye good night so one thing that that caller brought up was time that a healing coming into homeostasis takes time and this is absolutely true people are living a lifestyle it is rooted in stress okay it is rooted in never having time okay which is something we're going to talk about next week probably if we get if we go through all the the pharmaceuticals and everything I wanted to talk about regarding drugs and substances in general today on next week we're going to bring up a new topic called the illusion of time this is a mind control methodology number 10 and this is a this is a abstract one but it's something that I think a lot of people will be interested in because it goes into the psyches perception of time and how it actually operates and how people are perceiving that time is speeding up because we're trying to do so much more than we did in the past that it seems as if there is not time to actually accomplish the same things that we were able to accomplish in less time in the past and this perception isn't inaccurate it is actually that way however this is what they're counting on being able to basically manipulate is the sense of time and if they get us constantly in this hamster in a rat wheel mentality when it comes to time again it focuses us more on the body people are only worried about the tasks that they have to perform they're not thinking conceptually they're in stress mode fight-or-flight mode what happens when you're in stress mode we talked about this extensively on the show what stress really is the type of physiological reactions that take place when you're under stress the blood is pumped away from the torso and brain because it is not needed there the fight-or-flight response of the human body pumps blood away from the brain because you don't need to be in any kind of conceptual or higher-order thinking or philosophical thought mode when you're under attack or you're going to fight okay it is also pumped away from the torso because you don't need to have digestion and all the other functions that go on in the torso and the internal organs taking place as much as you need blood making the extremities as hard as possible because if you're going to run away you need the the muscles in the legs need to be pumped full of blood and need to be made as rigid as possible so that you can use them for running that's the flight mode the fight mode you need blood in the upper extremities if you're going to use your arms and fists to beat off an attacker okay - to fight an attacker and and beat them away from you if you they're attacking you you need to have as much strength in the muscles of the arms so therefore it more blood needs to be pumped to the arms to do that when blood is pumped away from the torso and is pumped away from the brain if you live chronically in that state this is a modality of chronic modality of consciousness if you live in that modality of consciousness most of the time you're going to basically create disease within the body because the organs aren't going to be performing their proper function with the necessary blood required to do that and nutrients you know going to the organs you're also going to develop an extremely destabilized brain and mind because richly oxygenated blood is not reaching the brain particularly the higher thought functions center of the brain which is called the neocortex ok richly oxygenated blood is needed in the neocortex to assist in higher order thought functions and conceptual thinking in other words philosophizing moral reasoning ok understanding morality understanding conceptual notions abstract thinking these things are going to be impossible if you live in stress mode and the more you live in it chronically the more destabilize the neocortex becomes and I've shown pictures of this on my site you can see them in the podcast section you can see them in the video section in the in Section number one where I talk about the brain and how it functions and how consciousness of you know functions through the physiology of the brain I should say it doesn't function through it is a mechanism for its its functioning okay it is what the what the consciousness uses to to experience the things that we do in the physical body it isn't what the physicality of the brain is what derives the consciousness is the other way around however if we're constantly in this flight flight mode which is called stress we develop disease and we lose our ability to really think critically and at a higher conceptual level and this is where dominators want people they want people in this mode all the time therefore the manipulation of time psychologically is critically important to their agenda we'll get into that more next week but where I was going with this is stress people recognize that this is a problem but they don't want to deal with the proper remedies to it which is changing lifestyle and diet okay they want to deal with it in the instant gratification mode because that's the that's the way that we do things in the modern day we can't actually do any real work we can't actually use our will and knowledge to change ourselves god forbid we need a quick pill a pill for every ill so this brings us to the one of the biggest topics of this and one of my favorites saying that sarcastically because this is one of the things I really really detest more than anything else and that is the antidepressant category of drugs these things are some of the most dangerous compounds that anybody can ever put into their body and if you're listening to me and you're on one of these substances find out the best way to wean off of it and start to deal with your problems start to deal with why you're depressed start to go into the psyche and know yourself and know the causal factors of depression and you're not going to be able to do that until you start to understand who you really are and stop being afraid of that little voice that keeps knocking on the door saying hey I'm in here I've been locked away here for a long time you want to deal with this problem down here a little attention here and most people will say oh absolutely not close that door put a padlock on it and give me the pills okay and what this does this is one of the motive then the most dangerous traps to get in and I feel for the people that are in this and I need to look no further than members of my own family all hooked on this crap these SSRIs the selective serotonin reuptake inhibitors okay the SNR is right the serotonin norepinephrine reuptake inhibitors these are the categories of drugs that I I don't know if I've coined this but I don't know if anybody else that specifically refers to it to the madness I've categorized these and call them the demon drugs and you know this connects back a little bit with the last call or talk about these possible higher dimensional or lower dimensional entities it may be manipulating things from the spiritual level it's quite possible I know dark cultist believe that is uh what is actually happening for sure and decide to partner with those types of things I'm not saying that that is definitely true I'm just saying that is you know what some people's beliefs are about what's going on I call these the demon drugs because whether they invoke actual demons or the demons are behind this agenda it is something that is demonic meaning taking people out of a higher state of awareness and keeping them rooted in a lower one keeping them rooted in a fear-based modality and a physical only material-based of state of awareness never getting to higher modalities of thought and consciousness so the SSRIs these are antidepressants that work by basically preventing serotonin from being reuptake entomb anoro pathways serotonin another name for serotonin is five hoxsey 5-hydroxytryptamine or 5-ht this is a neurotransmitter that is basically responsible that to boil it down and make it as simple as possible this is something that is basically responsible for your normal everyday waking state of consciousness if you didn't have this you would not really be able to deal with the physical world that we live in so serotonin is very important it is necessary to to live it in a body and deal with things around you however when it is prevented from being reuptake intact in the synaptic cleft okay it is being prevented from being reapply thinking later that you see this I want you to know the corporation is government takeover of the church right we're off of Liberty radio live and first amendment radio I just disconnected from them because they are going to go into other programming and you heard their ads start up there so continuing on with the discussion of talking about SSRI selective serotonin reuptake inhibitors what they do is they basically prevent serotonin from coming out of the the synaptic cleft and being Rioch taken into the neural pathways and what that does is that creates a a general state of well-being because serotonin is a substance which when it is going through the synaptic cleft creates a sense of well-being so if you're increasing serotonin levels you're going to feel a euphoric giddy etc if it's just kept there and kept from being reuptake in which is why it's called a reuptake inhibitor what will happen is somebody will basically just level off in their ability to experience a full range of emotions because they won't be super happy but they won't be super sad either they will just basically be neutral it is like some sort of a zombie-like state of consciousness and this is what the dominators and the you know people who are advancing the control agenda one they don't want people who are in touch with their emotions because if you're in touch with your emotions your emotions are your compass for moral direction in life it's what's basically telling you in the physiology of the body whether you're doing the right thing or the wrong thing in life that's what your emotions are for folks that's what your emotions are for let's make that very clear your emotions are are your moral compass in life you're meant to feel them you're meant to feel happy and sad you're meant to feel good and bad you're meant to be up and depressed okay now I'm not saying there aren't some disorders in people severe chemical imbalances and in certain isolated instance instances yes maybe some advances in in some medical fields through some types of substances may help people with those actual conditions but these are things are way over prescribed and they're being prescribed for normal ranges of emotions you know they put people on them who you know lose a family member or lose a job this these are events you need to deal with in life and not take a pill to try to make an emotion being numbed out of your body look I know people in my family and my immediate family who have been on these things for like 15 16 years and they are basically could not care less about what's going on in the world absolutely unconcerned with anything that's taking place in the world around them they have basically become completely and totally indifferent oh yeah they care about their own little situation whether they pay their bills and whether they're comfortable and whether their house is nice but anything in a wider sense the requires conceptual thinking if it requires moral thinking forget about it not interested it's about me and my stuff and that's it and if freedoms are being taken away and all this immoral stuff is going on couldn't care less and I'll tell you what that they're directly being held in that state of consciousness through these drugs and that's why I call them the demon drugs they're taking away people's moral compass for direction people are letting that this being that be done to them because they don't want to feel they don't want to feel bad I don't want to feel depressed I don't want to think about that I don't want to have to do any actual work upon myself I just want a pill and make it all go away well it doesn't work like that and if you think it works like that you're a naive child okay to put it as bluntly as I can all right your emotions are there for a reason they're your moral compass in life that's what they are your moral compass or your emotions the sacred feminine aspect of consciousness they're not meant to be rubbed out they're meant to be felt we have a caller on the line from Southeast Pennsylvania caller from Southeast Pennsylvania you are on what on earth is happening what do you have for us caller from Southeast Pennsylvania are you there all right it's Chris how are you Chris how you doing man good to hear from you um this another very interesting topic of which I've had some experience with first I like to say it reminds me a little bit of what the I was obviously talked about in brave new world with the soma where you know if you have ever a problem you just take the soma which I think means sleek and everything's right away and then grandeur heading a gram is better than a dam Chris that's know that's right and the other thing I've had personal experience with these SSRIs they put me on luvox about 20 years ago and um it was the only drug that I've ever been one only time in my life where I was actually suicidal and I after after our experience that you know for for uh I guess it was ten weeks or so I said to the psychiatrist I said what are you doing what what's this job all about and his response to me was and this was this guy University of Pennsylvania he says to me we don't really know what the what the prob which one will work for you we have to keep trust testing it out and then nothing is drop do they they affect your sexual aspects of your life and that to me it is a key thing are wait a minute something's wrong here yeah oh yeah and I didn't you know I unlike most people I didn't just ignore these he sent symbols and I got myself all for those things real quick and I told that flight psychiatrist to go there to go pound sand and um that God I did because I still have my my emotions and my you know my personality my sister and I'll finish up with this my sister-in-law is a registered nurse and I was talking to over the summer time to be talking to her and she was telling me how sometimes she fills them for the school the school nurse right she was telling me how the kids line up in the morning thirty kids they line up in the morning to get their meds I said what what do you mean I we didn't line up for we word score to get meds what we did was you know if we had a headache we went to the US they gave us an aspirin what he sent us home giving them medicine and I said why should your Webster's let sooner she should be giving these kids these medicines they're bringing joy and even formed yet and she just said to me well this is what they need and I said to her you know this is a case of the blind mean the blind yeah and that's wrong yeah yeah I'd like to hear your take on it oh but but but Chris she'll insist that she's harming no one she'll insist that she's not part of a huge hierarchical and compartmentalize structure that is actually doing harm to people by design that that is an unacceptable thought in her mind and feel free to go right ahead and take this podcast and give it right to or if you still talk to it because you know nod right I tell how I'll set it like that right in their face that they're naive that they're unread and that they have no idea what they're really a part of none is Europe you're that cop that's quite how about a little this is another example of what I call a negative knowledge you've heard me use the term on the show this is a person that not only doesn't understand the truth about what they're doing but our have a totally concur ties a calcified position on what they that what the thing that they're doing is and in order to actually get them back to the level of understanding at all they would have to break down all of these preconceived notions which are false even to get back to square one have a blank slate to start to understand what it is they really are doing it's called I call it negative knowledge not only does the person not know anything about the real truth of the situation but they're they're totally attached and holding on for dear life to their preconceived notions of what it actually is yeah and I am you know the problem is that the people in my family and society I mean my session was a bit person she just she just ignorant she doesn't understand and like people might now he said what she's a registered nurse she should know it so I you know I asked about aspartame and they're sizing and it's like there's nothing wrong with that Chris I said are you kidding me and that's what I meant because I'm seen as the outsider non expert with a freethinker and no one pays any attention to me and there's nothing there's nothing I could do about it it's all there is I mean I would I would point her to the research of dr. Russell Blaylock who was a world leading was a little leading neurosurgeon and knows more about the interactions within the human brain than almost anybody give her his book called the excitotoxin of the taste that kills or show her his lecture put make a DVD with his lecture on it and say here this is from a neuroscientist if you don't believe me this guy that does surgeries on the brain does he afford that that I'm on last week I shouldn't she didn't look at it but I forward it to her know that because they believe their preconceived notions they don't want to start looking at information with a blot from a blank slate they don't want to look at all the research the tons of research that's been done by independent companies to show that that these artificial sweeteners are normal toxins you know when you look at the research that the companies themselves do all the results I'm out skewed and then suddenly the ones that are funded by the people with a vested interest in the company and the bottom line of the company they come out with it with the read with the conclusion that these things are safe and don't cause health problems but anytime you've got to look at where the funding is coming from follow the money you know when it's funded by somebody that doesn't have an interest when the experiment and the study is funded by something somebody that does not have an interest in the outcome they don't have a monetary stake as the outcome always shows that these things are damaging to the physiology always yeah and you mentioned a week ago or so that there's this new diagnosis for people like me called oppositional defiance disorder and if this healthcare system continues the way it's going to go they're going to get people like me and I'm sure most your listeners or all your listeners in fact you know these SSRIs that take us out of our our real consciousness or try to anyway well they'd have to kill me to get it done but let's just put it the real one you're not going to you're not going to do that to my body without killing me trust me trust me is all I have to say about that you'd have a more common another cause call it but thanks so much no problem Chris taking a much pleasure to hear from Good Friday night I'll see you on Friday yes I will absolutely take care of men Kris from Philly always a pleasure to hear from them on what on earth is happening all right we're past the top of the second hour I'm going to give the Colin number again anybody wants to call in anything is open game no taboo topics here as always the calling number seven two four four four four seven four four four once again calling number 724 triple four seven triple for the call ID number that you have to punch in after you call that number is eight three five one five once again the call ID number four what on earth is happening eight three five one five ssris the selective serotonin reuptake inhibitors otherwise known as antidepressants let's look at some of their names Oh what wonderful names they have celexa lexapro luvox paxil prozac Zoloft anybody notice a pattern there couple of consonants keep coming up over and over and over again don't they Z and X Z and X okay this is bike design this is not an accident okay these names are specifically chosen celexa lexapro luvox paxil prozac Zoloft prozac being the number one prescribed one fluoxetine it's called because it's derived from Oh big surprise fluoride Wow there's our old friend yes see what these things do is they keep you in a so called level state of emotion which basically means you can't feel your emotions they don't want people to be able to enter any heightened state of awareness they don't want people to be able to even enter the fight-or-flight mode in a good way see this is a needed function when you're in danger when there is danger this you want this part of the brain functioning the r-complex of the brain that basically is responsible for the flight the fight-or-flight response in conjunction with the limbic system the limbic system it pumps the chemicals into the body that help us to feel fear when we're in true danger which is supposes the proper function of it you're in physical danger where there is danger moving on the horizon you want to know about it if there's a tornado coming you don't want to sit there and go hmm that's pretty interesting I'm not really I'm not worried at all I'm very level but you know not not feeling much of anything that's nice it's a tornado coming directly this way and and be like Azzam be about it you would want to go into a mode that says danger I better do something if I'm going to protect my physical vehicle which my consciousness inhabits okay you know that's not the time to not be able to feel any emotions or not be able to feel any fear because in that instance fear is a proper response or something that can totally harm the body or kill you you want to take preventive measures you want to take evasive action this is the whole argument like you know the other part called it about New Age movement you know sit back and wait just work on yourself it's all about waiting for a savior don't help other people understand it don't talk about the negative of you're so negative talking about all that negative stuff no it isn't negative it's information it's awareness what you do with it is what makes it negative or positive if I tell somebody of oncoming danger they might be able to take action that prevents them from experiencing the suffering that would happen once that danger strikes and therefore save themselves and their loved ones pain and suffering that they would have ordinarily that they would have otherwise experienced and that's not negative that's empowerment okay so the New Age movement is a controlled oppositional paradigm that is basically controlled by a compass in the high levels of the dark occult networks of the world and when I was involved in the occult I pulled this people to friends people around me they told me wait until you see all the New Age nonsense and garbage that's going to be coming out over the next many years we're going to flood the markets with this stuff it's going to be all about meditating your way to enlightenment and world peace and it doesn't work that way it doesn't they told me that that was going to be happening and then it happened because when they say that they're gonna do something they do it they're not talkers you know they're talked about this before in a weird way they're very United they're very in unison on the same page they have achieved a form of dark unity consciousness and um you know a lot of people don't want to hear that and they they don't want to look at this side of things and they don't want to understand that they're manipulating things that they're involved in like the healthcare industry you know like a you know a medicine and and hospitalization and you know just anything that basically affects people's state of health people want to believe that they're involved in something that's good regardless of whether they actually are or not people in the military want to believe the military does good things people in the police want to believe the police does good things people in education uh how they want to believe that they're doing something good and I'm all for education we should have some you know compared to the indoctrination system we actually do have people the media want to believe that they're actually informing people that's a laugh people in the health care industry want to believe that they're healing people that's a less we're in a collective state of denial over all of these things folks and one of the things that will keep you there are the antidepressant class of compounds the demon drugs another one another set is the SNR eyes what these are less well-known but these are serotonin or norepinephrine serotonin norepinephrine reuptake inhibitors what now this is directly connected with the fight-or-flight mechanism as well norepinephrine is a stress hormone it affects the parts of the brain where attention is controlled okay it also affects the brain where response to stimuli is controlled it underlies the fight-or-flight response interesting we're up a nephron okay so here's another thing that they're trying to disconnect us from what these drugs basically do is make it impossible for us to one feel emotions so we're not feeling the repercussion of our relationships our interactions with other people certainly not in any kind of a deep level and - they're making the fight/flight response numbed in people they're dampening the fight-or-flight response mechanism which is a necessary part of our survival mechanisms in the brain complex it's there for a reason it's there so that we can take appropriate actions when we are actually under a dangerous situation or a threat this is why these drums are so widely prescribed they don't want people waking up to the dangers that are around them and they want them numbed they want this numbed basically a whole set a whole range of emotions numbed out of them all right we have I'm going to try to go back to Kevin from Philadelphia let's see if this goes through I'm going to try this Kevin from Philadelphia are you there that I would try you again but it looks like we're still having a problem hey I'll turn the chat on in the chat room so let's try that there we go keV I saw that you were not only in the chat room but also a calm so if you're there type something into the chat if that will allow you to do so you could also Skype me I think you have my skype name so I chat over what you were going to talk about because it looks like I still can't get to your phone I still can't make you active on the talks you live program for some strange reason but Kevin who does a show on talk show now called caution tinfoil hat area a great I listened to the first episode and a couple of small segue episodes that he did and he's going to be doing a show on Friday his second show second big show he interviewed them Roxie um I can't remember her last name Roxie about the chemtrail phenomenon uh and she was a great a great guest for the show they did kind of a little roundtable discussion there at one point and it was a really good show um keep it up keep up the great work Kevin if you're listening and I will be calling in to tinfoil hat area on talk-show this Friday from the for your mind conference fundraiser let Kevin know on his show about how the fundraiser is going and how things are generally going for the preparation for the conference so keV if you're listening try to type something in or Skype something to me and I'll try to respond on the air let's continue to talk about the SNRIs okay so these are the serotonin norepinephrine reuptake inhibitors some of these names are cymbalta you've seen uh advertisements for that on television or gray another one is pristiq pris tiq pristiq one that I know specific members of my family take is FX or EF f EF f e XOR effects or this is a an SN RI and these are just as dangerous and just as overprescribed as the SSRIs I highly recommend people do their own research into these um I highly recommend people really try to understand the components of consciousness as we talked about on this show being our thoughts our emotions and our actions and why the emotions act as a bridge between our thoughts and actions okay just as the limbic brain will act as a bridge between the r-complex of the brain which governs our motor skills and the higher thought center of the brain called the neocortex the emotions are the Sacred Feminine component which is essentially the most under attack and lacking component of consciousness in the world today this is what the dominators have to continue to attack and they're doing a great job of it through the pharmaceutical industry all of these drugs all of these so-called solutions to problems are nothing of the sort they are there to keep our emotional compass broken they want to keep it spinning anything but have it point TrueNorth they want you numbed indifferent as they say in the great sci-fi movie they live they have made us indifferent to ourselves and to others we are focused only on our own gain I just re-watched they live this week with a with barb and a friend and it is just a phenomenal movie it's a it's my favorite sci-fi movie I it's one of the best allegories out there I highly recommend people check it out because it's an allegory for this for the media it's an allegory for the different types of compounds that they interject into our diet and into our body-mind connection to destabilize it to turn that signal on and to keep people under that spell of getting them to see things that are basically the exact opposite of what they really are no discernment and no ability to feel that's what the ultimate goal of this is and that's what drugs are ultimately all about it's turning off sense perception which we should be honing we should be refining we should be using as the god-given gifts and tools that they are our emotions and our perceptions to understand truth to know ourselves and what's going on within us as an expression of our consciousness one of the expressions of it all right we have another caller on the line caller you are on live on what on earth is happening what do you have for us can you hear an hour I can but it's very distorted it's like you're underwater that digital distortion type of effect but go ahead okay um I I just imagine in that no tell your alright go ahead I'll deal with it can you hear me can you hear me again it's a digital delight distortion effect but I'm willing to put up with it it's fine the information is what is important go right ahead okay I just wanted to confirm what you were saying as one of your listeners because I have been what where you're talking about before also many years ago about a year before I afternoon at you in the first place I was working retail and as weird as it sounds I teen movie idiocracy and a reference these things like giant trash at lashes and he called it a retail and I recognized that all of the things that I was settling with eventually wound up in China and I wish that I was pretty much contributing to it may mean our depressed and my wife then suggested I go on to an SSRI along with the people that the doctors have you seen and it put me through of a very interesting chorus to start with but once like we're actually feeling better about everything I are the enitre the notice is already kind of a fake feeling and it wasn't very helpful in the long run it's just because I started to get used to it and then all of a sudden anyone with my goldfish and before I knew it they were like double what I started with and it should have not a healthy thing in my editing and getting off of it there were many suicidal thoughts but why don't you get it hasit after about two previous amount of being off of it you're bringing chemicals you start to get it back to normal and then they sell illness I want to stop you there for one moment to mention something that's extremely important if you're listening to this please if you're on one of these things do not try to go cold turkey off of these it's very dangerous to do that you need to really do research and and consult somebody that knows what they're talking about when it comes to the particular drug that you're taking how to wean off of it because if you try to go cold turkey this is one of the most common side effects or actual reactions that takes place is extremely suicidal tendencies that these things are dangerous compounds to mess with they even get on in the first place coming off of them can be even more dangerous than going on them you really really want to be knowledgeable about how to wean off of these things properly if you're going to do that do your homework do your research consult somebody that really knows what they're talking about when it comes to these okay and if you're going to help somebody to wean off of it make sure you know what you're talking about and get them to do the research and get them to consult something that really knows I mean giving people advice about this can kill somebody if you don't do it the right way you know okay you know that's very important it's a very important caveat and disclaimer I want to make here I'm not telling anybody drop doing these immediately if you're on them you have to wean revise things but I completely agree completely as a matter of fact anyone was the first time and I kinda did not.we my visit had it was probable and then I was actually give him the chance to get one of them and I foolishly showed it and then we leave myself off of them afterwards at the second time but but or one in the first time I will say that one of the things when I done though and in did you do a cold turkey my wife knew that I was going to go into do you think ahead I'm and it was there for me in a way that many people might not have that sort of backup and on top of that they were also getting called 5-htp they were talking earlier participant riveted that I was taking it as a sign up with Lynn and or really balanced myself I again you're absolutely right a disclaimer eighty-two totally possibly lead to disasters that other than to be good set yourself for one more little thing Saturday off in such a fashion that you want all those skills I got but again the whole point is to get when you do finally it off of its innings will rebalance and you will find a new peace of mind that at least sit in the fact that the pain you're going through of living in the of trying to be agitated and in a profoundly sick Society as well but it is something and it natural your suppose it if you're opening trying regular are that like is not good for we're not good going through it in this exercise I like it and you need to start our changing society anywhere for rather than for refer it that is nice being able to gather in the moment absolutely and you are a living example of someone that has gotten off of one of these traps gotten out of one of these traps of these uh antidepressants I wish uh you know some people in my family would take that as a an example and as an inspiration to to you know basically begin to find the will to wean off of some of these things that they don't need you they do not need these they are not critically chemically imbalanced you know in an irretrievable way they want to stay on these because they like having their emotions numb now they don't want to feel every day awareness and consciousness and the emotions that go along with living in such a world and that's why they're basically ineffective and you know have not really attained the battle so to speak they have enjoined the war the ranks of the info war they have been really worked on their own consciousness as a result because these things basically make you not want to do much of anything except uh go along to get along it's it's a bit of that herd mentality training is what these pills are for all I got is it loosened at least the pain and it is revealed even if it's suffer they're going to release it it's real don't take the fall to the moon hill for the rest of your life to use all that I favor that again live in America with a disclaimer but at all I want to add to your show is like at least to the pain is real cam thanks so much the illusion the great point you brought up and I want to say once again a great job on beginning your show it's every Friday night on talk-show yeah yeah yeah plug go right ahead by 8 thank you Friday all right hold it Friday at 10:00 Eastern 10:00 to midnight Eastern odd Kadena Utah and it's calling in 10 employer area and the deceased going to be actually wearing shoes does one start and I'll be publishing it with hello Jose with a margin shooter if you seen in one on Facebook he's almost very much like me but you kind of want these West Coast and all the like tubes if you don't mind real quick I totally asked you can you ring when we're done okay what I particularly appreciated but you got a min and I'll be calling in on Friday to give a report of the fundraiser the free your mind conference fundraiser at liberties yes a great job starting up the show everyone check out a caution tinfoil hat area on talk show every every Friday evening at 10 o'clock p.m. Eastern Time so keV thanks so much always bring up great points you have a good night and I'll talk to you after the show then give your birthday again take care man awesome alright so a little bit of audio difficulty but no problem is the information that's important but I'll tell you a lot that provides a great segue because that was kind of psychedelic sounding and let's talk about psychedelics let's get into something that hardly anybody wants to get into to talk about to put on the table let's talk about entheogenic compounds and psychedelics okay why are these substances that have been traditionally used as medicines in a proper sacred spiritual and ceremonial context over thousands of years have been employed by indigenous tribal cultures all over the world why are they so demonized to the point of being made a Schedule one compound well part of this is the LSD Fiasco that went on in the 1960s which if you really look deep into the parts of the element elements that we're pushing LSD into the culture in the 60s were people who are involved in mind control projects like MKULTRA monarch and other deep covert black projects that dealt with the control of human consciousness it's a very deep area of exploration to start exploring because it opens up a big can of worms as to other Institute's and think tanks like the Tavistock Institute of human relations like the round table think-tank institutions operating throughout the world intelligence agencies like the CIA doing research in these fields of direct mind control through drugs through substances LSD was one that they clearly demonstrable II used to try to control the human mind INRI in experiments predating the 60s actually but powers-that-be also realized that this substance had the potential to really open up people's consciousness that they took it in the proper mental set meaning the mind set in which it was taken and the reason it was taken for see that's what these substances when you start to talk about them clearly someone like myself who is advocating total health eating good foods eating organic substances you can't start to think well now he's talking about just go and do as many drugs as you want randomly I'm talking about on the show not getting involved in certain prescription drugs these aren't drugs so to speak these are consciousnesses in and of themselves that are communed with and we talked about that a little last week they are communed with the word communion means to build together okay to create together that's what communion means when we break it down into its constituent latin elements come together or with an muni muni ohm unary which means to build these substances are communions with consciousnesses that actually are indwelling they are within us they are within the unified field of consciousness as the first caller of the show talked about an architecture of consciousness a field of consciousness that we are one with these substances help us to commune with that field and to explore it and to understand it better and they put us into an altered state of consciousness an alternative awareness for time and then they drop us back down to our level of awareness in general having learned something if we paid attention while in the throes of the psychedelic encounter or experience and then we can bring some of that information back down and employ it in our world this has been the traditional role of shamans throughout centuries and centuries of the human past to enter altered states of consciousness explore that realm and bring information back with them into this dimension of being and mind that can be beneficial to the community but shaman is is known as one who can see in the dark in the darkness of the world the shaman is one who has become capable seeing and that's no small task that involves looking deeply at the self and not flinching that involves going into these states of awareness without fear and for the right reasons again this is all about proper context I usually talk about this in my solution section what I want to basically bring up tonight is why these things are so demonized why people are unwilling to even look at these in any kind of a a context of expanding consciousness and awareness there's many different reasons you could do the substance you could take a substance or communion with a substance take it into your body and and let it modify your consciousness but why do people drink you know a lot of people drink for escapism a lot of people take street drugs for escapism and thrills no and just ignoring one's responsibilities well some people take psychedelics for that reason and I don't advocate that I think that's one ear espanha bill could be dangerous because you know you can play with these things you'll get stung now trust me on that or don't trust me and find out try to take him in some kind of a frivolous or you know you know you might get away with the first time or two maybe it's not that much not that far beyond that for anybody who knows what I'm talking about enjoy if you slip by with a joyride the first time taking it in the state of you know frivolous consciousness let's say because continue to try to do that and you will get stung by the class of consciousnesses let's say I'm hesitant to even call them substances okay you'll get stung by these consciousnesses hard in some instances if you play around with them the way that I'm talking about communing with these states of consciousness is in a proper context which means for the right reasons are you communing with these because you want to elevate your state of awareness because you want to help improve yourself and thereby help improve the state of the world well that's the proper context to go into this and yes there is a proper context people want to say there's no proper context or psychedelics it's however you want to use them nonsense nonsense these things are here for a reason okay they're here for a reason they're not here accidentally by chance just by you know random randomness there on the earth for a reason in this garden that we live in that has basically become almost like a hell and if we're not careful if we don't become discerning rather quickly it is going to be a hell on earth these things are the ten Nexen to nature that we've lost and if we commune with them in the proper context we can re-establish that deeper connection now what are some of these compounds well let's look at the word psychedelics first of all you know psychedelics people hear that and you know they have this immediate mind-control reaction oh dangerous shouldn't be messing with them you know you'll thought you'll fall out of a window thinking you can fly it has a connotation to it but when we break down the word and again the occult is all about words and the manipulation of words all about the manipulation of the perception of what words mean particularly when we break down the word psychedelic into its constituent elements which are derived from Greek okay psyche a in Greek will we get the word psychic from means mind and the Loom means to make clear to make the mind clear to make it easier to see that which really is okay it's about vision it's about clarity of vision now don't get me wrong these things uh you know physically will not give you better clarity of vision in penny cases and many people will say yes they will and it actually on lower dosages some of them do increase the visual acuity that's not true what I just said they provide visual distortions certainly and full-blown hallucinations if enough are taken if a high enough dosage is taken but ultimately the vision that's being spoken of here is the spiritual vision the third eye vision the third eye sight okay to make the mind's eye clear psychedelics it's like a balloon like a meaning mind in Greek delune the verb to make clear making the mind's eye clear the vision of spirit clearer these are called entheogenic I some people this is the term that to go away from the negative connotations of the word psychedelic many people have begun calling them entheogenic term that was deliberately created again to avoid the negative connotations of psychedelic MPO gen is comprised from three greek roots the word entheogenic beans in or within Theo's and Theo okay Theo Theo slean's divine theosis God in Greek the divine the third root is Gen okay which comes from the verb uh I believe it is Latin Gennaro Gennaro means to create or to generate and again we talked about some symbolism briefly the G in the middle of the compasses and square of Freemasonry this ultimate thing that this represents is the generative principle and that's the principle of care the generative principle is the thing that actually creates all reality it is the one overarching principles principle in which all of the other hermetic principles are therein contained so it is the most important thing to develop along with will and intelligence but care is the thing that holds it all together the reason that we're in the experience is that that we are is because most people don't care when people say oh yeah I recognize some of the things that are happening and I don't care I get that from members of my own family well and I keep going back to that for a reason there's a specific reason I keep highlighting that I want people to understand the people that are really enslaving us are not the people in these high-level positions of power they're not the dark occultus at the highest levels they're not the secret society members they're our own families you want to look at our enslavers first of all look in the mirror there's the first and foremost enslaver of the human family and then just look at the people around you there's the enslavers of the human species folks right there the manifestation of them is in of that not caring not developing the will not developing intelligence not paying attention the manifestation of all that that internal imbalance is the global elite and the secret society networks in the dark occultists they're just a manifestation of that on a higher level we do the work to change ourselves these people can't do what they do a small group of psychopaths that accounts for less than three four percent of the population cannot do what they do without our compliance the end the end and it's all about mind control that's how they continue to get people to ignore dealing with themselves their own issues they're the problems of their own psyche their own addictions their own you know uh negative patterns of behavior etc etc all the negative things that they do to other people that they don't have the moral right to do just ignore all that take a pill shut up watch television take this pill yeah eat your eat your Twinkies eat your drink drink your soda go to you know eat your powdered Donuts and uh watch American Idol which will make Americans Idol meaning inactive you know watch your sports drink your aspartame Laden Cola drink some alcohol and take your antidepressants and you think the world is going to change for the better enjoy enjoy what you got is as good as it's going to get and ultimately you're the creator of that experience but this goes back to the verb generic which started that tangent and it means to create it is the generative principle so the word entheogenic to psychedelics and entheogenic compounds and within Theo's divine and generic create it means to create the divine within to generate the connection to divinity or to the source within oneself this these this class of consciousness altering substances known as entheogens or psychedelic can foster this connection can assist in making that connection it Wells within us these are states we can reach in other ways we can reach them through intense meditation we can reach them through rhythmic drumming and dance and uh you know we can even reach them love in computer simulations you know you put a virtual reality headset you can go into an altered state of consciousness for sure but this is a direct path through the natural world a means of doing it and I think it's a valid one I myself have communion with some of these intelligences these consciousnesses if you will and they've helped me tremendously and again always done in a correct contact wanting to improve oneself that's the key in a proper context again these are not things to mess with but if you don't want to take my word for that try to mess with them and enjoy what you get you definitely won't but that's why a lot of people you know demonize them and stay away from them it's fear they know these are powerful thought changing their paradigm shifting helpers that's what they are they help us to see the folly of our ways they make us laugh about how ridiculous we are they'll make us cry about it sometimes too um they make you deal with your own crap let's let's cut right to the chase you're not going to you know get away with much in the presence of these consciousnesses let's put it that way they are there to make you deal with your Flemish is and inconsistencies and rough edges and to bring them extremely to your attention so that you turn your gaze toward those aspects of self and work upon them to smooth them out some of them let's let's talk about another word for them we talked about communion as being what these things really are these are active sacraments not inert ones as the religions of the world want to foster off and now Chris when he called in mention one that was used in the Eleusinian mysteries of a lusus off of Greece uh a loose in Ian Lu s i SI n i am a loose in Ian's mysteries the Eleusinian mysteries the mysteries of alesis look look that up look at what the Greek ministry tradition was about the Hermetic tradition look at what their active sacrament was it was something called soma this is not a connection to the soma of brave new world fame which was basically like a antidepressant compound soma of a lusus was a drink that people took to commune with another state of consciousness to get into touch with the mystery school tradition of the Greek the ancient Greek time period soma many people are speculated was derived from a form of psychedelic mushroom some people have said it was the Amanita muscaria mushrooms some people claim that it with this psilocybin variety of mushrooms I don't know for sure but I do know it was a psychedelic compound that altered the consciousness of the initiate so that they would have to begin to go down a deeper path of initiation of really dealing with their own stuff so to speak dealing with the things that are nested way down into our subconscious but this brings us to the breakdown of another word which is sacrament you know we look at Holy Communion in the Christian tradition as a sacrament it's one of these inert sacraments just made with unleavened bread bread with made without any yeast flattened bread it's inert it doesn't do anything to change the consciousness you have to believe in it well take a couple of grams of psilocybin mushrooms and tell me whether you need to believe in it but you don't need to believe in an active sacrament for it to work upon your consciousness it's going to work whether you believe in it or not and it is a direct route to a altered state of awareness in which you know you can do some work upon yourself you can choose not to - the experience will probably be much more unpleasant because these are things that try to nudge us in the right direction so to speak they can be gentle nudges or you know in the case of something like iboga they can be harsh nudges or outright pushes um and uh these things can help with addictive tendencies they can help pull us out of ego identified states of identification they can pull us out of materialistic identification there's so many uses for these the psychological community needs to really start researching these things and it's made very difficult because these are scheduled compounds made illegal look at the word sacrament briefly as I've said these are active sacraments not inert one's not dead ones there live sacraments the word sacrament comes from Latin sacrum means holy or sacred okay sacra sacred and meant a which means mind again it's very similar to psychedelic to make the mind clear will to improve the mind sacrum meant a sacrament means to make the mind holy okay so this is um this is the proper usage for them they have to be used in the right set or mind set and the right setting which is the external environment that we use them in we want to use these things in a reasonably controlled environment controlled conditions in the physical environment because you know it's called a trip for a reason when people use these with people commune with these I want you to refrain from even using the word use or do we're communing with these things with these beings these forms of consciousness you know that's what they are if you really understand entheogens and psychedelics you don't understand these are forms of consciousness okay and they exist in nature and we're communing with that spirit that is within nature to improve ourselves there it's helping us to get in touch with that unified field that we're all a part of so um that's what an active sacrament is just very briefly because we're almost running out of time here cannabis is one of them again one of the reasons it's so highly demonized okay contains the active ingredient tetrahydrocannabinol which is THC magic so-called magic mushrooms these are the sacred mushroom the suicide cubensis the the suicide mexicana etc you can go on and on about the different varieties of psilocybin containing mushrooms there's the Omni to mascara tea variety of mushrooms there is ayahuasca which is a very interesting combination of of plants that DMT is an active ingredient in dimethyltryptamine we continue talking about this next week a little bit but um basically I'll close the show I open the show with a quote from Thomas Jefferson and I'll close the show with a quote from the great Terence Mckenna Terence Mckenna said if the words life liberty and the pursuit of happiness don't include the right to experiment with your own consciousness then the Declaration of Independence wasn't worth the hemp it was written on think about it folks we'll continue with this discussion a little bit next week and then we'll get into the illusion of time as the next methodology of mind control we talk about food and medicine on the last few shows again I'll wrap that up next week and then we'll get into the next topic but I want to continue a little bit to talk about psychedelics next week and to specifically talk about the proper context in which to use these and specifically talk about some some specific psychedelics and some of the effects that they create so we'll do that in the first part of the show next week and then we'll get into the the next topic of discussion in our ongoing exploration of the methods of mind control that's all for tonight folks thanks to all the great callers as always thanks to all the listeners you've been listening to what on earth is happening right here on the revolution broadcasting radio network I'm your host mark Accio check out my website at what on earth is happening calm see you right here next week folks good night you

What On Earth Is Happening Show #033

Topics: *Mind Control Methodologies, Pharmaceutical Industry, Western Medicine, Vaccines, Flu Shots, Chemtrails, Geoengineering*

[Music] we're broadcasting in our new time tonight 8:00 p.m. to 10:00 p.m. Eastern Time I'm your host mark passio and you are listening to what on earth is happening today is Tuesday November 9 2010 my website is what on earth is happening comm and networks website revolution broadcasting calm once again where our new timeslot tonight the show will now be live every Tuesday evening from 8:00 to 10:00 p.m. Eastern Time this has been done to make way on Tuesday evening for Bob show which is carried live on revolution broadcasting and on his website they lie calm Bob show is truth be told radio I just had the honor of being interviewed by Bob for the last hour on his show thank you so much for the great interview today Bob and uh tonight we're going to be continuing our ongoing discussion for the next two hours of the attacks that are ongoing against the body the physical component of our experience in consciousness we are going to explore more ways that the mind-body connection is being attacked and attempted to be severed because if there is a severing of the connection between body and mind the mind is more susceptible to attack and that of course further D links us from the spiritual component of ourselves of the true self so we've been undertaking this uh exploration of this information for the last several weeks and I decided to extend it one more week before we explore further methodologies of mind control again we said that we were going to touch on about fourteen different methods of mind control in the multi-faceted techniques of manipulation that are used by controllers that are used by the dominator world to basically control people and keep them in a prison that they cannot see for themselves because they are under mind-control call it by whatever name you want psychological manipulation the exploitation of ancient psychology because of knowledge that is known about the psyche you can call it all of those things and it is indeed all of those things but by any other name it's mind control and that's part of what we do here we are going to be getting into solutions in later programs but what we've been doing is basically taking the methods of mind control and exploring them one at a time the ninth method was food and medicine and for the last few weeks we were talking about food and all the different ways that the the conventionally grown food products basically go to work to destabilize the body and mind I won't go into a recap of all of that you can listen to all of those methods to all of those all that information about food and what's in are conventionally produced food in the podcast section of my website if you go to what on earth is happening calm and you click on podcasts those shows are all available for free download and you could put them on any mp3 device digital music device that you may have and listen to them at your leisure what I'm going to do tonight since I'm extending this topic one more week is we're going to get into a couple of things that we didn't have time to get into over the last couple weeks and those topics tonight are going to be flu shots and vaccines vaccines that are done by children at an extremely young age at infant age actually not even when these children are even one year old and then we're going to get into the phenomenon known as chemtrails for many people this is a topic that they will be familiar with for many people they may not know about the chemtrail phenomenon and it's something that everyone should really deeply look into but before we do that tonight I always start the show with some event announcements and then I'm going to give the new calling number is we have a slightly new format on the show we're going to run a few of network spots at strategic locations in the show and there will be a new call-in number and hopefully that will go smoothly and I'll be able to take your calls a little bit later on so I always start to show with event announcements and I have a few this evening again the importance of taking action that is the biggest part of the solution knowledge is not enough knowledge is only the first step awareness is the first step it needs to be converted into action to become true wisdom therefore getting out into the community raising your voice and actually doing something about the problems that you see in the world is essential taking in more and more information will only get you so far the next step is convert that knowledge into proper moral action in the world so I have a couple of speaking engagements coming up and there's a few other events coming up over the next over the next month the first one I'd like to tell everyone about is the UFO et Congress hosted by Pat Market ilio this is happening in Bordentown New Jersey at the Ramada Inn November 13th and 14th that's this weekend the Ramada Inn in boarding town is at 1083 that's one zero eight three US highway 206 North Saturday is a nine a.m. registration the doors open at 9:30 a 10:00 a.m. welcome speech by Pat Market ilio will kick off the day's events here are the speakers for this day Saturday November 13th Dennis den okhla UFOs crop circles and visitors from extraterrestrial civilizations dr. julian e salt will give a talk called the global crisis and the New World Order's present situation Dan Smith will give a talk called the best possible world and its best possible ending Jacqueline Delibes will talk about the et forces of light Will Allen and a special guest talking about UFOs over Washington DC and UFOs filmed by astronauts is talk called the proof is in the pictures that's the Saturday events for this UFO convention the sunday events are excuse me also beginning at 9:30 there's a 10:00 a.m. welcome speech by the master of ceremonies Pat market ilio I will be the first speaker on Sunday starting at 10:00 a.m. my lecture is called don't count on disclosure bill Weber will be following me with a talk called 1930s German flying saucers butch rutowski underground bases and human mutilation investigations that should be very interesting Tim Hackman will speak on area 51 Joel Dean giving a talk called UFO abductions the directions to the conference take the New Jersey Turnpike to eggs at 7:00 then take route 206 north about 1/4 of a mile the Ramada Inn will be on the right-hand side and free parking is available advance registration is $135 for both days tickets are $75 at the door each day for more information on the UFO et Congress 2010 visit the website dr. UFO org that's dr you fo RG next the monthly free documentary screening and discussions at the ethical Society of Philadelphia hosted by truth freedom prosperity every third Monday of the month this month November 15th the ethical Society is at 1906 South Rittenhouse Square it's a 7 p.m. time for more information on the script the documentary screenings see WWE truth freedom prosperity o RG november 15th that's the third Monday of the month November 15th at the ethical Society 7 o'clock p.m. the end the Fed rally in Philadelphia this happens I believe twice a year November 20th Saturday November 20th at 11 o'clock a.m. at the Federal Reserve Bank of Philadelphia at 6 and arch streets that 6th and arch November 20th 11 o'clock a.m. come on out and support the end the Fed Philadelphia rally for more information on this please visit truth freedom prosperity org or end the Fed dot us I will be giving a one-time-only lecture as far as I know it's the only time I'll be giving it unless someone else asked me to do so at another location but this is a special event survive and thrive this is a group hosted by a friend of mine named Fernando salgueiro he does a monthly survivalist group and gives out a ton of great information on urban and wilderness survival this this meeting this meetup takes place every last Sunday of the month at Liberty's pub Liberty's is at 7:05 North 2nd Street that's the corner of 2nd and Fairmount in Philadelphia this saw this one I will be lecturing at this is on Sunday November 28th at 6 o'clock p.m. and I will be giving a special talk on natural law and sovereignty and for people who attend this I think it's going to be a real educational event for them and hopefully they will really get a lot out of this and understand how critical a role in our lives these concepts are natural law and sovereignty so--that's survive and thrive November 28 Sunday November 28 six o'clock pm at Liberty's pub second and Fairmount in Philadelphia finally the big event coming up in April of 2011 free your mind conference on consciousness mind control and the occult this is a conference that I am hosting I'm co-hosting this with several dedicated individuals in the Philadelphia area it's going to be the biggest event of its kind on the East Coast and it will probably be the biggest event of any type like this in Philadelphia in the year 2011 for your mind is a unique two-day conference scheduled for April 9th and 10th 2011 in Philadelphia PA featuring multiple speakers and diverse educational materials for the purpose of raising public awareness of the critically important topics of mass mind control techniques the covert and subversive influences that are exercised upon our consciousness and our behavior trauma-based mind control and ritual abuse and the practical mental and emotional healing methodologies that are available for those who are affected by these devices Saturday April 9th and Sunday April 10th 2011 from 10:00 a.m. to 8:00 p.m. both days the doors will open at 9:00 a.m. each day the location is a true Bohol our UBA UBA Hall 414 Green Street in Philadelphia PA admission price $20 per person per day the confirmed speaker list here it is Erin McCallum Alfred Webber Andrew basiago Bob tuscan farah your dozous John Irvin John Nicholson Larkin Rose Laura Eisenhower mark motika our Casio Mel fàbregas Michael Kelly and Suzanne Taylor and we are still in negotiation with a few other individuals and hopefully we will be adding a few more people to the event before the roster is completed those are the event announcements for this evening let me give the new callin number for the show the new callin number for what on earth is happening we'll see how this how this works out new call-in number is eight seven seven five nine eight eight five four nine the new Colin number for what on earth is happening toll-free eight seven seven five ninety eight five four nine feel free to call in the show at any time there are no taboo topics here we will have a topic that we'll be discussing but you're not limited to that again no taboo topics ever here on what on earth is happening when you call and please be patient hold on the line I will get to you I may be in the middle of discussing something I may be in the middle of laying out a concept or an idea so please be patient when you call in and I will get to the call I will be looking at the switchboard frequently all right last week we ended this show by discussing psychedelics we were talking about why psychedelics are so widely demonized and essentially I ended the show with a quote I ended it with a quote by one of the biggest influences in my life mr. Terence Mckenna and for people that don't know about Terence Mckenna and his work I cannot recommend looking into this gentleman enough sadly he is he has passed away he died back in the year 2000 but his work is seminal and it is instrumental it was instrumental to my own awakening I want to spell his name for everyone so they're very clear about who he is and about finding information from him many listeners will of course be familiar with Terence Mckenna but many will not be and I again cannot suggest that you look into the work of this gentleman enough Terence Mckenna ter ence Terence Mckenna mck e NMA Terence Mckenna the quote that I ended was if the words life liberty and the pursuit of happiness don't include the right to experiment with your own consciousness then the Declaration of Independence isn't worth the hemp it was written on yes that's kind of comical but nonetheless he's making a an extremely significant point here what these aspects of consciousness that we call psychedelics that we call entheogenic splain those terms last week what we what this is about is consciousness exploration what these compounds these consciousness is really are what they are what they do is they help break down barriers they break down barriers that our social conditioning has erected in our own minds they break down barriers that we ourselves have erected in our own minds through not wanting to look at our faults not wanting to look at the negative aspects of our personalities what these substances do is they make you confront yourself and I mean they really make you take a good look at some of the ways that you are falling short in consciousness the ways that you are still divided within yourself the ways that you are still in opposition with your own consciousness see the goal of consciousness is to be the goal of truly becoming aware means that you are bringing the three aspects of your own consciousness into alignment and unison with each other and these aspects are of course our thoughts our emotions and our actions and unis unison in these three aspects of consciousness this is true unity consciousness within oneself means that you become a being that as you think so you feel and so you act in the world all three of those things raised to a high degree of awareness and are removed from opposition with each other I've stressed this over and over and over again throughout the weeks of this radio show this is what unity consciousness really is this is what enlightenment really is contrary to what many people will try to pass off as enlightenment if you are no longer in opposition with yourself and your thoughts emotions and actions have come into a higher level of awareness for the good for the true will okay that is what enlightenment really is all about and yes there is an opposite form of this that is dark unison dark unity consciousness I talked about excuse me I've talked about this on the show many times this is something that many people don't like to hear that they are resistant to because it makes them uncomfortable in knowing how a specific aspect of the universe as far as the law of attraction works there is something called dark unity consciousness for dark unasyn meaning that someone who is basically committed to the work of evil can come into this form of oneness for the wrong reasons for the wrong goals for you know for all of the wrong efforts there would be the opposite of the true great work this means that a Dominator a controller a sorcerer a dark ocultist call it whatever you want they do have a way that they think and then they do feel a certain way about their ideas their ideologies and those are in unison with each other their emotions do not betray their thoughts as they think so they feel and then their actions do not betray either one of these their actions are in compliance are in unity with their thoughts and their emotions and this is why they continue to be successful and this is why we are continuing to be largely conquered because more of them in this agenda in this dark agenda are unified they're on the same page as they think so they feel and so they hacked and that's why the universe is respecting their unity it will give us what we wish for if we are in unison in unity in these three principles in these three aspects of our consciousness sadly they have this form of unity dark though it may be and sadly the human population as a whole does not that's what this show it is ultimately attempting to do is to bring more people of the good persuasion who are doing the true will and the true great work into this positive unity consciousness as we think so we feel so we act psychedelics can be a tool to that end and again that's all they are these are tools we commune with them and they help us or they could be a detriment if they are used in the wrong context or with the wrong mindset so if we use them in the proper context which I talked a little bit about last week the set and setting the mindset and then the external surroundings being conducive to raising awareness conducive to helping the community Dusit 2x exploring the deeper aspects of ourselves in our own consciousness then they will be of great use to us and they can be termed at that point tools or methods for our personal evolution and I certainly feel that that is why they are here that is why they are on the earth these are natural agents for consciousness exploration dominators don't want consciousness to be explored they want us ignorant of self they want us ignorant of the laws of nature they want us ignorant of the natural world and natural law this is why they will do anything in their power to demonize these substances and attach all levels of fear to them they will try to tell you that they're highly dangerous or addictive or will make you jump out of windows etc etc and all other levels of nonsense that go along with their fear-mongering and propaganda when it comes to psychedelics but these things simply are not true of course they can be detrimental if we use them in the wrong mindset anything can again Bob on the show previous to this when he was interviewing me brought up the dangers of alcohol look at how alcohol is abused and it can be more dangerous than psychedelics in just about every way yet it's legal look at the additives that are put in tobacco products in this country causing lung cancer again it isn't tobacco itself it's the additives and the chemicals and the fertilizers and the pesticides and all the other taste enhancers and the things that make the paper burn slower that's what will give people lung cancer not organically grown tobacco and indigenous people smoke organically grown tobacco practically 24 hours a day and there's no instances of lung cancer in their culture here it's rampant because of all the other junk chemical junk that is added to tobacco products in the United States and indeed throughout the Western world so again psychedelics are boundary dissolves they help us break down walls in consciousness they must explore aspects of our personality and deeper aspects of ourselves that we may be resistant in an ordinary state of consciousness to exploring so

I highly highly suggest people look into the works of Terence Mckenna he is an incredibly eloquent speaker he has a very distinctive voice some people may find it slightly comical but absolutely empowering information and there's tons of audio out there by and there's tons of video out there by him just through a google search on his name and and you you will be able to go to town for months practically with the amount of information out there on Terence Mckenna we're going to be coming up to a break in a couple of minutes for some ads for the network to run but I want to give the call-in number once again new call-in number for the show toll-free eight seven seven five nine eight eight five four nine once again the new call-in number toll-free eight seven seven five nine eight eight five four nine I'm going to shift gears now so we're going to get into the basic topics that pretty much wraps up what I wanted to say about psychedelics but let's talk about now a couple of other ways that the dominators and the dominator regime if you will in science and medicine and government attack the physical body complex and two of the most damaging ways that they do this is through vaccinations and flu shots so let's talk about these two chemical attacks in the next half an hour or so and then I'll try to switch gears and go into the chemtrail phenomenon vaccines are administered practically right out of the womb an infant's immune system isn't even beginning to develop when this cocktail of chemicals is injected and there were you know it started with a handful of shots then it climbed into the tens then into the tea you know into the 20s and now I believe it's something in in the neighborhood of over 40 different shots are given to children even before they reach the age of two now first of all if people don't just find that figure crazy in and of itself I don't really understand how you what you're thinking because if you think that children who have grown up without these things for tens of thousands of years actually need this sludge of chemicals injected into them in infancy to be able to live and carry on a normal life I think there's something wrong with the way you think if that's what you think this would be dangerous for an adult to take in let alone a newborn child look at some of the substances that are in the chemicals that are in vaccines that we inject in the newborn children we're coming up to a break here I'll be back in a couple of minutes after these ads run you're listening - what on earth is happening right here on revolution broadcast back in a few [Music] [Applause] [Music] in Warcraft Ephesus and all I don't have control of the population total Tier II is amongst us the burning of humanity rests on our shoulders the hunger would like it to expose the global crimes images known as the New World Order together we are one together not in Hell soldiers the battle for free humanity insolence join us in the fight you know of calm all right this is part opportunity to my show twisty hole radio Monday through Friday at 7 p.m. Eastern Time join me Jill Joseph and my co-host John King and AC Griffith Thursdays and Sunday nights and 8 p.m. Eastern Time for freedom route radios bridging the gap on the Intel hub radio network did you ever wish that you could have done something while you still have the chance what will you do with your income in tomorrow or if you lose your home as many already have do you have enough money to survive through an economic depression if you don't want to gamble with your future then free to prosper calm can help you quickly end your debt problems protect your property in possessions and develop a personal strategy to get you through the hard times most importantly you get to keep your money and not pay another cent to creditors our program is often superior to bankruptcy consolidation or settlement digit three to prosper calm to find out more this is your real chance to act ahead so don't delay your future may depend on it Paul seven one six one five zero one two three to learn more at seven one eight six one five zero one two three or visit free to prosper calm today all right we're back on this is what on earth is happening I'm your host mark passio we were talking about flu shots and vaccines specifically we had gotten into vaccinations of children right out of the womb and this is where they want the chemical assault to start folks they wanted to start as early as possible because we don't really understand the long-term effects of some of the things that are being injected into our children we don't really understand what that will do to the brain as it is even beginning to develop we don't ultimately understand the long-term effects of what that will do to the immune system and doctors want to tell people that these cocktails of chemicals that we call vaccines are safe for our children but I question that as the established wisdom of the day and I think the people should question that as well and look into some of the things that are in these vaccines and think about it long and hard if this is something that you want to be injecting into an infant baby look at what's in some of the vaccines that we give to our children luminol phosphate now aluminum is a metal and it's associated with a brain disease called Alzheimer's ammonium is in vaccination shots ammonium in the form of ammonium sulfate another form of aluminum called aluminum potassium sulfate a substance that you hear a lot about in recent times because it is in a lot of the flu shots that are given is by Marysol by Marysol is a preservative added to the flute flu shots and vaccines that we give to children by Marysol is essentially a form of mercury it is actually 50% mercury by weight that's what thimerosal is this is in the vaccinations that your children are getting right now you have a newborn child and you vaccinate them by Marysol is almost guaranteed to be in one of those shots and it is a form of mercury a heavy metal that is complete poison this is a poison by anyway you want to look at it it's not a preservative it's a poison another thing that's added to a lot of vaccines formaldehyde yeah you didn't hear me wrong formaldehyde you know the thing that they keep dead tissue preserved with formaldehyde this is in the things that we are injecting into our children one of the things that you will invariably come across when you start doing some vaccine research is its connection to autism and scientists and doctors in the establishment want to deny this they want to tell people oh no there is no link between vaccination and autism well I would highly suggest that people look into the connection between the vaccination of very young children and the appearance in children in later months of autism there's a high high probability that these are very closely linked there was a conference that was held several years ago called the autism and vaccine conference I believe this was hosted by dr. Rimland RI ml a nd his name is Bernard Rimland you cannot do a search for this type in autism conference and vaccines into a search engine or into YouTube and there's a video out there it's very short just watch it it's footage from this conference and the master of ceremonies of the conference is asking people for a show of hands and the audience is full of parents with autistic children and he asked them to raise their hands and tell tell him by show of hands um how many children there believe that they're how many parents there believe that their children became autistic after the second round of vaccination shots that they received and just about everyone's hand goes up he also asked them about how many of them have documented evidence that this is when this happened now again you can believe in coincidence theory all you want and you could say well autism it tends to get diagnosed in children at a certain age and this just happened to coincide you know with this tightness of age but you'll notice that this happened right after a specific round of vaccinations because these are given at calibrated time intervals there's a schedule they call it that these are given and almost every one of these parents had children that became autistic after a specific shot was given now I think you have to do some mental gymnastics to say that that's just coincidence a whole room of about 400 people or more all simultaneously raising their hands when asked if this is when it happened connection there and it needs to be explored with an open mind by the medical community again I'm not a doctor I'm not a scientist but I can see patterns when they make themselves the very obvious and I think this is a clear example of a pattern that many people do see but the established scientific powers that be and the people who write the established scientific and medical literature and teach courses on this stuff don't want to do the thing that they need to do if they're going to be honest with themselves but yet it is the most difficult thing for anyone to do and that's admit when they're wrong or admit that the previous paradigm may not be as correct as they once thought and that they once put their faith in it so strongly thinking that it is it's just this way this is how it is they don't want to backpedal from that position based upon evidence that is right before them and say we may be wrong about this and we need to take a second look at it so it looks like um I don't know if we're having any problem with the calling line but I'm going to give a backup call number okay if you're having trouble getting through on eight seven seven five nine eight eight five four nine you can call this alternative number five zero five seven one five six five two two so that's an alternative number to calling five zero five seven one five six five two two you can also call in on the old talk shoe line I'm still monitoring monitoring that also that one is seven two four four four four seven four four four let's just give them all out seven two four four four four seven four four four the call ID number on talk shoe is eight three five one five so hopefully people will have some luck with one of those numbers again no taboo topics call in and talk about anything that you like um some resources to look into the dangers of vaccinating children from infancy or at all really um look at the connection with autism and do your own research on this you want to look at sherry ten pennies work an excellent resource on vaccines in general and particularly flu shots as well dr. 10 penny calm dr te n pn n PE n NY dr te n PE n NY dr. 10 penny calm sherry 10 penny a gentleman whose name i mentioned over the last couple weeks is russell laylock russell Blaylock DL a yl Ock just phenomenal information on vaccinations flu shots excitotoxin 's artificial sweeteners brain health in general he's got something called a brain repair formula that helps to bring balance back to the neocortex of the brain which is the higher functioning the higher thought center of the human brain complex this is really what is under so much heavy attack by all of these methods through the media through the food that we eat through the substances that people take into their body through um through along the the media that we watch through the electromagnetic frequencies that were basically bathed in constantly all of these things are detrimental to human health and to human thought processes and there are their methods of mind-control when it's when it's put all together that's what these are um another resource that people may have heard about and I really highly commend her for doing what she's doing the actress Jenny McCarthy she has a great website called Generation Rescue org Generation Rescue dot o-r-g a phenomenal resource on vaccines what's in them what to do and not do you know how to get advice just a great a great website Generation Rescue org I have a caller on talk shoe here and I know that he's been personally affected by this and he's a friend of mine and he's got his own show on talk to called a caution tinfoil hat area I'm going to attempt to take his call here through talk show Kevin you're on what on earth is happening how are you my friend hi mark can you hear me yes now I'm clear but okay good I want to thank you actually I wasn't even going to call in until you actually mentioned Jenny McCarthy but I've been looking over at my bookshelf behind me and I see louder than words sitting sitting there and it's a called a mother's journey in healing autism and it was getting McCarthy's book she was also author of mother warriors both books gave my wife quite a bit of comfort and just the idea that she was not alone in what she was going through and so your what you were suggesting earlier or what we were saying earlier not to just being flat out saying because you know it about all those people being there at that conference is it it's more true than people can possibly imagine it it really feels like for me for someone who has delved into so many different areas one that sticks out in my head so much and it really messes with me is from brave new worlds they used to dump alcohol into the clone decanters where they made children court for their futuristic society um into there so that they could make weaker humans essentially that are not as fully mentally developed and then are great at doing like the trash pickup work and so on and so forth and then do not actually to get paid a larger wage because they're happier even there even programs on me happier along the way to the function at a lower in society yes they would also deprive oxygen to the brain of the children that they were decanting in brave new world that was another method to basically make the brain develop much less slowly than what I believed were termed the alphas exactly the people who were geared were of higher strata of society so it was a pure social of biochemical engineering is what it was and this is I believe may be part of the vaccine agenda it may be outright eugenics period just attempting to ruin the health and immune systems of people write it out of the womb and they say it's to strengthen the immune system I think I I don't think we need to be doing that through chemical means I think that the food that we eat needs to be our medicine and we need to understand proper nutrition let's start with that let's get that right and then can move on from there you know again I mentioned the London wonderland yeah I mentioned even on one of your last shows it's not always what you actually have to do but what you should stop doing something is right mall and taking red dye out of like red for tea specifically out of your child's diet could dramatically change how your child's cognitive functions like go on a normal basis because my son he specifically has had issues than if not allowed any sort of red candies we had to tell her like the teachers at school like if they if he somehow earned some sort of treat or whatever that bet or gets it from another student he's not allowed to have it he he just isn't and his story yet children are in such a delicate state of development when I mean this is their most formative time period the brain is developing the the body is developing the immune system is developing we want to keep the chemicals down to a minimum I mean this is basic common sense I mean why would you want to bombard a child that is basically has just come into the world and is still growing and developing with anything that that's not natural you know why not just get them on the right diet get them on proper nutrition high nutrient value food you know get them off sugary foods you know first of all how about one of the things that children need for proper brain development is mothers milk breast milk so many mothers don't feed their children breast milk and just uh given this infant formula breast milk is one of the things that children need that's why women have mammary glands ladies and gentlemen one of my Irish I just met your chat all day every day yeah it did with a specific woman's specifically during the first three or four days asks a large amount of nutrients that act then as passing along the same immunizations that the mother automatically has from doing the same thing from previous generation and as well as I know this sounds silly but it is also been documented I looked I a suggest people look into it but I've had nurses concur with this at doctors offices on multiple occasions where children would even pick their nose and eat them and because of catching various particles of various diseases in there and they eat them it somehow consumes into their body the same way the quest milk does and it acts as a natural immunization as silly and as disgusting as it sounds children picking their nose and eating it have been known to actually build up tolerances to bear various diseases Wow discussing though it may sound a sentence for sure I know it sounds so ridiculous but it because those little particles get caught in that area and then it gets consumed in a different fashion and enters the body and I think related it somehow when the body breaks things down it becomes a part of who you are so therefore you are what you eat and if you wind up eating little specks of various things that's just like the immunisation does what they give you the actual disease little particles of the baby immunity and I system the immune system needs needs on germs and microbes to practice on exactly that's just exactly I think George Carlin had a pretty funny skit about that that wouldn't prom at all for anybody guys so so yeah again the solutions are simple you know we need to get back to natural ways of dealing with things and uh you know doctors and and um you know pharmaceutical industry specialists they think that we can improve on nature's game that's what they are all ultimately about God got it wrong nature got it wrong and we need to refine that it isn't about living in harmony with nature it's about conquering it with something that's artificial that's man-made and this almost invariably leads to more problems not the solving of these problems but it adds other problems on for the list yeah there's a Michael Kellner quote from that I actually originally heard from David Icke and kid fit just look at us just look at it everything is upside down doctors destroy health lawyers destroy justed universities destroy knowledge governments 4-straight freedom and the major media destroy information and religions destroy spirituality their orders and it just bottles the mind that all of these things have been institutionalized to such a degree that my wife who now just not got our son medical insurance can't you a doctor today to get him checked out and the woman wound up being a geriatrics doctor because that's where the system sent her for the free checkup and the woman had no clue no clue about the issues with autism why did you have him diagnosed for a dee dee even though literally in the sentence before she had asked the question my wife had responded to her and another way about saying how he specifically had something called pdd-nos and that means pervasive developmental disorder not otherwise specified is the exactness of TDD and om Wow she had no clue what was going on because the system sent her with my son to the nearest doctor who happens to be a geriatric and family practice doctor and so had really no clue how to deal with my wife or my son who clearly had specialties and what measures are now taken if it's not - uh - pressing uh what what types of treatments or are you uh honestly undergoing work he is only going through speech therapy in a specialized classroom at the school where he is able to that during the morning and then during the afternoon he's in a normal classroom with the rest of first graders now do you have any suspicions about ran may have what may have a caught brought on I'll hit his yeah autism okay I'm missing it out in the ended with event yeah I'm missing out on one of your previous calls and I do believe 100% it's the exact timing that you're speaking of like that roomful of 400 or so mothers and so on there are right on point it's really that simple I am a father of a child who has a variant of autism that develops immediately after he was given his second round of may of of immunization and he was not going to be allowed to go into the school system if she did not get them is what we were talking so we had subject them to this in order to get him into a school which was not the right setting for him we found out but it did lead us ultimately to right now I have to admit through the spunk through the school systems as unfunctional they were to begin with once he was diagnosed he was unable to get the treatment that he needed and it is now well on his way to the point that most likely next year not the hundred percent guarantee depends on how the rest of the year goes but if he continues well in this parent course of progress he will be in a normal second grade classroom and will be able to function just as well as anyone else in society and possibly even have a couple of the benefits that go along with pdd-nos so I need to stress to your audience that happens to come across this information not just to like get the kid diagnosed early but get him early in an interval in it in an early intervention type of program in order to get things fixed as early as possible you don't know what's going on you may think you can unlike their clunky kid with a DD but you don't you have you just had someone who has a little bit more will and needs a little bit more direction absolutely Kevin I thanks thank you so much for sharing your story and I wish you the best of luck and um you know I hope everything turns out great with Max I'm sure things will - yeah I'm sure he'll be fine thank you keep keep the diet improving that's the main and that's the main important thing because that's what all is going to really build the brain and really help him to you know form all of the cognitive systems that basically help with our pattern recognition and that that's the main key key thing to do as far as human health is those human health goes again about that quote from Hippocrates let your food be your medicine and your medicine be your food take it to heart and put it in practice have been enjoying your show as well ah kevin has a show on talk show every Friday night at 10:00 p.m. you go on a talk shoes page and search for caution tinfoil hat area a nice bit of humor interjected there into the title but he talks about a lot of serious topics such as this on a show and I wish you the best of luck with your show Kevin they have another caller from central Pennsylvania here we go caller from central Pennsylvania you are on live on what on earth is happening what do you have for us hey Mark hey Don you guys actually touched right on what I was going to speak about first off I found your show because of Kevin he's on my facebook and I decided to come on and check it out tonight and I've enjoyed what I've heard so far but I was going to touch him the same thing you know people ask me why don't my backs meeting my child I stopped at six months and I tell them I say why because you know it's not healthy forms destroying their brain the chemicals that are in there just are not good for the body and they say why aren't you worried about you in sick or you know catching any of these things I say no of course not I said I let him go out he plays in the dirt you know if you drop something on the floor and the house they pick it up and eat it you know you build your immunity by the exposure to nature and people don't realize that and it's just it it it makes you wonder how they don't want you realize it sit back and go wait I didn't realize this either so it's real hard to deal with people that's what I've been learning and experiencing when it comes to discussing vaccines or 9/11 or anything whatever it is you're talking about that is not accepted in society because it's like not in light it's like they want to sanitize society now a society where you're completely uh you know a free of any exposure to anything harmful and there's no such thing doesn't exist you live in the physical domain you live in a physical world it was the only they were viable here the only thing that I feel home for heal it harmful here we put here I mean that's right when when the planet was made and life started on this planet that's what the body needed and everything we had and I'm not saying it's wrong that we've developed these things I mean we have developed some great things but then you look at ten trails or you look at the vaccines or you look at the just all the things we do the bombing we do do you and in our in our ammunition I mean there's just so many things we do that is destroying our own environment and I'm not you know I'm not a tree I had a one classify people are anything but I'm not a tree hugger big environmentalist I just believe that nature is what was given to us and that's what we should be respecting and loving absolutely we're a part of that natural holistic living system you know right it functions with us in it as one and we can't look at it as like it's ours to conquer and we need to constantly change and try to improve upon its design you know we need to integrate in with it and live in harmony with it and things will get better for us the more we can try to keep struggling against it the more we're going to you know basically be like uh you know trying to go upstream against a raging river and it's not going to work out for our betterment it's going to be very detrimental to our evolutionary progress well is another question be who who do we even think we are to think that we have the right or the ability to control any of it whether it be again back entrails with with whether my weather modification huh who are we to think that we should be allowed to or able to control it as if the living weather patterns of the system of the earth aren't there for reason as well see we exactly think that there's no purpose unless it serves ulcers the providing something good for our agenda our plans you know don't get me wrong hey build build a house for shelter wear clothes for warmth and protection from the elements I don't have problems with those things you know that right a form of technology that serves us you know otherwise we'd be sleeping out and then you know freezing you know uh you know sheets of ice rain out in the winter but um you know it gets taken to an accessor gets taken to an extreme and then we get into things like genetic modification of things that we eat you know and then he really can happen that you have going on right now you know there's so many different things and then you yeah how about you know they're trying to get mosquitoes loaded up with with vaccines the force vaccinate us yes yeah I mean this company or you right bad I don't know yes that's definitely could be one of the next plans of trying to get that into and get those chemical cocktails into our systems another thing is the chemtrails may be attempting to do this this may be one of the reasons for the mass spraying over populated areas now bringing us how normal going on shopping or not I don't know what that one on topic it is about chemtrails but I don't I'm actually in Southwest Florida my my cell phones through Pennsylvania but um I haven't had any down here in about two and a half three weeks um and I've seen other reports on against on my Facebook groups and stuff that have said they haven't seen any in their areas for about the same period of time I assumed it was because of the elections and the daily traveling around doing their campaigning and all that other junk that they do but now that's over most and we're out of the country at this given moment where are they why have they I just don't know if you're experiencing that up there or not yes yeah no that that's true and this is something we could talk about a little bit um I have not yet been able to determine the pattern of chemtrails spraying it is something that has eluded me um it seems very random it is a bond for a time off for a time right and one thing I do notice is that almost invariably almost now this is not 100% but almost all the time after a very heavy day of Cantrell spraying um there will be a rainfall very shortly thereafter often on our very next day right and now now I don't and I again I think there's other things while I'm at I'm in Southwest Florida a near and old it's a runway that is marked private from satellite pictures and it's marked as a private Airport and I know bushes used to fly in little neighborhood above the grand a lot down that thumb in that area um and I I've always seen before I got into all this and this is two three years ago I always thought something strange or I always joke we don't get rain over this little section of where I live um but we'll get chemtrails all the time we never ever ever get rain like we'll see the storms coming in from the neighboring town and it goes right around us so I always thought there was something going on there maybe some kind of I don't say force field but some kind of modification of that level from the ground that was preventing everything getting rain possibly deflect certain weather patterns or airflow patterns like it's really weird you can expect the clouds match and then they stop and go around yet we get very minimal pain in my little eye I mean like a ten square mile at the most area and it's right next to the airport the airport actually we could walk through the woods to get to it we did saltine off and it's as I always thought something with strange there and it could be a connection with either the chemtrails or Harper or something along those lines right now right um but what I forgot where we were going I went off on a on a thing there with path I'm sorry no problem we're going to transition into this topic so I thank you for bringing it up and thanks for calling in and uh feel free to call in any other time uh you know always always enjoy the caller's to call in to the show keep it up keep listening I'll spread the word about the show check out the website and thanks again thank you have a great night you got it yeah but it's a good topic to transition before we do that I just want to briefly mention a little bit about flu shots and then we can get into the chemtrail topic which the last caller has alluded to and I can start to lay out what that is for some listeners that may not be aware of this phenomenon hopefully most people who list these networks are but again we need to take this information to the wider masses of people and bring this to their attention make them look at it you know talk about it and have your information right there bring it up in a very logical way where you can show the me refutable evidence even if they don't aren't where you accepted at first you're planting seeds as a brief aside a little anecdote someone that I maybe listen to the show right now I don't know but I was telling carve out 9/11 for many many years and I was and we're coming up to another break folks has taken a couple of minutes for the network announcements you're listening to what on earth is happening right here on the revolution broadcasting internet radio network I'm your host mark SEO we'll be back right after these words to cure your future get your non-hybrid feedback now with the looming economic crisis food shortages and other toxic disaster now is the time to be ready just click on the heirloom organics banner at the top of our BlogTalkRadio page today to cure your future and the future of your family in hard times heirloom organic seeds did you ever wish that you could have done something while you still had the chance what will you do with your income in tomorrow or if you lose your home is many already half do you have enough money to survive through an economic depression if you don't want to gamble with your future then free to prosper calm can help you quickly end your debt problems protect your property in possessions and develop a personal strategy to get you through the hard times most importantly you get to keep your money and not pay another cent to creditors our program is often superior to bankruptcy consolidation or settlement visit free to prosper calm to find out more this is your real chance slack ahead so don't delay your future may depend on it call seven one eight six one five zero one two three to learn more at seven one eight six one five zero one two three or visit free to prosper calm today don't forget to catch the bientôt hub Wednesdays and Saturdays at 5 p.m. Pacific 8 p.m. Eastern on the Intel Hub radio.com in a hole where cool appetizers and long ago after you control of the population [Music] volunteering is amongst us a burden of humanity and on our shoulders the only way out is to expose the global crimes images known and the New World Order together we are all one here no intel alters the battle for Humanity and soon enough in the fight and al-haram you are with me to the Intel hub news network crushing a new world order [Music] [Music] all right we're back on what on earth is happening on your host mark passio my website is what on earth is happening calm before the break I was just talking about planting seeds with this type of information to people who may be initially resistant and this is something that you're bound to come up against if you haven't already um someone that I know I won't mention by the name of this person was very resistant about the 911 inside job about all the information having to do with 911 being a example of a false flag and we'll get into that in depth in the weeks to come in this show however um you know I persisted with giving her information for years about it you know a little bit here a little bit there but I guess the seed eventually sprouted and a couple weeks back she told me that she is now thinking that I was correct about the nature of the event and want to look more into it so I gave her some movies and documentaries to research it on her own so sometimes the truth takes time to work its way into people's psyche and that's why we shouldn't give up we need to keep putting it out there that's what we are tasked with doing and that's what we will continue to do so um let's look briefly at flu shots because this is something that's been big over the last couple years and no doubt they'll be starting this up again over the end of the fall and the winter this year look at of the things that are in flu shots the adjuvant thimerosal and flu shots as well um just it's it's the st. the similar cocktail is as in other forms of vaccinations another thing that I want to bring up before I get into this is if they're so effective and they actually do prevent you from getting the disease what are you worried about people who aren't getting it for as Kevin said they won't let his son go to a school where he wasn't vaccinated like this if if the vaccine is so effective and the children are now immunized against this disease what are you worried about a child not having it that would just be on them if they develop the disease wouldn't it logically it doesn't even make sense to force people to be vaccinated because if it's your choice and you you have it done to you then you're fine right if it's so safe and effective you don't have to worry about somebody who may be carrying the disease now because you took the shot and you're immunized against it that doesn't seem to be good enough in their world of logic anyway but just thought I'd put it out there there's now mandatory flu shots for hospital workers this is something that's affected uh my partner and you know our life because uh my girlfriend is a nurse and had to go through this uh you know just constant badgering to get the shot and had to get a waiver signed by a priest I wouldn't accept just philosophical grounds and health issue grounds that she doesn't accept taking something into her body that she doesn't want needed some form of a religious waiver as if a priest telling somebody that this person doesn't want it on on religious grounds is okay you know and that's not even our you know of going to a priest isn't even within our world view because we're not religious spiritual yes not religious and uh you know the the the gentleman who did write the letter so that she could be exempted from this ridiculousness it is a great person and uh you know did a good thing by writing that in and I thank him for it however why should this even need to be done I mean this is a basic body ownership uh issue do you own your body or do you not own your body whose body is this isn't my body or is it someone else's body if I don't want something put into my body then I there's nothing else that should need to be said about it I don't want that in me period you don't even need to know the reasons I don't want it in me you don't own me you don't own my body the end good night you know it's really that simple it's a open-and-shut case as far as I'm concerned but for some reason other people don't see it as simply as that they want to say come up with all kinds of justifications while you're endangering someone else by not getting it nonsense again if it's effective you go right ahead do what you want with your body and leave me alone so another thing there they're coming up with is waivers making people sign waivers to say if something happens and you're harmed by taking this shot you can't do anything about it you have no legal recourse to take any action against anybody it's no one's fault oh really it's no one's fault you take a harmful chemical sludge compound in sludge cocktail into your body and then it creates something like you know autism or Gyan Berets syndrome that that's spelled um uh GUI ll AI n - VAR re check that out Jian beret syndrome this is another disease that people contract from taking flu shots and vaccines um it's a uh it's an immune autoimmune disorder that is basically a that basically affects the nervous system Keon beret syndrome and this is contracted from taking flu shots in many instances because of all the different additives and adjuvants the things that kick the immune system into high gear that are added to um these shots particularly the saw h1n1 swine flu shot I highly would recommend looking into some of the things that are in it and some of the side effects that can be caused or I should say the effects of taking the shot so um there's you know so much research that you can do again I said sherry Tenpenny is a good resource dr. Russell Blaylock um Len Horowitz Jenny McCarthy and the list could go on and on I'll post some of these to the podcast section let's shift gears now and get into the chemtrail phenomenon for the remainder of the show and this will wrap up be you know we could talk about HAARP a little bit too we could talk about cell phone radiation is it kind of connected in many ways with a spring at least in some people's minds it is and may there may be some overlap there before we do that let me just give the call in numbers one more time okay you can call in on a couple of different lines I'll give the blog talk call-in number is eight seven seven five nine eight eight five four nine once again eight seven seven five nine eight eight five four nine you have problems on that line call in to the talk-show line that I'm basically streaming this show over as well this is the one I've been using this is seems to be working seven two four four four four seven four four four seven two four four four four seven four four four the call ID number is eight three five one five you'll be prompted to put that call ID number and if you call other talks you call a number once again the call ID eight three five one five so the chemtrail phenomena now this is spelled CH am pi r a ILS chemtrails so like chemical trails chemtrails what these are are aerosol spraying from flames these are aerosol spray operations from claims that can be flying at any altitude now the first thing is to be able to distinguish a chem trail from a contrail a contrail is short for condensation trail this is essentially frozen water vapor okay this is water these are ice crystals thank because at very high elevations usually above let's say 25 to 30 thousand feet approximately the air is so cold that when a plane goes through it often from the wing tips you will have condensation happening and there will be ice crystals forming as a result of that these pressures okay from the plane cutting through the atmosphere at this high altitude what that will create is a trail behind the plane usually from the wingtips it could be from the tail however okay and this is a trail known as a contrail these are small ice particles that eventually then evaporate and become water vapor again okay they go back to a gaseous state you will see these dispel from behind planes very quickly often within about 10 to 15 maybe 20 seconds so you'll see them up there in the high atmosphere contrails form only up at least above 20,000 feet in this under certain conditions even higher 30,000 feet okay so about 25,000 feet the trail will dispel quickly that's how you will know it's a contrail and not a chem trail chemtrails do not dispel quickly they are persistent they stay in the atmosphere and they happen at any altitude because it is a particulate spray it is actually sprayed from nozzles attached to the the jet or plane what you are witnessing when you are watching a chem trail as opposed to a contrail is small bits of particulate matter it's not water crystals these are actual chemicals that are being emitted from the plane from some mechanism like a spray nozzle or a canvasser equipped on the plane these trails that are left behind when these chemicals are sprayed out of the jet then expand spread out and are persistent they linger they linger in the atmosphere for hours and they create almost like an artificial cloud bank so they linger they spread out and they begin to obscure the blue sky so you get like a haze effect or an outright cloud effect this is how you know you have a chem trail now you can watch them do this do you just pay attention when planes are out there if you see a long big expanding trail behind the plane and it lingers and these planes will often not be flying at a very high altitude they will be flying around eight to ten maybe fifteen thousand feet now here's the thing contrails can not even form at that altitude you do not have the atmospheric conditions that are necessary at those low altitudes this is basic aviation physics you cannot have a contrail a water condensation trail of ice crystals forming at such low altitudes it just doesn't happen once you get up around twenty-five thirty thousand feet yes then you have contrails chemtrails are often seen sprayed in great abundance at as low as 8,000 feet or lower so these are two very distinct phenomenon the chemtrails phenomenon is legitimate it is real it is measurable and it has been proven to be ongoing weather people say oh no you know the first link if you just type in chemtrails the first link you're going to get back is a Wikipedia link that says the chemtrails conspiracy theory the connotations that go along with that term conspiracy theory people ask me if I talk about conspiracy theories on my show or they don't know about what we do here and I say nothing of the kind I talk about things that are verifiable through facts and I talk about some things that I know from first hand experience that I have directly experienced there's no theorizing going on on the show now when we get into theory is why they're doing this now that's what I couldn't tell you that I know for sure now we can theorize whether it's happening there is no question I mean you only need census to understand that this is taking place and being able to employ your senses make observations and trust what you observe with your own eyes you know and if you have measuring instruments to be able to look at what these chemtrails are comprised of that the instrumentation that you're using to do that as to whether it's happening 100% certain then we can get into the why but let's look at some of the things that they are spraying that we know that they are spraying because chemical analysis has been performed on some of these trails samples have been taken this stuff falls to the ground it doesn't linger up there forever these are metal particulates again the theme going back once again to metals getting metals into us mercury in the vaccines and flu shots getting soft metals or heavy metals into a body into the brain some of the things that are in chemtrails aluminum has been shown to be in high concentrations aluminum again we saw that in vaccines why would somebody be trying to get the lumina into the human body just think about that fact alone for a few minutes aluminum has been connected again with Alzheimer's disease it affects memory and the ability to uh basically remember details function in a normal way the brain capacity the neural connections are to degrade within the brain my grandfather suffered from Alzheimer's disease for many many years before he passed away and it's a horrible disease to watch somebody I live with they're basically robbed of you know their personality and they become someone who is different that it is not the person that you know you grew up around and no because essentially it takes memory from them and they don't remember who they are who you are and it's extremely painful coping with that so aluminum connected with Alzheimer's disease and it is sprayed from these jets and these are big tanker jets in many cases some people claim they're kc-135s I believe that's an Air Force jet some people have claimed that the chemtrails are a joint military operation between a US and Canadian Air Force forces at least in North America but these are being sprayed all over the world in just about every country in the Western world so in Western civilization I should say so another metal that is found in the chemtrails is barium barium extremely toxic when it reaches certain concentrations in the body why would they be spraying barium in the atmosphere it's very curious there's very different explanations or theories to why this is being done but that is being done is not in dispute this is no conspiracy theory this is measurable so I want it I'll first give some resources to look into this phenomenon and you can look into this for years there's so much information on the internet about this and there's some good documentaries on it and there's some great websites so the person who made me kentrell aware the person who first exposed this um at least to my eyes and ears was William Thomas and he's been talking about this to my knowledge since at least 1997 probably even before that because I became aware of this phenomenon in early 1997 and it was through William Thomas's website and the this of this website is will Thomas dotnet WI ll th OU mas will Thomas thought net I'll link some of these on the podcast page another good site that was pretty early on in this uh documenting this phenomenon was chemtrail central.com as CH am pi are ail CNT RAL chemtrails central.com check that site out another great researcher who's put together a huge repository of information on this phenomenon is Clifford Carnot come okay he has a website called aerosol crimes and cover-up aerosol crimes and cover-up this is at karna calm calm I'll spell that CA r ni c om karna calm calm two more I'll give out for people's further research and edification educate yourself org of just a phenomenal resource in its own right on just about any topic educate yourself work and this is khlifa needed so educate - yourself dot org and you want to go to the chemtrails section but if you want to go there directly it simply educate - yourself dot org slash CT educate yourself org slash CT and finally another website to check out is chemtrails dot CC chemtrails dot CC these are all incredible resources about this phenomenon to learn more I recommend checking them out I'll link them on the podcast page when the show is up in the podcast section of my site just recently a great documentary has been put out by people within the freedom community and it is called what in the world are they spraying this documentary features G Edward Griffin and many other experts that talk about the chemtrail phenomenon what it is how it is carried out and what it may mean some of the possible explanations for it you know I think a better topic would have been why in the world are they spring you know we can do the research to find out what these things are what this particulate matter is but why they're doing it is the real question to be asked so we got to get the what establish but then we need to ask the why and the main thing that seems to be one of the biggest theories in the answering of the question why are they spraying this is geoengineering now geoengineering is a term given to general weather modification modifying the atmosphere modifying the way that weather weather patterns move and flow to create weather or to change weather in specific geographic regions of the planet again I think this is a dangerous thing to get involved in you are messing with the natural system of the earth that is a holistic a unified system that we are a part of that isn't ours to exploit and isn't ours to UM just do it as we will and try to conquer and control um we aren't the creators of this planet or the creators of the weather patterns that manifest on it they manifest for specific reasons there's a purpose behind it it's a living system it's not a dead clump of inert matter okay it has to do with the cycle of life it has to do with life period in general you start messing with that in a way that you don't fully understand what you're doing and you're going to probably create more harmful repercussions than you do good ones regardless of what your intent is because one you don't have the full picture of what you're really doing and I say this specifically to the pilots who spray these things you want to want to do something with this information give this podcast to some of the unconscious fools who go out and spray something that they don't even know what they're spraying or doing you think these pilots who get paid to go out there in the military in the Air Force or the Navy has has planes as well whatever the case may be go out and spray substances which you don't really know the reason why you're spraying these you may have been told one thing and you have no way of verifying whether that's actually the reason why your superiors want these substances in the air but yet before paycheck you'll go and spray over populated centers something that you do not absolutely have no verifiable way of knowing what it is you're actually doing imagine that I mean really for real and yet this is what people are doing constantly all day every day and just about ever every country and in the world practically going out accepting money to spray on populated regions and they'll claim oh yeah it's for the good oh you wouldn't want to know what would happen if we didn't do this you have no idea zero idea of why you're really doing this because your owners would never tell you why they're really doing if this was for any altruistic reasons they would be right there trying to tout it and put it out there to the masses so that they know how wonderful our our our masters are that they are do this for our benefit because look at you know what dire straits we would be in if they didn't we need them they want to be seen as needed in any circumstance so if they're not if they're a posh hawks and secret about this it has some nefarious you can be guaranteed to be sure that it has some sort of nefarious purpose that they're not telling you and particularly they're not going to tell their lap dog and yeah that's that's what the pilots who do this are unconscious lap dogs go do this dog that's exactly how your owners think of you and believe me you have owners my friends you have owners I don't even understand how people like that can look at themselves in the mirror knowing that they're owned knowing that their dog on a leash and yeah I know that's harsh language yeah you're right it is because how could your you even know whether your actions are moral or not when you've barely looked into the phenomenon you don't know why you don't know the why you don't even ask that question that's a question that's not even in your vocabulary that's anathema to the military-industrial complex chain of command you never dare ask that question dog right that question is not in your vocabulary that's the first thing you need to erase when you take that job isn't it because your owner puts you on that leash and says you do what I tell you to dog you'll dare question me I'm your owner and you know it selling your soul my friends selling your soul and I think you got nerve to do it nerve and your children are breathing that crap in your children are breathing that crap in so you know people who listen to the show frequently know I get a little bit emotional and you know tend to uh start turning up the heat when it comes to particularly people who help and support this control system and take a paycheck for doing so I got a family to support I have to put myself through school yeah you don't need to do none of that by doing this by spraying something that you don't know what it's doing you don't know what the long-term health effects are you don't know what the long-term environmental effects are you know no idea what the agenda that once that those particulates in the atmosphere why they want that done zero because you're not in the loop you're not a higher-up you're just a dog who takes a paycheck to do it your tow dog and that's exactly what your owners think and let me tell you something that's not even me saying that I may be using that word just to explain to people and that's that's really what they are viewed at is I worked with your owners four years of my life okay and I I'm telling you I'm not asking you to believe me I'm telling you directly this is what they think of you this is what your owners think of you they call you their dogs they call you their dogs and this is what people need to know folks you want you want to know what you can do start talking to people in the military and telling them that it's a disgrace it's a disgrace that they would fly operations like this and spread over populated regions go to have a conversation with your father or grandfather who is in the military and tell them to look at the sky take a look up some days when they're spraying this junk over your city and that your children are breathing into their lungs and is getting into their bloodstream and through their blood blood-brain barrier and you have no idea why this stuff is being sprayed and yet you continue to go up in a plane and spray it on populated regions you got birth nerves yes so take that message and give it to whoever's in the military doing this operation and yet don't justify it I already know I already know the response before it's given so I'll lay that out so when you Evers listen to this and justifying it in your own mind so you know you don't know what's going on you don't know why we're doing it and neither do you is the point I'm trying to make and I'm telling you it can't be any good reason if it's kept secret good works are done in the light of day evil has to be done under the cloak of darkness caller from Southeast Pennsylvania you're on live on what on earth is happening what do you have for us raagh pass GL Eric - down here in Doylestown how are you sir Eric G how are you my friend oh man just getting through the day struggling to survive just like any other man so uh interesting topic tonight Akutan I just got home like 9:30 I was talking about the vaccines then yes chemtrails and you know yes like what I actually back in 2007 started hearing things about the vaccines and I asked my doctor about the insert in the box could you just believe me he didn't believe me that there was Tamara so on it and I said okay well where's the box cuz this should be an insert and right there it said there's the marisol in it so I mean that's what you got to do if somebody is doubting it just get the insert and just show them I mean it shows you that these doctors don't even look at what they're injecting into people they just thought you know it's rote action to them it's robotic action it's just this is how it's done we take it we do it it's procedure and that's it they don't even think about it themselves where you can read what they're injecting yeah well you know actually I had a roommate one time mark that was one of those guys that experiments on animals for the drug companies yes I kind of say man things people will do for money I mean this guy actually liked this job he thought it was cute to like you know little poor innocent rabbits and rub toxic disgusting poisons in their eyes and getting tumors and because he felt like he was doing something good now that's how they always have it sell it yeah he see these people like to justify evil to make themselves look better these peoples like to make themselves look better you know I mean that's why a lot of times these people sit there to tell you that your bed and then I'll turn it around and I'll try to make themselves look good right is it's an ego trip that's what it all is about it's about best to find their immoral behavior and and and justifying ignorant behavior that that's saying oh because I don't really know what's going on at the high levels of this agenda or why it's really being done that I can be excused for my actions because I didn't know see this is the whole you know following orders a excuse and justification like what was given in Nuremberg now we were just following our orders in the military people of Germany said we didn't know that that was actually going on you know all the killing of people in camps etc and it's just all justification it's all justification for people not wanting to take personal responsibility for their own actions and that's why the human race and slaves itself we know we could talk about the controllers and their mind control methodologies and it's important how people become aware of all of that but ultimately it's about using your own will to change your own actions for the true good not some nonsense excuse and justification and that you were sold and that you bought because you didn't want to really think for yourself but the true good to actually know what's going on and then take take up the side of good and there is such a thing there is such a thing as good and evil I mean we've talked about that on this show before people think there's no such thing as moral good and act an actual evil and this is a solid sistas ition solid sysm you know this is moral relativism these are dangerous ideological paths to go down and this is some of the reasons that people in the military will cite for why they perform the actions that they do in the state of ignorance that they live in and they are some of the most ignorant people in the world they ignore evidence to the contrary it shows what they are doing is actually harmful to other people and living beings and they continue to do it because they say we can you can pass the responsibility along to our superiors and that doesn't cut it it doesn't cut it guys and gals in these so-called services you got to ask yourself what are you really serving why do they call it the service are you really serving the people of the country that you live in are you serving some other force you don't even know enough about understand that you're serving it not only goes very deep mark passio got anything else tonight and anything else going on if I could just throw this out there that a lot of people don't know this but there are already and I know for a fact in Pennsylvania that they're flying drones over over the skies drones I've seen them they look like they're higher planes but when you really look at them you can see that they're very slow and they're not very large and but they definitely already are flying drones over no doubt interesting get ready everybody thank you so much mark take everybody our thanks as always man to take care yes so some of the theories for why these spraying operations are ongoing geoengineering or weather modification some people think it's outright eugenics its outright population control as the sanitized term for eugenics is known as um and they think that they are going they're doing this to suppress the human immune system that this is some kind of a chemical cocktail that will suppress the immune system and make people susceptible to diseases that their immune system would ordinarily fight off therefore the young and the very old and infirm would be at the highest risk and uh you know when these chemtrails are sprayed heavily in certain populated areas there's reports come in of uh all kinds of respiratory problems particularly in the elderly and the young and this is a very pop strong possibility that this just may be a chemical cocktail that is sprayed over regions to try to make as many people sick and infirm as possible and attack the immune system in as direct delay as possible I would not put it past the Psychopaths that are currently running the show folks and if you just dismissed that as a possibility as a theory of why they're doing that I I'd say you're very naive because people don't want to think I was talking about this with uh with Bob at his show in the hour before mine people don't understand the psychopathic mindset they don't understand the person with no conscience but there are people with no conscience ladies and gentlemen believe it know it that's the truth there are people who simply do not have a conscience and don't hold them to the same standards that you would hold yourself because you are bound by the moral compass called a conscience called your emotions there are people who are born with no emotions because they don't feel the part of the brain the limbic system of the brain that generates the emotional qualities through which we feel the repercussions of our actions that we take to others is not really functioning properly we talked about the structures of the brain and what these structures basically make possible for us to feel and do and there are people who are born with this part of the brain damaged literally so they don't feel emotions in other words they have no conscience they could do anything to anyone and not feel a thing quite literally so when you say oh people wouldn't do that no you wouldn't do that see you are holding yourself to a standard of moral conscience that is not present in someone else that may certainly do that and nothing twice about it to advance whatever sick twisted agenda they may have finally another you know we talked about this briefly another possibility is a forced inoculation program where these substances have some of the same things in them that vaccines have and they're trying to get test this as a delivery system for something that they want in the bodies of people for some reason and it's been speculated that this may also be to activate certain compounds that are in the body with certain electromagnetic frequencies metals react to electromagnetic frequencies like when you put metal in the microwave so if they turn at got a whole bunch of metals into our system and then activated some frequency that would do something to the physiology this could be some sort of a superweapon and that's just another theory again do I know the truth about it know what I like - absolutely and mice constantly searching for more information about it you bet you and this is where we can delineate between facts and theory these are some theories about why they are spraying that they are spraying over populated centers and that these are not contrails that they are particulate metal particles that are sprayed from these jets is not in debate therefore not a theory here we go caller from

Southwest Ohio you are on what on earth is happening bark passio Bob from Cincinnati this is a powerful topic thank you Mark for having the courage to put this out there you are the voice in the wilderness most people won't discuss this mark thank you for putting this out here absolutely Bob a pleasure to hear your voice thanks for calling in I I had some trouble getting through these numbers so I went back to the old talks you but we're running out of time of this show but thank you Mark I think you're hitting on it on the last point metals metals metals why are they getting all these metals not only of course are they putting toxin in this that's just a base one and not only is it happening ladies and gentlemen use your eyes look up into the sky get your face out of the iPod and the iPhone and all the other little devices they want you to look downwards look back up to the skies again because that's what's happening they are spraying us the debate is over those who won't accept they're spraying us we need to move on from their foolishness they were fools to begin with next point mark there is an occult aspect of this it appears that at the very highest levels of the Intel community a service that Milton William Cooper was attached to look up Milton William Cooper he was I am or he was attached to the Intel community that is actually spraying us but they are in conjunction with the pharmaceutical industries they know we're trying to get healthy they know we're trying to eat better they know we're getting away from their fluoride program you notice that even the dental slide catch on fluoride anymore because they're stepping away quietly they're saying oh sorry we really didn't mean it no culpability goodbye don't don't remember us with fluoride week we didn't really mean it but there is an occult aspect to this mark as you know the black adepts high in the Intel communities are involved in the spraying mark the brain cycles at 12 to 14 Hertz per second this is just basic science there that doesn't cycle at that but if they can get the brain to cycle at 12 to 14 Hertz per second people become agitated with all this metal in their system and if you can't relax and if you all you understand is a feeling of agitation 24/7 with all these towers all these elf towers that they're building they're not cell phone towers ladies and gentlemen they're Gwen slash elf towers look those up these are towers that are in conjunction with chemtrails and as Mark said these are theories I can't back these up but use your eyes ladies and gentlemen look around you at all these towers is your cell phone reception any better mine isn't I know it's not for me so these towers are Fred nefarious alternative purpose and they're tying in with the chemtrail phenomenon and it's not a phenomenon mark and I appreciate you talking about it it is a chemtrail crime they are spraying us and and mark I've got a question for you here's my aunt on take on and I oh we're running out of time I believe that like 911 people have a hard time wrapping their minds around the idea that oh my god if if there's a crime involved at 9/11 and and oh it's not as its portrayed little men from cave climbed into planes and NORAD stand down for over an hour and we brought these buildings down flat face per second they just dropped to the ground that means that my government might be working and guessing oh my goodness that would have to I'd have to open up my mind and like the mannequin seconds and like these medical professionals mark they are under mind control they can't even admit what's going on they can't even admit what their eyes are showing them just like your previous caller with the the insert with skull and crossbones may cause death these health professionals look at that and go hmm I never really looked at mark powerful show you're the best thank you Mark Bob thanks so much you brought up some great points there I definitely recommend that people look into the Gwen's acceleration when g w en extremely low frequency harp look into harp this may be connected with the phenomenon of chemtrails people have speculated h AARP high frequency active auroral research project park that's that goes on in alaska we'll touch on some of these things in future shows basically we're running out of time for a night thanks to all the callers thanks for bob tuscan for bringing me on his show earlier tonight that's all we have time for tonight folks we covered a lot of ground we'll get into some new topics next week you've been listening to what on earth is happening right here on the revolution broadcasting internet radio network I'm your host mark passio the show is live every Tuesday evening panel from 8 p.m. to 10 p.m. Eastern Time I'll see right here this time next week good night everyone you

What On Earth Is Happening Show #034

Topics: *Mind Control Methodologies, The Illusion Of Time, Present Moment Awareness*

[Music] all right everyone welcome to what on earth is happening I'm your host mark passio my website what on earth is happening calm I apologize for the technical difficulties in the beginning of the broadcast tonight but we seem to have gotten that straight straightened out today is Tuesday November 16 2010 uh the theme of the day seems to be technical difficulties because it seems that my website hosting provider is down and my website is unreachable and has been since I believe yesterday so I am trying to work with them to find out what's going on on the server end and not resolve that issue as soon as possible um we have a good show lined up for you here today what I'm going to do today is continue with the next method of mind control we've been talking about different methodologies of mind control for the past several weeks and will continue to do so we're going to begin to go into a little bit more of an abstract direction here tonight mark yes Bob it just got word from our producer that your website is working according to him so he's back up hopefully it's up and we're ready to go and now we're on air and future solutions are to come Bob thanks so much thanks for your help in assisting with the technical problems at the beginning of the show today so um before I start the show the topic of discussion and give the call in others I want to thank Pat market Illya of the UFO et Congress I spoke there on Sunday in Bordentown New Jersey and it was just a great experience there was a lot of great people out there and met a lot of cool people and the other speakers were phenomenal I want to thank Pat once again for putting it all together and letting me to speak at his fine event if anyone has a chance to check out a future event hosted by Pat market le oh please do do check it out do check out his website at dr. UFO or dr UFO org I'll give some event announcements for events that are happening in the Philadelphia area and then we'll jump right into the show the end the Fed rally for Philadelphia is happening this Saturday November 20th at 11 a.m. at the Federal Reserve Bank of Philadelphia 6th and arch streets and then afterward there is going to be a get-together there's going to be a march away from the Federal Reserve Building and then there will be a get-together and just general hangout session and and uh you know partying and having some food and drink together and discussion and will be a good time so if you're in the Philly area and the Fed rally for Philadelphia November 20th this Saturday at 11:00 a.m. at the Federal Reserve Bank 6th and Arch Street I will be giving a small talk outside of the Fed building shortly after 11:00 a.m. I've been asked to do so by the members of truth freedom prosperity that's the group that helps to organize the end the Fed rallies I think you know not not necessarily that just ending the Fed itself in and of itself is the total solution to our problems that we face here on earth but it would be part of the way toward the solution I think you know we need to go a lot farther than that you need to understand that money in and of itself is a complete illusion and is the thing that basically holds us under control by even believing that we are separate and that we need to have this as a motivating influence for us to do anything last night we were at the ethical Society and we screened the movie secret of Oz Bob just interviewed Bill still the maker of that documentary on his show truth be told this evening and while I think it's a phenomenal documentary and it explains a lot of the things that Financial booms and busts and helps us to get into the mentality of the dominators behind the banking system these financial sorcerers or wizards if you will I think that really the ultimate answer is understanding that no form of money in the course of human history no matter what it is no matter what it is made of no matter how much exists in circulation has any actual real intrinsic value and there are people that will debate this and argue with this and contend this until the end of time but when it comes down to it you're not going to eat gold you're not going to eat silver you're not going to make your houses out of these materials you're not going to clothe yourself with them you're not going to shelter yourself with them and you're certainly not going to know yourself glue them and that is what it is really all ultimately about understanding that we're all in the same situation together and the solution is to know oneself and to advance in consciousness not to accumulate precious metals or worthless strips of paper or tally sticks or any other form of currency that may be used it's all line control that's the thing that really struck me about watching the movie the secret of Oz realizing that look at the motivations of what people what we're willing to do or not do depending on whether money was flowing or not something that's fake it's an artificial construct that exists nowhere but in the human mind it does not exist in nature we talked about that on the shows that we did on money but of course I'll be reiterating things and you know exploring things further we're going to be going in a different direction tonight a more abstract direction we're going to be talking about time the illusion of time as I call this piece in my presentation we're going to be exploring what time is what our perception of it is anyway and how it basically works to manipulate and control us how it is used this concept of time is used to manipulate and control and how we let that happen we let that happen in our ignorance of present moment awareness so before we do that I have some event amounts some more event announcements and then I'll give the call and number and then we'll jump in with the topic so coming up at the end of this month survive and thrive this is a group that is hosted by a good friend of mine Fernando salgueiro this happens every last Sunday of the month here in Philadelphia at a pub called Liberty's in the Northern Liberty section of the city Liberty's is essentially at second and fair now the actual address is 705 North 2nd Street that's the corner of 2nd and Fairmount I will be speaking at a survive and thrive meetup on sovereignty understanding its role and your ability to use it I will be giving a lecture called natural law and sovereignty November 28th this will be taking place that's a Sunday Sunday November 28th at 6 o'clock p.m. sharp at Liberty's pub 2nd in Fairmount Philadelphia for more information if you go to meetup.com and you type in survive and thrive Philadelphia you will be able to view the activities of Fernando survive and rot survive and bribe survivalists group here in Philadelphia and finally the free your mind conference which I am a co-host of working with several committed individuals in this area to put on a conference on consciousness mind control and the occult here in Philadelphia for your mind is unique two-day conference scheduled for April 9th and 10th 2011 in Philadelphia PA featuring multiple speakers and diverse educational materials for the purpose of raising public awareness of the critically important topics of mass mind control techniques the covert and subversive influences upon our consciousness and behavior trauma based and ritualized abuse and the practical mental and emotional healing methodologies available for those affected by these device is the dates Saturday April 9th and Sunday April 10 2011 10 a.m. to 8 p.m. both days with the doors opening at 9 a.m. both days this will be happening at Ruvo hall are you be a Hall in Philadelphia that's at 414 Green Street also in the northern Liberty section of the city admission is only $20 per day tickets are on sale now the confirmed speakers Erin McCollum alfred weber Andrew basiago Bob Tuscan barrier dozous John Irvin John Nicholson Larkin Rose Laura Magdalene Eisenhower mark motika mark passio Mel fàbregas Michael Kelly and Suzanne Taylor for more information about the conference coming up in 2011 right here in Philadelphia please visit www.thegrape.com for callers to BlogTalkRadio the guest call-in number is six four six seven two seven three three eight seven once again six four six seven two seven three three eight seven calling whenever you like no taboo topics here I'd be interested in getting some people's take on the topic of time which is what we're going to talk about here today so when we're talking about mind control essentially what we mean is the manipulation of human perception this is ancient dark psychology this is dark occultism when it really when you really boil it down that's what the occult is people don't really understand what the methodologies of the occult or mind control in particular are in a wider sense that's why we do this show here that's why we talk about these manipulation tactics to know about how the mind can be manipulated and persuaded and how the perceptions of it can be shaped and engineered is critical it is of paramount importance it isn't negative its information what we do with information imbues it with either positive energy or negative energy but information in and of itself is never negative if we see how something is being used manipulated perverted and used against against us as a weapon that isn't necessarily negative that can be empowering if we use that information to raise our awareness and protect ourselves against these methods well like I said we're going to be getting a little bit more abstract as the weeks and months go here on on this radio show on what on earth is happening because what I'm going to begin doing not necessarily in this show but in future ones coming up is starting to break down different occult schools of thought and we're going to be exploring the symbolism of different occult schools essentially what I'll be doing over the weeks to come is providing a form of initiation into the occult for some of the listeners of the show and people may think oh that sounds scary no occult as we talked about on this show simply means hidden hidden knowledge and if we're ignorant of some of this knowledge we can be controlled through it if we become aware of it we begin to work with this information we begin to assimilate it and understand it in depth and in doing so we begin to know ourselves better we become we start to know the psyche better our own psychological makeup and development and as we move further into that path of initiation if you will it becomes much more difficult to pull the wool over one's eyes it becomes much more difficult to manipulate someone that is in possession of that knowledge because ultimately it's all knowledge of self and that's why a Dominator wants to hide that information it wants to hide that knowledge because if they have access to it and someone else doesn't it's a piece of cake to manipulate their perceptions and what they think and what they feel and that's what's going on on this planet folks whether you recognize that or not by this time doesn't matter it is happening and I'm going to do my best to expose it until I can't do that anymore so let's start our basic discussion tonight of time what it is how it is used to essentially manipulate the human population pal our system of time and timekeeping is basically set up on the earth no matter where you are is based upon physical movements it's based upon the physical movements of bodies in the heavens so this is going to eventually springboard off into a discussion about Astro theology okay and we will be talking about religion probably in two weeks or so and we'll be getting into Astro theology as the main underlying exoteric aspect of what religion is all about once you strip away that exoteric cover story you find something deeper beneath it that relates with the self and relates with consciousness and we'll be talking about those esoteric components and when we begin to get into this distinction between exoteric or the outward explanation or cover story if you want to look at it that way versus the esoteric the meaning that is reserved for the initiated that is what a cultists basically keep for themselves and they give the exoteric cover story to others who do not know themselves and do not understand their symbolism or their system of manipulation so we'll be looking at the distinction between those two principles exoteric philosophy or ideology and esoteric philosophies and this will lead into a deeper exploration of the occult and its movements its schools of thought when we are looking at time we have to understand first and foremost our conception of what time is and how we base our measurement of time is always based in the modern world at least upon physical cyclical movements of objects the Earth rotates once per day upon its axis that's a physical movement we measure the month based upon essentially the moon and its movements that's why it's called a month a month based upon the moon another physical astral astronomical body when base our year upon the revolution of the earth around the Sun again another physical movement that is cyclical what is the importance of physical cyclical movements when it relates to our psychological perception of time why is that important what does that do to the mind what does that do to the perceptions what does that do to the psychology of a person well one of the first things that it does is it begins to paint the picture within the mind of Evan and their perception of the world upon this physical and cyclical movement that things have always been this way things are this way now and things always will be this way it is a sense of eternity or forever or unchanging mess moreover it starts to put the idea in people's mind and get them to think that change is not possible at all that there is just continual cycles that go on and on and on and on and on forever in one direction no less starting in the past proceeding through the present and moving to the future linear time linear thinking time-bound thinking and that ultimately we're a trap that's created in consciousness time-bound awareness is eight and extremely low form of consciousness material based awareness is connected with time-bound awareness why because we're basing our view of our movement through time upon physical movements that are endless endlessly repeating therefore we begin to think in endlessly looping repeating ways cyclical just going around in circles the earth is going around in a circle it is going in a larger circle the moon is going around in a circle around the earth the earth is then going in a larger circle around the Sun the Sun is going in a larger circle around the center of the galaxy circular movements meaning you're never actually going anywhere this form of linear cyclical time traps people in a modality of it's always going to be like this it's never going to change its going to keep doing the same thing forever and ever and ever and ever you'd be surprised how many people whether they think about this consciously or not from a subconscious level just the fact that our system of time is based upon physical movements of objects material things how their consciousness falls into this pattern of always been this way is this way now always going to be this way and there's nothing I can do about it when you really begin to break down our perceptions of time and you understand this is how people think based on time based on our system of timekeeping you understand how powerful of a hold that entire conception of time has over the human psyche now what's the alternative to this but before we even explain or explore that let's look at some of the expressions that we use we say time is money we equate time and wealth we look at time as a quantity not a quality definitely look at it as a a quantity much more so than we ever look at time as qualitatively based we look at it as quantitatively based I don't have the time there's not enough time I need more time scarcity based thinking the more our lives become hectic and we still try to stay in these linear modalities of thought and consciousness the more it seems like there is less and less time in which to do the things that we want to do or need to do this paints a perception of time speeding up as they're never being enough time as they're seemingly not being the same amount of hours in the day that there used to be and we can look at the words as we just saw month is related to move the moon hours why are they called hours they're related to Horus the Sun God the golden Falcon and Egyptian cosmology it treks across the sky each day as the solar disk the Sun an allegory to be sure a metaphor however the word our named after him the Sun coming up on the zone of Horus the whore I zone the horizon named after Horus be looking at this when we look into religion because you have to understand how how Horus is connected with Christianity when we look into astrobiology we'll be taking an in-depth look at that and speaking of time we're coming up to that time in the program where we have our commercial break so stay tuned - what on earth is happening are you happy [Music] have you ever wish that you could have done something while you still have the chance what will you do with your income in tomorrow or if you move your home as many already have do you have enough money to survive through an economic depression if you don't want to gamble with your future then free to prosper calm can help you quickly end your debt problems protect your property in possessions and develop a personal strategy to get you through the hard times most importantly you get to keep your money and not pay another cent to creditors all program is often superior to bankruptcy consolidation or settlement visit free to prosper calm to find out more visit your real change to act ahead so don't delay your future may depend on it call seven one eight six one five zero one two three to learn more at seven one eight six one five zero one two three or visit three to prosper calm today you know we're collector hunters and all I don't seize control of the population travel to your team there's amongst us a burden of humanity left on our shoulders the only way out if to expose the horrible crimes images no at the new world order together we are all one together law in hell soldiers for battle for freedom and elite and soon enough in the fight Leonel hub calm [Music] secure your future get your non-hybrid theme pack now if the looming economic crisis food shortages and other toxic disasters now is the time to be ready just click on the heirloom organic banner at the top of our BlogTalkRadio page today to cure your future and the future of your family in hard times heirloom organic seeds hi this is vodka to knit to my show twisty hold radio monday through friday at 7 p.m. eastern time our whiskey TV Intel hub network compression if you will over compete by peas and now that - what on earth is happening with their homes are back here [Music] Bob thanks so much we're back from our break before the break I was talking about how different gradations of timer know basically given two different physical objects and in this case planetary bodies uh the Sun we were talking about Horus the Sun God of Egypt named after the hour let's uh let's look at how some physical nesting of cycles it is used when it comes to our way that we divide time different measurements of time we can see that these are nested within each other and the same pattern repeats again this is psychologically getting into the subconscious of a person this is basically painting the picture that the entire universe is you know like Russian dolls like a prison that you can never get out of you get out of one you hit another wall go into an another another dalam and get out of that one and it keeps going and going and going it's a linear cyclical endless progression and that paints a picture of hopelessness in most people's minds the inability to change it basically gives them a sense of futility that's what it paints in the psyche in most people people who can't see through this linear way of perceiving what we call time so look at the you know the smallest gradation of time that we basically work with of course we have smaller gradations used in science but we're talking about for the general person the second is the smallest gradation now the second is actually dedicated to the planet Mercury now that sounds strange to most people but if you follow this progression you'll understand how this works and I'll put some images related to this on my podcast section again every week I put related images documents movies anything connected to the topic that I'm talking about up on my website in the podcast section so you could go to the show for that week you can listen to it or download it and then you can view associated images documents videos etc on the podcast page mercury is considered the second object in our solar system the Sun being the primary object the first object so mercury is the first planet from the Sun in our solar system it also has the fastest orbit its orbit I believe is approximately 80 days we've just shy of that about 79 days in earth days so it makes one complete revolution around the Sun every 79 days or so this makes it the fastest planet and in Greek tradition mercury was considered the messenger of the guy I'm sorry Roman tradition so Greek the Greeks called him Hermes okay ah this is he was considered a messenger of the gods in Egyptian tradition he was known as both this is because he is the closest to the Sun which is considered a bringer of life and light and energy essentially being the embodiment of God in the solar system so the second hand okay that's positioned around the central hub all the hands on a clock position from the center if we look at an analog clock this will be demonstrated much easier than if we simply try to think about it if you have pulled the image of an analog clock in your mind okay the center point represents the Sun a circle with a dot in the center is the ancient symbol of the Sun and as we look at some of these concepts to get a bit more esoteric symbolism is going to be very critical to keep in mind but we're going to have to understand become symbol literate understand the language of symbolism as it has been used throughout the ancient world and as it is still used in the modern world so a dot with a circle around it this is the symbol of the Sun it's an archetypal symbol an archetype as we talked about before is it a simple form that it has a meaning inherent to it that is already indwelling in the human psyche and in the subconscious mind if this ancestral memory this is embedded in our subconscious we may not be aware of it at a conscious level of the meaning of the symbol but we know it at an intuitive fundamental level of consciousness that's an archetype one of the biggest art types is the egg we've talked about that briefly before on the show another archetype is the solar symbol of a dot with a circle around it so going back to breaking down this nested cycle of time in our method of timekeeping the second hand the smallest gradation that we use it at a practical level on a daily basis is given to the planets okay this is the of the three ancient cults of Astro theology Astro theology Astro meaning star Theo's meaning God okay Astro theology roll arts meaning word whereas the difference between that in astrology astrology is a study of the movements and basing predictions upon some of the movements and positioning of these bodies okay I said Astro theology is the basis of a belief system rooted in the story about these gods in the sky okay people have called the three great religions of the world the three most popular religions of the world essentially Christianity Islam and Judaism of the desert sky God religions these are the three religions that developed out of the ancient world based upon the three cults that developed in the ancient world you had the solar cult the lunar cult and the cult of the planets and stars or the lesser lights so you have two great lights of the heavens the Sun and the moon and then you have the smaller the pinpoints of light okay the stars and planets each one given to a different religion and as we will see each one given to a different gradation of timekeeping and then that cycle is repeated it is nested okay it's a nested time cycle again nesting is very important in the occult as well again it think of the object the symbol of Russian dolls one thing embedded in another embedded in another endlessly okay about Friday they come the same same concept fractals now yes this is true of the universe in a wider sense but I'm talking about how something that is true is manipulated to have a specific condition to generate a specific condition in the human psyche that's the key point there so if we look at these gradations of time we'll see a specific pattern nested in them the second hand given to mercury goes around the Sun or the central hub of an analog clock faster than any of the other hands okay so mercury the second object that's why it is called the second hand it goes around the hub the dot in the middle of the clock representing the Sun okay the second hand on a clock meaning not the next hand not the set of the second hand itself the next hand that we come to is the minute hand okay minute is derived from one of the words of the moon in the ancient world in the UM the Phoenician tradition the moon was known as min the the goddess of the moon men mi n was one of her names moon the moon always being a feminine aspect the feminine presence it is a considered a female presence okay at just as the Sun is considered a male presence lunar associated with the yin or feminine energy and the solar energy associated with the yang or masculine energy so it's very close to moon the moon it's the minute the min hand min a name for the moon so the minute is the next gradation of time upwards okay above that we have the hour hand now this is named after Horus or the Sun God and this is of course given to the Sun so we see the the planets actually embedded in our system of time the planets the moon and the Sun planets mercury secondhand the minute-hand the moon named after men goddess of the moon then the hour named after Horus the Sun God now this cycle repeats what is the next measure of time above one day okay of course a day is given to the earth okay each day is one spin of the earth upon its axis so we face the Sun then we turn away from the Sun and then it goes back and that's one day to rub it's a revolution of the Earth on its axis a rotation of the earth on its own axis of rotation that's one day now let's look at so the earth is one of the planets okay but as we see we have a seven day system in the modern world a week if we look at the names of each one of the days that is in a week we see that each one is given to a planet so now we're back to Planet a day is reserved for the planet and so is the week so that the day is the Earth's that's the planet we are upon and then the wider aspect of the days of the week is the week each one is given to one of the other plan let me guess what Monday is all about market by May moon yeah of course Monday is the moon okay Tuesday now immediately that make one may not be immediately recognizable so it will help to go into other languages and I have seen you can you can take it into a few other languages but the easiest language to understand all of these is the French language in conjunction with English so if we look at the day that it is named after the evening the name Tuesday in French Tuesday is Mardi ma RDI as in Mardi Gras Fat Tuesday Mardi okay so this is the root of Mars ma are s Mars okay choose to s is also a name of an ancient god that was named after Mars at the God of War 9/11 2001 incidentally occurred on a Tuesday because they were invoking war they were invoking the entire spirit of war with that false flag operation so Tuesday is given to Mars Wednesday okay again maybe not immediately recognizable in the English language but if we look at the French language Wednesday is their credi their credi in French that's mercury so Wednesday is named after mercury Thursday okay in French is should be je di but it is fors day the Norse God for associated with Jupiter the same basic god Jupiter named after Maine by the Romans so fors day or Thursday is named for Jupiter pride any now free--ah is one of the god goddesses names in the Norse tradition free--ah okay so this is a feminine day there are only two feminine days of the week Monday named after the moon and Friday named after the other feminine planet in the solar system if we take the name Friday into the French language this is vondre d ve n D re di Vaughn daddy named after Venus the other feminine um planet our body the soul vs and I didn't get the last two sure go and then appropriate I think well I'll get to that when we get there but Saturday seems to me like it has to do with Saturn sure I mean it's right in the word that one's really easy right and of course and of course unday as well sun day and that's the most I guess the crucial of them all because of all these son Colts as you mentioned and it's it's kind of interesting to me mark out you start off on a moon day and you head on a Sunday and there's not only something behind that and well some people will say that you know you start off on a Sunday and end on a Saturday and there's something behind that as well see the the Sabbath's of each of the desert sky God religions or the astro theologically based religions all are each one is given to either the Sun the moon or the planets and stars okay so the moon is actually given to the Islamic religion this is the lunar based cult of the ancient world it worships on Friday as its Sabbath and you would say okay well that's Venus what Venus is also connected with the feminine aspect of the moon okay Venus is another name for the goddess the goddess Venus Isis Hathor Aphrodite you could go on and on and name the different names of the goddess Semiramis these are all connected with the moon in some form or another so the feminine presence is always a lunar presence and this is a lunar based religion it's not only lunar base but it's galactic base this is the religion that ultimately worships the galaxy okay we'll be talking about this and going in further to this when I get into a show theology in a much more fundamental way when we talk about religion coming up on future shows but uh that's the the Islamic religion is actually derived from the lunar cult the Christian religion that's quite easy to figure out if you know we understand the basics of the symbolism of the Sun and the the Son of God okay you can look at movies like documentaries like zeitgeist addendum or look into the works of jordan maxwell and you can easily trace the actual theological basis of christianity to the solar cult the son of god okay the worship is on sunday that's their Sabbath okay the savior who wrought dies and then rises okay rises again to bring life to the world the son dies each night and then rises each day to bring new life to the world okay saturday is the Sabbath of Judaism so this is the from the ancient world the cult of the planets and the stars and it's symbol as a star the the Islamic religion it's symbol is the moon the symbol of the religion the moon with a small star next to it that's the base the crescent moon the symbol of the Judaic religion a star and the symbol of the Christian religion across which is a zodiacal cross zodiacal cross the zodiac that's what the it is actually representative of the Sun upon the court in a great cross of the zodiac so we look at the zodiac okay the Sun symbolically placed in the middle 12 houses or divisions around it the 12 helpers of the Sun the 12 disciples of Jesus okay let's look at the next cycle up so of course we have had the week and that was based upon the planets now the next cycle of time up the month and we all have already alluded to that that's based upon the moon the moon a month and that is how we measure basically a month the lunations of the moon so again we we see this nested cycle we had the second given to the Planet's specifically mercury then we went up to the minute given to the moon then we went up to the hour given to the Sun the day and week given to the planets again then we go back up a month a longer duration of time given to the moon again and then the next gradation of time the year of course measured by our revolution around the Sun so that's given to the solar the soul of our concept and the solar cult as well now when we start to understand this physically materially that's the key thing the materialistically based measurement of time it's always based upon matter that's the key thing to keep in mind it's based on matter and materialistic thought when we say time is money we're equated it with something that is materialistic the fake money not the real money the one eye but the fake proxy for balance and imagination and um harmony with nature and understanding natural law and enlightenment etc that's what our fiat currency debt based monetary system fractional reserve a central bank owned and controlled monetary system is all about okay so when when we associate endlessly repeating physical materialistic movements of objects with time our consciousness tends to become more materialistic this works whether we understand it we don't understand it we know it consciously we're ignorant of it it doesn't make a difference we are being entrained to something so that this is another word I want to bring up when we're talking about time and Trainmen t' en see RAIM and train mint okay this means to get the mind following along to set up a system of leaders and followers entrainment a train n train mint M ent the basis of mind mint a in Latin and Trainmen t' essentially means to make the mind follow and right there in the word that we use in relation to time ok we have a concept that is related to mind control getting the mind to follow along so we will explore deeper aspects of the astral theological basis of the world religions coming up in future shows we'll go into that in the future well we we saw how this is intricately connected with our gradations and measurements of time in the world today so we can go up another step from the year where you say ok well how is anything measured even bigger than a year well there's the ashram the astronomical and astrological clock a this is known as the Great year or what astronomers refer to as the precession of the equinoxes now this is a little bit of a abstract concept to understand but if you do explore a little bit about astronomy and astronomy is a fascinating topic to look into it's a fascinating science I do encourage people to look into the movements of the planets and the Sun and the earth etc in the moon understanding this is actually really if we break past the exoteric ok and we break out of the linear time based thinking this becomes a very powerful metaphor for different aspects of the self and that's ultimately what astrology becomes all about now I wouldn't call myself by any stretch of the imagination an expert in astrology even in some of the symbols of astrology okay it is the occult science that I feel that I need the most study in compared to the knowledge that I have about other occult Sciences so it is probably my weakest area of my delving into the occult in general is astrology um I have looked into it a bit but my interest in it is we're in relation to religion when it comes to astrology because that's all religion basically is about it's about the movements of the planets and the attributions of the planets uh and that is what is ascribed to the gods of these religions we understand the God that is ultimately being worshipped in Islam is really about the galaxies okay it's about the the feminine aspect of creation which gives rise to the stars of the galaxy see in in Islam there is a you know a black cube called the the Kaaba at Mecca and the adherents of Islam make a pilgrimage and wear a white cloak only and then they go around the Kaaba in a counterclockwise direction well this is representative of the stars going around the central black hole of the Milky Way galaxy in a counterclockwise rotation this is an astro theological ritual because ultimately it is the moon and galactic cult the Christians worshipped the Sun upon the cross of the zodiac crucified upon the great cross of the zodiac which has to do with the precession of the equinoxes which has to do with the cycle of the year the solstices and equinoxes forming a cross on the on the zodiac the twelve helpers again representative of each house of the twelve houses of the zodiac so the Judaic religion again based in the gods the Elohim plural gods why plural well you have the singular gods of this solar and lunar cult in the plural God's own the Judaic cult the Stars and the planets all the small lights of the heavens it all starts to fall into mine and make perfect sense once you understand the astro theological basis for religion and moreover it perfectly helps us to understand how time is chopped up in little pieces and given to different gods of the ancient world and what that does for the human psyche sounds like we're coming up to another break folks I want to thank everyone for listening you're listening to what on earth is happening I'm your host Marc Castillo my website what on earth is happening calm we'll be back after these words if you ever wish that you could have done something while you still had the chance what will you do with your income in tomorrow or if you lose your home as many already have do you have enough money to survive through an economic depression if you don't want to gamble with your future then free to prosper calm can help you quickly end your debt problems protect your property and possessions and develop a personal strategy to get you through the hard times most importantly people get to keep your money and not pay another cent to creditors our program is often superior to bankruptcy consolidation or settlement visit free to prosper calm to find out more this is your real chance to act ahead so don't delay your future may depend on it call seven one eight six one five zero one two three to learn more sex seven one eight six one five zero one two three or visit three to prosper calm today in will we're crap offenses and all I don't have seized control of the population so here he is amongst us the burning of humanity nets on our shoulders the only way out is to expose the global crime Vinnie chase node has in the world work together we are one together not in Hell soldiers the battle will be humanity's influence do not aim device BNL hub calm secure your future get your non-hybrid feedback now with the looming economic crisis food shortages and other toxic disasters now is the time to be ready just click on the heirloom organic banner at the top of our BlogTalkRadio page today to cure your future and the future of your family in hard times heirloom organic seeds hi this is Bob substitute it to my show truth be told radio Monday through Friday at 7 p.m. Eastern Time you are with to the Intel hub network correction this will order P by P [Music] [Music] all right we're back here on what on earth is happening we're at the top of the second hour of the show I see we have a caller on the line let me quickly before I take this call give the call in numbers for the show you can call in on two different networks broadcasting on talk show and blog talk radio on the Intel Hub news network so the callin number for talks you eight seven seven I'm sorry scratch that the call a number for talk-show seven two four four four four seven four four four once again calling number seven twenty four four four four seven four four four call ID number eight three five one five once again the call ID for the show will be prompted for eight three five one five on the call number four blog talk is six four six seven two seven three three eight seven once again six four six seven two seven three three eight seven I see you have a caller here on talk-show I'm going to attempt to take this call let's see what happens freedom in Texas now you are on live on what on earth is happening are you there caller from Texas are you there oh yeah mama call thank you so much for having me on the program of Al Gore food I recognize this is Bob isn't it yeah I figured I jumped it there make things interesting I get your callers not there hey you have anything for us though rocking out Sullivan Eli calm I've been enjoying the show now and it's so funny how every time we come up to a commercial break you happen to be talking about time throughout the program that's kind of the theme and I was wondering if I didn't have any knowledge of the seven-day week or the Monday Friday system or the hour minute system how would I live my life you know how different would it be and how controlled are we to time and how it's time associated with our price system our monetary system because like you keep saying time is money so in a sense they have created a control of our lives using this tool of time and I think this is an underestimated tool of corruption it's one that you don't hear many people talking about because it's abstract it's largely based in symbolic thinking because ultimately the answer is there is no such thing as time just like there is no such thing as money it doesn't exist it's a construct the only we make up and it only exists in the human mind and psyche and we need to break that linear pattern of endlessly repeating cycles that go on and on and on and on and on that we never break free of we need to break the psychological hold that time has over us and like you said how would that make our lives look in the aftermath if we began thinking in nonlinear time-based terms not non time down awareness means you're always in the present moment there is only one moment and it is now the past is gone well I've experienced that with with the use of infusions is that feeling of time being completely 100% subjective yes addition to that I'd like to mention that we have some talk in the blog talk chat room for the Excel new hub news network and they're mentioning a little bit of here about cliff high and his web BOTS and supposedly I don't know if you know about this mark but the left side it's taking all these keywords and phrases put on the Internet yes I'm familiar and it's able to create these predictions and in a way it's looking into time and then I'm even interested perhaps and I might be going off Juan and I apologize if I'm digressing from your topic too much mark but I'm interested in time travel kind of technology do these elite scumbags have that we don't know about I have to imagine that the military industrial elite scum bag complex has technology far beyond Nikola Tesla and some of these things they've suppressed over a hundred years ago that were developed today that would only surpass our least of imagination yeah I would think that they would certainly be looking into it if not developing already because if anything would were to occur that would upset their plans they would want to be able to try to change that timeline I would absolutely think it would be in there a psychological makeup to certainly look into the possibilities of that I'm not saying that it is developed or not but it's it's it's an interesting topic to explore and we can speculate about whether they may have some of these things in the black of you know the black ops projects already under under development absolutely thank you for calling in and raising that point I'm going to move along and take on another call from what I think maybe another Bob on the show here a caller from Southwest Ohio is this Bob from Cincinnati it's like the two Jakes it's the two Bob's on mark passio show mark thank you for taking my call firstly and thank you for all the great work you've done up to this point on vaccines chemtrails in the food I know that just that the links you placed on your site was so important for me I stopped by that there was one Trader Joe's in my 30 mile radius and it was worth a stop in - thank you Mark fantastic I'm glad you got some use out of that yeah I spent a lot of time on that because a whole month because it's a whole move I spent on that it's really important I mean that that is really the thing that if they have you at the physical level of the damage to the brain and the and the central nervous system and the physiology and you're not strong you don't have a strong constitution to resist that they're going to get you at the mind level and ultimately that's going to keep you spiritually down this is true and and just the Ezekiel bread alone I and I hit up the guys when I oh it's delish my favorite my money my girlfriend doesn't like it so much I love the Ezekiel bread I get it all the time it's it's very earthy and like you said it's sprouted sprouted organic sprouted bread there's no flour in it none of that bleach toxic flour and mark on a positive note this week earlier in the week the American Dental Association itself put out in their newsletter fluoride is toxic / poison for our infants or young people that was a major breakthrough that that is really big hey Mark yes it's Bob again Bob no man no problem one or number two however you want to put it bob test in daylight calm I had a Paul qanats on last week I don't know if you recall and yes he's been breaking the news on this fluoride topic for quite some time now absolutely amazing story thought that you just referred to when did this happen I want to say November 10th or 14th of 2010 it looked looking the the websites a a da admits fluoride is toxic for infants powerful powerful statement of an industry that has spent the last 70 years poisoning not only our bodies but our metaphysical beings shameful we must still hold them accountable they are trying to break their culpability and accountability but but it's it's good news for us but sad news for the reality we're living in so much scientific literature is coming out on the topic that they cannot suppress it anymore they cannot keep it back because so many voices are being raised to condemn fluoride as something that does not need to be in our drinking water never did so true in mark I'm going I'm ashamed to even interrupt this powerful topic of time I've always felt just on a personal note ladies and gentlemen I've always felt that time not space I never argued about space it was at the construct because you know either one can feel that but time always was inherently or I felt constructed mark thank you for defined just even you mentioning it last week was such a powerful validation for my spirit thank you and I'm going to hush and let you continue on time this is very important for us to know this is power for it's not powerful it is classic mind control over us this concept of time it is a prison for our three-dimensional reality because if we can get away from this this ridiculous construct of time and the watch in the oh I've got a hurry I got to keep moving oh god we missed this oh I've lost that it's a mind control thank you Mark Pass yet once again you are the greatest good night gentlemen Bob thank you so much for calling it always a pleasure to hear from you Kevin from Philadelphia you're on what on earth is happening what do you have for us hey Mark I was actually going to honor the positive side of time that I have been offered recently sure in the many moons that it's been since she started your show because I first called in with and my wife once called in like couple weeks later specifically talking about how we were involved in a group that was trying to build the first urban Earthship inside of Philadelphia but there were some issues on board well they just finally got past one of the first major hurdles and we now actually have a place to build and there's one also being built out out in for an out in Bristol for a Nature Center in the in Silver Lake Park in buck Tattler quarry County and wrapped in theory in theory that one should be starting in the springtime they'll actually be breaking ground there and will be like packing tires and such then so it's been a long process and a frustrating process when it comes to time and the illusion of time as dr. King had mentioned about how late when will we have to wait until we're actually free what was his with his big question at one point during one of his speeches and at this point I'm suggesting that although time can be frustrating to have to be patient through that learning of patients comes with its own rewards well it's been said that the only reason for the existence of the perception of linear time is to separate different events so that everything isn't perceived as all happening at once it may sound like a cliche you know but that's but that's part of I guess why we perceive time as such but you know there's another cliche that the time is now and that one is really true there is no other moment there's nothing the past is gone it's over there's nothing you're going to be able to do to change that the future has not arrived yet we exist in the now and if we really bring our focal point of observation or our observer qualities into the present moment it's a powerful shift in awareness that takes place while I think that he doesn't talk about things in a big wider sense of what's going on in the world when it comes to the concept of time I think that Eckhart Tolle has it very correct about his concept of true present moment awareness and of how we need to bring ourselves into the now and stay there understand that time bound awareness is what sets us up for all other forms of manipulation the book be here now by Ram Dass also discussed this and I think that's an another powerful book for people who are explorers in consciousness and like bob was talking about earlier psychedelics which we talked about a couple of weeks ago and and last week a little bit these can really give you the sense of non time-bound awareness of complete oneness with the now and um you know it can be a disconcerting thing because it really is a significantly altered state of consciousness but there are certain psychedelics entheogens that will completely obliterate your sense of the the time-bound awareness in the traditional sense that we normally experience it that we normally perceive it in our normal waking consciousness and it will help us to expand our consciousness out beyond that that box of linear time it's something that we need to work on breaking as a species but that happens you know by doing it a one-to-one basis and in that regard I think some psychedelics can be a powerful tool yeah I can imagine that that being so considering there have been many guys that have spoken about how specifically like a most recently it was Joe Rogan previous to that it was a Terence Mckenna as well as Bill Hicks both all three of them have spoken in the past about what they called this stone to eat theory and it's pretty much about how like ancient ancient man or caveman or previously even past Neanderthal was just sticking their nose into the ground and bobbing into various things that would when they started to eat them in natural foraging and such they wound up having these experiences and those experiences around of causing various shifts in how the brain functions as well as um sometimes sexual excitement and and that then also started to produce more people of that nature right I think a good a good book on that and this is a guy who has really explored the nature of time with him style time weighed zero theory having to do with a habit and novelty Terence Mckenna who I mentioned a couple of weeks ago and last week he him and his brother Dennis wrote a book called the invisible landscape which was about their concept of time I hear the music were coming up to another break I'll get to that right after this break Kevin if you want to hold thanks for having me on I'm good have a good one man it was good to have you again [Music] and market rocks they were there not going to hear the commercial so you ever wish not to have done something while you still had the chance what will you do with your income and tomorrow or if you lose your home 10 other news BP donated $23,000 to a school it taught at bps propaganda arm donated $23,000 to Oakland junior high the same school that hosted their presentation that claim the gold seafood was safe to eat the donation came months before the presentation but remained highly suspicious multiple residents have shown their displeasure for the presentation one resident went as far as to claim that BP paid with school in question $50,000 to prevent their whitewash of the Gulf oil disaster it also looks as if BP was given a free ride to the media for a twenty billion dollar check six months have passed and no one is talking about this disaster Bob can Bart author of disaster of the horizon has listed there is tragic the US government's n BP both wanted this story off the television because it was 24/7 this the bill would be our OB feeds the BP ad where you could actually watch the well flow and and all of the reporting it is going on the government desperately wanted to get that off of the television so they actually work with BP to make that happen I believe and that's what that's what is in my book mixie the BP will have some explaining to do on the technological front nano generator powers up last week the journal nano letters published a paper detailing recent achievements with their pvo electric piano generator the device is about 1.5 to 2 centimeter then is capable of generating around 2 volts the device works by converting mechanical energy into electrical energy by bending nano fibers within oh this has been another eye HNN news update for Tuesday November 16th 2010 brought to you by the Intel hub calm [Music] okay ladies and gentlemen we're back on mark passio you're listening to what on earth is happening we had some further deck technical difficulty technical difficulties our call dropped out there during that break we had to reconnect but we're back up now so continuing in with the topic if there's any other callers I want to call and talk about this topic of time specifically time as a method of mind control the calling number is seven to four triple for seven triple for the call ID number eight three five one five you could also call in at six four six seven two seven three three eight seven so it looks like we have a caller on our blog talk I'm going to try to take this let's see how this goes here we go caller you're on water mirth is happening what do you have for us and looks like that caller unfortunately called in before our call dropped out on us and was disconnected if you want to team up to call in recall in one of those numbers and I'll be glad to take your call so Kevin had brought up the point before the break and the disconnect he brought up a couple of people's names we briefly talked about psychedelics as a method of breaking down this psychological barrier of time and our perception of it and helping us to live in now and realize that now is all that there is um Terence Mckenna was instrumental one of the first people who was instrumental in helping me to understand that topic his books are all phenomenal he's got a few really great books out he wrote one I believe it was his first book he wrote it with his brother it was called his brother Dennis McKenna who is actually still involved in the ethnobotany and psychedelic community today they wrote a book called the invisible landscape in which they break down this theory of a habit which is you know doing the same thing over and over again often you know expecting a different result of getting the same one of course and novelty which is newness change etc basically evolving that's that's what his theory of novelty is ultimately about that's what ultimately all theories of non time-bound awareness and non materialistic a time measurement is ultimately about uh Terence Mckenna of course coming up with this concept called time wave zero which he equated with the Mayan calendar of his ending for his time wave zero theory was correspondent with the ending of the Mayan calendar which is December 21st 2012 a date we here a lot about in the in the alternative community the consciousness movement the New Age movement etc I think there is something to the Mayan calendar I think that the Maya were obsessed over time because they were much more in tune with the zero time with the now the present moment I think that um I think that some of their shamans some of their teachers were had a deeper understanding of time than we do today they understood time as not a perpetual cyclical measurement of physical objects and their motions they understood it as a progression in consciousness they understood time as the thing that we move through in consciousness on our journey of evolution in consciousness they understood that time was moving toward something that was ineffable intangible non-physical and that it represented a paradigm shift if you will it represented what some of the other traditions about time referred to as a shift of the ages a change in the way human beings think and interact what has been called in the new consciousness movement the paradigm shift I heard this referred to for the first time myself back probably in the very early 90s late 80s or early 90s the paradigm shift and I think this is something that we're in the middle of now and it's still in a transitional phases and it's all about moving to a higher level of awareness and consciousness when it comes to what is taking place on this planet and when it comes to what is taking place within each one of us so uh Terence Mckenna his other books the food of the gods about psychedelics and their role that they played in human history and the expansion of human consciousness also his other book called uh um true hallucinations about his journeys with his brother and Friends in the Amazon basin and their use of psychedelics there he has another one which is I think one of my favorites called the archaic revival and this is a collection of essays by Terence and it's just brilliant with what it lays out about consciousness and time so Terence Mckenna I can't recommend people look into him enough as I said a few Weeke you know over the last couple weeks tons of information from Terence off the post a couple of things on the website particularly regarding his theories about time habit and novelty um another gentleman that Kevin brought up was Bill Hicks the comedian and we talked a little bit about psychedelics Bill Hicks was a very conscious individual he put a lot of this information in very comedic terms for people to understand it and not you know be hostile about you know as the saying goes uh if you're going to tell people the truth interject some comedy or else they'll kill you so he had a saying about LSD you know and again this is another psychedelic it's demonized you know it can be used in a very negative context and there's also positive usages for it again it's it's a tool and it's something that we could explore if we go into it with the right set and setting or the right mindset and Bill Hicks always had a little line that he did in his comedy route when he said um today a young man on acid realized that all matter is merely energy condensed to a slow vibration that we are all one consciousness experiencing itself subjectively there is no such thing as death life is only a dream and we are the imagination of ourselves and then he would say and now here's Tom with the weather you know he's like you know this is a news story it's presented at as he says you know what you like to see a positive LSD story on the news you know it's um it helps us to understand what the power of some of these psychedelics what the power that is embedded in these substances in these forms of consciousness as I talk about them as yet people continue to demonize because they think that it is in our birthright to experiment with our own consciousness and that our own consciousness does not belong to us my consciousness is mine it is my own it may be part of a larger ocean of consciousness but the the in this vehicle I own my body I'm the steward of it at least until I relinquish it and I also own my mind I own my consciousness and that means that I own my ability to take what I want into my body whether it be um extremely good for me such as a healthy organic food or whether it be extremely negative for bad for me such as uh any any sort of compound or drug and this requires studying thought and you know understanding what we're actually taking upon ourselves when we take in anything and that could be from something as simple as sugar or flour or you know smoking a cigarette to smoking a marijuana joint or smoking DMT or you know snorting cocaine or shooting heroin it's all it's up to us to exercise our responsibility for those things but um you know that's going off on a little bit of a tangent because what I was really emphasizing is that psychedelics as we talked about over the last couple weeks do have the ability to really change our perception of time for a brief time anyway and when we come back down to the ground so to speak upon using a substance such as LSD or DMT or uh you know a psilocybin it helps us to shift our focus shift our awareness a little bit about what time is about our perception of it and about how we are often for more of our lives than not living in time-bound awareness so I recommend terence mckenna's books on some topics such as this I recommend Eckhart all these books I think that he could go further when it comes to explaining some of the things that are going on in the world and hey so could that Terence Mckenna however the contributions that they do make regarding these topics are invaluable so please do look into both Terence Mckenna and Eckhart Tolle and Bill Hicks and his comedy is phenomenal he's one of the best so it looks like we have a caller who called back in here we go caller you're on what on earth is happening what do you have what hey what it's pretty Chris how are you now you do like I'm not having time not a lot of trouble with this talk show as usual so I tried to call in a grant talk sure you're coming in loud and clear what come okay I'm right here um this fits the topic of time I'd always fascinated me I always view time as being artificial I never really conforms to the time I've been I've been told that I'm oblivious to time and I think one of the things that's very important that about time is like you're saying it's cyclical it needs to ritual repetitive behavior yes and I think it's kind of like having humans chase their tails I you can chase your tail all day long when you're really never to get anywhere and this I'm saying some a consciousness standpoint absolutely and that's the whole object to keep us in that rat wheel that mad hamster wheel in the cage running and thinking that we're going someplace and we're going nowhere that's the hole for the bill that's got to come down I don't know why I ask my arm friends at sama I thought interesting I said I want you to explain to me what time is but don't use any units of time if explaining because I think what's doing they will do it because I paused apart for a while and that'll be how we define time there we go I'm sorry creating Chris Chris we lost you there for the last five or ten seconds it looks like though we were accidentally muted if you could just repeat what you said you said the last thing I thought I heard was you were trying to explain time without using any units of time yeah I asked people that because I like to you know bend their minds and then line at the same time and they weren't able to do it now I was able to do it because I have been thinking about it and when I come up with in my own mind it was fit the only day we now at one moment in another moment is the relative positions of the planets deity the heavenly bodies and that's when we caught on now I didn't understand I guess everything you're going through I think it's the same thing and we'll relating time to the movement of of the planets and and you know just things in motion because I had done it that day with time ISM have you seen the movie Inception I have I thought it was great one thing I found no word in our Xavier but what one thing I found no worthy was time was relative within the level of consciousness in which you were act yes so it's when the one that when something was happening one level of the dream and another level of the dream where you'd have maybe I don't know 10 seconds at one level if it give you you know an hour for four hours at another level which told me the message there was that time is well it's a perception it's just like most about all the other parts of reality is it's just an illusion or a perception yes and it's a very it's a very heady concept of time that is put forward in that movie um Chris I want to thank you for calling unfortunately we're going to have to end the show a little bit early tonight there's been some technical problems and some other things are going on and bob has asked me to cut the show short for now we're going to pick up on this topic next week and continue to talk about this a little bit because I know some other people Kevin wanted to chime in with some other things I have a few other things to say I wanted to talk about the great year and the precession of the equinoxes as a grand cycle of time get into the UGA's a little bit so we'll extend this topic over into next week and we'll also talk about the eleventh method of manipulation next week which is the what I call the DHR factor which is us basically police dogging ourselves the denial hassle and ridicule factor that is so prevalent among a you know the people of our society that don't want to look at the truth about what's going on in our world so we'll transition into that topic but we'll continue to talk on this topic for a little bit next week Chris I want to thank you for calling in I'm mark passio you've been listening to what on earth is happening sorry to cut the show short this week but we'll be back here next week at 8 p.m. Eastern Time thanks for listening good night everyone [Music] you

What On Earth Is Happening Show #035

Topics: *Mind Control Methodologies, The Illusion Of Time, Astrotheology, The Great Year, Time Ås Spiritual Currency, Denial, Cognitive Dissonance, The Hassle-Free Zone, Fear Of Ridicule*

freedom man that's what it's all about welcome you are listening - what on earth is happening this show will discuss the topics of human consciousness mind control natural law vehicle and all issues that affect the freedom of the people of Earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches it's critical moment of choice and now here is your host Marc Pascal welcome ladies and gentlemen welcome one and all you're listening - what on earth is happening my website is what on earth is happening calm I'm your host Marc passio were simulcast and tonight on the Intel Hub news network today is Tuesday November 23rd 2010 we are going to continue our discussion on time as a methodology of mind control particularly in the time bound consciousness aspect of time and we're also going to look at time as a spiritual currency which is kind of a abstract and somewhat odd idea to some people but indeed that is what it is in its positive element so we'll continue to do that probably throughout the first hour of the show and then we're going to get into yet another methodology of mind control the self policing of the human species we'll look at the ways that we police each other I call this the denial tassel ridicule factor the DHR factor these three self policing methods go hand in hand with each other so we'll be talking about that probably in the second hour of the show I want to thank all of the attendees and the organizers of the end the Fed rally in Philadelphia that took place this past weekend that happened on this past Saturday November 20th and it went great I want to thank Mike Salvi like also thank Rob Pepe and Jordan page in particular they made it a great success but we had a good turnout we had a lot of enthusiastic support the musical element to this rally was very different and I think it added a great um motivational factor to the event and I think it brought in a lot of attention people were looking up to see what was going on because we had some live music we actually had a float going down Market Street in Philadelphia and we I think brought a lot of information to a lot of people of course some people still resistant to even taking information and looking at it with an open mind but we did get a lot of information into a lot of folks hands so overall I think it was a great success so that was the end of Fed rally this past weekend coming up in Philadelphia this coming weekend I will be giving a special lecture on natural law sovereignty and survival this will be happening at a meet-up called surviving thrive this is hosted by Fernando South Guero who hosts the survive and thrive Philadelphia group this is a meetup calm meetup if you go to meetup.com and type in survive and thrive philadelphia you'll find this great group a meet once a month on the last Sunday of each month at Liberty's pub so this will be taking place November 28th that's a Sunday at 6 o'clock p.m. I'm sorry it's actually the time has actually been changed it is now at 5:30 p.m. they're going to start it a half an hour earlier because of all the great information that's going to be given out at this Meetup so 5:30 p.m. Sunday November 28th at Liberty's pub 705 North 2nd Street that's basically the corner of 2nd and Fairmount in Philadelphia so I will be speaking at that and my my topic is natural law survival natural law sovereignty and survival the second and last event announcement I have is the one I've been making for many months and will continue so the time that the conference is held the free your mind conference on consciousness mind control in the occult to take place April 9th and 10th in Philadelphia featuring multiple speakers and diverse educational materials for the purpose of raising public awareness of the critically important topics of mass mind control techniques the covert and subversive influences upon consciousness and behavior trauma based and ritualized abuse and the practical mental and emotional healing methodologies available for those affected by these devices Saturday April 9th and Sunday April 10th 2011 10 a.m. to 8 p.m. both days doors open at 9 a.m. both days the location is rubra Hall in Philadelphia at 414 Green Street or one for green tree admission price only $20 per day confirmed speakers Erin McCallum Alfred Webber Andrew basiago Bob Tuscan barrier dozous John Irvin John Nicholson Larkin Rose Laura Magdalene Eisenhower mark motika mark passio Mel fàbregas Michael Kelly and Suzanne Taylor once again that's the free your mind conference a conference on consciousness mind control on the occult for more information please visit visit the website WWF re your mind conference calm I'd like to now give the call in numbers they show the calling numbers we're broadcasting on two different networks this evening talks you and blog talk so if you'd like to call in there's two calling numbers the first for the top shoe network seven to four or or four four seven four four four once again calling number seven two four triple four seven triple for the call ID number you will be prompted for is a eight three five one five if you'd like to call into the blog Talk Network the calling number there is six four six seven two seven three three eight seven once again the blog talk call-in number six four six seven two seven three three eight seven so last week we were analyzing methodology of manipulation of the mind number 10 in our ongoing exploration of the techniques of mind control we agree that we would outline 14 total methodologies and coming up tonight we're going to continue to look at number 10 and then go into number 11 and I will probably be taking a break from these techniques for a week and I'll be having a guest on the show next week I'll post more information about that on my website so you can check that out at what on earth is happening calm and get information on the radio page about the guests that will be coming up next week however um probably after next week in a couple of weeks we'll be looking we'll be beginning to take a look at what I call the three big guns of mind control the three favorite methodologies and this won't take us into probably as many weeks of exploration as we have already done on mind control to get through these three techniques because I'm really really going to open up and expand on these topics even more extensively than I have done in my presentation and in doing so as I told people last week this will act as a subtle form of initiation into different occult philosophies and again people shouldn't like be concerned about that or were even thinking this is something that is bad or negative a cult as we have said many times on the show simply means hidden knowledge and it is ultimately hidden knowledge about ourselves and our psychological makeup and motivations if you keep that knowledge hidden from people if you are so inclined you can wield that knowledge and information as a weapon against people and that is in fact what is being done the only solution to this is enough education about this hidden knowledge bringing it forward into the light of day so that it is no longer hidden and when people become acutely aware of this information they can basically no longer be manipulated by it because they have brought it to the conscious level of awareness and that's what the show is all about awareness and coming to a higher level of it so starting two weeks from now we will be exploring deeply the occult and we will be starting that process or initiating it by looking at what religion really is over the next few weeks we'll be looking at religion as astrobiology we'll be breaking down different religious traditions in both the exoteric or astro theological form and then we will look at the esoteric underlying meanings that are revealed only to initiatives of mystery traditions which are what religions are I guess you could say fallen versions of after that we will be looking at symbology and again this will cross over a lot because symbology plays into religions so much that it will be pretty much impossible to talk about it without looking at some of the uh the symbolic language that is encoded into religion finally we will be looking at what I call chaos sorcery which is essentially the fidelity dialectic enacted upon a mass scale on a grand stage this is the biggest ritual that the occult ever trots out into public and actually basically wields a human sacrifice ritual or some other form of mass ritual magic right out in the open for all to see and this is done to instill fear into the psyche of the human population so that they will give their rights away willingly to the hidden covert manipulators that plan these events all along so we'll look at that as well and then we'll transition from the stage of this show that looks at the dark into the part that puts forward the light and we'll be getting into deep solution based thinking this will be many weeks from now but just giving a general broad outline of what we have in store you know as beliefs progress on on what on earth is happening so tonight I want to briefly recap some of the things that we'll talk about last week when it comes to time the illusion of time time as we explored last week does not actually exist the only thing that does exist is the present moment and the solution to the psychological manipulation when it comes to time is to become aware of that if there is only the present moment there is only the now in which we operate the past is gone there's no point in dwelling in the past bringing attention to the past and um educating ourselves as far as history is concerned is absolutely critical and essential in the understanding of what's taking place in our world what I'm talking about is living in the past that's what's dangerous that is a method of mind control that many people get stuck in they cannot let go of events and circumstances that happened in the past they cling on to these things and kind of hold them close to their chest as something that defines them as a person people who are trapped in this past awareness this past modality of consciousness they can't get over things that occurred to them they can't move on in relationships that happened in the past they can't then they bring those into the present moment and in doing so they taint the present moment they take away the power of the present moment people do the same thing when projecting their consciousness into the future that's a powerful tool that human beings have we can look at trends that have already taken place and based and based upon those trends we can extrapolate what the future may bring but to get trapped in future awareness future consciousness I guess you could say or lack thereof as the case may be can be very dangerous because then we're living in anxiety over the future rather than actually living in the present moment so the present moment and present moment awareness is really the solution to this time bound form of consciousness and that's what we essentially talked about last week on the show we also started talking about timekeeping methods and how these are all based in physical modalities of consciousness they're based on the consciousness being trapped in not only time bound awareness but material material modes of thinking and this is done by basing all of the cycles of time that we use are the units of time that we use in a physical expression of basing them upon units that are broken down based upon the physical movements of objects in the solar system essentially heavenly bodies that's what we essentially use for time keeping and this routes our consciousness in material only thinking materiality we look at time as based in money time is money that's an expression that is often used we say we don't have enough time that's based in time as a quantity rather than a quality okay there is such a thing as time as currency however and that's what we're going to talk a little bit about tonight when people say time is money they're talking about the fake form of money we talked about this when we talked about money a few weeks back on this show and essentially what we want to look at is tonight is time as real money as real currency the currency of spirit there is such a thing and we want to look at what time how time acts in this capacity before we do that there is I'll briefly recap some of the cycles that we talked about time being timekeeping being based on in the modern world we saw that time is connected to Astro theology and this is kind of a prelude to talking about religion as ask for theology this is because the Astro theological cults of the ancient world are basically broken up into three main groups these three groupings are the cult of the Sun the cult of the moon and the cult of the stars and the planets so you have the cult of the greater lights and the cult of the lesser lights I hear the break music playing so we're going to get into this recap in just a moment stay tuned and we'll be back in a couple minutes after these words there's did you ever wish that you could have done something while you still had the chance what will you do if your income ends tomorrow or if you lose your home as many already have do you have enough money to survive through an economic depression if you don't want to gamble with your future then free to prosper calm can help you quickly end your debt problems protect your property and possessions and develop a personal strategy to get you through the hard times most importantly you get to keep your money and not pay another cent to creditors our program is often superior to bankruptcy consolidation or settlement visit free to prosper calm to find out more this is your real chance to act ahead so don't delay your future may depend on it call seven one eight six one five zero one two three to learn more at seven one eight six one five zero one two three or visit free to prosper calm today in a world where harassed oppressors and all I don't have seized control of the populations total gear there's amongst us the burden of humanity rests on our shoulders the only way out if to expose the global crime syndicate known as the New World Order together we are all one together we are in hell soldiers the battle for free humanity and soon join us in the fight be in hell of calm secure your future get your non-hybrid feedback now with the looming economic crisis food shortages and other toxic disasters now is the time to be ready just click on the heirloom organics banner at the top of our BlogTalkRadio page today secure your future and the future of your family in hard times heirloom organic seeds hi this is Bob Tusker tune it to my show truth be told radio Monday through Friday at 7 p.m. Eastern Time you are listening to the Intel Hub news network crushing the new world order piece by piece welcome back what on earth the naps with bark patio all right we're back before the break I was talking about the different gradations of time that are given to the different astra theological cults or in other words the different bodies in the heavens okay we look at this a little bit last week I'll briefly recap it before we go into the different aspect of time I want to talk about tonight we saw the smallest practical unit of time that we basically use is the second that was given to the planetary cult and it was basically for the planet Mercury because on a clock the second hand goes around fastest out of any other hand and this is the smallest unit mercury is the closest to the Sun that goes around faster in its orbit around and its revolution around the Sun than any other planet this is the second object in the solar system mercury I put a visual aid for this up on my website on every week the show is podcast and click on the podcast tab and get related images for any given show so this was show number 34 last week this week is show 35 we could check out the images that are related with that show up on the site he is the the next great Astro theological cult of the ancient world was given to one of the gods of the heavens is the moon cult so the minute-hand which is the next gradation of time upward is given to the moon men is a Phoenician word that means moon that's what the moon was called in that up in that culture so the minute is associated with the moon above that we have the word hour and that's the next gradation of time as we progress upward in the the unit of length so that's given to the Sun cult and it is named therefore Horus as a matter of fact you can just by looking at the word ours you can see that all of the letters of the word ours is in the word Horus because these are indeed gradations of time that are allotted to the Sun or Horus as he was known in the ancient Egyptian cosmology when we progress up in units of time you can see that the day is given to the planets again because it is based one day is a one rotation of the earth okay and each day as as a matter of fact of the week is given to the planet so the day and week now is actually assigned to the planetary cult once again so this cycle repeats as we go up in units of time as we you know move on to greater units of time we saw that Monday is the moon day Tuesday in French languages merridy and that is Mars as day in the Norse tradition of the the god that represented war was also that is akin to Mars in the Roman tradition his name was to tiw so this is Tuesday Wednesday in the French languages mercredi and that is Mercury's day mercury is associated with the Greek heard news and the Egyptian folks okay this is the Creator God in the Norse tradition the Creator God one of them was Odin and this is also assigned to Odin Wednesday so we need the Thursday we saw that in the French that's you should be that is in the Norse tradition Thor's day okay that is given for the planet Jupiter who was associated with the god Thor in the Norse tradition and Jupiter was his name in the Roman tradition Friday is Venus's day it is named after the goddess Venus in the French we see it is von Verde in the Norse tradition which is where the name for friday comes from this goddess was referred - as Freya Freya or Fria okay Saturday and Sunday are very obvious the names are right in the words Saturday Saturn's day and Sunday the sun's day okay so we'll move on to the next gradation of time past the day and week we get to the month of course we talked about this as the moon because it is given to the moons it is given to the movie the period of the month it is based upon the periodicity of the moon the via of illumination as it is known so we go then to the year and of course that is based on the Earth's movement around the Sun and that is one of the largest numbers units of time that we work with on a practical level of course we have the decade the century the millennium and then there's something bigger than that there is something called the great year I want to touch on this a little bit before we move on to talking about time as a spiritual currency the great year or the platonic year it is named after Plato who kind of came up or not really came up with it this has been around a lot longer than and when played a live but it is named after him because he basically I guess brought it out to the public and popularized it and wrote about it so it's called the Platonic here or the great year simply this is known scientifically as the precession of the equinoxes and I'll post a probably a slide or two about this in in the podcast for this show the precession is due to the earth's tilt upon its axis with relation to its orbit around the Sun it is tilted at a twenty three point five degree axis with respect to its orbital path around the Sun now that's not what causes the precession now you have to understand that in order to understand the procession and what causes it is entirely different maybe an entirely different thing altogether I don't know we'll get into the night because it's vet it's debated what causes the precession of the equinoxes I want to help people to understand from an astronomical point of view simply what this is basically referring to over a very great amount of time the pole of the earth begins to point toward a different location in the heavens and it slowly makes a wobble okay now I am NOT claiming that the Earth's axis is actually tracing a circle I'm simply saying that there is a frame of reference at work that visually makes us see that the axis of the earth slowly drifts okay in a in a counterclockwise circle and the pole star slowly changes okay what what stars the northern pole of the earth points at slowly changes through this vast amount of time the amount of time is approximately twenty-five thousand years that it takes the Earth's axis and let's just let's just basically say the the northern axis of rotation that we observe that the earth is basically making this rotational spin around okay for it to make one complete circle to go back to the same star or general vicinity of stars that it began at takes approximately 25,000 years different people give different numbers for that but as a general average approximately twenty-five thousand years for this great cycle this one great precession of the equinoxes or great here to take place the reason it is called a precession of the equinoxes is because the constellation that the equinoxes Sun the spring equal knocks Sun rises in slowly changes about one time Anja's constellations approximately every 20 100 years a little bit over 20 100 years okay and that is what this measurement generally is referring to it refers to every 20 100 years or so the spring equinox moves backwards through the zodiacal houses so it is not a procession through them it is a procession it moves counterclockwise through the so vehicle houses as the Earth's rotation moves counterclockwise um around the pole star okay so the reference frame is not necessarily need to be the actual wobble of the earth the planet Earth itself I do not pretend welcome back to what on earth is happening with mark passio mark it looks like top shoe doesn't want to take the same information we logged into it before we dropped I don't know how much we dropped off of BlogTalkRadio but we're back from our break caught on our blog Talk feed and if you have any thing I can do to hook us up back to your other feet let me know off the air here and type it to me if not we'll just hopefully continue with our with our feed with BlogTalkRadio no problem Bob it looks like the call was ended on talk-show since the call dropped out there on skype I could try to make a new call in talk show and start that up while I'm talking so I'll try to do that um and we can pick it up during the next break or whatever so um I apologize for the continued tech problems um but let's take a look at um well we were where we had left off so I was talking about the difference all about the precession of the equinoxes and how this is related to what's known as the great year in it called the great year or the platonic year in astronomy and this is what the ages are based upon the term called Ages represents the time period when the Sun on the equinox the spring equinox rises in a particular constellation of the zodiac so there are twelve zodiacal constellations they are aries taurus gemini cancer leo virgo libra Scorpio Sagittarius Capricorn aquarius and pisces the ages as they are related to the precession of the equinoxes okay are actually actually form these conflation form a great time keeping system which is we refer to as the great year or the platonic year and that cycle of the Sun as it rises in the equinox in the spring equinox in each of these houses okay for to precess through all twelve so vehicle houses and it does this again counterclockwise or backwards okay in the order I just mention them backwards from the order that I just mentioned them this cycle or great year takes approximately 25,000 years so if the Sun is rising in let's say the house of Virgo what this means okay is that if you look at the rising of the Sun on the horizon at dawn okay behind the Sun visually the constellation that is there is said to be the house that the Sun is currently looming in during that age so right now we're in the Sun is ruling in the house of places for approximately 2100 years if you go out and look at where the Sun rises on the equinoxes it would be coming up in the house of Pisces so slowly over a twenty-one hundred year period the visual of the the zodiacal house that visually appears behind the Rising Sun at the spring equinox changes very slowly over time and it precesses backwards through the so vehicle houses in a counterclockwise fashion so as I said right now the Sun is in Pisces within another couple hundred years if we look at the rising of the Sun on the spring equinox we would see coming up in the house of Aquarius in another twenty one hundred years after that we would see it rising in the house of Capricorn on the equinox so the equinox is not fixed that continues to precess over large periods of time approximately 2100 year cycles for each zodiacal house you put that all together time times twelve you get approximately a twenty five thousand year cycle that is known as the precession of the equinoxes this becomes important when we start to look at different time keeping traditions that base some of their ages in these large units of time or great years the Maya is one of them and it much is made of the Mayan calendar especially in the world today when we have these prophecies and predictions that are made for year 2012 that period of time around 2012 which is said to be transformative time that we are moving toward some would say that we are already in and if you look at the way the Maya kept their system of time they have these what are called the cycles of the long count okay so these are baktuns and they form approximately a 5,000 year cycle and then they repeat so it's a five thousand one hundred twenty five year cycle they considered that there were five of them in one of their great years for you know great periods of time that represented a complete transformation of some kind in their system of timekeeping because again their time was not really based on physical movements of objects but as I started to allude to last week is essentially about the movement of consciousness the evolution of consciousness through what we refer to as time and that's essentially what some of their sacred calendars are timing not simply physical movements of planetary bodies but they are actually referring to how consciousness itself is changing over time and if we look at their great leader their long count in other words it's a 5125 years cycle and they consider that this moves through ages of the elements a fire cycle an air cycle a water cycle an earth cycle and of course an ether or spiritual cycle you put these five together and again you have one great precession of the equinoxes or one great year or platonic year this kind of completes the analysis of timekeeping methods related and given two different planetary bodies or astronomical bodies and again we see how they progress upward as the length of the the timekeeping unit gets larger from the planet planetary houses to the moon to the Sun and then that cycle repeats once again planets moon Sun okay aside from that explanation of the precession and you can look at that I'll probably post a movie that's related to that because that will make it a little bit clearer to help understand that there's a really great documentary called the great year that kind of explores this movement and it also looks at what this what the actual calls for this may be beyond a wobble of the earth on its own axis of rotation I tend to not concur with that theory and I do think there is another reference frame of motion at work and this movie the great year kind of explores that a little bit and I mean if I can find the copy of it floating out there on the net post that to my podcast section for this week so it looks like we are probably only going to be able to take calls on blog talk for those who are listening on that network the calling number is six four six seven two seven three three eight seven sorry I can't get the talks you up and running right now um but you want to call into the show calling on blog talk and that number is once again six four six seven two seven three three eight seven I want to shift gears a little bit now on time and talk about time as a currency a spiritual currency again we talk about I don't have the time time is money but let's talk about how we spend our time okay we talked about the fake form of money when we talk about money on the show as also being an illusion a being named after the one I loan i money symbolically being presented as something that is representative of balance and nature and love energy and it is none of those things this is all sold to us as a proxy for the real form of money the truth spiritual vision the one eye okay and basically what we want to look at tonight is time as a form of true money not fake money not associated with the fake money but again this is an abstract idea time as something that we pay or spend I've said before that there are two basic forms of spiritual currency one being time and the other being attention and we say the expressions that we use or that we spend our time doing what we are doing and we pay attention to different things and depending on how we use that currency we will receive different results for the spending or pain of it so if we pay attention to certain things we will get certain things as a result if we spend our time doing certain things we will get certain things in our lives as a result they will become manifested so how we focus our attention will get us one thing and how we spend our time will get us a specific manifestation in our experience of reality this makes time one of the most important aspects of our lives what do we spend our time doing do we spend it on frivolous pursuits that we fete then you spend it on totally self-absorbed activities self-absorption do we spend it trying to run away from ourselves do we spend it pursuing pure fake monetary pursuits trying to amass material possessions we spend it trying to gain influence over others do we spend it trying to accumulate power or do we spend it trying to edify ourselves trying to truly educate ourselves about what is going on both within us and around us we will get two very different results depending on how we spend our time it is a spiritual car did you ever wish that you could have done something while you still had the chance what will you do with your income ends tomorrow or if you lose your home as many already have do you have enough money to survive through an economic depression if you don't want to gamble with your future then free to prosper calm can help you quickly end your debt problems protect your property and possessions and develop a personal strategy to get you through the hard times most importantly you get to keep your money and not pay another cent to creditors our program is often superior to bankruptcy consolidation or settlement visit free to prosper calm to find out more this is your real chance to act ahead so don't delay your future may depend on it call seven one eight six one five zero one two three to learn more at seven one eight six one five zero one two three or visit free to prosper calm today in a world where who are oppressors and all I don't ste control of the population totally rainy there's amongst us a burden of humanity rests on our shoulders the only way out if to expose the global crime syndicates node has the New World Order together we are all one together we are in hell soldiers the battle for free humanity ensues join us in the fight ENL of calm secure your future get your non-hybrid feedback now with the looming economic crisis food shortages and other toxic disasters now is the time to be ready just click on the heirloom organics banner at the top of our BlogTalkRadio page today secure your future and the future of your family in hard times heirloom organic seeds hi this is Bob Costas to knit to my show truth be told radio Monday through Friday at 7 p.m. eastern time you are listening to the Intel hub news network crushing the new world order piece by piece all right well back on what on earth is happening we were talking about time as a spiritual currency based upon what we spend our time doing you will get a very different result in our life we spend it doing certain things certain things will manifest we spend it trying to just focus on materialism not really educating ourselves as regards to our psyche as regards to the aspects of consciousness and self we will get certain things in our lives that will basically be pretty uncomfortable if we do spend it edifying ourselves educating ourselves about what's really important in life we do spending it understanding true moral values we do spend it in pursuit of truth then very different things will manifest in our lives and we would see that our lives would flow more effortlessly and suffering will dissipate particularly self-imposed suffering which is what we're drowning in right now in our world and it's because of the way people spend their time that's one of the biggest things it really is going on regarding why we're getting what we're getting look at what people watch and pay attention to and listen to and types of conversations that they have with each other that are often completely vapid you know that aren't about anything of any true importance or significance and people can say oh well who are you determine that I'm not anybody to determine that but there are certain things that are true and real and actually going on that we need to be paying attention to around us and we need to shift our attention to understand to come to a level of discernment about what is important and what we to be spending our time pursuing or doing in the world don't do that as I said we're going to continue to suffer we're going to be getting results that we really do not want in our lives so that's pretty much what I have to say on the whole aspect of time if anybody wants to chime in on that with still taking calls on blog talk the number is six four six seven two seven three three eight eight seven six four six seven two seven three three eight seven what I want to do now is start to talk about the eleventh methodology of mind control and I'll try to write out the remainder of the show on this topic and take some calls with it if people feel inclined to call in so the eleventh method of mind control as I have put forward in my presentation and will do so on this radio show is something that I've termed a group three methods of that we have of self-policing as human beings basically ignore reality and police each other okay ways that we act as sheepdogs to the sheep population we're basically doing this on our own as a result of conditioning and programming we don't even need people to you know pressure us into this or force us into this these are ways that we are imprisoning ourself of our own volition giving up our own free will and saying we don't even need a master to be whipping us or beating us or locking us up in cages or trying to kill us we'll do that for the master hey all the different ways that we just basically enslave ourselves and we try to keep the truth suppressed we try to keep each other's spirits suppressed in other words it's the idea of it well I'm in a cage I'm in a prison I'm in a mental prison and a physical one at that and definitely a spiritual one whether that's recognized at a conscious level or not it's all of our own design it's of our own building yes we can talk about the manipulators that formulate all of these methods of mind control but again as I've said they're running a program too and essentially they really don't have any power when it comes to this they may be smart and have the will to enact their manipulation techniques and continue to do so but ultimately it's we who do this to ourselves by giving up our free will over to them and falling in you know to this low level of spiritual awareness such that these methods can have any effect over us it's us doing it to ourselves I put a slide in my presentation if you want to know who the real sorcerer of the world the top-level sorcerer at the top of the pyramid you know the whole pyramid of manipulation as we've talked about if you want to know who that top-level sorcerer is to control the whole whole game look in a mirror that's who it is and most people spend their entire lives running away from that fact refusing to acknowledge it don't get me wrong that doesn't mean simply by changing yourself you're going to be physically free in this world the problem is that other people are here with you and they are also they are giving up their free will and acting as that that sorcerer or manipulator okay so the object is to change yourself and then help other people to make that same change that you've made once you're on the other side of the fence mentally the goal is to help other people make that journey make that climb over that fence or that wall okay so let's look at some of the negative aspects when it comes to what people do to themselves to keep themselves in a prison of the mind I call this the BHR factor after the three aspects that are identified as being the main police self policing techniques so this is methodology of manipulation number eleven the denial hassle ridicule factor so let's start with the first one and boy is there a whole lot of this in the world and it continues to be one of the strongest factors toward the suppression of the truth and the suppression of what is really taking place on this planet and that is denial psychological denial what denial is is basically a psychological illness when an organism that has the ability to think comes under such great stress attack and suffering that it becomes too mentally emotionally psychologically painful for them to acknowledge the condition that they are in they go into a psychological condition known as denial some people refer to this when it gets really really bad as cognitive dissonance cognitive dissonance meaning that the ability to actually cognize one surroundings and circumstances becomes in such disarray that the person is basically lying to themself about the condition that they are in and this is done as a defense mechanism denial in general and cognitive dissonance in particular is a defense mechanism of the human psyche but it's also one that if it is told for too long if we stay in it for too long we are alternately going to cause destruction by refusing to acknowledge the causal factors of the problem to begin with denial is something that addicts are often referred to as being in they don't want to admit that they have a problem they don't want to admit that they're doing something that is self-destructive not just self-destructive with a lowercase s as we've talked about the distinction between the lowercase s self and the capital S self or higher self they're in there in denial that is self-destructive with a capital S as well so what we want to look at is why people enter this state why do people go into states of denial about problems that are clearly present present to a child let alone an adult human being that's supposed to have developed emotionally and mentally the reason that people go into this state is simple fear over time they have chosen fear as the main modality that they wish their consciousness to dwell in and they have done that because they feel that it is easier simply for them to deny and ignore reality rather than then for them to confront what is actually taking place the confrontation of a problem implies that you have assumed personal responsibility you've assumed that responsibility because you have acknowledged that the problem exists and and in the acknowledgement of that problem you're saying I recognize this situation is present well if you've recognized the situation as present and you also have basically made a statement about what you desire so let's say you've recognized that there is a health problem present well probably everyone in the world has made the statement that they want to be healthy I mean who says they want to be sick who says they want to be ill who says they want to have their body riddled with problems due to an addiction who says they want to be in sleep everybody if asked will consciously say I want to be healthy I wanted to be happy and I want to be free well there are requirements that go along with those things and if we are doing the opposite of those things we are taking steps that create that are the causal factors for creating the opposite of those conditions so if we're taking steps that are the cause of disease are the cause of illness are the cause of enslavement the only thing that we really can do to reverse those conditions are to assume personal responsibility by first acknowledging the problem is present acknowledging the causal factors of those problems and then taking responsibility into one's hands by saying I am ultimately responsible and we in a wire sense humanity is ultimately responsible for these problems and then taking the measures to reverse them and that means not adding the same polarity that created them again Einstein said no no problem can never be solved by the same level of consciousness to created it well if fear created the problem fear can never undo it that means that you can never undo any problem that exists through denial denial is based in ignorance which is based in fear not wanting to look at the truth the outward refusal the willing refusal of the truth and that will become self-destructive every time the solution is in consciousness that is expansive which again we have called love what that does is bring the desire to seek truth and that's what dissipates denial or the willing refusal to look at truth and seeking truth leads to knowledge and as we saw a diagnosis means through knowledge dia in Greek means through or by way of and gnosis in Greek GN OS OS in English it's spelled okay gnosis is a Greek word meaning knowledge so we make a diagnosis of the problem through knowledge knowledge is based in truth which is based in the polarity of love so this is how we come out of denial we have to conquer fear we have to make a conscious decision based in the will to turn our tension toward the root causal factors of the problem once we identify those causal factors then we can act appropriately then we have the information to take appropriate action in the world if we remain uninformed through our ignorance and specifically through denial that the problem exists exist to begin with in staying in that condition never set you off on the journey for information to seek truth this is the condition so many people are trapped in but it is unbelievable at the end of Fed rally this past week we were handing out information as we marched back and forth along Market Street in Philadelphia and I saw a great dichotomy of people there was a great divide you would take a flier and try to hand people information about what the Federal Reserve is as an institution what it is doing right now what it is doing has been for over a hundred years what it is doing to our country how it is destroying your ability to basically live a life that doesn't resemble a feudal servitude futile ISM okay we're basically giving very basic single page info sheets to people you know third of a page half a page and just asking them to just take a look here some basic info about the Fed and you could do more research on your own that's all it was about nonpartisan this isn't left or right that's an illusion this isn't Republican or Democrat that's an illusion all this was about is giving basic information to people that would hopefully encourage them to do some research on their own about a corrupt and immoral institution well we saw a great division between people and how they would respond toward either taking or not taking this information what you saw in people well at least what I saw in people I'll speak for myself when it comes to this perhaps someone else and uh you know chime in on it we may have been there when we look at who took it who took the information they seemed humble in many ways when you looked in their eyes there was no there was no look on their face about you know snide nests they didn't have a snide look they didn't smirk at you okay they looked at even the kind of attitude was well why would you be out you know doing this you know trying to give information to people there was a curiosity there that's the main word they had curiosity and then they would take the information from you in a humble way in other words it seemed like what they were acknowledging is that they didn't know what this was about they didn't have a preconceived notion of what it was about they simply saw us coming down the street so I don't know what this is about somebody's handing me a flier with some basic information on it I'll take it and I'll check it out and I'll find out what it's about and if I don't think it's about anything that is good for me to know about I won't pursue it if I do maybe I'll pursue it but essentially what I sent was a general humbleness from the people who took the information they didn't think they knew at all they thought there was something that they could learn whether they felt that it was valuable or not remain to be seen but they at least knew I don't know what this is all about and that's the beginning of all knowledge seeking is the words I don't know I've said that many times on the show in the past the beginning of all knowledge is basically admitting to yourself that you do not have knowledge and maybe wanted set off in search of it so that might work three of the most powerful words you can ever speak is I don't know because that sets you often a journey for the truth so this seemed to be a smaller percentage of people you know I would say maybe 10 to 20 percent of the people on the street now for the great majority was the other way around there was a disdain or information a disdain for learning something new or knowledge and that is always based in fear the people who refuse to even take a flyer from your hand to see what it is about seem very snide they seem to ridicule what was taking place without any knowledge about it they seem to think they already knew what it is all about and I I will almost guarantee you hardly any of the knew a thing about the Fed okay so they seem to think that this was either a completely conservative right-wing Republican thing or that it was a completely leftist socialist Democrat leaning endeavor these are people who are still trapped in the left-right paradigm and they seem to think they already had it all figured out and that there was nothing that could be brought to their attention that they didn't already know I hear the music that's another break coming up this is what on earth is happening I'm your host mark fasciae we'll be back a couple moments there's a lane did you ever wish that you could have done something while you still had the chance what will you do if your income ends tomorrow or if you lose your home as many already have property and possessions and develop a personal strategy to get you through the hard times most importantly you get to keep your money and not pay another cent to creditors our program is often superior to bankruptcy consolidation or settlement visit free to prosper calm to find out more this is your real chance to act ahead so don't delay your future may depend on it call seven one eight six one five zero one two three to learn more at seven one eight six one five zero one two three or visit free to prosper calm today in a world where who are oppressors and while I don't have seized control of the population total tyranny there's amongst us the burden of humanity rests on our shoulders the only way out if to expose the global crime syndicates known as the New World Order together we are all one together we are in hell soldiers the battle for free humanity ensues join us in the fight ENL of dot-com secure your future get your non-hybrid feedback now with the looming economic crisis food shortages and other toxic disasters now is the time to be ready just click on the heirloom organics banner at the top of our BlogTalkRadio page today secure your future and the future of your family in hard times heirloom organic seeds hi this is Bob Tuscan to knit to my show truth be told radio Monday through Friday at 7 p.m. Eastern Time you are listening to the Intel Hub news network crushing the new world order piece by piece all right we're back here on what on earth is happening I'm your host mark Cassio my website what on earth is happening com call the number for tonight six four six seven two seven three three eight seven um we were we were discussing the end of Fed rally and uh I was illustrating the denial factor and how this is based in fear so we're talking about the denial hassle ridicule factor these are methods that people basically police themselves and keep themselves in the mental prisons that they are conditioned into um I was talking about the people who would not take a flyer from our hands even to look at the information at all so they had this general quality the people that refused to look they had again a snide look on their face as if they already understood what they were seeing when I can almost guarantee you if you asked any of them about the Federal Reserve they couldn't tell you one detail about it they certainly are aware that it's basically the cause of the economic crisis that's taking place now it couldn't tell you that to be valuing the worth of their money so that they have to work more to pay for less and if you asked any of them if you like to pay more pay more money for the same thing year after year you have to basically are doing the same amount of work but your money's worth less so you have to spend more of it to get the same things every person would say no I hate that I want as much as I can get you don't want to understand the causal factor of what's doing that and again this is even in the fake system of money as I said in my speech if this were heli there's no such thing as money it's all an illusion they're nowhere near that understand excuse me take a drink of water there so they it was as if the people who wouldn't take it we're in such denial that there was anything that could possibly come - no there wasn't already in their repertoire of knowledge they know everything there is to know that could possibly be of any influence in their life or could possibly affect their life for the positive or the negative that it isn't necessary for me to take information the other thing that I sensed is that they feel anybody who is saying that they don't like something or protesting against practices that are taking place the bets in some form of in Val it's invalid you know that's some form of invalid behavior that you're never to do that the idea that you can never be against something and this this comes through the consciousness through that this is expressed in people's consciousness through the New Age movement is big with this ok the New Age movement in its negative aspect again we talked about this before on the show as controlled opposition there are some good things in the philosophies some of the philosophies of aspects of New Age movement largely it's there to stop people from becoming active that's what the greatest bulk of New Agers are all about they think they're going to medicate their way to peace on earth and I got news for you it's not going to happen that way you're not going to read your way to freedom either if you're not going to take action in the world you're not going to read you it doesn't matter how much knowledge you have that's the only the beginning of the process you have to convert knowledge into true wisdom which is then taking the proper moral action in the world with the knowledge that you have and I'll repeat that endlessly on this show it's all about action ultimately because it's all about courage it's all about conquering your fear and these people have been conditioned by the media and by the religion and by the New Age movement but if you don't like something you don't you don't ever stand against a practice or an institution you've tried it before or something else well I wholesale reject this ok this is not what the law of attraction is people who advocate the law of attraction saying that that is the law of attraction nonsense absolutely yes you can be against something and be completely morally in the right and doing the right thing in the world that is not enter into the law of attraction Hey yeah you should be talking about let's do this as opposed to this combine that with it but not shining the light on the darkness is not going to get me very far refusing to shine light on the darkness and the immoral practices that are taking place in our world is denial its denial and so many people are trapped in the state of consciousness and again politics the New Age movement religion these are all things that are pushing people toward that state of inactivity of right brained imbalance too much of the passive modality and not enough active or sacred masculine modality of consciousness which is right action in the world I actually said to one young woman at that I was passing by on the street when I tried to hinder a flier and she just what-what would not even practically look at me I said are you afraid of information because that's all this is taketake of it and make of it what you will know no one's telling you to believe anything we're asking you to look into something and she said yeah I'm afraid of new information I already you know I don't want anything anything new brought to my attention but admitted that actually said that and my response simply was that's why you will be going deeper into enslavement people who think like that they think there's nothing I can learn I don't even look at anything else and most of all are in fear of looking at anything else are causing their own enslavement by that modality of consciousness that combined with not taking action in the world and you can't really take action unless you inform yourself properly or you can but you're going to basically be you know getting completely chaotic results which is why we have the chaos that we do in our world because most people are uninformed but admitting absolutely outright admitting I'm in fear of new information doesn't want to look at anything what willingly wants to remain ignorant running headlong into her own enslavement truly unbelievable all right this is the last break we'll be back right after this there's a lady if you ever wish that you could have done something while you still had the chance what will you do if your income ends tomorrow or if you lose your home as many already have do you have enough money to survive through an economic depression if you don't want to gamble with your future then free to prosper calm can help you quickly end your debt problems protect your property and possessions and develop a personal strategy to get you through the hard times most importantly you get to keep your money and not pay another cent to creditors our program is often superior to bankruptcy consolidation or settlement visit free to prosper calm to find out more this is your real chance to act ahead so don't delay your future may depend on it call seven one eight six one five zero one two three to learn more at seven one eight six one five zero one two three or visit free to prosper calm today in a world where who are oppressors and all I draw access control of the population total journey there's amongst us a burden of humanity rests on our shoulders the only way out if to expose the global crime syndicates known as the New World Order together we are all one together we are Intel soldiers the battle for free humanity ensues join us in the fight in Hell of calm secure your future get your non-hybrid seed pack now with the looming economic crisis food shortages and other toxic disasters now is the time to be ready just click on the heirloom organics banner at the top of our BlogTalkRadio page today secure your future and the future of your family in hard times heirloom organic seeds hi this is Bob Costas tune it to my show truth be told radio Monday through Friday at 7 p.m. Eastern Time you are listening to the Intel hub youth network crushing the New World Order piece by piece and then Orion all right ladies Elmo we're back that was our last break for this installment of what on earth is happening so we have another about 25 minutes and going to be going to calls in a moment we were talking about the denial hassle ridicule factor specifically denial and the willing refusal to progress toward truth by seeking knowledge and to contain and confronting information just basically taking information into one so how many people out rightly refuse to do that in fear of what they may find we were talking about the end the Fed rally how certain people took the information we had to present them with a humble attitude knowing that they do not know with a little bit of human curiosity if you could imagine that and took it and thanked this and said yes I'll look into this and that's wonderful and I think there needs to be a lot more of that I do believe that they were in the minority but we gave out a lot of information I mean a lot of people did take this uh you know as a ratio they were definitely the minority more people refused the in folks and scoffed at people who were on the march because they feel that this is some form of invalid behavior you know that you cannot you cannot protest against things you don't like that have going on in your world well that that's off limits how dare you how dare you not sit back and be a good little slave and go along with the program of your masters how dare you this is how we police each other when when people like that were attempted to be given information they had this snide almost cocky look on their face as if you're trying to give me information like I don't already know what's going on in the world and you somehow are aware of something I'm not as if they knew everything I knew everything there is to know own there's nothing that could possibly be brought to their attention that could possibly affect their lives the denial factor totally based in fear let's go to our first caller from New Jersey you're on what on earth is happening we have force hey Mark it's Chris how you doing Chris how are you always a pleasure to hear from you well Chris all I want to congratulate you on that speech on EDA in the Fed rally that was terrific I love the way you tied in the imagination theme to the end the Fed rally if we can't imagine a world without the Fed we can't create the world where at the Fed so that was that was very good I also tried I'll be posting that to my website later this week probably in the next day or two I'll put the video up there it's on youtube if you search mark passio and the Fed rally Philly that that should come up on YouTube but I'll post a link to it on my website in my new section this week probably with a transcript of the actual speech so thanks Chris yeah I won't do much more time but I do want to say Tom Einstein said that them your condemnation without investigation is the height of ignorance and that's you know that's a great Restatement and when you're trying to stop people in their consciousness you have to get used to it in my experience you have to get used to denial and rejection and maybe maybe over time they'll come around and I always in the end of the rally and I experienced the same thing you did in terms of you know rejection and chosen ignorance as far as I'm concerned right yeah you saw that a lot I mean people who are refusing the information soon very much at least in my perception to be trapped in this false political paradigm this false left-right paradigm you heard people either saying oh these are right-wingers or oh you know oh yeah these are all you know left-wing socialist types to want to well you know yeah where we saw in our our economic system and you know I give you an incredible a stereotype some quarters you know by Chris now I give you a credit I watched you handing out this flyers for a long time you know you did a great job on that I it was a there were a lot of people that I guess over within the federal I but the people who were they were very principled and courageous and trying to help other people whether they wanted to be helped or not and but not personally helping them just offering a hand and saying here's some information and you know maybe if you're interested go look into it and then I think I'll say write this part of the course is um the fight the fight of waking people up and that's basically what we're doing with the end the Fed insistence in a focused way is I think it's portrayed really well in the movie they live where the fight scene was indicative of how people will hold one through fear I guess to their ignorance that's right that the philosopher Deleuze once said that he asked the question why do people fight as stubbornly for their enslavement as they do for their salvation as they should for their salvation you know and it's incredibly true you know we're fighting more for our enslavement than we are for anything else for our freedom for our time you know understanding to greater levels of mob coming to an understanding greater levels of knowledge people don't seem to want those things they do they want the big-daddy state and manage state they seem to want to remain ignorant and you know Thomas Jefferson replied to that and said if a nation expects to remain ignorant in a state of civilization it expects what never was and what never will be of anger great quote and freedom do not go hand in hand they are diametrically opposed to each other I'm going to go I don't want that thing I I think a lot of students here they're choosing fear over love and the other thing is David Icke said that the biggest thing the biggest obstacle holding us holding those people in lower consciousness is worrying about what other people think so allah ek- are a much great show you got it we're going to get that factor in a moment I'll try to basically get through the hassle and ridicule factors in the remainder of the show so we talked about denial and cognitive dissonance let's look at you know cognitive dissonance is basically lying to yourself and you know holding two contradictory things in your mind and simultaneously George Orwell call this doublethink you know to believe that black is black and the black is also white okay people who believe that you know 9/11 was done by nineteen Muslim hijackers when in fact they can see the buildings falling at freefall speed the understanding that Muslim hijackers couldn't possibly have put demolition charges in buildings that came down at the speed of gravity are in doublethink they're in cognitive dissonance their senses are telling them one thing what their mind is telling them since that's impossible you must accept the alternative to that which is the official government fairy tale and they do that willingly like trained sheep you know they just go right along with that programming because the alternative is too horrible to contemplate or then fear you know again I've heard people say I don't care if the government came out openly claimed that they killed all of those people deliberately I would still choose not to believe in it imagine that if people openly admitted this is what we did base instead of proof came out and the people who were who did it were actually acknowledged that they had not they would still choose to believe that it was done the way the official story said because they want to live in that world rather than the one that that would actually be have that a horrible scenario of you know insiders and different agencies within the government having done this to their own people I mean that's as sick as you can get psychologically as far as I'm concerned that's willful denial of truth and for somebody to say they're willing to enter that condition that's a sick sick stick human being you know that's like saying I'm so afraid that two plus two equals four that I will to believe that in equals five in baton and live my life accordingly rather than face the actual truth that it does in fact equal four that's how crazy that is that's totally right brained in balance because of fear as Chris mentioned I'd like to also say you mentioned David I like to also say another great thing David I brought up is we have to begin our journey and investigation into the truth with a blank sheet of paper if we bring our preconceived notions to it the information that we encounter is all going to be colored by that preconceived notion we're going to try to squeeze it into a little box we bring preconceived religious notions to it everything that we find in our pursuit of truth has to be squeezed into that box of religion if we bring our scientific preconceived notions to it everything that we find in pursuit of truth no matter how much of those against that preconceived notion has to be squeezed into that box that's all all of these conditioning factors when it comes to religion or politics or the New Age movement or science or any other form of mind control that's all they are the boxes for consciousness that's it it's saying anything that's within this box is valid and anything that's outside of it is off-limits for human consumption and consideration and that's simply not true the truth cannot is too big to be confined to any system or any box for consciousness if it exists outside that box as a matter of fact the truth contains that box everything inside it and everything outside of it that can never be squeezed down into a nice neat little package it doesn't work that way but try telling that to somebody who's in this state of cognitive dissonance the other factor the crisp brought up was that we basically are afraid of what other people think of us that's why we won't look at certain things this is the ridicule factor I would rather stay silent then actually actually start to bring up things that make people a little bit uncomfortable because it challenges their preconceived conditioned notions of reality and I would rather not take any action not raise my voice not say what I feel to be true because I'm more in fear of what other people may think of me for doing that now imagine how much of a low state of fear-based consciousness you need to be in to think that way that's also always based in fear that's it you have to be in fear of another person's opinion another person's opinion of you we need to get outside of that barrier to truth we do break down that wall that we're erecting on our own no one else is building that wall but us how many people are actually talking about this stuff to other people and you know I would critically say not enough okay because if they were more people would be aware and start to look into this on their own there are many people out there that could be inspired to search for the truth on their own terms if only more people in their lives would start to bring information of this sort to them by speaking it I've often said and I put this in almost every one of my mailings but I send out on my mailing list to people the truth is spoken into existence if we are in fear of what other people are going to think about us we're going to make that stop us from speaking our truth into the world and therefore we're also basically helping to build the prison that we're going to have to live in as a result we need to use our courage to break down that divide to break down that barrier to speaking the truth the reason that the dominators the occultists of the world are so successful in what they are doing the d'arco cultists are so successful in what they are doing and the NIP ulation tactics that they enact that they control the world through the reason that they're so successful because they never stop speaking their view of reality into the world they have a device it does it 24 hours a day it's called tell a vision and they're constantly telling you their vision of reality and putting that vision into your mind getting you to live in their fantasy world in their dream enact their dream and make their reality come true they're telling you a vision that's why it's called television that's green language that's our chemical green language most people never see that never think of it in that term even though they hear it constantly they're always using their voice they're not divided I said this before people hate when I bring this up and talk about it they don't want to hear this but I'll keep saying it the reason they're successful and we're not is because very United and we're not largely there are some of us who are but nowhere near enough of us are on the same page and doing the same work and so many of these manipulators all on the same page doing the same work they're acting as one overarching mastermind and because they think feel and act in unison they're getting their desires manifested because we are in opposition consciousness we are not thinking feeling and acting in unison we're not getting what we want we're not receiving the manifestation of our desires we need to change more people's minds and hearts through courage and inspiration and knowledge such that they start to speak reality that what they want to create into existence and you can't do that until you put your voice out there and you can't put your voice out there unless you know enough and have enough courage not care what anybody else thinks about what you're going to put out there you have to do it because you know it's the right thing to do and that's why respect David like so much as Chris mentioned him I respect him he's one of the of people I dedicate my presentation series to because no matter what anybody's thought of what that man was saying he kept saying it because he felt it to be true and right and he always said if you don't feel it to be true right believe what you don't feel is right and you take what you will and do with it what you will do though is that information he shared widely and freely and put out there with no fear and that's why I have a tremendous amount of respect for his courage and that's why he's an inspiration to me for what I do and more we need more people in the world like that it's all everything about this method of manipulation all has to do with fear each one of these things denial is psychological fear the ridicule factor okay is fear of speaking your truth and then the hassle factor is fear of taking right action in the world that you know you should be taking once you have a certain level of awareness this is where a lot of people who do know the truth are trapped okay this is the hardest one to overcome the hassle factor when you know something is wrong in the world and you want to start doing what is right but the dominators the people who actually live evil into existence who are actually taking all the actions of evil so that they're bringing a more chaotic world into existence whether they're doing this knowingly which some of them are of smaller percentage or whether they're doing this because they're an oppositional consciousness and they're under mind control they're trying to stop people from actually doing the right things in life and saying you can't do this you can't speak you can't take this action if you have every right to take and people sit back see that see that they're willing to enact violence upon people for doing certain things that they have every right to do and people back off because they say I'm unwilling to deal with that hassle I want to be in the hassle free zone I don't want to have any with the police I don't want to have any dealings with the government I don't want to have any dealings with quote unquote authority figures all based in fear people who won't come out to a rally I know so many people personally it won't come out to an end the Fed rally because they're so afraid of what that might mean they might be on some list for their activities or what they're you know promoting this is this is there are special places in hell reserved for people with that kind of fear because they know what's going on they know they know and yet they still choose not to act because of their fear and guess what that's the last place I'd ever want to be that's the last mode of consciousness I would ever want to dwell in because that means you have completely abdicated your personal responsibility in a state of awareness of it all I have to say is woe to people like that you don't even understand what you're bringing down upon the higher self your higher self or if you want to use the term of your soul and I'll openly say that to somebody I don't care who they are if you know you're not acting worst place you could possibly ever want to be in or stay in and it's because you've taken the step and conquered the fear of knowing you know okay and you've said I want to know I want I no longer am in the fear that keeps me trapping ignorance but then you've chosen a new level of fear a new value that's based in fear and that's non-action and like I said I think that advocates you the more responsibility than simply remaining in ignorance willfully staying in the Hat and the non hassle zone the hassle free zone is actually a greater abdication of responsibility than remaining in denial see the people want to remain in denial who want to remain in denial they want to remain there because they can say they can cop out and say well I didn't really know I never really look into that for myself so I I didn't need to take any action on it because I never really understood so it's all also based in a denial of personal responsibility in advocate of personal responsibility you know the ridicule factor it's also based in there I don't even want to start speaking because of my fear of what someone else may think and in getting thing back from that they're there copping out again they're giving away their personal responsibility by saying hey if I speak this what I feel is true what I know they even know to be true I may be ridiculed by somebody else who doesn't have the same information and they're going to say oh you're some kind of a crazy conspiracy theorist or whatever okay so that's another level of fear that we encounter so it's the fear of knowing and the fear of speaking and finally the hassle zone the fear of acting all horrible modes of consciousness to be trapped in and to stay trapped in but I would say the worst is the hassle free zone because those people who remain in there they know deeply what's going on and they know what needs to be done about it they know the right action to take and they're willfully refusing to act based upon what they know and what that is that's not only an advocate of personal responsibility that is a pure shunning of wisdom which is the goddess principle the Sacred Feminine that is basically the destruction of the goddess herself and again this is symbolism this is the divine feminine aspect of the self I'm not talking about an actual being okay you are cremating ultimately the Sacred Feminine component of your own self because by putting down the male element of action okay you are killing your conscience because conscience is the nullity of what is right and that is what compels you to act in a moral way in the world so this is part of what is ritualistically enacted in the cremation of care ceremony appleton oh each year in the California Redwoods it's killing care which is killing the Sacred Feminine aspect of consciousness which ultimately results in not taking proper moral action in the world this ultimately sums it all up this is what the denial pasul ridicule factor is all about the denial factor is staying psychological denial psychological state of of refusal to accept truth even though you can basically see it even at a conscious level the hassle factor the riddler factor is all about not speaking your truth into the world for fear of what other pal may think of you and then the hassle factor or it's all about not taking proper moral action in the world no you're right that's all we have for mark after you kiss me what on earth is happening see right here next

What On Earth Is Happening Show #036

Topics: *Natural Law, Sovereignty, Survival, Hermetic Principles, Polarity, Law Of Attraction, Cause And Effect, Morality, Responsibility, Free Will*

and as promised I'm just going to jump right into the presentation on natural law now what I'm doing this for is one to put a little bit of a break in the traditional outline that I've set for the program we've been covering the topics of the topic of the techniques of mind control for many many weeks we have gone over 11 of them and I'll just briefly recount what those 11 methods of manipulation have been we have looked at abused ocation which is basically to put someone into a state of general confusion or bewilderment by this association of two different completely different concepts or ideas we looked at world view poisoning the poisoned view of human nature of the value of the individual and of the possibility for change world view poisoning we looked at the exploitation of primal fears ears that are rooted deep in the subconscious mind and are often there in the underlying genetic code of an individual because they have been present in the human psyche for thousands of years so these are fears from antiquity from the antiquity of the human species and these primal fears are exploited by dominators to further control people these we saw were the fears of darkness the fear of predators the fear of abandonment and the fear of chaos we also looked at technique number four which was the divide and conquer strategy okay and this is the exploitation of our perceived differences between one another the divide and conquer strategy race religion sex nationality politics age you name it any way that we see each other as different from one another that will be exploited and used as means to conquer the population the fifth technique was the school systems the indoctrination methods that go to work on us from very young ages to get us not to think critically and to get us to basically go along with anything the state says to look at the state as you know Big Daddy its outcome based education it isn't based on actual real holistic intelligence is often purely a elector mod intelligence the indoctrination system technique number six was controlled opposition this is basically dialectical mechanics basic dialectics which takes two opposing forces off against each other gets people to choose a side so that they are polarized against each other and ended up fighting each other instead of understanding the force that's essentially conquering and enslaving them technique number seven was the monetary system and this is one of if not the biggest of all of them because this is the universal worldwide religion of the masses of humanity and it is a religion this is what I call the one and only religion money it's a proxy for the true intelligence the true care the true will etc and it's it's completely fake we saw the house based on nothing except the belief in it and it is one of the most powerful techniques that the dominators have at their disposal the monetary system we looked in depth at that we also took a look at the control of the mass media that was method of manipulation number eight the mass media is basically working for a few major corporations and they're essentially yellow journalists propagandists not reporting anything that resembles truth although every once in a while they'll throw a little bit of truth in there with the lie to get you to take the poison pill but essentially these are institutionalized corporations that are run by the same dominators that run the banking system in the military in the intelligence agencies etc you don't have a free press in this country you have a controlled media so that was technique number eight technique number nine was food and medicine we spent out many weeks on this because there's a incredible attack that is taking place on the physical bottom because that is the gateway to the mind if you weak in the body you have access to the mind and what is in our food is disgraceful the the poisons that are in what is passed off as food and the pharmaceutical industry they're peddling poison in the form of medicine so we looked at that over many weeks great resources up on the website on that you can go to wall on earth is happening and click the podcast tab and always get access to past shows and there's a lot of great information posted there as well in the form of pictures related images that go along with these shows and also documents and videos to go along with them to help people to study further on their own some of the topics that we cover over the last couple weeks we looked at the illusion of time and that was technique number 10 and we saw that time is it is an illusion it is not really rooted in anything that is truly real it is the getting us to focus our attention on the past which is completely gone and cannot be changed we can't do anything about it so spending energy on that is fruitless and to have us to basically dwell in a state of anxiety over what may happen in the future which is also almost equally as pointless because the future is not here it has not arrived yet the power lies in the present moment and in present moment awareness so we looked at that over the last couple of weeks we also looked at time as a spiritual currency we say how we spend our time and indeed it is a form of currency because we get something in return for the quality of our time what we use our time to pay attention to so that was a technique number ten last week we talked about the eleventh technique which is the factors of denial hassle and ridicule and these are the ways that humanity basically polices themselves they deny the events that are really taking place even though they could essentially see it with their own eyes they decide to stay in what is called the hassle-free zone not to deal with any of the inconveniences and discomforts that may result from standing up and speaking the truth and the ridicule factor being afraid of what other people may think of them for coming forward and speaking the truth so those were the 11 techniques that we've covered so far in future weeks we are going to be getting into religion which is technique number 12 as a form of binding and mind control we will be looking at subversive symbolism the subversive usage of symbolism which is a language in and of itself we'll be covering these in depth these will probably take up more weeks than the monetary system or food did okay so these are the big guns that are coming up that the main techniques that are used to really really get into the human psyche and keep it under deep levels of control finally the the fourteenth method is what I call chaos sorcery and that is basically mass rituals or false flag events that take place in public in the light of day and are essentially there to inject pure fear into the human mind so that we will be softened up to willingly give up our sovereignty and our freedom such that the dominators of the world can come in with even more subversive solutions to the problems that they themselves have created and put bring the bring the lock down further on humanity you know really close the entire society for even further than it already has been so that will be coming up over the next several weeks those techniques will be covered in depth and in the covers of those techniques as I've said on the past on this show we will be looking at different occult ideologies and differ cult philosophies that are embedded in a lot of these techniques for mind control so the next three techniques will really open up a initiation of sorts into different schools of occult thinking so stay tuned for that coming up over the next few weeks on this show what I want to let people know before I jump in with the presentation for this evening it is that if you go to my website and you click on the radio page if you're not already there you will see that there is a link posted for tonight's show on the radio page okay that's on the left hand side you click where it says listen live and then we'll take you to the page where the player is at and there will be a link there that says for tonight's show the natural law sovereignty and survival presentation that is a PDF document I compressed it as well as I was able to I could have probably shrunk the images down in size but I decided to leave them at their full size I didn't put every single build of every slide and I put the things that were really important in and I compressed it as well as I could and turned it into a PDF document so essentially what you can do is download that document and follow along with me and see the actual slides that I used in this presentation a couple of nights ago as I go through the concepts and ideas in the presentation so Before we jump in with this let me give the callin numbers just so people have them and I'm going to take calls after I'm finished going through the presentation that's unusual I don't usually do that I usually will open up calls at any time during the show but again this is a special show so calls will be probably in the last half hour of the show or so okay and that there are two calling numbers you can call in to the talk show number that that number for calling is seven two four four four four seven four four four once again the talk should call in seven two four four four four seven four four four the call ID number is eight three five one five once again the call ID you'll have to put in after you call that first number is eight three five one five we're also simulcasting on the Intel Hub tonight so that's broadcast over blog Talk the blog Talk calling number is six four six seven two seven three three eight seven once again six four six seven two seven three three eight seven all right so this presentation that I gave a couple of days ago at survive and thrive Philadelphia was called natural law sovereignty and survival and what I basically told the audience when I began the presentation was that this will not be a political presentation this will not be a religious present presentation this will not be a scientific presentation as it is generally thought of in the term that modern science is thought of and this will not be a New Age movement presentation because all of those ideologies are essentially boxes for human consciousness that basically say anything outside of our box the walls that we have erected is unfit for human consumption and unfortunately the truth is too big to fit in any of those boxes it is much bigger than any of those ideologies the truth encompasses a much wider range so we can't be limited to those who are ideologists you have to look outside of them I hear the music be right back [Music] all right we're back on what on earth is happening I was talking about that the truth is too big to fit inside the boxes that are erected by certain institutions like politics religion science and the New Age movement it's much bigger than that and we have to look outside of the box that we want to find real truth so what I basically had established in mind what on earth is happening series of lectures as I told the audience there the other night is that what's really taking place on the earth is that a small cabal of people who don't have the the general interests of the public at mine are really controlling this world and through manipulation and techniques that basically subvert the human consciousness they are getting us to hand over our sovereignty and our natural law rights and in doing that all the power and influence of this world is flowing right to them and people don't understand how this works because they don't really know enough about themselves ultimately all knowledge that is really a solution to this problem is self-knowledge and we'll talk about that a little bit as the presentation unfold but essentially what their main aims are is to put the human population into a trance-like state that resembles sleep that resembles hypnosis and basically bring in a completely closed society or a police state and they're very close to achieving this objective I believe they've partially achieved it and brought in a soft police state which is what we really have now and they want to make it a hard police state and really lock down the entire world that they want this to be a globalized centralized dictatorship so we're on some on slide number six for those of you who are following along in the PDF document that I uploaded to my site hopefully my server I just went to a new server and hopefully it is handling the load of people downloading the presentation for those who did go up there and try to retrieve it so slide number six shows basically the earth with a cage around it locked down with a master lock and that's basically the kind of world that these dominators want to achieve that they want to bring into manifestation what I've told the audience the other night what I'll say again here tonight is that the presentation on about to give is the master key to that lock this is the key to act the understanding that is herein contained is actually the key to unlock that gate and to free this world if only we essentially come to that knowledge of our own accord and our own free will and what I basically told the audience is that I can never get you - well I can't forcibly make you understand this you have to receive it but I wanted to establish that this isn't my belief system this is this is stuff that is inherently existing in the universe and we'll talk about that as as we go forward actually we'll talk about it right now because the next section the first section I gave this presentation in 13 sections which is kind of a symbolic number so section number one was definitions to establish basic foundations for the language as we go forward in the presentation so what is an actual law you know we have to establish what the word natural means and what the word law means in the context that were of the ideas that we're talking about so I defined natural as inherent and that means having a basis in nature reality and truth okay its basis is in nature in the natural world it is not made or caused by human kind non man-made in other words man didn't make this up it is self existing okay and law undefined as an existing condition which is binding and immutable binding means that it has an effect on you whether you accept it know about it believe in it it doesn't matter you are bound by it if there are conditions in the world laws are conditions that are existing in the world that you are bound by when we're talking about natural laws okay and they are immutable they cannot be changed simply by wishing them away for not wanting them to be there they are period okay so that's natural law then is existing conditions which are binding and immutable and have a basis in nature reality and truth that are not caused by humankind that's what natural law is the historical significance of natural law I've briefly touched on and this was touched on by the host Fernando earlier actually so he read a bit from the Declaration of Independence and this was also in my lecture so the historical significance of natural law was section number two if you're following along we're now on slide 10 and moving to slide 11 I talked about natural law in the foundations of America in particular could have mentioned it in other societies but since this is where we live I wanted to help people to get an appreciation that the founders of this country had a deep knowledge of natural law they didn't always adhere to it as well as they should have or could have but they did possess an understanding of it that they attempted to enshrine in the founding documents of this country so I'll read a little bit from the Declaration of Independence to show how they incorporated the concept of natural law into it when in the course of human events it becomes necessary for one people to dissolve the political bands which have connected them with another and to assume among the powers of the earth the separate and equal station to which the laws of nature and of nature's God entitle them a decent respect to the opinions of mankind requires that they should declare the causes which impel them to the separation okay so in the first paragraph of the Declaration of Independence natural law is mentioned the laws of nature and of nature's God nature's God okay the founding fathers of this country were deists they weren't religionists they were deists they knew that there was a force of creation or a creator and they knew that that was the force that basically created nature the natural world and that there are laws that nature is governed by and that humanity is bound to those laws whether they like it or not so they put that in the very first paragraph of the Declaration of Independence okay moving on to slide 12 they also said that we hold these truths to be self-evident that all men are created equal that they are endowed by their creator with certain unalienable rights that among these are life liberty and the pursuit of happiness there's a lot of words in there that are important first of all we hold these truths with a capital t to be self-evident truth not beliefs not opinions not trends not current circumstances but truths okay and we hold them to be self-evident they're so obvious okay it's like saying the sky is blue okay it's self-evident at least it was to them we've fallen a long way in our under understanding of natural law since the founding of this country at least most people have all men are created equal and by men they mean mankind men and women some people will claim they did not mean that but you know I think is it is something that if they did not mean we should certainly include all people it's not just men and you know this is like as we say man men you know man can mean a single man or man as a whole of the species okay but they're saying all men are created equal created created that implies a creator and then the next phrase talks about that they are endowed by their creator okay an endowment is a birth right it means something that you have by nature of being born you were given it by the Creator as a birthright no one can take it from you no one can grant it to you or take it away from you and they go on to describe that they we have certain unalienable right this means they cannot be separated from us they cannot be made alien alene cannot be placed upon them so that they are separate from us we always have them we always have had them we always will have them these rights are eternal they're not made by man they're not granted by man they were granted by the Creator whatever you happen to feel that force is for you doesn't matter you can imagine it however you like to imagine it and it's your goal to get into touch with that through a one-to-one basis on your own okay but these are not granted by men or women they are not given to us they cannot be taken from us oh there are people who think they can but in reality they cannot ever really usurp our rights they can make the claim and try to put that into practice but the right still exists whether no matter what the conditions on the earth are okay they are inherent rights moving on the next action was called general principles the general principles of natural law and these were not specifically defined or gone through in order in the presentation but I will touch upon where these happen to be talked about as we go further into the presentation okay there are seven basic principles to understand when talking about natural law natural law is ultimately expressed through seven basic principles principles the word principles means first things and as we've said on the show in the past when it comes to our principles we have to put these first things first we need to be more concerned with principles than anything else because principles are based in truth those who know know and adhere to these principles now I notice I didn't say believed in these principles these are not things that need to be believed in these are things that are in existence they are naturally occurring in the universe okay they are inherently extant they exist we need to recognize their existence to come to know them not believe in them but to know them and adhere to them okay so those who know and adhere to these principles possess the key through which the wisdom of the universe is unveiled and that's a big statement that's a big claim okay however that is the truth if we really do understand and know these principles and then we live in harmony with them the amount of wisdom that will open up to us is scarcely imaginable to us in the current conditions that we live in these seven principles of natural law the basis the foundation for natural law are the principles of mentalism correspondence vibration Larry rhythm cause-and-effect and gender okay so I'll briefly touch on them I won't get into it them in depth and then you will see how these will apply as we move forward in the lecture the principle of mentalism is simply that everything that exists exists first as a mental construct the mind is the essential generator of everything that we experience okay the universe that we experience comes into being as a result of how we think our experience will be dictated by how we think as a man and woman thinks so they will be the principle of correspondence is that the universe is self-similar across all scales from the macrocosm to the microcosm it is essentially fractal and holographic alright as above so below as takes place in the microcosm cosmic universe it will be reflected into the macrocosmic universe or the larger as the things that take place and enter into manifestation on the small scale okay you will see that the the larger scale be reflective of that atom vice-versa all right the principle of vibration everything vibrates nothing rests everything is composed of vibratory energy I hear our break music coming up stay tuned coming up to another break a mark pass gl we'll be right back [Music] okay we're back on what on earth is happening I'm your host mark passio the website is what on earth is happening calm the network is the Intel hub news network calm so we were talking about the general principles of natural law the principles of mentalism correspondence vibration polarity rhythm cause-and-effect and gender and some of you may know these as the hermetic principles and indeed they are but these are the principles that govern natural law I was talking about the principle of vibration this is that everything in the universe is essentially composed of vibratory energy and we can employ different vibrational States to change what we experience the principle of polarity everything has a positive and a negative pole to it the principle of rhythm time and consciousness move in cycles the principle of cause and effect effect invariably follows cause for every effect there must be a prime cause and the principle of gender everything essentially has a masculine and feminine component to it so these general principles will be touched on it will not be gone into in depth but they will be touched upon as we uncover natural law what it is and how it works so I'm now going to slide 16 for those who are following along in the PDF document and that will be posted with the podcast to the website in the podcast section I usually post the podcast the following day after the show I have a section called discovery vs. belief so this is section 4 I started this with a quote from Soren Kierkegaard there are two ways to be fooled one is to believe what is not true and the other two is to refuse to accept what is true so the first way to be fooled is to believe what is not true the second way to be fooled is to refuse to accept what is true and that's the decision that humanity basically faces and they fall into usually fall into both of these and people believe all kinds of nonsense and refuse to accept the truth that's why we're in the mess that we're in well my presentation isn't about belief at all I think we need to steer humanity away from belief in general and deaf people to start looking at what it actually is present in this world the truth okay things that actually do manifest in reality and there is such a thing you know the opposite of that that there is no such thing as truth is an ideology called salep season which we've talked about on this show pretty extensively and it is the biggest lie that can ever be bought or sold and you know the ideology that there is no such thing as truth is the most dangerous and slippery slope to totalitarianism that there is because if there's no truth there's no right or wrong and therefore man gets to make up what is true what is right what is good and decide that he's God essentially and that's what the ideology of solipsism is it's outlined in the book 1984 by George Orwell solecism specifically mentioned so in general belief I'm on slide 18 now is you know I have an image of a guy jumping off of a cliff saying I don't believe dot dot dot and then the next slide slide 19 is M falling to his doom and you know as he's falling he's saying in gravity and then there's gonna be a splat there again because he wants to refuse to accept something that simply is true a natural law known as gravity thinking that he's going to defy it because he doesn't want to believe in it and the universe doesn't work that way and like a physical law like gravity the natural laws do apply in the same way that gravity does apply it does not matter whether you believe in them or not they are accent that means they exist in and of themselves they are self existing principles and belief in them is completely irrelevant we're not talking about belief here we're talking about recognition or discovery of principles that exist okay so the next slide slide 20 is Mikhail Bakunin the father of modern anarchy he says that the liberty of man consists solely in this that he obeys the laws of nature because he has himself recognized them as such and not because they have been imposed upon him externally by any foreign will whatsoever recognition discovery that's what we're talking about not belief no belief is required here no belief is required of anything that is said on this show at all look into it discover it for yourself or discover the contrary if that's what the information leads you to consciousness is the next section to understand natural law and how it works we need to know a little bit about how our consciousness works first we've covered this extensively on this show so this will be a recap and you know I don't think you could ever repeat this information too often the more you go through it the more it sinks in the more you come to understand it and the more you think about these things the more of an appreciation you have for them so I think it's important to recover ground that's already been covered I don't think it's wasted time I think that helps to solidify some of these concepts and ideas for for people many people need to hear things multiple times before they really become entrenched okay so before ideas sink in to the extent that they're really applicable in someone's life okay so consciousness how we're defining that as that in the context of this presentation is the ability to recognize patterns and meaning with respect to events taking place both within oneself and around oneself it's simply the ability to recognize patterns and meaning okay both internally and externally and consciousness has a polarity to it in gender okay so this is the principle of gender coming up here there is a masculine and a feminine component to consciousness the masculine is called yang energy which is solar or of the Sun it is active analytical dominant aggressive and then corresponds with the left brain hemisphere there is also feminine or yin energy to consciousness and that is lunar or of the moon it is passive intuitive submissive compassionate and is largely governed by the right brain hemisphere of the brain okay moving on to slide 24 consciousness has three basic expressions there is a creative principle and again a feminine and masculine principle and so we see gender employed here again all right so our thoughts are the first expression of our consciousness this is the creative principle of consciousness or the father of this Trinity of consciousness the emotions this is the internal or feminine quality of consciousness the feminine principle or the mother of this Trinity this is the in energy or internalized energy of consciousness all right the external component of consciousness of the manifestations of our consciousness is our actions and this is a male principle we act with you know force we act with what we do with our body so that's an outward or external manifestation of consciousness so that's considered masculine or yang based energy okay so since our actions are the byproduct of our thoughts and our emotions this is considered a child because it is born into existence after we have had thoughts about something and emotions about it and then we act on it so that's the fruit of our thoughts and our emotions or the child of the Trinity of consciousness thought emotion and action okay and since it's masculine it's considered a male child or a son all right moving on to slide 25 consciousness is expressed through the physiology through the human brain and we broke down the triune brain the three part brain structure that we all have and the first component of the brain the component structure is the reptile brain the brain stem and the cerebellum so this is the component this is the structure within the human brain of the complex within the brain called the are complex that essentially governs our motor skills provides our movement coordination our respiration and governs instinct and survival in the physical sense it's important to have that the fight or flight response because that's there for when we are in any kind of physical danger that part of the brain kicks in and helps us to survive the situation as the need may be dwelling in it is a problem because it will be stabilized the other components of the brain if we really live from a pure physical survival standpoint only and dwell completely obsessed by the material world ok so it's a necessary component of the brain but we don't want to dwell there because it's the lowest consciousness of the brain structure the mammalian brain is also known as the limbic brain this is slide number 26 it's highlighted in yellow there ok this part of the brain governs our emotions it makes possible our emotions to be felt within the body because of the chemicals that it outputs and this is known as the midbrain now they're all human range of emotions basically are chemicals that are secreted and make those that range of emotion possible so both positive and negative emotions both are basically generated through this complex in the brain the limbic system all right so that's the internal qualities of consciousness you know generated through the limbic system that's the emotional machinery for the brain finally on slide 27 we see the human brain or the neocortex this is responsible for higher order thinking and higher order thought function conceptual thinking reason logic science mathematics creativity art intuition morals ok language everything that basically makes us a human being hence is called the human brain this is the most complex and developed part of the brain it is the newest evolutionarily therefore it is called the new cortex neocortex ok now in the next slide 28 we see that the human brain is bilaterally symmetrical meaning it is composed of two equal hemispheres the the left hemisphere or the male hemisphere of the brain which I've marked with a upward pointing triangle and the word to correspond again in gender the principle gender here applies to the brain this is the male hemisphere of the brain the functions that it makes possible are analytical thinking logical thinking precise thinking repetitive organized detail-oriented scientific detached literal and sequential all of these types of thought functions are made possible by the left or male brains okay this is gang energy the symbol of yang energy is the upward pointing triangle or the blade okay the right brain basically makes it possible beyond that quite the opposite functions of thought and consciousness it is more creative it is imaginative it is general it is intuitive conceptual it grasps the big picture is your ristic we're holistic it is empathetic okay empathy is figurative and irregular thinking or nonlinear thinking okay unnhhh on time-bound thinking so this I've marked with in the word yin and a downward pointing triangle which is the chalice was a symbol of feminine energy the goal of working to elevate our awareness will be the balancing of these two hemispheres of the brain and I've symbolically shown that by the coming together of the yin and yang yin energy or the left and right brain or the male masculine and feminine components of the brain to bring to bring them both together and that is a well known symbol known as the Seal of Solomon the Sun and the moon again the left brain is the solar bring the right brain is the lunar brain or moon okay the Sun and the moon coming together the chalice and the blade coming together okay and some people know this is the Star of David but it is much older than that this is called the Seal of Solomon okay the Sun and the moon coming together or me female coming together the chemical wedding the balance of consciousness between male and female left and right brain hemispheres in the next slide I show what a balanced brain looks like versus what an imbalanced brain looks like when we dwell chronically in one brain hemisphere modality or another no matter what it is no matter which hemisphere is dominant the neocortex becomes destabilized and we see the result here this is a PET scan showing global EEG coherence in the neocortex on the left and showing a person who basically has neocortical brain damage and these are not holes in the brain physically they are areas of electrochemical deadness or these complete reduction in neural activity in certain areas of the neocortex of the brain the higher clock center of the brain meaning that this person cannot really engage in on the right the person whose brain is labeled damaged there on the right-hand side of this slide slide 29 their neocortex is damaged and this person in this state can probably not engage in much conceptual or higher conceptual or higher order thought functions sadly ok and this I put this slide in the presentation on natural law to help people understand why there are so many people out there who are willing to try to tread all over other people's natural law god-given rights and try to do CERP their sovereignty and it is because that is what their brain looked like ok unequivocally I will state that is what their brain looks like these are physically ill people physically damaged people they are sick not figuratively literally literally they have brain damage ok I'm emphasizing that really strongly as I did when I covered this on earlier show okay dominators are physically sick people that need help they need healing this is what their brain looks like on the right they need to be brought back to the state of a normally functioning brain which is the one on the left all right so let's move forward slide 30 the natural law also known as and this is a brief section where I just basically explain to people that an actual law has been called different things over many years okay and these are essentially the same principles that are applied in these different types of ways of looking at natural law but they have different names and maybe people have heard about natural law under a different name one is the law of cause and effect and I gave a couple of quotes to basically show the general principles as people know them under these names okay so for the law of cause and effect I put down effect invariably follows cause this is a more scientific way of looking at natural law effect invariably follows cause and there we have the law of cause and effect okay for every action there is exist an equal and opposing reaction this is one of Newton's laws of motion in the physical sense okay so this also applies in a non physical sense or in the sense that how of how natural law governs human behavior okay that's the law of cause and effect the law of attraction here are some quotes that demonstrate this and this is something that is pretty hot in the modern world people are all talking about the law of attraction and how to employ it okay the energy that you emit is the energy of is the energy that you attract and that is essentially true energy flows where attention goes attention along with time being the other spiritual currency that we employ what we pay attention to is what we get more of okay and not in the sense that if you are becoming aware of some of the negative things that are going on that means your get more of that it means put your attention on frivolous pursuits and pretty much you're going to be ruled by people who have the will to rule you okay you want to not pay attention to what's really going on in the world well you're gonna be treated and your life is going to result accordingly that's what it means it does not mean this new-age BS notion of looking at the global conspiratorial aspects of what's happening as far as the organization of evil in this world is going to get us more evil just because we're trying to discover how that's working and taking place because in looking at that in looking at all that shadow material the solution lies there in it helps to wake us up to what the solution really is the things that we must not do not continue to do and continue to support okay so energy flows where attention goes Law of Attraction as you think so you shall be I've already stated that on this show okay karma or moral law natural law has also been called and I Ellis rated this with the famous quote you reap what you sow okay the seeds that you plant are the fruit that you're going to get back again the universe is like a gigantic mirror the energy we put out into it is the energy we receive back from it in the form of what manifests in our lives and finally the Golden Rule do unto others as you would have done to yourself quite simply and if people lived it the world would transform overnight but sadly they do not or most of them do not I should say okay natural law expressions this is the bulk of the presentation essentially this is how natural law works to put it quite simply we're at slide 32 now okay so slide 33 I saw I'm going to start filling in this chart on the expressions of natural law there is of course a positive expression and a negative expression of the energies that are used that basically make natural law go into effect okay so again here we're seeing the principle of polarity alright there's a positive and a negative expression to natural law works alright in the next slide we're looking at the basic two polar forces again the polarity principle okay that generate they this is called the generative force generation means creation these are the two principles the two energies or polarities that we use to create that which we manifest in the world okay so these are the two basic emotional polarities the positive one is love and the negative expression is fear okay these are the generative forces the only two real generative forces that exist and that we have to work with every decision that we make is ultimately a decision between these two polarities so in the next two slides I show representations of what these sources basically look like if we were to give them an image okay of course in reality they don't have an image but we're trying to illustrate concepts here and we do that by you know putting some graphics onto some slides that are appropriate to the concept okay so slide 35 shows love and slide 36 shows here in slide 37 I show the initiative expression of natural law okay and again we're going to show this in both the positive and negative expression okay there's always a polarity that is inherent to these expressions when you use love the initiative expression or in other words the first phase the beginning stages is we seek truth okay we are not in fear so we want to know this is the desire to know seeking truth and it manifests as knowledge so knowledge is seeking truth okay the opposite of this or the negative expression of the initiative expression of natural law is ignorant so this is the negative gaining stage ignorance this is where you say you don't want to know I don't want to know that I refuse knowledge I refuse truth this is the refusal of truth okay so that's based in fear wanting to know is base in love or the expansive force of consciousness that's ultimately the sense that we're talking about love in here this isn't the romantic Hollywood movie romance novel version of love okay this is love as the force of that expands consciousness and wants you to look at that which is and understand that which is that's the sense we're using love here so ignorant is based in fear knowledge is based in love okay and in the next slides we see representations of knowledge and ignorance so I'm sorry it looks like I've got slides 38 and 39 reversed I will fix that and re-upload the document but slide 38 should be the knowledge slide and slide 39 should be the ignorance slide so ignorance there's I'm sorry knowledge there's a picture of it there on slide 39 and this is you know kind of what it looks like an enlightened being shown in in an energy sense you know a higher awareness expressed the opening of the third eye and all the chakras okay in slide 30 what should be slide 39 at slide 38 currently we see a depiction of ignorance to people you know eating horrible foods watching a television that's telling them everything is okay there's this I believe is art by David Dee's who's a phenomenal artist and illustrates these concepts so brilliantly it took kind of a funny image and it would be probably funnier if it weren't so true and so sad but that's what ignorance looks like and ignorance is the biggest wall or barrier to the others standing of natural law so I put an image up of a wall there because we need to break down those levels of ignorance and that's what this show is all about I'm getting down to the causal factors by looking at it and removing our ignorance Thomas Jefferson is quoted on slide number 41 he said if a nation expects to be ignorant and free in a state of civilization it expects what never was and never will be so he's talking about ignorant here and how it is diametrically opposed to a free society and I could not agree more he understood it very well the more ignorant we are as a whole the more enslaved we will be if we want to be free we have to become knowledgeable most of all about ourselves okay Ian Goddard on slide 42 says the same thing only a little bit more harshly he says a society whose citizens refuse to see and investigate the facts is a society that chooses and deserves the police state dictatorship it is going to get societies who want to stay ignorant and keep their eyes closed about what is going on in their society will eventually end up enslaved and that's just how it works and I concur with this statement as well harsh as though it may be people who want their ignorance deserve the dictatorship they're going to get it is richly earned by them they have chosen it of their own free will okay the next slide the internal expression of natural law in the positive sense is sovereignty it is the understanding of our sovereignty it would more accurately be put sovereignty is internal monarchy okay most people may have not heard of it put that way but again there are only two states of rulership there is monarchy and anarchy and as I've said I'm a proponent of both of them I believe in monarchy and anarchy now that's really odd a state of a statement to make but you'll understand what I mean in a moment okay sovereignty means you are an internal monarch okay now the opposite of sovereignty is confusion that is the negative expression inwardly okay of consciousness of natural law principles okay this is when there is internal hierarchy so that means in sovereignty there is self-control there is rulership of the self and one's own thoughts emotions and actions in confusion there is internal anarchy there is no rule of self okay there is complete confusion within taking place and there's opposition consciousness duality consciousness as you think so you feel and so you after not United your actions betray your thoughts and emotions okay then we can look at sovereignty in the next slide slide 44 showing an image of it in slide 45 I show the word sovereign comes from the Latin language soup air which means above and regnum which means rule or control a sovereign is essentially a king or a queen one who is above rule or control one who is not subject to any other person or being okay that's a sovereign ultimately what a sovereign really is in a wider sense is a ruler of the kingdom of the self the sovereign rules one kingdom only itself population one okay one's a sovereign is truly one whose thoughts and emotions and actions exist in unison or non-duality particularly one who has recognized their sovereignty they come into that state of non-duality all right so it's about unison becoming one becoming whole meaning bringing your thoughts emotions and actions into alignment non contradiction non opposition sovereignty is self ownership it is internal monarchy means one ruler that means I rule me I own me and rule the kingdom of myself period no one else owns me I do recognize my sovereignty I do employ unity or non duality consciousness as I think so I feel so I act so that's what it's all about self ownership and that means you have become a monarch the one ruler of you self control self governance okay confusion in slide 46 depicted there okay that state is a state of being completely broken up internally you're in a state where you don't know what's going on inside of you you haven't looked at your actual self you don't know about your own consciousness in your own psyche and so you're in a state of internal opposition consciousness that means that your behaviors are in contradiction to your thoughts and your emotions you can think and feel one way and act completely different like ultimately you're in opposition with your own self and this leads to opposition in the external world that's the correspondence principle as there are more people in internal opposition there are more people in external opposition hey the internal is reflected on the external the microcosm is reflected in the macrocosm okay when in your when you're in that state you're wide open to the next slide slide 48 which shows an image of a puppet master holding a puppet on strings and that's the state of manipulation or mind control as we've been talking about for so many weeks here okay so when you're in the state of internal confusion or internal anarchy okay not ruling your own house not ruling your own Kingdom then you're in opposition consciousness within and you could be manipulated from without very simply the next slide 49 shows the external expressions of natural law this is when we employ either the positive expression of love or the negative expression of fear what we get outwardly in society okay and if we employ the positive expression of love we will get external freedom true freedom is the positive external expression of natural law and this is what I've labeled here external anarchy external anarchy meaning no one is ruling anyone else externally there are no masters and no slaves everyone is created equal and expresses their consciousness by living equally amongst each other in harmony okay nobody thinks they own anybody else as they do today people thinking their God and on other people I thought ultimately what the governments and police forces and military of the world are there are people who think their God as we've said many times on this show people who think that they control the actions of other people who aren't really breaking any natural law natural laws or violating the natural law rights of others in fact that's what the government police forces and militaries of this world do every single day is violate natural laws we'll get to okay so true freedom as is shown in slide 50 is external anarchy the falling away of the chains that have so for so long bound this planet through freedom no external rulership of others and in slide 51 we see the opposite condition that's when fear has gone haywire people remain in a state of ignorance and refuse truth they're in a state of internal confusion which leads or internal anarchy which leads to a state of wanting to exercise external control over anyone and everyone until it becomes completely a coalesce into fewer and fewer hands concentrated power into fewer and fewer hands okay centralization of power and that becomes an external monarchy okay or one-world government which is what we're spiraling toward in the modern world and that's external monarchy meaning there is long force that is ruling everybody okay moving to the next slide which I believe is slide 52 the chart is completed here and we see the generative expression or the manifestation of natural law in our world there is a positive expression when we have moved through all of these other states by using the generative polarity of love we get a generative expression or manifestation called order or will we recognize and know to be everything that we experience as good in the world things are ordered they are peaceful they're in harmony they're good okay if on the other hand and you can see images of this and slide 53 and 54 if on the other hand we have used the polarity of fear dwelt in ignorance confusion and then brought it you know brought it through to attempt external control of others we result in mostly what the world is like today a state of chaos and this is what we're alternately trying to avoid by understand how these natural law principles do indeed work in slide 55 we see a very simple idea when you start using the generative polarity in the positive sense you cannot create any of the negative expressions okay the positive generative course which is love can only create the positive expressions in this chart they do not cross over so if you employ love you cannot create ignorance if you employ knowledge you cannot create confusion if you employ sovereignty you cannot result with control chaos or evil etc etc summer they move in one direction they are mutually exclusive forces when you employ one you get one set of results when you employ another you get a completely different set of results this is very important okay they are indeed polarized principles the principle of polarity it applies here okay moving to the next slide slide 56 these are the four polarities that natural law is essentially recognized through and we'll get to those when we come back I call this conception the next four sections I call know the difference will highlight some of the differences to help us understand natural law I'll be right back [Music] okay we're back you know what on earth is happening on when they don't the right factors into presentation on that for law you don't have too much time so here we go no the difference is the next section and we're on slide 56 here and moving right to slide 57 we're going to attempt to understand the difference between right and wrong and that sounds overly simplified and you know it's the year 2010 and I feel like I need to be explaining people the difference between right and wrong really but unfortunately that's the world that we live in it seems and people don't really make much of a distinction between this because of the amount of moral relativism moral relativism that exists in our culture so when we use the word right we often mean correct eating two plus two equals four you're right correct so it is something that is based in truth we'll use the word right to represent we also use it to represent something that is moral that action was right to take it is based in natural law okay it is right it has not harmed anybody okay so again actions based in it do not result in harm to other sovereign beings to other living beings period okay again we're defining right here in the negative sense that which does not result in harm is right you are right to take that action very simply okay does it result in harm to another being or the result in usurping their natural law rights well if it if it does it's not right if it does not result in any harm that is within your right to take that action wrong on the other hand we'll use the word wrong to represent something that is incorrect as I said the other night you know you could say two plus two plus five and that's the wrong answer quite simply it's not based in truth that's not the truth but when we use the word wrong we all so mean amoral meaning something that want of something did not have the right to take an action that was wrong to do that to your brother or your sister okay actions based in this result in harm to other living beings quite simply it can't get any simpler than this hoax the concepts of incorrect and immoral are equivalent and the concepts of correct and moral are equivalent if something is based in truth it is based in principle it is based in natural law it will not result in harm if something is not based in truth it will not be based in natural law it will result in harm it can't get any simpler than that and I cannot get anyone to accept that there is no way I can make you accept that all I can tell you is that is the truth and that is how natural law works this is the foot one of the fundamental principles and polarities to understand when it comes to natural law I can only put it out there you can accept or reject it slide 58 conscience is what the understanding of natural law is ultimately attempting to create live in us to develop true conscience conscience is a word that comes from Latin it means to know together calm means together in Latin a prefix in Latin means together and skilled Cierre means to know or to understand conscience is to know together to come to a place of knowledge together common sense is what conscience ultimately is and sadly we have lost our common sense in the modern world and people most people do not know the difference between right or wrong anymore as sad as that sounds that's the case okay so the next slide is called know your rights and I list three basic principles here that are easy to keep in mind it is best to understand your rights in the apophatic sense apophatic apo ph 80 i see what this means is in the negative being defined in the negative okay and this sounds bad but it's actually quite good and it's a good way to understand what your rights are and what they are not we need to come to know which actions are not our right because they cause harm and we have way too many rights to list them all there's so many actions that you can do and take that don't result in harm to other living things you couldn't possibly list them all but you can define what you do not have the right to take okay everything else that remains are your rights if it causes harm they're not your rights so define your rights in the apophatic sense as a as opposed to the affirmative sentence okay natural law holds true regardless of the human population I hear that one of the biggest arguments people come up with is well if there were only a couple if there are only a few people in the world you know and it was a real small society or town or village well you could act like that but but word the earth has seven billion people on it ladies and gentlemen natural law does not care how many people are living on a planet it exists it is immutable it is unchanging your rights are not going to change whether there's one person or two people or whether there's twenty billion people on a plan it doesn't make a difference the human population is irrelevant when it comes to natural ball rights your rights hold true hold to be the same and what your rights are not hold to be the same and in other words right and wrong is the same regardless of how many people there are okay when in doubt as to whether an action is in harmony with natural law simply visualize the scenario of a world where there are only two people and that this is an exercise about on this show in the past okay if something is wrong to take an action where there are only two people it's wrong to do it in a world where there are seven billion people all right so there's two people living in the world I can't go over and say I'm stealing the food that you produced and and I'm gonna come and take this much of it after you produce it you can't do that okay that's wrong to do you know in a situation where there's only two people it would be wrong to do in a situation where there's 10 billion people or any amount of number of people all right I can't can't say I'm gonna sit back and not do anything and I'm gonna take there's only two people in the world I'm gonna take the product of your labor because I say I'm allowed to do it I've given myself the moral authority to do it I'm claiming that authority and I'm saying you're bound to it if there were only two people in the world and what another person did that to you you'd laugh at them and probably go after them with a club okay however people do that now in the world all the time and we think that this is morally sanctioned you know we actually believe that nonsense that they have the moral sanction to do that because they're the government I can say how much I want to take if you're the product of your labor and you're going to give it to me whether you like it or not called taxation the next slide slide 60 the fall of the Republic this is a quote from Aquinas on Liberty which I've read here before because choice is subsequent to a judgment upon the truth of the matter presented it is an immutably true principle that human Liberty depends entirely upon judgments which conform to the natural law if a judgment which does not conform to the natural law which is therefore objectively false and immoral is acted upon by the will then it becomes a source of grave disorder in society exponentially multiply these numbers of individual immoral acts and you have a republic that collapses from moral decay in a short period of time and that's why we went from a republic to a soft police State which resembles feudalism and is moving toward a state of neo feudalism which is going to be what the New World Order ultimately is the dark new world order I should say okay and this says it beautifully you believe in things that aren't true you're acting upon something that you haven't established the truth of and therefore you're making judgments which don't conform to natural law because they're not based in truth okay the action that you take with your own free will becomes a source of chaos a source of disorder when you exponentially multiply that when everybody is doing the same thing okay then it you get a society that collapses and becomes a closed society or a police state and this is the cart correspondence principle the principle of Correspondence as above so below or you have a few people doing it it builds up this order in chaos and then when you have a lot of people doing it you see that cast reflected in the in the macrocosm on the large scale a whole society the next slide know the difference force versus violence okay so this is the second polarity of natural law the next slide shows that law in other words this is natural law versus man's law to know the difference between natural law and the law of man that we scribble down in law books okay so on the next slide 68 you see a chart natural law on the Left man's law on the right depicted as lowercase L aw okay natural law is based in principles or truths man's law based in dogma Dogma which means unchallenged belief claims of authority and then the unchallenged beliefs in those claims I depict the dichotomy between these two concepts I show on slide 69 a man who embodies living according to principles and truth like Gandhi versus the dogma can in a myriad of law volumes that are just spewed all over the place and we're expected to understand what's in all these codes rules and regulations which are ultimately nonsense ok which one do you think emits a more powerful energy it's pretty self-evident all right the next slide 70 shows that natural law is harmonized with meaning we come into compliance with it we come into harmony with it based on knowledge it is harmonized with due to knowledge that is recognized we have recognized the truth of natural law and therefore by our own volition or free will we have come into harmony with it man's law on the other hand is simply complied with due to fear of punishment that slide 71 shows this dichotomy knowledge being acquired someone becoming enlightened as to what the forces of the universe really are there on the left versus a person who you know just wants to stay out of that prison cell and therefore they're taking their actions from the lowest place of consciousness possible which is fear the next slide shows that natural law is immutable it exists for as long as the universe exists we've talked about this concept already man's law on the other hand changes on the whim of legislators so therefore it can be legal to do things one moment and it illegal to do with the next it can be legal in one country and legal in the other how can that be if it's if laws supposed to be based on what is right or wrong how could something be right in one place and wrong in another place how could something be right at one time and wrong at another time this is simply moral relativism period that's all it is it's moral relativism and that's the slippery slope to socialism and a police state society period and this is depicted in slide 73 the cosmic forces of creation are the embodiment of natural law and man's law is based in a bureaucrat who thing sees God sitting behind a desk in a black robe which one of those forces do you want to align yourself with I think it's pretty self-evident though the law the next slide a living being must be armed or defrauded in order for a violation of natural law rights to have taken place and there are so many offenses in modern man's Law Society that there is no harms pardoned and yet they want to try to take other people's freedom when there's no harms party and this is nonsense in order for any action to be taken against somebody for violating natural law there must be a living bein who has been harmed or defrauded period the end second component of this slide right that do not exist for an individual can not be granted by man's law to any other individual or any group of individuals that means that you do not have the right to do something you cannot say I'm giving you the right to do this okay if I don't have a right to steal from people's labor you can't put who does in other words okay I don't have a right quote can you tell me someone who does an individual that has the right to say I am morally allowed to take from you that which you have earned no one has that right therefore I don't care how many people you get together and try to write a law that says you're allowed to do that you can't give somebody something that you do not have yourself so if a thousand people come together call themselves a government none of them have a natural law right to impose taxation in and of themselves and as an individual upon another individual I don't have a right to say to my neighbor you're going to give me this much of what you earn well a thousand people come together and none of them have that right they can't write a law that gives them that power the power cannot be put into another being that is already not self existing you cannot grant yourself rights you either have a right where you do not have a right and you can't write laws to grant rights you know why you can't do that folks because you're not God okay and I know that comes as a shock and a terrible terrible revelation to some people but it's true you're not on the other side sections [Music] into the presentation wrong slide number 75 which says so what does this mean for man's law and the next slide slide 76 we see if man's law is in harmony with natural law it is redundant meaning it states what is self-evident natural law is always in effect so if man's law is just writing down something that is already in effect it's a redundancy it is therefore unnecessary if man's law is in opposition to natural law it is both false and immoral as we have already seen and therefore it cannot be binding upon anyone so what does that mean for man's law in slide number 77 significantly in light of natural law man's law is irrelevant next slide to know the difference responsibility versus abdication well responsibility is what this is all altom utley about our responsibility our ability to respond that's what our sovereignty really is that control over our own faults our own emotions and our own actions the only three things we really have the right to control whenever we hand over our natural law right to use force to another individual group or entity we have advocator our own personal responsibility which is the foundational basis for the discovery and understanding of natural law okay so I actually I actually kind of glossed over a section I want to before we do responsibility let's look at force versus violence okay force is voluntary action based in morality and natural law voluntary action force is a misunderstood term and force and violence are Wheatly opposed to each other there are not the same thing okay violence is the initiation of coercive action that is not based in morality and natural law so we you can use force to build a house we can use force to transport goods from one place to another it forces essentially the ability to get something done and it can mean it can mean protecting ones or defending ones natural law rights against an incursion against them that's how we can mean force okay but essentially it's any action that one possesses the right to take that's what forces violence you never have the right to take because it's the initiation of physical action that you did not have the right to take the initiation of coercive action okay you don't have a right to coerce people to do things the only time you have a right to make somebody stop doing something is if they're violating your natural law rights and then you can physically stop them from doing that that's another thing dominators more people to think they don't have a right to take horse does not violate another natural law another beings natural law rights and it may include defending oneself against the incursion against your own natural of all rights violence always involves the violation of another beings natural law rights so we saw this at the g20 in Pittsburgh people who think they had the right to come in and use violence against people with these LRAD weapons and batons and tasers shutting down free speech in a society that has the right to assemble has the right to use free speech they were trying to tell people they don't have these rights and they're going to stop them from exercising then these thugs I won't even even call them police they're thugs and it was just the idea that they're following orders and I'm going to do what I can because I've been told I'm allowed to I'm going to kick your ass and get away with it in other way again we talked about taxation as being violence it's basically forcibly taking one another has produced and earned and it's based in violence and it's slavery ultimately it's indentured servitude so going back to personal responsibility you know that's all connected with these people who are told they're allowed to use violence against people and they actually believe that and that's what a police state is people who think they have the right to do this stuff and they don't and they never will get that right the problem is we've handed over our responsibility by even creating forces like these because we don't want to deal with our own house we've not morally educated our young so they grow up to be criminals and then we want a controller to come in and clean up something that we should have handled to begin with education is really ultimately the key and not trying to put together forces of controllers to save ourselves from our own ignorance it'll never work like that because it's always based in fear so when we hand over our natural law right to use force to another individual group or entity we have abdicated our personal responsibility and our personal responsibility is really the foundational basis for the discovery and the understanding of natural law okay the TSA situation that's so prevalent going on is a perfect example of this you know all trying to get us to feel safe and therefore we're handing over our natural law rights to not be searched you know and and violated to these thugs of the state because that's what they are to people who are just doing this because it's a job and they're following their orders well no it isn't you're a criminal you're a criminal you're violating other people's natural law rights and you don't have any right to do that but this principle was illustrated by Ben Franklin you said those who would give up Essential Liberty to purchase a little temporary safety deserve neither and will lose both and I wholeheartedly concur Franklin was an enigma he had a dark side to him as well but this statement is totally true he stated you give up your Liberty because you want to be safe we were going to lose both your Liberty and your safety and that's what's happening in our society Gerald Massey egyptologist said they must find it difficult those who have taken authority as truth rather than truth as Authority again people who accept claims on authority over other living things and the usurpation of their natural law rights this was so prevalent in the Nazi dictatorship that happened during the 1930s and 40s in Germany and other societies like in the Soviet Union and it happened throughout history these are automatons lining up to take their orders and in doing so they're advocating their personal responsibility and on slides 85 and 86 you can see the absolute horror that really resulted in what they did regardless of what numbers you want to think are associated with what happened in Germany if this happened to one person it's too many okay if it happened to one being it's too many so that's what's coming here if we're not careful and you know look at what we're already doing in other countries right now as imperialistic occupying forces we're blowing children apart we're torturing people take a look at the slides on the slides 80 70 I'm sorry 88 89 and that's what the United States has become where as you know we were once a you know of an example of freedom in the world as a republic this is what we've become an imperialistic on militaristic dictatorship David Icke said it best he said accept responsibility for your self and your actions thoughts and words you alone make choices you alone are answerable to the consequences of your behavior the feeble excuse that your boss required it the establishment expect that it holds no truth or justification and that's all it is when you say I'm only doing my job I'm only following my orders it's all justification for immoral acts that you do not have the right to take like says what is the point of having principles if you allow others to dictate behavior at the end of the day you will judge your performance and the contribution you have made to creation it will not be based on one another expected of you or what you did because you felt trapped and that's what people are letting themselves become there and slide 92 puppets on the strings of puppet masters whose agendas they have no idea of and do not understand they're giving their minds and their bodies ultimately away to those people because ultimately what this is all about is free will and it's about free will whether to go along with the system or to refuse to cooperate with a system that's enslaving people and ultimately it's about whether to follow along with natural law principles or whether to ignore them and we're going to see what results when we do those things okay Francis Bacon Rosicrucian said that nature to be commanded must first be obeyed if we're going to once you command the forces of nature they will only bow to our commands when and do what we want in our service when we first obey them and that is absolutely fundamentally true living in harmony with natural law leads to the states of freedom peace prosperity survival and evolutionary progress for Humanity when we live in harmony with natural law life begins to flow effortlessly and the that the forces of creation actually opened up to us and helped us to prosper and thrive when on the other hand we live in opposition to natural law we enter the states of control enslavement poverty war evolutionary stagnation and ultimately extinction which is the opposite of survival and that's where we're headed folks if we don't wake up soon because going against natural law going against natural law is like standing on railroad tracks and expecting to stop a powerful locomotive with your arm out at arm's length good luck with that good luck with that Alex gray depicted it best in his painting Gaia I love this I got a chance to see it in person at Kazem back when he was in the Soho area of New York and it depicts it perfectly that side there on the left which is the right side of the world tree representing getting in touch with the right side of the brain okay the Pixar world in balance peace and harmony and order goodness in other words and the right side is if we go against natural law that's the kind of world of chaos that we're going to create very simply slide 102 the way out and I'll just briefly recap this and then we'll take a couple calls all right you're the way out it's up to you it's all up to the individual you need to understand the principles of natural law you understand how natural law works you need to understand the difference between right and wrong you need to claim your sovereignty you need to clean your own personal responsibilities and stop making excuses and that's when we will advance as a species the answer is looking back from the mirror you are the answer okay you are the way out through your own edification through your own education true education okay paying attention using your time and attention well spent okay spend them well because they are spiritual currencies and that's the way out that's the way toward evolutionary progress up the ladder of consciousness and breaking the chains of this world and stepping out into a new world of harmony peace and prosperity together hand in hand the chemical wedding the left and right brain brought into harmony and unison with each other and our thoughts emotions and actions brought into unison and non-duality so that was my presentation at survive and thrive and there it is here tonight put on record here on the water on earth is happening so Bob told me that we have a couple of a caller here on blog talk switchboards so let's bring them on yes mark we have Hugh on the line Qi welcome to what on earth is happening with your host mark bass I'll just let you know well I copy all those close to so we're going to go for about a minute and then and a happy cuz we have very little time left so go right in hello mark he you have served ed on correct and I have some very powerful information that I would like you to get a bead on from me to start transforming the world with more love that's what's needed and the way out with the corruption yes I I don't have access to email but there is a blog that has my home number on it if I could give that to you and you can contact make sure if you just Google creativity the number seven seven seven calm okay and I have some extremely powerful strategies that I'm putting out there but I'm just one person to stable so if you can hook up with me will really good things cooking I appreciate that thanks for calling and here we go gunslinger 748 your own what on earth is happening you have one minute go right ahead are you there okay the gods lair sorry that they're gone so caller from Southeast Pennsylvania you can take us out where you have for us Oh market Eric countermanded here oh no it's Eric it's Eric well I think Bob dusk is gonna like this comment box us can really likes harp on the whole ideas solution based thinking well if you incorporate that with the laws of attraction and like see like you know one of the big solutions to the whole food thing is Oslo in our own gardens well if we if we think about the solutions rather than oh you know they're poisoning us you spend more time thinking about the solution then you'll get that law of attraction and then it'll come true and like you say that these people they're all unified they're all thinking about how they're just going to pay all the way from us and we're not thinking about it at all that's why they're making so much progress I think both sides of the equation are important it's the awareness of their agenda combined with basically stopping cooperating with it and then doing the things that we need to do to break to create a world of peace and prosperity motion absolutely oriented think thinking is critical we need to do that and after I break down these last few methods of mind control that's what we're going to do probably for the rest of this show is we're going to do nothing but talk about solutions that's great thanks mark you got it Eric thanks for calling man all right so we're about at the end of the show we got about a minute left I want to thank everybody who called in and it was a good special show where I got a chance to give a presentation that I gave had a little bit of an error in there I had a slide reverse I'll correct that and post that tomorrow to the podcast you can pick up the podcast with the slides for the presentation tomorrow and I'll link to some of our videos that talk about these concepts as well so that's all we have time for tonight ladies and gentlemen going to wrap it up I'll see you here next Tuesday night at 8:00 p.m. Eastern on what on earth is happening what on earth is happening calm in the in so-called news Emily [Music] tell me you [Music]

What On Earth Is Happening Show #037

Topics: *Mind Control Methodologies, Religion, Astrotheology, Exoteric vs. Esoteric, Mystery Traditions*

[Music] welcome one and all you are listening - what on earth is happening I'm your host mark capacity of my website what on earth is happening calm the network is the Intel hub news network you can check them out live on the internet at the Intel hub news network calm today is Tuesday December 7th 2010 we have a great show lined up here for you today we are going to continue our ongoing exploration of the methodologies of mind control right here tonight and we are going to be getting into one of the three big um heavy guns as I call them of mind control the three biggest ways that people really have their psyches manipulated and twisted by the occult dominators of this world and we're going to be discussing religion on the air today and of course that's always a controversial topic it's always a topic of contention but I'm going to try to clarify some of what religion really is and it can be known what religion actually really is people will often debate this but when you really start to look into the esoteric meanings of religion you understand that overwhelmingly religion is really one thing and that is a form of mind control it is an occult form of binding and we're going to be exploring that deeply on today's show and probably for the next couple of weeks here on what on earth is happening I want to give the call in numbers you can call in to two different networks we're simulcasting on talk show and blog talk so on my website the shows character talks you on the Intel hub that goes out over blog talk you can call into talk show on at this number seven to four four four seven four four four once again calling number seven two four four four four seven four four four the call ID number you'll have to put in if you call that number is 8 3 5 1 5 a call ID number 8 3 5 1 5 if you choose to comment on the blog top Network you can call the number six four six seven two seven three three eight seven I have a couple of event announcements before we get started um two events coming up in the Philly area this weekend we are having a second fundraiser for the free your mind conference which I will be hosting in April along with many other great committed individuals in the Philadelphia area so we're having a fundraiser because we we have a lot of speakers that we need to fly in from out of town and lodge and that can be quite expensive so we need to raise some money for that we did one fundraiser already and it went pretty successfully we raised a bit but we still have a long way to go so I'm making an appeal to anyone in the philadelphia area who listens to the show or who knows people who are interested in the topics of consciousness mind control and the occult to please come out to the free your mind conference fundraiser number two this weekend Saturday December 11 2010 at eight o'clock pm at Liberty's pub Liberty's pub is at 705 North 2nd Street that is the corner of 2nd and Fairmount in Philadelphia there will be a $10 donation requested at the door as part of the fundraiser there will be a couple of raffles done there it will be music there's a bar there you could order food and drink and we're going to probably get into discussing some of the things that will be talked about at the conference and will be maybe reading some BIOS for some speakers and asking people if they would be interested in perhaps answering bringing particular speakers in so second fundraiser for free for your mind conference coming up this weekend Saturday December 11th at Liberty's pub that's at 8:00 p.m. this coming Saturday tickets for the fundraiser will also be on sale at the I'm sorry tickets for the conference will also be on sale at the fundraiser so if you are coming out to the fundraiser you want to get your tickets in advance for the conference tickets will be available there for more information go to free your mind conference calm which brings me to the second and final announcement the conference itself for your mind a conference on consciousness mind control and the occult a unique two-day conference set for April 9th and 10th 2011 in Philadelphia featuring multiple speakers and diverse educational materials for the purpose of raising public awareness of the critically important topics of mass mind control techniques the covert and subversive influences upon our consciousness and behavior trauma based and ritualized abuse and the practical mental and emotional healing methodologies available for those effected by these devices the date Saturday April 9th and Sunday April 10th the time 10:00 a.m. to 8:00 p.m. both days doors will open at 9:00 a.m. both days this will be taking place at rubra Hall our UBA UBA UBA hall at 414 Greene Street Philadelphia PA 19136 are $20 per day per person if you buy tickets at the door the tickets are $30 at the door so get your tickets in advance we started taking ticket orders on the website the confirmed speakers for the conference so far Aaron McCallum alfred Weber Andrew basiago Bob Tuscan farrier dozous yan Irvin John Nicholson Larkin Rose Laura Magdalene Eisenhower Mark motika Mark passio Mel fàbregas Michael Kelly and Suzanne Taylor for more information on this great conference that we have scheduled here in Philadelphia coming up in April you can visit the conference website at WWF re your mind conference calm apologize them a little bit stuffed up here today bear with me my allergies seem to be acting up a bit so let's see we're going to talk about religion here today and I want to set this up with several things the first thing I'd like to do is read a quote that really encapsulates exactly how I feel about religion so right off the bat let's set out to offend anyone with religious sensibilities okay because if you're easily offended when it comes to this topic you might as well just turn off the show right now and stop listening because I'm going to break down all of the lies of the deceptions all of the misinterpretations the dissembling the hiding of critical information that is everything that has been perpetuated and perpetrated by mainstream religions their doctrines and their dogma over thousands of years of human history and to start with I want to read a quote by one of the founders of this country I think he's philosophically probably the most enlightened of the founding fathers of America and this is Thomas Paine even an influence philosophically of mine and I think that while none of the founding fathers particularly were what I would say completely enlightened what I would call completely enlightened I think Thomas Paine had the best understanding of true human freedom than any of the founders and if you read his writings that kind of will make itself pretty self-evident he made a statement regarding religion that I open up this section within my presentation when I give this uh when I give my one on earth is happening presentation live and here it is he said I do not believe in the Creed professed by the Jewish church by the Roman Church by the Greek Church by the Turkish church by the Protestant church nor by any church that I know of my own mind is my own church all national institutions of churches whether Jewish Christian or Turkish appear to me no other than human inventions set up to terrify and enslave mankind and monopolize power and profit and that is exactly how I feel about religion I want to say something before I dive into this excuse me one of the things that led me into a very dark path in life when I was younger one of the things that turned me I guess what you could say into a pretty hateful human being and one who began to align himself with the dominators that I am attempting to expose now one of those things one of those factors was religion and my hatred for it when I started to understand that it was a lie and sadly I did not have enough knowledge of what religion really was back then if I did maybe I would not have gone down that dark path but you know hindsight as they say is 20/20 and I look back on it and think it's probably better off that I did go down that left-hand path of the dark occult because it led me to see exactly what did what was lurking in the corridors of power this world and helped me to gain a perspective on the mindset of the dark occult this the dominators the sorcerers of the world if you will the people who essentially Institute these systems of mind control and are attempting to slay enslave the entire human population so would I take it back probably not however what I'm just trying to illustrate is things can happen to people that set them off on particular paths in life because they lack certain levels of awareness and had I known about some of the things we're going to talk about when we begin breaking down religion perhaps my life would have ended up in a completely different you know different way different things would have unfolded for me and I may not have needed to suffer to the extent that I did to come to this understanding that I am at now and one of those things is Astro theology and that's the thing that we're going to be discussing today or at least beginning to get into today but before we do that I'd like to talk about the word religion itself as i've re-emphasized over and over again on this show the world is essentially controlled through words if we don't understand the language and the power that the language has over the human psyche and to influence the human psyche we're going to understand very little and right here I'm going to open up a topic that is endlessly debated and I'm quite frankly tired of the debate over this I'm tired of hearing people say that what I'm about to tell you is not the case because it absolutely 100% is the case the etymology of the word religion if you look at a standard etymological dictionary they are not telling you the correct etymology of the word religion and I don't care what language expert linguistics expert ancient languages expert etymological expert you talk to I'll tell them to their face that they're wrong okay people are insistent when you bring this up that the etymology of the word religion comes from the word in Latin to read okay leg-oh McGary it does not come from that root do you say the word religion is that how you pronounce it is there an e after the Ellyn religion or is there an i after it of course there's an i after religion the word is derived from the Latin verb relig re the root is Li go Legare Magary okay which which means to tie to bind to fasten okay as in to take a rope and to tie up alright so when we add the prefix prefix re in front of it in Latin it means to tie back or to bind back okay re means back or again in Latin to redo something okay back to go back and do it again so when we put these two roots together three lagari it means to tie back or to hold back okay that's what the origin of the word religion is it does not mean to reread okay this is nonsense it's ridiculous if you just think about it it's ridiculous okay I mean I don't know where people get that from that etymology but it's wrong the etymology of the word religion means to tie back so essentially what religion is right in the word see the words will always tell us if we understand their constituent elements and we understand where those words are derived from often the very meaning of a thing is embedded right in the word for that thing so religion is something that is tying us back holding back for ting or binding it is a binding so a binding essentially means shackles it means chains okay other term for slavery and it is indeed slavery over the mind when we were breaking down certain words like government we saw the government is derived from governor or goober gnar a-ok GU Verne are a goober nari in Latin means to control meant a the second part of the word govern meant means mind in Latin so government is the other part of the binding of the mind the two major sources of mind control government and religion one form namely government is a left brained form of control okay this binds the right mind the right hemisphere of the brain which is intuitive and nurturing and creative it has compassion for what one does to other living beings so government is the control strong-armed aspect of this dual edge system of control that work hand in hand there never has been any such thing as separation of church and state these two principles work hand-in-hand together and anybody that tells you otherwise is lying to you deliberately trying to deceive you into thinking that religion is something that it is not okay and I'm talking about organized world religions okay not talking about getting in touch with your own spirituality and working that out in a one-to-one on a one-to-one basis with what you perceive as the Creator that's not what we're talking about here this is completely different from spirituality which is an internal process I'm talking about external worldly institutional religion let's make very clear from the get-go before we go into you know any further to let people understand exactly what I'm talking about here so you don't start thinking that I mean something that I don't government is the form of mind control that works through the left brain okay which is the purely logical linear time bound physical world is all there is aspect of the brain okay it's a control system and it binds or controls the right hemisphere of the brain it ties that out of the way okay so government is working through the left brain and it's helping to shut down the right hemisphere of the brain and just look at the ridiculous officious bureaucrats in government to understand that they don't have a develop the right brain they don't have a developed neocortex at all their neocortex looks like the cratering on the moon if you scanned it okay there's very little if any normal activity taking place there and most government officials that they have a diseased mind and that means a diseased brain but essentially the part of the brain that's really the weakest is the right brain hemisphere the creative nurturing intuitive and compassionate side of the mind so government is binding upon the right brain hemisphere or the right mind religion on the other hand is the opposite form on psychological binding this form of psychological chaining or binding or slavery works through the right mind the more spiritually oriented center of the brain okay side of the brain when this part of the brain is overly active chronically alright the left hemisphere is not being actively engaged so you're not using these two hemispheres of the brain in unison or conjunction with each other and therefore the logical and physical aspects of human thought are being actively suppressed so the right spiritual side of the brain kind of goes haywire it takes over and dominates alright and there's more of a emphasis upon other worldly things other dimensions of existence and afterlife etc etc take the focus off of this world and what we're what we are here to be doing that's not important what's important is what comes after this life okay just as in a left brain imbalanced person that has a left brain dominant aspect to them this world is all there is and that's all that's of any importance and there is no such thing as anything survival of consciousness after physical death matter is all that has any significance spirit is insignificant or non-existent both of these things are complete garbage nonsense that should be thoroughly renounced and rejected from any holistically intelligent human being that has the ability to think critically in a holistic and balanced way you will see that both of these things are forms of control they're methods for control and they are there to destabilize the human population toward one brain hemisphere or another because what's the force that has created both of these things wants to do is to polarize the world and create members of society that act as masters or dominators control freaks and the other half has a completely right brain imbalanced aspect aspect of consciousness and they'll bow down and accept their slavery so religion is good for that side of things to get people to not play an active role it see it cripples the male principle the active principle how many so-called Christians out there okay are actively uh you know who are really deep fundamentalist Christians are really seeing all of the dominator aspects of what's going on in the world and really actively trying to do something about it religionists you don't see many of them doing that they say oh it's in God's and what happens in this world isn't important BS okay absolute not nonsense this is a form of right brain imbalance just like the New Age movement these two things go hand in hand with each other because that's just another religion and we talked about the New Age movement when we talked about controlled opposition many weeks ago these people are people who think that they're going to meditate their way out of slavery good luck with that okay they're not actually taking any real action in the world they're just thinking that they're going to think that the world will be a different way and then magically it's going to happen and it doesn't work like that folks it doesn't work like that you can think all you want about a better world that's the beginning of the process but until you actually care enough and develop the courage enough to take moral action in the world to change things it's not going to happen on its own okay that's not how the law of attraction works and anybody that tells you that that's how it works is a deceiver they're a deceiver so understanding that these two forms of control government and religion go to work on two different hemispheres of the brain is the first step toward understanding why they need to have people polarized like this and why they want to get as many believers in different religious dogmas as they possibly can this is a very deliberate effort and a calculated one the religions are set up to polarize people against each other we talked about that when we talked about the mind control technique known as divide and conquer okay polarize people based on any perceived differences and perceived differences are entrenched in the polarity of fear this is fear-based consciousness people fear tend to fear that which is different from them and a culture and a set of beliefs that are completely different from what they believe in and how they live and again let's talk about the word belief a little bit when it comes to religion all right we talked I talked about this last week when I did the presentation on natural law which I felt went very well and I think it was one of the most valuable shows that I put out over over the air so far got a lot of good feedback on it and I think people got a lot out of it that was show number 36 again you can always go right up to my website at what on earth is happening calm and check out the podcast page and that's show number 36 where I did my presentation on natural law live on the air but belief we talked about last week during that presentation and like the law of gravity okay natural law requires no belief as when it comes to religion belief is always required these are dogmatic ideologies they're not philosophies based on principles which are based in truths ok these are beliefs and their foundation lies in dogma and we talked about this last week during the presentation on natural law as well you can believe or disbelieve in the law of gravity you are bound by it anyway under natural law binding conditions that are true and immutable meaning they cannot be changed and it doesn't matter whether you believe in them or not as long as you're in this dimension of existence you're affected by them these laws are in effect period the end when it comes to religion people always talk about whether you believe in it or not so right in the word belief and I've touched on this before we'll get into it a little bit more as we go through religion we have this prefix ve L and this will come up over and over again because this name Bell is one of the gods of the ancient worlds of the ancient world okay one of the gods of the cultures of the ancient world Bell it's a Phoenician Sun God and it encapsulates this God Bell or Val or Bill okay encapsulate the dark aspect of the Sun it's a symbol it is kind of synonymous with other Sun gods and other gods that represent the bringers of light so it's similar to Lucifer in one aspect it's similar to um set in the Egyptian tradition the Setting Sun alright we'll talk about some of the names of these gods as we go on and we'll break down different traditions we'll look at the Egyptian tradition the Babylonian tradition the Phoenician kanan tradition when it comes to the religious practices and beliefs that shaped the modern foundations of religious thought and dogma now dogma is connected with the idea of belief dogma is unchallenged belief so that's very critical you can believe in something and you can constantly challenge a belief but again there are some good beliefs not all beliefs are bad like I think you need to believe that you can be effective and help to create positive change in the world before you go ahead and do it you need to have that belief you have to believe that you can come to know the truth otherwise you'll never set off on the journey to truth we talked about that they want on this show that's the only belief that's really kind of required you want to go off on a journey to learn the truth you kind of have to in your in your initial state of ignorance have to become aware you do not know and then you have to believe that there's something out there that you can find because you don't know it then if you don't have that belief initially and then act upon it you're going to stay ignorant so belief in and of itself isn't bad what I'm trying to emphasize here is that when it comes to particularly natural law belief is irrelevant okay when it comes to principles that exist in nature that are there that you're not capable of changing that you need to recognize you need to discover that they are in operation and then try to come into accordance with them and understand how they work you need to understand how they work first really not to come into accordance with them if you're going to do in any way that doesn't create unimaginable amounts of suffering belief is irrelevant to all of that you either learn it or you do not you know it or you do not but belief plays a big role in religion and we have billions of believers in the world not seekers after truth but just people who believe that which has been put out so on day one of the show I also said don't believe what I say on this show that would be disastrous that would be disastrous I want people to look into things for themselves to do research on their own you can verify some of the things I talk about on the show if you go off and search for that knowledge on your own you don't have to take my word for it I'm not an authority on anything I'm a seeker after truth and I put the information that I have acquired in my journey out back out into the world for other people considerations and they can make up their own mind about it there are certain things I will state are true that I have discovered or are truths and one of those truths is religion is a form of mind control and it does work through something known as Astro theology particularly the three big religions of the world Christianity Judaism and Islam then we're going to break them particularly Christianity this is the most blatant forms of astro theological belief based dogma in the world but we'll also take a look at Judaism and its connections to Astro theology as well as Islam and its connections to Astro theology so Dogma unchallenged belief this is the worst kind of belief because it's an entrenched it becomes an entrenched meme okay this becomes a pattern of thought that is in rooted it grows deep roots into the psyche of an entire population and then it kind of just runs on its own it's a self-perpetuating mechanism of thought and that's what Dogma is set up to do to make a system that inherently protects itself by having people just deeply believing in it and never actually challenging the fundamental basis upon which those beliefs are based and they often do this by occult in' the original sources that the religion was derived from and changed from so we'll be talking about those and that's what we really need to get down to the mystery traditions to understand what religion in the modern world really is because then we'll be hitting the esoteric side of things and after the break i hear the music coming up we'll talk about the distinction between the exoteric and the esoteric i'm mark passio you're listening to what on earth is happening we'll be right back after these words [Music] hello mark patio and the top shoe Network how are you guys doing tonight hey Bob how are you LM feeling a little bit under the weather tonight but I'm trying to hang in there yeah here you trying to get through the show and folks who are listening on the talk should stream via Marc's website what on earth Oh sadly calm I hope you realize that not every day but we do this we have a hundred percent arm day we have to realize that we're all humans and we're doing what we can so people should not you know get too caught up on the semantics is what I'm trying to say and try to focus on the ideas and continue to support guys like you too so that that you can continue to present such great information so rather than play the Intel hub news commercials I wanted to mention that I'll be coming up there to speak at the free your mind conference and that people should support make a donation to mark cassia what on earth is happening calm if they want to do something helpful in this holiday season and I know mark would appreciate it and all of the people involved we're trying to get the info out would use this money these Federal Reserve notes that we can't stand but unfortunately we have to live with to get out the word on two serious topics like mind control and mind control is so prevalent in the world today it's amazing Bob if just to mention if anybody wants to make a donation to the conference all they need to do is go up to the conference website at free your mind conference calm click on the make a donation link and then there's simply an email address there that's all it really is the email address would come to me and some of the other organizers okay it's some donations at for your mind conference calm you send an email there and I can give people instructions on how to make a donation from that email and every penny of it would go toward bringing in speakers promotional materials for the confer sprinting up educational materials for the conference there is no profit to be made in this uh it you know hopefully will break into the profit of waking people up that's very profit that's getting the word out all right mark enemy to hog your break time here hey that's alright I'll let you get back to your show well any time for anything I wish I thank you for bringing that up and III know that um you know you're trying to get the word out as well and we appreciate your efforts man all right thanks so much stand by you got it okay we're back after the break there on on our Intel hub news network you're listening to what on earth is happening on your host mark pass you know we were talking about religion and we were talking about how when knowledge becomes occulted or taken out of circulation from the general population how it can be kind of used against them as a weapon and a form of mind control because a select few have access a select few will have access to that information while it is hidden from the rest and if this is particularly aspect information that contains knowledge about aspects of the human psyche and human consciousness then that information can be distorted and twisted and then made into a weapon of sorts to be wielded by people who don't have other people's best interests at heart so we I was beginning to talk about the distinction between what is known as exoteric information and I'll spell this ok exoteric is e x o te ric exoteric exoteric information versus esoteric information okay esoteric is ESO te Ric ok exoteric versus esoteric so what is the distinction between these two terms alright what do they mean when we talk about we're talking about this in the exoteric sense verses we're talking about this in the esoteric sense and what I said before the break was we need to break past the exoteric aspects of religion and get down underneath to the hidden esoteric meanings of it okay so what are these two terms mean let's explore them okay so exoteric means relating to the outside world external okay it means outside it's actually derived from a Greek word that means outside okay now this is very important is this distinction is critically important when it comes to understanding what is being set up when it comes to religion what has been set up when it comes to religion okay because believers in religions in the dogmas of religions you will note if you open your eyes and pay attention if you're not one of those deep believers that they are always looking out side their gaze does not wish to be turned inward they don't wish their gaze to be turned inward upon the self the self they don't focus upon they don't concentrate upon knowing the deep aspects of the self they are looking outward for something a force that exists outside of themselves that they you know Russian and act as a savior and free us from our own immoral actions that we've put into place in the world collectively to build the prison walls that we built up all around us again I'm speaking figuratively here but you know when somebody like Alex Jones talks about the prison planet he's very accurate in that assessment that's what this has become and it has become a prison for the mind as is talked about in the movie The Matrix you know again when we talk about the exoteric we mean outside of oneself the outside world external but more specifically what the word exoteric means is popular among the general public so something that is exoteric is known by the public it is in specifically intended for the general public and it is more likely to be understood by the general public if it is exoteric hey so Jesus is the Son of God Jesus is the savior of the world okay the Lamb of God right savior of the world some of God this is exoteric all right it is generally understood that's something that the the general population has heard and will at least understand some of the aspects that are at least talked about by the mainstream religions when it comes to particularly particular beliefs or uh dogma on the other hand esoteric okay and by the way exoteric is derived from the Greek word exoteric os-- which means outer it means outside so that's where that word comes from esoteric on the other hand is the exact opposite it means from within a inside it comes from the Greek esoteric hose which means within okay what esoteric principles are all about are things which are intended for a small group of people that is separate or sequestered from the population from the general population this is a reserved group okay it's a secret club esoteric means reserved for the initiated for those who have been shown the inward okay they're there telling everybody else look at look outside there look over there and then they're taking something and bringing it over here and saying this is for us and we'll look at this deeply inside of it to go deeply within esoteric intended for a small number of people with specialized knowledge or interest okay likely to be understood by only a small number of people in other words when you get past the exoteric that which is on the outside the shell or the wall that needs to be broken through to get down to the core mystery tradition that lies beneath it once you break past the ask the exoteric you get down to that core which is the real mystery and that is the esoteric and that has been hidden from the general population it has been halted from the general population so what we want to do is we want to first start looking at some of the so tarik belief systems of religions the outward traditions that are put out there for the masses of people that's the exoteric what we want to do by looking at this the reason we're going to look at the shell first is to understand why the shell has been set up there to hide that core okay the could the very core is the truth see I have this concept that I call the the dartboard of truth okay and what we really want to go after is the bullseye okay and this is very symbolic as well a dartboard is extreme symbolism this is Stargate symbolism and the name as well bullseye again you hear that phonetic variant BL bull coming up over and over Val bel bill bull we'll see how that plays a role when we start to get into the symbolism and gods of various religions I'll have a picture on the site in the related images section from my presentation that I call the dartboard of truth okay it shows how the exoteric is the religions and their dogmas then you get deeper toward the center of the dartboard okay so you're on the outside edge of the dartboard you know the values are less out there okay we hit it way on the outside okay I shouldn't say the values are less I should say there are more people out there okay there's it's a bigger area okay so you're you're not approaching the center that has a very very small area to hit but that's where the value actually is in the dead center of the board and that represents truth okay so that this centering that is within represents truth on the outside you have a much bigger area and that's where most people are at okay that's where most of their mindset is at and their belief systems lie within the exoteric or outward shell okay when you get in closer toward the center that's where the mystical traditions come into play and those are esoteric traditions they are reserved for initiates a smaller group of people it represents a smaller area you look at the image that I'll put on the podcast page you'll see if you look at the bottom of each of the sections of this dartboard okay you'll just imagine each one like a pyramid okay you have a wide base and that represents the majority of the people holding up that structure and as you go up it's a smaller you know it inclines on both sides and so you have a smaller group in the mystical traditions and then there's a very few who go all the way to the top of the mountain so to speak for the core principles then lie at the heart of the matter which represent which represents truth so what I will say to caveat my entire presenting of the topic of religion is that at the center of any of these traditions there is a core a core foundation that is based in the principles of truth which I had talked about when I gave the natural law presentation last week sadly it is such a small center and it is so buried by the exoteric garbage that has been layered over top of and continued to be heat than piled upon it over thousands of years there very few people can see those core principle of principled traditions then lie at the foundations of most religions but they are there they are there the problem is like any other control structure religion has been institutionalized and its main goal is not to teach truth but to preserve itself as an institution no matter what the cost truth be damned you know if the cost is the truth at the expense of the survival of this religious dogma well truth be damned throw that out the window we're going to keep the exoteric cover stories that control the minds of the masses of people and fill our collection plates see how that works okay and that's essentially where we're at today when it comes to this so that's it is critical to keep in mind that distinction okay exoteric reserved for them the masses okay it's given to the masses as a cover story or an exclamation most people stop there that keeps them quiet after you know you answer you know you give them some silly answer for some pesky question that they've asked they accept it that's good enough for them but the esoteric that's reserved for much smaller select group of people then you know if if you continue to press even past that you'll get down to the very seed or foundational principles upon which truth really exists okay so let's um let's start to look at what most religions in the modern world really are okay and to do this we have to introduce the concept of escrow theology Astro theology is spelt a s TR o th EO l o gy Astro theology I would invite everyone to look up the term if you're not already familiar with it and research this as deeply as you can there are some great books on it I'll post some documents in the related section on the podcast page with this podcast that will be podcast number 37 8 and maybe I can link to some full books I'll try to find a couple maybe on scribe or something like that - to link to to get people a little bit better of an understanding when it comes to astron theology but I'll do my best to break this down on the show tonight by just basically let's look at the word first okay so if we look at the roots of Astral theology as far as the word goes we have a screw and this comes from the Latin Astra which means star okay Astra means star then feels that's Greek okay and that um means God okay Theo's the divine God then you have logos l o gy logos that comes from in Greek and that means word okay so the Word of God in the stars that's what Astro theology means and indeed we call the stars of the heavens the concept of heaven okay when we say where is God people point up most of the time they don't point inward they point outward see how this works folks it's so simple it's almost silly they've gotten people through Astro theology to equate God with being something that is outside of themselves okay not something that is within as the words of the teacher attributed to the words of Jesus say that the kingdom of heaven is within religious dogma would have people believe that God is completely outside of this world completely outside of themselves and have them looking outward as opposed to looking inward I often say to people who are involved in different religious traditions particularly Christianity mainly because that is the religion that I grew up in which was tried tried to be foisted on to me when I was young and which most of my family members still adhere to and are held under the thumb of and when I say when you go to church on Sunday ah do they ever mention even once ever the word consciousness and you ever even heard that term uttered in a Christian Church because I haven't I've never heard that word uttered in a Roman Catholic Church a Protestant Church a Greek Orthodox Church I've been to a lot of Christian churches for different ceremonies and masses over the course of my life and I'll tell you one thing that they have all have in common regardless of what rituals they perform or what little different idiosyncrasies that they believe in not one of them has ever to to my knowledge even uttered the word consciousness one time within its walls not one priest not one deacon not one brother nothing ever I have never heard from the pulpit or from the altar of any Christian Church the word consciousness spoken in my life have you as anyone that you know heard that term spoken in a church I'd be interested if you do call it we're past the top of the hour I'm giving calling numbers again okay to calling numbers the first one seven two four four four four seven four four four once again the calling number seven twenty four triple four seven triple for the call ID number eight three five one five okay if you're going to call into a blog talk through in Tahoe okay that's that number that column number is six four six seven two seven three three eight seven once again six four six seven two seven three three eight seven going back to the topic of Astro theology we're seeing the breakdown of the word it comes from the Stars okay God word stars okay that's that's the the actual etymological origins of the word a stroke theology the Word of God and the Stars okay and when I say this I don't mean it figuratively this is a literal interpretation of the gods in the heavens I apologize again folks know uh you can hear them pretty stuffed up on the air then having a rough day with my sinuses today so again please bear with me hopefully the value of the information will override um you know how it's sounding but uh Astro theology when we talk about Astro theology what we really mean is equating the divine with the bodies that are in space I'll say that again Astro theology means the equator of divinity or God okay or gods plural with the bodies of the heavens of space that means you are making the heavenly bodies the physical heavenly bodies that exist in space to be God okay that means they're essentially from Earth as beautiful this planet three different types of heavenly bodies that we can see in the sky at any given time so it's very intuitive and obvious to anyone that just stops and sits for a moment and thinks about that statement there are three essential bodies that can be seen in types of lights in other words that can be seen in the sky at any given time from Earth and they are the Sun of course that's the most obvious thing in the heavens okay the moon which is easier seen at night but it can be seen during the day as well prominently these are the two biggest objects in the heavens Sun and the moon and then we have all the smaller lights and the heavens smaller pinpoints of lights we call these the stars these are distant Suns like the Sun that our Earth revolves around so the three bodies of the heavens the Sun the moon and the stars now in the subcategory of the smaller lights so we have the two greater lights the Sun and the moon then we have the category of the lesser lights or the small lights of the heavens okay the Stars and we can include the planets in that okay because these are also very distant from the earth they're in our solar system so they move in a different trajectory as do the Sun the moon and the other stars however we recognize that they are closer in the recognition that they are closer we understand why they move differently than the stars as seen from the earth because they are much closer to us than our stars they're in our solar system they like the earth they Rock revolve around our Sun therefore nonetheless they are still quite distant from us and they appear as small points of lights in the heavens Venus being the brightest of these Jupiter also been quite bright Mars depending on how close it is in its orbit can be very bright in the heavens as well venus is the brightest object in the sky other than the Sun and the moon as seen from Earth so we have the Sun the moon and the stars and planets well we'll look at that as one grouping okay the to greater lights and then the lesser lights these are what are known as the three Astro theological sets sec TS sex like a group okay the three Astro theological sects some people call them the Astro theological cults and they are derived from beliefs and traditions of the ancient world but they come down to us in the modern world as the three major religions it will talk about each one of those in turn so we have the son or what is known as the solar cult okay or the soul our sect now Astro theology in your research you may come across the term that it is often equated with you may come across the term Astro mythology this is essentially the same thing but moreover what Astro mythology is about is the stories and the traditions and the beliefs that come down through a show theology okay the Astro theology is I would say the root of Astro mythology because it is equating the divine force or the creative power of the universe with the actual physical matter of the universe okay and this is another thing that kind of makes this form of mind control in the exoteric sense what is being equated is matter as power not spirit as power not the underlying creative force but when we equate the divine force with the actual physical matter okay it is not equated with spirit it is not equated with the animating spirit but with the actual objects itself this is like time bound consciousness we talked about time a couple weeks back as how it controls the mind is because we look at it as a physical quantity okay and we talk about time being money and not having enough time okay things like that and how time is based upon the movement the repetitive cyclical movement of these very objects that we're talking about here thus equating time too materialistic principles namely the movement of physical matter it's sort of a heady concept we have to understand that's how the subconscious mind relates things okay it takes one thing and it relates it to another and it does that in real time you don't need to understand all the intricacies of how that works at a conscious level for it to be working at a subconscious level that's the key a lot of this these um relationships and representations symbolically are working at a subconscious level that until you understand the actual traditions of in this in the sense of Astro theology okay and how they work and how their symbolism works through Astro theology you're not going to bring this to the conscious level and that's what I could not seem to do on my own when I was young to get out of my hatred for the lies and misrepresentations of religion and therefore I chose a very dark path you know I said well I'll show them I'll go down the opposite path and got involved in Satanism and bark occultism and luciferianism and uh you know the rest is history as they say I wish that I would have been introduced at a very young age to the works of someone like Manley P hall or Jordan Maxwell or perhaps um Albert Church ward or other great authors who have talked about Astro theology and Astro mythology and explained it so precisely and clearly that to anyone who studies this even for a short amount of time you will really open your eyes as to what religion really is in a short in short order and again I will try to link to some of those documents and books if I can sorry again folks trying to uh grin and bear it as they say I'm going to go have a hot cup of tea and rest a little after the show but continuing on um let's begin to look at one of these Astro theological sex okay let's look at the solar cult the cult of Astro theology that is based upon the Sun now we talked about when we were discussing the time section on the site or on the show we talked about the days of the week and how they were divided into seven groupings because they were each given to the major lights of the heavens okay the Sun in the moon and then to the naked eye five additional planets can be seen from the earth okay we can see Mercury with the naked eye we can see Venus with the naked eye we can see Mars with the naked eye we can see Jupiter with the naked eye and we can see Saturn with the naked eye those five are the other planets in our solar system that can be observed without the use use of optics or a telescope um also in our solar system beyond Saturn there is a Uranus and then Neptune and Pluto was I think a designated a planetoid and now I believe it has been reading to a status of a planet officially regardless of how you look at Pluto we have either eight or nine planets in our solar system including the earth the earth isn't counted in giving each one of these our days to the week because you know the day itself is defined as the rotation of the earth on its polar axis one complete rotation so each day is then given to one of these quote-unquote gods of the heavens the planets the Sun and the moon Sun day is the sun's Monday is the moons Tuesday belongs to Mars its merridy in the French language twos tiw s is ignores God that was also equated with Mars Wednesday okay is there credi in French that is Mercury's day then you have Thursday that is Thursday in the Norse tradition associated with the planet Jupiter in French it's Judy Jupiter okay Friday is Fria in the verse tradition that is Venus's day that the Fria is the goddess okay as is Venus in the Roman tradition and then of course Saturday is Saturn's name farthest out from farthest out from the Sun can be seen with the naked eye so we saw that in the giving of these three days we have the the three days that are given to each one of the religions the major religions of the world being Christianity Judaism and Islam we see that the weekend is reserved for Krish the weekend is reserved for Judaism and Christianity the judeo-christian tradition the Sabbath of Judaism is celebrated from sundown on Friday to sundown on Saturday so that is traditionally looked at as Saturday or Saturn's day the Judaic religion is a Saturnian based religion and its roots sunday is given to the solar cult is called the sunday Sun they write in the word okay and indeed the solar cult religion in the modern world is Christianity and their day of worship where their Sabbath is some day the Islamic tradition its Sabbath is on Friday and we saw we thought about this in the time podcast the first one I believe that the Islamic religion is based upon the feminine principle which is the goddess in her dark aspect as the galaxy so this is a traditionally looked at as Isis or mopped or in the Roman tradition the goddesses name was Venus again her day is Friday that's Vardy in the French religion and that is the day of worship of Islam so Islam is Friday or it's Sabbath the assignment of Sabbath of Judaism is Saturday because it is Saturnian Saturn alien ok and sunday is the day reserved for the Sun God or the Son of God which is Christianity's day of work let's begin to look at that tradition and I will probably uh take the rest of the show to look at the Christian tradition then maybe some of the next show and we'll continue to break down different traditions in the form of a shrug theology so I'll tell you what another great source for some of this information is um he opened my eyes to a lot as well bill Cooper William Cooper he has a phenomenal 40 40 two-part series from the hour of our time which was Bill Cooper's radio show that he did back in the 90s before he was murdered by assassins of the state by my house slaves of the criminal government that we have uh I'll talk about that when we come back after the break I'll let you know about one Cooper's uh great series podcast series we'll be right back [Music] hey Mark I hope you're feeling alright and you're making it to the show and enjoying the broadcast they wanted to let you know that we have a caller on the Block talk line like I didn't know if you were taking calls or not let's uh let's bring them on I'll just bring up the William Cooper thing and after that we can bring him on before I start breaking down Christianity Bob I'm gonna run upstairs and grab a drink real quick because I ran out of water here and I want to you know stay hydrated and um just take take a break real quick so I'll run up there and I'll be down in like 30 seconds no problem I'm going to go to the Intel Hut news network commercials on your talk show in that case and together we are all one together we are in hell villages the battle for freedom and soon do not end the fight being elle.com did you ever wish that you could have done something or you still had the chance what will you do if your income ends tomorrow or do you lose your home is many already have do you have enough money to survive through an economic depression if you don't want to gamble with your future then free to prosper calm can help you quickly into a debt problems protect your property and possessions and develop a personal strategy to get you through the hard times most importantly you get to keep your money and not pay another cent to creditors all program is often superior to bankruptcy consolidation or settlement visit 3 to prosper calm to find out more this is your real chance to act ahead so don't delay your future may depend up call seven one eight six one five zero one two three to learn more at seven one eight six one five zero one two three or visit to prosper calm today the impulse of the ring they showed gundega pipe in each room on oracle broadcast and also find the task on the link will help music will continue to work together to achieve peace that's what we're long freedom and peace are risky in the info homework compression [Music] welcome back to what on earth is happening okay welcome back everyone we're back from the break on the Intel hub I'm your host mark passio you're listening to what on earth is happening my website what on earth is happening calm the network the Intel hub news network calm before the break I was uh briefly mentioning some of the work of William Cooper he was I think he was brilliant I think he was a very courageous person and sadly agents of the state murdered him and you know he kind of paid the ultimate price for being a pioneer and getting some of this truth out there to the general population so he has a great series of podcasts out there you can do a search for them and find them easy easily enough called Mystery Babylon and it breaks down some of the beliefs of the mystery traditions that go back into the ancient world and this is a 42 part of podcast series and it's worth every minute it helped like I said open my eyes to a lot of things I have given it to many people and it really really delves deeply into astrobiology so before we get back to talking about astrobiology I was informed by Bob during the break there that we have a caller on the line so let's take that call right now so caller you're on what on earth is happening what do you have for us I did greetings to the beautiful city of Philadelphia launching on stage at the Pittsburgh and I apologize your beautiful city of brotherly love market is Bob from the small hamlet of Cincinnati Bob always a pleasure to hear from you I'm so happy to speak to you again mark mark to touch on what your what you're working on tonight I have a question I have gathered some information that perhaps this well-funded well-oiled very quickly marketed not not quickly but very cleverly marketed and also completely saturated the chub stream the got you payment turkey film zeitgeist yeah I know I'm going to step on a lot of people's nerves and upset a lot of people mark but if if one examines it it appears that maybe like guys like you are like your phrase the cul-de-sac before the goldmine it delves deeply into Astro theology and these hidden truths and we're so eager to grasp on to but I think maybe I not maybe wrong mark it's just my opinion but maybe it is a clever cul-de-sac before the gold mine diverting our attention at the moment truth with the end message of the movie your thoughts mark yeah I've heard this from a lot of people I think that the gentleman's intentions is pretty good in general I don't think that he's an active deceiver um well I do kind of think that I get from it is that he may be a theistic I'm speaking to I'm speaking in reference to Paul Joseph and he does understand asteroid theology I don't think his breakdown of it was it was it was good but I don't think it was as extensive as it could have been but um I think there is a danger if we were going to try to come out with a resource-based economy if we did it in a controlled way if it was done in a truly egalitarian way I'm all full if it's not in a controlled way that's called communism okay and I'm completely against that because that's total control and you know we can't I don't think we can get into the idea of we're going to forcibly confiscate whatever wealth we want from whoever we want to take it from them redistribute it as we see fit I don't think that can ever be done by force I think that needs to be done because of an elevation in consciousness and recognizing that we're all on this planet together we're all in the same boat together and as one suffers all suffer and you know I think his work with the Venus Project I think they're pretty aware people they understand the problems of the monetary system my thing that I would have to look at is how their vision how the methods of implementing that vision how they would want to go about doing that before

I would comment on whether they're you know their intent would end up for the better or whether it would end up badly so I would want to see personally more specifics of the implementation of something like a resource-based economy again if that was done through some form of control then yes I would say that would be like a cul-de-sac before the goldmine so to speak if it was done from a place of consciousness and awareness wonderful I think that's where we need to go so does that answer your question as to my take on on zeitgeist indeed it does and thank you for expanding our market and Marc I'm sure all of us with me we wish you a speedy recovery from being tough these winter times sniffles my friends no problem on the last part oh thank you mark for taking my call again and the last thing that I'll probably keep around real quick isn't it interesting maybe sometimes you can do a Chanelle mark I know I guess went to pick your brain and not apologize for putting it out there so bluntly there's not enough hours in the show to just sit and ask you to develop email marketing please continue to share that quickly a visit interesting maybe you can do a show about Star Wars and all the time because of course Jordan Maxwell does a great job trying in his Star Wars take but I begged us your perspective have seen wonderful tie-ins with Star Wars I mean just imitated it the two sons of captaining mirroring the two sons of freemasonry of course the Sun which is present amongst us but kind of son to the father so to speak in the green way in green language evident or not the green language yet exoteric esoteric evidence and also the last piece mark so consider that mark if you had turned out to a Star Wars rendition of what on earth is happening I love his mark if you could come I would love it I would love to do that right yeah as I was obsessed with Star Wars when I was young I mean I mean it was I was so into it I I watched the movies constantly I had collected the figures when I was young all of it I was into all of that so now from from you know my perspective of a kind of understanding the symbology and the allegory that that Star Wars was I can definitely do a full presentation on that I would love to do that one day on the show for sure that would be wonderful are you just in the symbolism when you were speaking I see that the helmets of the rebel soldiers and also the troopers the ones that drove vehicles were the symbol for the storm troopers and the storm troopers have the classic hexagram the six pointed star within a circle digital but a hexagram down the left yes the the rebel soldiers from what I'm gathering I can't verify that but some one wrote of getting is denying something to do with ancient Mayan culture on the stonework with the strange of sword elite style rising phoenix a stylized on rebel soldier it meant something to the Mayan I'm not shirking for that it's what you do know that were they filmed of the rebel base of the first movie where they actually play in the attack of the Death Star that was T call inmate in Mexico a Mayan ceremonial center to call tik al that's where they actually set the rebel base in the filming of the movie right you're that's that's correct it was the rebel base in the first 1977 Star Wars film living near the climax of it right before the climax the CeBIT guest star I think it's haunted syncro middle at Delano I kind of synchro mystic and I go ahead oh I hope I hope you D treat us to a Star Wars yellow mark that would be wonderful definitely uh you know I'm planning a lecture in the area on on the film The Wizard of Oz I don't have a date set for Israel I have a presentation that I'm going to break down all of the occult symbolism within that movie as well I think that will be very popular and I think a mu a presentation on the symbology and allegory of Star Wars would also be wildly popular these are cultural infinitely avoided these are cultural icons you know these things have become synonymous with uh just uh the the the overwhelming a deeply held uh cultural myths in the Western Hemisphere the movies like this and um and people know intuitively that there's something much deeper to them at a subconscious level but to bring that up forward to a conscious level I think so many people can benefit from that understanding of these brilliant spiritual allegories and uh that is in fact what they are and they're their creators the creators of these stories are playing off of much older archetypes and much older traditions and I would I would go so far as to say that they're probably much more aware than they will ever admit to in the public in the public eye yes yes to say that Lucas has a cursory understanding of the mysteries it is is widely understating what his knowledge-based was back in 1977 when he puts all wars together yes I will definitely take under advisement and maybe I'll build a a presentation on on the symbology of Star Wars and tie that all together with some of the concepts that I talked about I do have once one or two slides in my presentation when it comes to the concept of basically burying the true self killing the true self you know I talk about that in my presentation when you know if you look at all the villains in Star Wars this is very interesting just looking at it very briefly all of the villains have given up their true self their true selves are dead and they become like clones or they become completely devoid of their own uniqueness and individuality so like the lowest level of this is like the stormtrooper you know they all look exactly alike they're clones they're robots actually they're like robots that's how they're dressed even though there's a physical body underneath the actual outside has become is identical every other one we don't learn until the I believe second of the new series episode 2 that um that every one of these stormtroopers are in fact clones they are all clones of the same being Jango Fett which is Boba Fett's father in the story okay they're caught it's a clone army that became the stormtroopers so they all are exact duplicates dupes in other words they've been duped okay this is a green language pun duped is a duplicate and and in order to become a duplicate you would had to have been duped or really you know kind of fooled this represents that they are the fools in the whole story because they're doing the work of the dark horse and in doing so completely giving up any chance at any individual aspect of their personality and soul in other words above them you have the the uniformed officers you know that like kind of run the Deathstar you know or their Admirals etc and these guys might give orders to the stormtroopers who are the the lowest in the totem pole but they are all kind of identical invader who basically is their Overlord and master you know he kills them with it when he sees fit to do so and they don't serve him anymore to his liking and they're all just puppets and have given up their uniqueness and their free will over to Vader who controls all of these forces then you have Vader himself he used to be attic and Skywalker he gave up his were killed his true identity as Anakin Skywalker and became Darth Vader okay so he his true self died and he became a dark alter-ego and is he in charge no because he has a master who heals and vows down to like a slave you know that's the Emperor and if you look at him he also gave up his own self you know completely buried his himself he was Palpatine he became scarred and disfigured and this you know crumbled old man you know uh and uh you would think okay that said he's the top of the food chain and you could say okay at least in the physical sense he may be but what is he really a puppet on he's a puppet and a slave also because he's given up his true self which is consciousness and he is a slave to fear which is the the dark side of the force and what that force actually is is fear so you know I talked about that in the presentation and uh that pyramid that really illustrates the hierarchical nature of any control based institution you could put the the soldiers of the military in there right off the chain of command you could put the pull these forces in there right at the chain command you can put religious figures in there right up their chain of command etc bankers you know doesn't make a difference the same thing represents the the hierarchical nature and compartmentalization of any control based institution and it's right there in the allegory called Star Wars because you can see that same thing in a lot of other allegorical movies but yeah it's very interesting you know I can I can do a presentation on that and illustrate it with slides and I could definitely do that one day on the air for sure we would appreciate it mark it would be a wonderful show also like to switch gears really quick and I'll like you The Wizard of Oz presentation yes you could also record or gift because we share it with us we tell it to us would be wonderful sure um you comment on that or a question well I won't steal your thunder so I won't tell them but won't the audience be shocked when they find out who the Wizard of Oz is and also won't they be shocked when it ties in to the whole Kennedy assassination the ruby slippers oz is the city Oswald crack Ruby the killing of the king yes Camelot yes it's nice mark I am desperate to know your knowledge on this so if I could just ask one major question sure the killing the Kennedy is as you already have a dreaming ritual sure and to find the quick ones it was on the 33rd parallel of each of the globe I'm sorry the 33rd degree right it was all said of the site of Dallas was the site of the original Lodge in Texas and can you all really delia Plaza what Dealey Plaza where he was assassinated is in the shape of a pyramid missing its capstone AHA and so my question to you what other times do you see such a chat and what was the end what will be trying to achieve I know I know that it's part of the alchemical the dark alchemy process or maybe it's a light alchemy there's there's the no it's it's dark but if the killing of the King the killing of the King is definitely dark occultism at work in a ritualistic sense Kennedy was represented representing he was coming online he was becoming enlightened as to the power structure of the world decided not to cooperate with it and that's why they needed to do away with him he did a lot of bad things in his day he was no saint however he was getting ready to expose the underpinnings of the worldwide conspiratorial an occult aspects in a big way that would have turned a lot of people online to this they knew they had to put that down and so they enacted the quote killing of the King as you said at Dealey Plaza in Dallas see that this is this is the ritual murder of Osiris and this connects beautifully to the topic that we're talking about tonight although we're getting a little bit ahead of ourselves Osiris is a Sun God of ancient Egypt he is killed by the dark aspect of the Sun set okay so osiris represents the the positive power on the sun okay where the King aspect again sovereignty the Sun within okay they mean the kingship of the self rulership of one's own house as we talked about last week in the natural law presentation but Osiris is murdered by the dark force of fear he is broken apart this represents the self in the state of confusion okay and he has to reassemble himself or come to know himself through the process of seeking and reintegration becoming whole again the the big were the God God who helps him is Isis the goddess this is the feminine principle that needs to be present to unite the masculine aspect which is our right action in the world and I hear the music stay on the line with me Bob this is great stuff we can continue after the the breaking we write that or water groups happen in will wear cool rock definitely and all my don't actually hit control the population total teary-eyed amongst us a burn in the canary next on our shoulders the only way that you exposed the global crime index mode and if you were award together we are the one together you are in town budget the time for freedom annually in to fill not in the fight be endow club.com [Music] they are and all we content nice Italian and international if you ever listed and could have done something where you still have the chance what will you do if your income in tomorrow or he read your home as many all what we have do you have enough run to survive through an economic depression if you don't want to gamble your future then three to prosper calm can help you quickly end with that problem protect your property in possessions and develop a personal strategy to get you through the hard times most importantly you get to keep your money and not pay another cent to creditors our program is often superior the bankruptcy consolidation or settlement visit free to transfer dot-com to find out more this is your real chance to like a hack so don't delay you'll feature me depend on call seven one eight six one five zero one two three to learn more at seven one eight six one five zero one two three four visit PT prosper calm today oh you mean [Music] all right we're back on what on earth is happening calm I have on the line Bob from Cincinnati and we were talking about this ritual murdering of the king and I'll tell you what this comes up over and over again synchronistically and I'll just since you brought it up and I appreciate that you did this is not a diversion in any way again we may be getting a little bit ahead of ourself but I'll go back over it and you know cover cover our tracks but and again that's what this show is all about never never feel like that you're taking too much time or stealing anybody's thunder throw ideas out there you know that's what this show is for and now we can but we can break this down because if you look at the synchro mysticism and again what this means is that words and symbols are connected through events that actually take place in the world and the universe is actually kind of structuring and ordering this information in order to teach us a lesson if only we are conscious enough to receive the lesson this is really really incredible if you really study it and you look into what synchro mysticism is and it opens up the mind ways that are just absolutely unbelievable that's all I can say I highly encourage people look into the concept what it is known as in the modern world is synchro mysticism okay so these are very esoteric pieces of information that are screaming in to consciousness through seemingly mundane events but again a lot of times these are connected with the creative process at least I noticed that they are they come in in movies they come in in books things like that um and that is I feel because the right side of the brain is so actively engaged during the creative process so much a Sacred Feminine creative energy needs to be put into play you're making a very big creative work that's why movies seem to be how synchro mysticism puts its message out there into into our culture at least in the biggest way but to go back to this concept of the killing of the king how many kings have we seen murdered or died under suspicious circumstances or built up to be big huge icons and then cut down in their prime or while they were still essentially young um look at Martin Luther King ok Kennedy ok was at Camelot ok associated with the Kennedys ok he was that that's that resonates with King Arthur of the round table ok he is associated with the Sun a symbol of the Sun ok in the Arthurian tradition he is the light bringer ok he is a vehicle for enlightenment kennedy associates with him they are killing this principle this lot true light principle because he was going to bring knowledge of the inner workings of the the elites to the masses of people they needed to stop him he was also going to print interest-free money and that's their vehicle of control so they needed to put that down ok Martin Luther King agent for peace ok he was assassinated his name was king okay look at look at Elvis Presley he was called the king ok died there you know it after being built up to a tremendous tremendous uh height of popularity in the media through music the king of rock and roll look at Michael Jackson who people think may have been murdered not just a died from some overdose but there's a lot of evidence to suggest that this may have been some form of silencing him because look at some of what his more recent music has been about talking about the elites and how they don't give a damn about the people of the earth okay the song they don't care about you etc he is the king of pop uh over and over again you can see this theme coming through there's other examples that could be given but the the ritual killing of the king this is something that you see over and over again and this is a putting to death of the light because that is what the dark force always wants to do it doesn't want the true light of consciousness coming into our lives and into our minds and into our hearts and our souls it wants us in darkness so the the murderers represent the set force se T this is the dark aspect of the Sun the Sun in his setting principle the light going out from the world okay and set was the Egyptian God who murdered Osiris and Isis the goddess principle which represents care which represents concern for other beings which represents truth and justice needed to help to reassemble to get in touch with those principles see now we're touching on some of the esoteric as opposed to just the exoteric see she helped to reintegrate Osiris but sadly she could not find the last piece of him which was the fat the phallus okay this represents the final aspect of the male principle of courage being put into place because she ties a reed in place of the phallus kind of substituting the true principle of courage and and activating the male principle of action and sadly that is why the she Reis still in this condition of not being activated enough to change the dynamic on a mass scale or what is called reaching critical mass critical mass of taking the right actions in the world to really upset the balance of power and break out of our chains so that's what this story is all about the ritual murder of the king is always about the killing of the positive side of the Sun which is the Horus principle Horus being the child of Osiris okay who needs to rise so that he can avenge the death of his father Osiris by killing conquering set the the angel of darkness okay the god of darkness and they do battle in the underworld okay and then Horus conquer set and rises on the horizon to rejuvenate or save the world and we're going to talk about this as we go forward in our own theology but Bob if you're still on the line is that kind of a mood to and kind of get into what we were talking about when you talked about Kennedy's murder and how it's connected with this ritual murder of the king that was wonderful Thanks thank you mark for putting that out there and you know ironically two of your kings maybe stuff of Elvis and Martin Luther jr. hail from the Osiris like city of Memphis Memphis Tennessee I'm sorry I'm neglected to mention that that's absolutely right the Egyptian capital of Memphis that we have the rights of Memphis in Freemasonry and these aren't even considered official rites or degrees of the they're not associated with the Scottish or York rites or what is considered traditional Freemasonry in the modern world these are considered of spurious degrees or what are called clandestine orders of mace but the rights of Memphis and mizrahi which are Egyptian Freemasonry essentially that is not that is not to say that they are all negative okay I don't believe that they're all blackbirds light and dark in all forms of esotericism in all forms of mystical traditions we have to I think we need to get out of I personally think that we need to get out of the idea that all forms of the occult I've said this many times on the show are bad or evil it is what we do with this knowledge and it has been hidden do we bring it to the light of day do we expose it to to the the light of the world good works are done in the light of day we bring them out and tell people what our intentions are and then we act in accordance with those intentions for all to see not hidden and secrecy not veiled okay and if we're doing that and we're doing that in with it with the proper moral intentions in mind those works will be brought to the surface and be done in the light of day if on the other hand we have a control-freak personality if we have the intentions of trying to subvert other people's consciousness and put them under our control we will take the knowledge that has been occulted in the ancient world and will pervert it will twist it to our suiting we'll use it as a weapon against people who we know don't have the same level of knowledge and always people who do that will always try to hide under the cover of darkness because they don't want people to see what they're actually doing that's what ultimately we need to do expose the people who are using this information for what they are and in the negative sense for what they are and we need to take this information and make it not occult anymore I've also said many times on this show and will continue to say humanity is not really going to get out of the mess that we're in right now until the occult is no longer the occult we need to uncultivated by these different mystery traditions time for the unveiling that is what the apocalypse means it means the removal of the veil it is time to take the veil away and expose this knowledge and bring it to the light of day for everyone we need to make it we need to make the esoteric the core tradition the exoteric so that the wider range of people have access to this deeper knowledge of information which is ultimately the deeper knowledge of the self that's what this is all turn utley about and thats as you can see we went past the exoteric the cover story about the sun god okay being conquered by the dark aspect of the sun god this is right action being conquered by ego akan desires and and and dark thoughts and the divisive divide and conquer etc he divided him he divided Osiris set conquers Osiris he kills him betrays him kills him and breaks him into pieces this is oppositional consciousness the one who can unite those pieces is the feminine principle which is the principle of care see this is me that's the beginning of understanding these traditions from an esoteric point of view which means to go within what does the symbol that's being spoken of in the external sense what does that mean in the internal sense what does it mean inside of you because that's all these things are these are just symbols and words and and they're being attributed to people and things that are seemingly outside of the self but these are all within ourselves in our own consciousness so Bob I want to thank you for bringing up that and it led into a great a great tangent there and I think we'll continue to pick this up next week as we go into the Astro theological solar cult more in-depth I didn't really get a chance to do that this week but what I want to take my time on this topic and we're going to go into it and explore it in depth and break it down over many weeks I always love it when you call in Bob thanks so much and uh call in anytime manthang thank you guys and thank you for being a builder with the white mark good night gentlemen take care of it well that's all we have time for on this episode of what on earth is happening folks we've got about a minute left in the show I want to thank everybody for listening if you're in the Philadelphia area and you're hearing this podcast please do come out this Saturday evening at Liberty's on second and Fairmount at 8 p.m. for the free your mind fundraiser number two we need the support folks the conference isn't going to happen without your support that's all for a night from mark Cassio you've been listening to what on earth is happening I'll see you here same time next Tuesday evening folks thank you and good night a rock or certain Asian King once I got to that tell me you'll enjoy the water you

What On Earth Is Happening Show #038

Topics: *Mind Control Methodologies, Religion, Astrotheology, Exoteric vs. Esoteric, Mystery Traditions*

[Music] welcome one and all you're listening to what on earth is happening right here on the Intel hub news network I'm your host mark passio today is Tuesday December 14 2010 my website what on earth is happening dot-com and networks website V Intel hub news network comm we have a good show lined up for you here today I'm going to be continuing our discussion of religion particularly religion as Astro theology and as a methodology of mind-control in our ongoing series on mind-control in which we are going to discuss a total of 14 over all methods of manipulation I have a few event announcements in the area that I'm going to read and then I'm going to give the callin numbers and then we could jump right in so let's see I'm going to be on a local show in the Philly area this week weekend of Friday night December 17th and that is going to be hosted by Kevin he goes by the name of Kevin tinfoil or karma tinfoil he has a show on talk show called tinfoil hat area in which he discusses conspiracy theories he does it in kind of a light-hearted way he calls it a fun place to have serious discussions so I'm going to be on as part of a show that's going to feature Philadelphia activists and all of the different things that they do in the Philly area to bring awareness to people in in different aspects of the freedom movement and just in general of what is going on on the planet that we live on so that's this Friday night tinfoil hat area if you simply go to talk show calm and you type in tinfoil hat area into the search the show will come up and you can listen in live at 10 o'clock p.m. starting at 10 p.m. this Friday night number 17 January 16 2011 I will be giving a lecture at germ books and gallery term books is at 2005 Frankfort Avenue in Philadelphia this is going to be a joint lecture with Michel Melton from mufon Pennsylvania so this is going to be a fundraiser the third fundraiser for the for your mind conference which is coming up in April but we decided to do it at germ books this time and it's going to be a dual lecture series Michel Melton is going to be giving a talk on mind control and the history of mind control and I will be talking about the occult symbolism in the movie The Wizard of Oz as we briefly discuss the last week on the show so this will be the first time I'm giving this particular lecture and perhaps I will give it on the air following this event at germ books so that's Sunday January 16th 2011 germ books and gallery finally the last event announcement I have is the freer mind conference itself a conference on consciousness mind control and the occult a unique two-day conference scheduled for April 9th and 10th 2011 in Philadelphia PA featuring multiple speakers and diverse educational materials for the purpose of raising public awareness of the critically important topics of mass mind control techniques the covert and subversive influences upon our consciousness and behavior trauma based and ritualized abuse and the practical mental and emotional healing methodologies available for those affected by these devices the date Saturday April 9th and Sunday April 10 2011 the time 10:00 a.m. to 8:00 p.m. both days with the doors opening at 9:00 a.m. on both days the location Liuba Hall ruv a rubra hall Ruba is at 414 Green Street in Philadelphia the admission price is $20 per day if you purchase your tickets in advance if you decide to get them at the door the price of admission at the door is $30 per day the confirmed speakers Aaron McCollum Alford Weber who was just on Jesse Ventura's conspiracy theory show this past Friday and he did a magnificent job Alfred Weber Andrew basiago Bob Tuscan ferret judo zoo non Irvin John Nicholson Larkin Rose Laura Magdalene Eisenhower Mark motika myself mark passio Mel fàbregas of the Veritas radio show Michael Kelly and Suzanne Taylor for more information on this great conference please visit the conference website at WWF re your mind conference calm all right before we jump into the topic for tonight let's give the call in numbers if you want to call into the talk show Network you can call seven two four four four four seven four four four once again seven two four triple four seven triple for the call ID number which you will be prompted for when you call in that number is eight three five one five once again the call ID number eight three five one five if you want to call in to the blog talk network which is what the Intel Hub carries their shows on you can call six four six seven two seven three three eight seven the calling number for blog talk six four six seven two seven three three eight seven before we start I just want to say you may hear a little bit of background noise hopefully it's not too distracting uh I do the show out of my home and there is a central heater that's running and it is frigid here in the city of Philadelphia at this time this is you know coming into the winter season so it really really gets cold here in those months and I think we're we're down around 30 degrees now something like that maybe even less than that by this point but it is a frigid day out there today where I'm where I'm at so uh the heater is running in in the house and just want to let you be aware of that in case there's a little bit of background noise please forgive me for that so last week we began our discussion of religion a sensitive topic a controversial one to be sure but what we are looking at is religion as a methodology of mind control and particularly religion as Astro theology we broke down the word Astro theology last week Astra from the Latin star meaning star okay Astra Theo's from the Greek meaning God and logos from the Greek meaning word so the Word of God in the stars and indeed modern day religion is in fact Astro theology it is the worship of the heavenly bodies of the night and day sky as gods and we will see starting this evening how this ideology is incorporated into religious beliefs holidays rituals etc um Oh theology can be equally applied to other religions in addition to the big three we're going to be talking specifically tonight about the big three religions what has been called by some researchers the desert sky God religions all coming from cults of the ancient world astro theologically cults of the Sun the moon and the stars and planets and we briefly began this discussion last week we didn't get too deeply into it I want to mention a couple of things um we had a caller in last week Bob from Cincinnati phenomenal caller always a pleasure to hear from he calls into the show a lot he had mentioned the zeitgeist movement and I gave a brief a account of what I felt about that how I thought that they were you know had good intentions and I said I wasn't so sure about their methods of implementing a resource-based economy I know they work with the Venus Project and there's some good minds and that as well I had talked about that if it was going to be implemented you know and this came up because of course site-geist is a movie that talks about Astro theology in the first section of the first movie I said if it was going to be implemented in a truly free way in an egalitarian way and in a way that was non-coercive than I was for a resource-based economy of course um if it is somehow exercised through control and taking away from some people to give to others by force then I'm not for that so it's all in the methodology but more specifically why I wanted to read bring up the topic of zeitgeist in those movies is I want to make it clear on my stance on Astro theology if I hadn't already done this last week I want to make it very clear how they portray a short the ology in zeitgeist is accurate to a great extent however I don't feel it goes quite far enough because it leaves out the deeper underlying significance --is of what the exoteric cover story of Astro theology okay is keeping people back from in the esoteric sense again we talked about the distinction between these two words exoteric and esoteric last week we saw that exoteric was a meaning that is reserved for the general population the masses of people this is like a you know an explanation that is given to the general population to get them to just you know take it at face value and say okay I don't need to looking further that's what it is and that's taken care of okay the esoteric meaning is reserved for those who are in a small specialized group okay so this is the in crowd that understands the true meaning that is reserved only for the initiative a particular particular tradition or or a group or you know a ceremonial type of gathering or philosophy okay so with its own associated symbols words rituals etc okay in other words a mystery school distinction between exoteric and esoteric is essential to keep in mind as we talk about Astro theology and it's where I kind of do some what part ways from the way Astro theology is portrayed in zeitgeist again I think it's a good beginner's introduction to the topic of Astro theology but I think it largely dismisses the inner tradition it dismisses that these symbols if they are understood in their proper context in their esoteric context can be powerful transformative tools for consciousness because they are telling us about our own consciousness our own psyche they're telling us about aspects of ourselves and this is where I think I was like they stopped short and where I'm going to pick up the ball and run with it here tonight and going on into the weeks in the future when we talk about religion and Astro theology so my stance on this is that I am NOT dismissive of the inner core traditions that religions have at least in the past attempted to hit the mark of so to speak to hit that bullseye we talked about and I put on the podcast last week a representation of what I call the the dartboard of truth this is kind of a symbolic you know circular pattern concentric circles okay and in the very center you have the truth itself that is unwavering that just simply is and then around that you have this esoteric tradition that you know isn't at the very center of the bullseye or the center of the mandala but it's it's reserved for a smaller group that really wants to make that journey toward the truth the initiate so to speak okay those who have begun looking into the deeper aspects of something and then around the outside you have the exoteric religions which are given to the masses kind of to placate them and to keep them in a docile state in particularly a right brain state of consciousness which is what religion is ultimately designed to do by the controllers of the world so again for the people who may be approaching this topic from a religious point of view which I am NOT I am looking at this strictly from a spiritual point of view in a perspective which encompasses consciousness not from a place of dogma or dogmatic unchallenged beliefs I want to make it very clear that I am NOT dismissive of the inner core traditions the esoteric mystery traditions that lie at the heart of religion and attempt to help the initiate to get further along in his or her quest for the truth which as I said lies at the very heart of the issue unfortunately what religion has become in the modern world at least in the last few thousand years here on earth is a mechanism for holding people back from the truth for erecting a wall of exoteric beliefs and dogma and that is encompassed right in the word religion religion itself means to hold back to tie back and again I kind of went off on this last week about the meaning of the word religion and you still have people that insist that religion means to reread oh you know believe what you want about the etymology of the word religion means to tie back to hold back or to thwart that is where the word comes from from the Latin relig ra I do want to say that it can see there's always a positive side to something as well people tend to look too much at the at the negative but particularly when it comes to symbology or when it comes to um anything having to do with the and again the occult is can be a very bad influence and can be a very you know dangerous thing when wielded if it is done with the intent to control hidden knowledge is hidden knowledge it's what we do with it that's what the word occult means as we've said many times on the show it simply means hidden well yes religion means to tie back to hold back to thwart but again what you know can we what does that actually mean insofar as what is it holding back in its negative aspect which is how modern religions are being used without any question it is being used to hold us back from the truth if religion is in its true essence in the actual core mystery tradition aspect of it which is where it ultimately came from before it was degraded and you know perverted over the centuries if we were to really try to get at the heart of the mystery that religion used to be about um we would we would basically come to the understanding that that there is a that there is a deep fundamental underlying mystery that has to do with how we function as human beings okay it is is the the knowledge that the dominators of the world understand and it is the knowledge through which they control us we have to become aware of that if we are going to protect ourselves and steal ourselves against their manipulation and influence I hear the music for the first break coming up we'll take a break and I'll be right back after these messages [Music] did you ever wish that you could have done something while you still have the chance what will you do your income ends tomorrow over here is your home as many already have do you have enough money to survive through an economic depression if you don't want to gal with your future then free to prosper dot-com can help you quickly BlogTalkRadio page today to cure your future in the future of your families in hard times heirloom organic seed join the Joe Joseph John King and AC Griffith Thursdays and Sunday evening at eight pm research the fiddling radio on the internal hub news network [Music] [Music] okay we're back on what on earth is happening I'm your host mark Basia we were talking about the negative and positive aspects of religion specifically when it comes to the word religion again it means to to retie or to tie back to hold back and you know if it is done in the negative way it is tying us back or holding us back from the truth however we should look at the positive aspect of the word to bring some balance to it and you know to tie together can mean to unite okay to be bound together that means to connect okay so religion in its positive aspect true religion can to reconnect us to reconnect us with the truth to reconnect us with the divine to reunite us reunite us with our understanding of natural law and again this is all ultimately about those things okay so let's start looking at religion from the astro theological perspective let's pick up looking at it which is where we started last week we saw that Astro theology is based upon three basic as for astronomical cults of the ancient world the cult of the Sun or the solar cult the cult of the moon or the lunar cult and the cult of the stars and planets the lesser lights of the heaven the smaller lights in the sky okay and that is the stellar cult so let's start looking at religion connected with each one of these cults in turn will start with Christianity and how the story of Christianity is completely interwoven into the solar cult mythos of many ancient cultures now in the Christian religion and faith there is a Trinity the concept of three-in-one a triune God now for those who have been listening to the show from the beginning or who have maybe seen my lectures you will understand that this is an exoteric symbol for the aspects of our consciousness we see saw in the past on this show that consciousness manifests itself or expresses itself in three basic ways through our thoughts our emotions and our actions thoughts being kind of the creator aspect of these three modalities of consciousness our thoughts arise out of nothingness from the void of pure consciousness okay everything that we said into motion in the world is created ultimately first from our thoughts nothing can ever exist or be set into motion from us until it comes from our thoughts first as far as what we experienced in the world okay our emotions are the internal quality of consciousness this is how we feel things inside this is the feminine aspect it's the spirit in which we do things our emotions the spiritual aspect of consciousness and then our actions are the byproduct of these two of the creator and the feminine spirit okay the creator aspect is the thoughts the emotions are the feminine spirit in which we take our actions and then the byproduct of these is the action itself which is a male principle it's an active modality of consciousness not a passive one like emotions we're not in essence like thoughts okay and therefore it is ascribed masculine qualities and considered a male child so right there we have a set up in the story of Astro theology because this is ultimately the truth of what the exoteric cover story of Astro theology is trying to hold us back from they want you to always think controllers that Institute religion the negative of the negative kind okay always want you to think of the gods as outside of yourself no matter what God it is something that you are separate from okay not something that is internal as the words attributed to Jesus the very you know of one of the gods of the triune gods of Christianity the words attributed to him in the New Testament he says that the kingdom of heaven is within and this is sort of dismissed by modern religionists he was trying to explain the people it was all about your consciousness not to look outside it's about your own personal sovereignty and your one-to-one connection with the divine regardless of what you happen to think of that as no intermediary no intercessor just you and that force and ultimately they're ultimately one because everything is that force when we look into the ancient past we see that this concept of eternity or a triune God or a family okay of three comes up over and over and over again in Babylon you had eternity of Nimrod Semiramis and Tammuz in the Egyptian tradition you had the Trinity of Osiris father Isis mother or Sacred Feminine and Horus the divine child you have this repeat of the Trinity over and over again in various cultures in the in the Hindu religion the Indus Valley you had Brahma Shiva and Vishnu okay you have a father a mother and a male child always well in the Christian tradition dating back approximately 2,000 years you have this family again depicted okay now Mary and Joseph are the physical biological parents of Jesus in the story and there's your Trinity there but since they are deifying the Jesus character in the in the exoteric story of Christianity and making him into the Son of God which we'll talk about what that means in a moment his true parents are God the Father and God the Holy Spirit okay the Creator God and then the Spirit so he is the son of the Creed the true creator God the one God okay and that force through the Holy Spirit impregnates a earthly woman who gives birth to the physical incarnation of God on earth at least in the exoteric cover story the Sacred Feminine is of course left out of this Trinity the Sacred Feminine represent you know which Mary represents in this Trinity or triune aspect is completely left out so it has been turned into a spirit or a ghost the Holy Ghost this is significant this is a male dominate or patriarchal religion in our male dominator times the Age of Pisces women aren't allowed the service priests in this religion still to this day totally patriarchal totally male dominator and so why not in their main symbol leave out the sacred feminine aspect of emotion and relegated to the status of a ghost Mary is not to be worshipped in this religion that's that is anathema in Christianity to worship a goddess the goddess always has to be removed from the equation who are killed or marginalized because it's all about the Dominator of the male energy the masculine that's what's going on in our world that's why we're losing our freedoms because there's such an imbalance in consciousness toward the male essence without much import placed upon the sacred feminine or conscience our emotions and being able to feel the repercussions of our actions we take them in the world and they affect others that's what it's all about it's all about destroying that aspect aspect of the individual and this is a symbol of that in the religion called Christianity marginalizing the Divine Feminine she's just the vehicle for bringing in the mail God into the world so this story is ancient it's been going on as long as the world has been under male-dominated rulership and it's just retold over and over and over and over again in the Babylonian religion the Creator God's name was Nimrod often depicted as a fish God or a combination man fish God you know the Sumerians and Babylonians said that their gods came from the Seas this is highly symbolic but could be very telling when we get into you know the concept of visitation to this planet we're not going to get into that tonight but it's an interesting topic to look into great series on I believe it's uh is it discovery HD or History HD called ancient aliens erich von daniken you know producing this series and I highly encourage people to check it out and look into it they've done a phenomenal job on this series speaking of which I posted a lot of different movies up on the podcast section for last week for those who might want to jump ahead and do their own digging into this topic of Astro theology there's a ton of resources up on my podcast page at what on earth is happening I try to mention that every week go up there make use of that page it's a great resource page I posted a ton of stuff up there let me bring it up and I'll tell you tell you what I posted there last week let's see I put some books up there um I put some videos up there arm i link to an audio series which i'll tell you about in a moment I think it's absolutely invaluable for those who know like a podcast audio and want to really do some more research into this topic so I posted some books stellar theology and Masonic astronomy astrobiology and side aerial astronomy by Michael Cera on occult theocracy and another book called symbols sex and the Stars and these are all about the actual theological codes of the ancient world great books every one of them um William Cooper put out a series called Mystery Babylon years ago when he was still alive before he was murdered by the dominator system and its agents it's it's housed slaves as I called them last week because that's what they are any anybody that loves their own enslaver enslavement and fights to protect it and serves their own dominator master who's keeping them in bondage is a house slave and that those are harsh words but they're true ones nonetheless and that's what the people who serve this immoral because they think that they're benefiting from it in the short term don't even understand that they're they're putting their own chains on willingly and more even more more from an amoral point of view than than that they are putting the chains on to their own children if they have any and they're too stupid and unread to realize it you know sometimes I feel like coming on the air and just saying hey folks you want to know what's going on and why the world is the way that it is people don't read good night everyone because that's all it really ultimately boils down to so make use of some of the resource resources I'm posting on my podcast page it's um you know that's why I do it these people went out of their way some of these authors to acquire this information and they get and do it for their own health or their own enjoyment they did it to try to bring light to the world so William Cooper the Mystery Babylon series I posted four pages of links to that entire series if you are so inclined avail yourself of it and download those podcasts because they're brilliant and he was a great person also up there there's some some videos from Jordan Maxwell there's one there's a one up there from Michael - sorry on and there's a couple from Manley P Hall all great scholars on asteroid theology and uh there's many many other topics that that I'll probably post and post resources to in the weeks the comma on this topic so let's look at the Egyptian Trinity now and let's see how this equates to the modern Christian tradition and how this is all tied in with Astro theology as the solar cult because that is what Christianity is is the cult of the Sun and yes I mean that not the Son of God I mean the physical Sun in the sky okay it is Sun worship in the Egyptian Mythos the Egyptian pantheon of gods the the there was a ideal family and this ideal family was represented by three gods that acted as one basic unit so this already should sound familiar okay Osiris was the Creator God hey he represented the divine force in nature the bringer of life the giver of life his wife was Isis is is they the goddess she represented the natural world she represented the sky she represented the galaxy with its myriad of stars she was the birth giver okay she gave the life-force of osiris physical expression in matter she was the birth giver to all the sons of the cosmos the stars of the heavens because she is the feminine void the potentiality of creation whereas Osiris is the masculine aspect of that divine force so Isis you want to look at as the goddess of the heavens the galaxy and all of the stars okay they're a child was named Horace hor us Horace we mentioned him in the weeks when we talked about time he is uh his name is given to the hours it's just the reversal of letters in English the hour is it is named after Horace Horace was the golden Falcon okay he was the son depicted as a golden Falcon a bright ball of light that makes its trek symbolically as this bird this Falcon or hawk okay but he was the Sun that gives us life he was one of the aspects of the Sun and there are others which we'll talk about okay Horus journeys from his zone when he is rising okay this is the zone of Horus it's the horizon Horus zone okay always in the words that we speak there is a lesson to be learned there the Constructors of our language are always telling us something in the language itself so there's the intro music we're coming up to our second break I'll be going more into the story of the Trinity of ancient Egypt when we come back here on what on earth is happening [Music] [Music] join the jokes with John King and AC Griffin Thursdays and Sundays at 8:00 p.m. Eastern for finding like radio on the Intel box news network in over we're campuses and all my drunks st in control of the population doesn't hear any there's amongst us the Bremen of humanity that on our shoulders the only way out is to expose the global crime syndicates known as the New World War together we are one together we are Intel soldiers the battlefield three humanity into join us in the fight in Val up calm did you ever wish that you could have done something while you still have the chance what will you do with your income and tamaño or if you lose your home as many already have do you have enough money to survive through an economic depression if you don't want to gamble with your future then free to prosper calm can help you quickly end your debt problems protect your property and possessions and develop a personal strategy to get you through the hard times most importantly you get to keep your money and not pay another cent to creditors all program is often superior to bankruptcy consolidation or settlement visit free to prosper calm to find out more this is your real chance to act ahead so don't delay your future may depend on it call seven one eight six one five zero one two three to learn more at seven one eight six one five zero one two three visit reach across for calm today the Intel Hubbell radio show Sunday 5:00 p.m. on Oracle broadcasting and also climate ask on the Intel community members will continue to work together to achieve peace that's what we long freedom and peace are with team to the Intel hub new network on compression by piece [Music] [Music] [Applause] [Music] okay we're back on what on earth is happening I was talking about the Trinity of ancient Egypt and comparing it to the Trinity of modern day

Christianity we were looking at the Trinity of Osiris Isis and Horus the ideal family of ancient Egypt so Osiris the Creator God the Sacred Feminine aspect of nature which was embodied in the goddess Isis and then their son Horus the golden Falcon who makes his daily trek across the sky from the whole horizon the zone of horus and he rises in the east lies in an arc to his Zenith point and then finally in the West sets or encounters the dark God known as set the brother of horse at the opposite horizon where they do battle and Horus is slain by set okay this is about of course the daily rise and set of the Sun because that is what Horus represented he was the Sun God and there were three aspects main aspects of the Sun in ancient Egypt the rising aspect the zenith aspect and the setting aspect so the rising aspect is embodied by horse the zenith aspect is generally represented by almond raw the Sun at its highest point again the word Amen or on men is derived from the Egyptian tradition and at the end of each prayer in the Christian tradition this Sun God's name is invoked amen it is sending the prayer or the intent Zenith word to the highest point of the Sun the highest aspect of light for the manifestation of the intentions of that particular prayer set of course choruses I don't want refrain from using the word evil but for all intents and purposes his evil brother okay it's more of his um I guess you could say alter-ego or maybe just pure ego sense that if this is the aspect of the self that if it is followed and listened to will result in the termination of the light or in other words a very hard experience okay the lights will go out if we follow set instead of Horus so set is the dark god of the western horizon that conquers Horus as I talked about you know he conquers them at the end of each day and then of course they do battle in the underworld and Horus emerges triumphant to rise once again in the morning and rejuvenate the world to bring light and light light and warmth and life to the world once again or in other words to eternally renew the world through his death and subsequent subsequent resurrection so this should sound quite familiar because it is the story of Jesus they're essentially one in the same the story of Jesus is a retelling of this ancient um Solar myth of Horus and his parents Horus was said to be the son of God because he is Osiris his son who represented the divine force of the cosmos key ultimately represents he ultimately goodness righteousness in harmony with moral law when you see him depicted in the Egyptian paintings and statuettes etc you will often see him being born or carried by Isis okay because the night sky of Isis in an older tradition she was neat okay neat meaning well we get the word night from okay the night sky which Isis represented gives birth to the Sun each day the Sun is born out of the night sky in the Greek tradition the Sun God was Apollo his mother was Leto okay she was the Dark Knight goddess that gives birth to the Sun God out of the night light emerging out of Darkness is a theme recreated in this solar mythos the solar cult religion and you know then it is conquered at the end of the cycle and then it is reborn and we're going to look at how that works but before we do that I want to make clear that there is an esoteric aspect to all of this see this is the exoteric cover story once again this is the exoteric story that is told that is given to the public oh yeah Jesus is the Son of God he's born of a virgin and then you know he uh he dies and then come resurrects and comes back to life and to save the world to renew the world but this is ultimately about aspects of ourselves when we look at I'll be posting an image of a statue of Osiris who is flanked by the brothers Horus and set now it's very interesting how this statue was depicted Horus is standing on Osiris's right-hand side and he is touching the right side of Osiris's head while set is standing on Osiris's left-hand side and touching the left side of his head of Osiris his head now think about this if horus represented goodness righteousness harmony with natural law which is embodied by his mother Isis set is the opposite of that going against the grain staying in ego going against natural law principles okay the one who always has to be you know reeled in and correct it if you look at the stories of set if he's not doing outright harm and evil he is one that always needs correction because he represents the ego principle the left brain divorced from the Sacred Feminine right side of the brain and they're depicting it in this statue which I'll post with this podcast truly an amazing symbolic depiction if you understand how to get past the exoteric to the core tradition that lies beneath the symbolism then it becomes magic and beautiful and wondrous and something that's very important to understand and that's why they veiled it no perhaps the wisdom masters of these traditions veiled it to keep it away from the food male dominator forces that they knew were rising or had already had control in their times so there's we'll get into deeper aspects of it like what is the virgin birth okay we'll look at that in a moment let's let's continue on with this Trinity okay so I have another depiction of Osiris Osiris was often depicted as a pillar okay or his essence is depicted as a pillar there's a pillar in ancient Egypt known as the Jade pillar and this is spelled DJ edy Jed it's pronounced okay so this was a called the pillar of Osiris with a backbone of Osiris and it represented stability it represented harmony okay and there's a there's a depiction of this in an image I will also post I probably should have done this before the show sometimes I will post images or documents on the radio page I didn't get a chance to do that tonight I apologize for that it would have made it easier in helping the audience see you know go out there and look at some of these but I didn't get a chance to I was actually preparing a presentation for this is a side note a complete of tangent to what we're talking about but actually it's a pretty interesting I was invited by the Tesla Science Foundation to help give a presentation tomorrow at the Franklin Institute which is a great opportunity we're actually going speaking at the Franklin Institute in front of a classroom of science students and not telling you all about Nikola Tesla his life and his accomplishments and what he tried to do for the world and how that could still be brought to fruition so great that the Franklin Institute is moving to educate some of their students on Tesla and working with the Tesla Science Foundation Philadelphia to do that um so I was working on that presentation earlier today and I will be giving that I'll be one of the three presenters tomorrow at the Franklin Institute on Nikola Tesla so just a great opportunity there to go back to this image that I'm looking at and I'll post with the podcast Osiris who represented harmony um Dominion okay sovereignty oneness with the divine force the flow of nature he is shown in the middle on a pillar and to his right and left sides is Horus and Isis now again Isis represented the laws of nature she represented natural law Horus represented right action in harmony with natural law so when you're bringing these two forces together okay they form this arch or this very strong structure the pillar of stability it was known as in the Egyptian tradition the JED pillar so that's what it represented and that's what Osiris represents in this Trinity okay and that is form that stability that order which we talked about in the two weeks ago when I gave the presentation on natural law is what is embodied here in this story again what we're getting past the exoteric cover story of Astro theology about just the the son being born out of the night sky okay the virgin birth so to speak and there's a deeper aspect to that but we're getting past that we're looking at what do these symbols truly mean and they mean the same things in the Christian tradition if we get past the story which most people don't want to let go of see what Christianity is being used for in the exoteric sense it's control people in the modern world if we get past the exoteric debt to the esoteric there's a rich tradition to be found underneath of it as would any other religion but most people want to stay with the story I don't understand it I don't know what they think that they get from that I woke up to it a long time ago and as I said last week I knew I was being lied to about what religion really was but sadly I wasn't blessed with a conscious family in my youth as many of us are not and I didn't really have people turning me on to other areas of inquiry and research specifically when it came to Astro theology if I had known about what Astro theology was back then maybe I wouldn't have gone down the path that I went down which was total abject hatred for religion and wanting to find what the exact other side of it was to go down the dark left-hand path and I got involved in Satanism which is the force that I ultimately understood was really controlling everything in the world and not specifically just Satanism but the dark occult in general um you know had I had a teacher about asteroid theology back then or encountered this material then I would have simply said oh I don't need to hate that now I understand what it is and how people are fooled into the belief system that they have based on this it all makes sense so we see Isis often depicted with this child Horus okay and this is an analog it's a direct symbolic analog to Mary with the Child Jesus because they represent the same concepts Horus son of God given birth to by the mother of the night sky well she Isis was the moon goddess okay again the moon the dark aspect of night the night sky okay she's the night goddess the moon reigns in the night it's the Sacred Feminine symbol lunar but the the feminine energy is said to be lunar begin energy okay so we will often see Mary depicted as wearing a dark cloak with stars embedded in it because she is the mother of the night sky the queen of the heavens okay that she is the goddess that gives birth to the sons of the heavens just like she gives birth to the son Horus or Jesus if it's Mary if it's Isis she gives birth to Horus I have a depiction here of Mary with a night sky cloak with the stars embedded on the cloak wearing a crown depicting that she is the queen of the heavens with a crescent moon that she is standing on because she is the moon goddess of the night sky and then beneath her she is bearing the Child Jesus /chorus the Sun because the night sky in all the aspects I just described with the the sons of the night sky thus the stars embedded in Mary's cloak okay in this image she then bears the Sun in the morning sky this is a symbolic representation that only harmony with natural law with morality with conscience which is what the holy spirit truly represents in the Christian Trinity and what Isis represented in the Egyptian Trinity okay only getting in touch with those aspects can ever truly bear light or save us can bring the Savior into the world they're trying to hold back this understanding by wrapping it in a story and getting people to worship it as something external to themselves and then put all kinds of dogma in it and put all kinds of rules and regulations and control-freak mail Dominator control-freak factors in it to to dissuade people from looking at the real tradition that lies underneath the esoteric but again as long as people are wrapped up in religious dogma they're never going to understand that these things are symbolic and they're telling you about aspects of yourself so let's look at how astrobiology is based upon astronomical principles and ash for logical ones okay so before I even do that let's let's break down what the virgin birth is all about now clearly it's not about actual conception okay which is what they try to tell you in the Christian exoteric cover story that Mary actually conceived without actually knowing man okay there was no sex involved she just gave birth and the Holy Spirit you know impregnated her with the Child Jesus to understand the virgin birth truly we have to understand the human brain because that's what it's really about see there's three components to the brain as we've talked about in numerous times here the r-complex which is the lowest aspect of consciousness in the brain it's the physical motion you know actual motor skills survive survival only mentality identification with the physical world fight-or-flight mechanism stress etc okay in other words all of the things that we don't want to see our consciousness become like we want to see higher thought we want to see reason we want to see logic we want to see creativity we want to see nurturing we want to see moral behavior okay moral thought we stay in the r-complex that's not possible it's animalistic behavior okay the thing that we need to get into touch with is the positive aspects of the emotional system it is made possible through the limbic system of the brain the limbic system has a positive and negative component to it depending on the types of emotions that one is experiencing through it and the types of chemicals have been outputs to the body ultimately it is the part of the brain that governs our emotional makeup so if we if we look at this part of the brain it's the feminine aspect of the brain complexes the three brain complexes and the goal is to give birth to the higher-order brain which is the neocortex at the top of the brain complex the highest part of the brain okay which has all those functions that I talked about as making us human logic reason creativity you know nurturing true care all of that moral thoughts ethical thoughts okay and all the things that we really aspire to as human beings in order to reach that state we have to conquer the controlling Dominator influence of the r-complex of the brain which is traditionally looked at as it is the oldest evolutionary part of the brain okay and it's looked at as the male dominated or aspect of the brain so this is the the old testament god the law obsessed control obsessed but nonetheless currently in charge aspect of humanity okay if we get in touch with the positive aspects of our emotions and the limbic system is then activated in the right way okay which is empathy conscience okay helping us to feel the repercussions of our actions in the world towards others then the r-complex will die away its control at least not physically but its control over us will die away and we will bear into the world through the emotions or through the Sacred Feminine parts of the brain okay the child which is the neocortex is the higher order thought functions of the human brain and therefore if you look at these other two parts of the brain the are complex and the limbic brain we look at the are complex as the male Dominator father figure and the limbic brain is the Sacred Feminine mother who then gives birth to the child that is the neocortex the newest part of the brain ok it is the youngest evolutionarily therefore it is the child in this Trinity ok we see what the virgin birth really means the virgin birth is when the met the feminine aspect of our consciousness for our emotions the or the limbic brain that the midbrain finally gives birth when the our complex has basically lost its hold or quote died away so that I Widow ok it's it's been widowed and yet it gives birth to a child a virgin birth has taken place in the tradition of Freemasonry this is called the birth of the widow's son the widow's son the widow does not have a husband the r-complex is dead if the widow's son is truly raised okay the widow's son is one who has been raised as a master mason to that third level it's an esoteric meaning okay the virgin birth is about the birth of the higher order aspects of consciousness and the human brain after the lower aspects of them have been conquered or done away with and therefore a virgin birth has taken place Hiram Abiff the widow's son is born is raised up out of his his tomb just like Jesus is raised out of his tomb because he represents the savior of the world in the form of the human neocortex which if we don't actively engage and uh basically bring to a state of equilibrium and balance and health once again the world isn't going to be saved it's going to it's going to experience a development by set the dark aspect of the Sun which you know is the dark oak opus of this world they are set teens they are dark Luciferians they are dark Mason's they are you know um those who worship this dark force but yet it is a force that is symbolically characterized by light or the Sun it's just which aspect of it which horizon are you looking at are you looking to put the light out to death in the western horizon are you looking to have it be raised in the eastern horizon it's all symbolic you need to get past the immaturity of looking at these things as simply you know one dimensional and understand that they are telling a much deeper richer story yes the dark occult this worship set one of the darkest occultus in the whole United States a Michael Aquino the leader of the temple of seti was once the head of the psychological warfare division of the US Army a second other word for a Satanist essentially used to be involved in the Church of Satan separated from lavas church and on his own wanted to be more hardcore even in love a who worked with members of the Skull and Bones and Lansky send a kitten just about every kind of vile creature walking the earth that you could possibly you know name although some say he even repented on his deathbed lanten love a creep high priests of the Church of Satan people said Holdren repented on his deathbed enough people were following that story dominator globalists john holdren died this week and said people say he recanted and on his deathbed called for the end of the war in Afghanistan because he knew what he was really doing in the world and he knew that that wasn't going to save him where he was going and yeah believe me um death is the grand leveler so one thing we all have in common that's where we're all going to meet eventually on the level we may be meeting symbolically on the square a world that is gone horribly awry right now and is it in a state of immorality and low consciousness which represents the earth but ultimately we all meet on the level and death is the grand leveling tool and everyone is equal in the light of the Angel of Death and Holdren realize that and perhaps put forward you know a moment of repentance on his deathbed it kind of makes one wonder a little bit at least I took pause at hearing I kind of took pause at hearing one Anton LaVey died he made the statement I wasted it all meaning my life what he did compared to what he could have done what he chose to use his life for in the moment when he was seeing death face to face he finally recognized that that he wasted it all and maybe that's what Holdren realized in his moment of truth but to go back to the story of looking at Astro theology in a perspective of astronomy um let's uh let's revisit I think we looked at this a little bit when we talked about time but let's relook at this because it's going to help us to understand the story of Jesus a little bit better um and you know I've been so getting into this that uh you know I'm not even paying attention of the time we're well past the the top of the second hour so let me give the call in numbers and if anybody wants to call in and ask any questions or make any comments the talk shoot call-in number is seven two four four four four seven four your family in hard times heirloom organic seed when the Joe Joseph Java King an asynchronous Thursdays and Sundays at 8 p.m. eastern fiddling greatness on the Excel Hub News Center [Music] okay we're back on what on earth is happening I'm your host mark passio um let's look at the actual year the Earth's path around the Sun during the course of the year this is going to pave the way for helping us to understand Christianity as the religion of the Sun s un our year is we divide our year into four seasons okay now what you have to understand about how the seasons work and what makes the differences between the seasons is is not anything having to do with the earth being on an elliptical orbit for the most part we can look at the earth as a circular orbit it is not a drastic ellipse so a lot of people think that the seasons are made by the earth being farther away from or closer to the Sun at certain times a year and that is not the case okay the thing that actually creates the seasons is the angle at which the light of the Sun strikes the earth the only real thing that creates the seasons is the angle at which the earth is tilted either toward or away from the Sun okay because the earth is tilted okay at a twenty three point five degree angle with respect to its plane of orbit as it revolves around the Sun so I'll say that one more time the earth is tilted at a twenty three point five degree angle on its own axis of rotation with respect to its plane of orbit okay with respect to the Sun so when the when the earth is tilted toward the Sun on this plane of orbit we call that the summer season because the most direct sunlight is actually being received by the northern hemisphere most of the life most of the human life on earth actually resides in the northern hemisphere of the earth population wise population density wise okay you know at the same time in the southern hemisphere they're experiencing winter when we're having summer and vice versa be close in the southern hemisphere would then be tilted away from the Sun so if it's if the northern hemisphere is tilted toward the Sun okay so the North Pole's axis is tilted toward the Sun at a twenty three point five degree angle the Sun actually is striking the northern hemisphere with more direct sunlight if we go then to the autumn equinox okay this is the you know the divider line you could say right between summer and autumn so this would be at March 20th um you have I'm sorry that would be at September 21st so the Sun the the earth is entering a fall okay the there is no angle at all with which the Sun is with respect to either hemisphere either north or south it is basically striking the earth with equal amounts of sunlight in the northern and the southern hemisphere okay so we call this an equinox because it equally means means equal and noxes night equal amounts of day and night okay so if we looked at the angle that the Earth and Sun actually make with respect to the Earth's plane of orbit around the Sun it's a zero degree angle we look at the winter solstice this is December 21st the the earth is tilted away from the Sun at a twenty three point five degree angle in the northern hemisphere so the Sun appears to be at a 23.5 degrees south angle with respect to the equator of the earth okay so more direct sunlight is striking the southern hemisphere so we say that the winter have the the northern hemisphere is experiencing winter at that time and again we come then to the spring equinox and the Sun is at the equator again essentially no angle with respect to the hemisphere it's a striking the earth directly in the middle and that's equal day and night again so the equinoxes meaning equal day and night the solstices mean that's the largest angle that the Sun reaches with respect to either the North or the northern northern or southern hemispheres so in the winter the Sun is at a 23.5 degrees southerly angle with respect to the earth's equator and at the summer solstice the Sun is at a twenty-three point five degree northern angle with respect to the equator right now that's it sounds complicated when you get a chance to look at the image that I've prepared for this concept in the podcast on the podcast page I think it'll make it a abundantly clear how the seasons work so you can just basically look at it as a sine wave okay the if you want to say the angle that the Sun makes with respect to the Equator starts at zero and then that's the spring equinox then it rises to the summer solstice and it's at 23.5 then it goes back down to zero at the autumn equinox and then it goes all the way down to minus twenty-three point five or in other words 23.5 degrees south at the winter solstice and then it comes back up to zero at the spring equinox again and it repeats so it's like the sine and it repeats I'll see if I could find an image that depicts that it's an easy way to symbolically think of this movement but all that's really going on is the earth is going around the Sun in a circle while it is tilted with respect to that plane abort of revolution that's it that to that plane of orbit so the tilt of the earth is what creates the seasons if the earth were directly upright with respect to its orbit around the Sun there would be no seasons it would be perpetual of spring / fall whatever you want to however you want to look at it the really the same season okay so there's one other frame of reference and I talked about this in the time section to understand the story of Astro theology when it comes to the solar beast cult which is Christianity and that is the precession of equinoxes and all you have to understand with this is that the frame of reference as far as the earth's tilt slowlyslowly wobbles okay it slowly turns in a counterclockwise circle with respect to the stars that we call the zone the zodiac the zodiacal band the twelve houses of the zodiac okay so I posted a movie called the great year in the time section you can watch it to understand the precession of the equinoxes and the reasons that this may be happening in other words why this frame of mode of motion exists and I don't I do not personally believe that the earth wobbles on its own axis of rotation I think that there is another reference frame of motion that science hasn't really fully come to acknowledge yet as to why the earth makes this movement or seems to make this movement I should say I think it's the entire solar system that's making this movement in my opinion but I will not get into that now because that's more complicated so I'll post an image that just shows this motion on precession and what you have to keep in mind to understand precession in the terms we're talking about it in is that all it means is that the rising of the Sun at the spring equinox which is the beginning of acid aerial year okay changes very slowly throughout thousands of years okay and it precesses or moves backwards through the zodiacal houses in a time period of approximately 25,000 years so we will look at that when we start to look at the zodiac which we're going to do right now then when it comes to the appropriateness for explaining where the precession of the equinoxes comes into play in this story I'll do so which is the only reason I brought it up the zodiac is the 12 houses through which or the 12 groupings of stars a zodiac means um it comes from the word animal okay it's these the sky animals essentially is what it means it means what the zodiac is is twelve groupings of stars we call constellations okay that are given symbolic names and images depictions to tell a story of what is taking place in the heavens and this is Christianity is entirely based upon astrology it's based upon stories told about groupings of stars in the heavens through which the Sun passes okay because it's all about the Sun and its journey in the heavens that's what the religion of Christianity is about when it comes to a show theology so we're going to look at the houses of the zodiac and how the ancients viewed these things okay how they viewed these they call them houses for a reason and it's like the god inhabits this area of the sky for a time okay when we say the Sun is in a particular zodiac house or any planet is in a particular zodiac house it means against the background of stars okay if you saw this object the background of stars behind it would contain this grouping of stars that's all it means when we say the Sun is in Aquarius the Sun is in Pisces the Sun is in Taurus etc okay it means if we looked at the Sun if we could see the background of stars that it is behind that is the constellation that the Sun is in front of that the the constellation behind it would be whatever that constellation happens to be so you know we looked at the Sun and Scorpio was behind it in the sky the Sun is in Scorpio we viewed the Sun and Aquarius happens to be the constellation that is actually behind it in the sky the Sun is in Aquarius okay it's the backdrop of stars that are visually behind the Sun so the zodiac what are the houses of the zodiac well we have Aries Aries at the beginning cows of the zodiac at least in modern times in the way we look at the zodiacal year the spring equinox begins just as the Sun enters the house of Aries okay so this is the beginning of the zodiacal year after Aries in Aries is a ram okay after Aries we come to Taurus Taurus is the midpoint of the spring season okay now these are very important symbolic dates at the midpoint of Taurus you have a occult um day that is the celebratory day for that particular season there are four of them they call these Sabbath's there at the midpoint of these seasons okay now this is a pagan belief system but this is carried over into all forms of occultism and particularly dark occultists observe these days and conduct ritual ceremonies and other dealings during these times of the year so in the midpoint of Taurus which is at the midpoint of the spring season in the middle there's three zodiacal houses there's twelve zodiacal houses total and there's three houses in each season for a total of four seasons so the ancients ordered the year into four quadrants in other words they placed a cross on this zodiacal wheel okay and they would symbolically depict the Sun on this cross and describe its journey through these four quadrants of the year which we call the seasons spring summer autumn and winter so the Sun begins at the spring equinox passes through the house of Aries because it is a young lamb okay lamb the RAM okay it goes through Aries enters Taurus and there is loss there the Sun becomes a charging bull all right I'll not let dr. Gould not sure we're picking up something we're picking up some other audio all right looks like that's the intro music yep there it is okay so we'll be right back with more on a show theology and the explanation of the zodiac and the sun's trek through it in just a moment hold on Hertz [Music] did you ever wish that he could have done something while you still have a chance what will you do your income ends tomorrow or if you lose your home is many all he had hey Mar trade show run Bob how are you man I'm doing well how are you today not bad not bad a lot better than last week Yeah right and yet they're faster tell him yeah yeah it was weird it was kind of just a couple hour long thing and then it passed right away which is good I guess I got you make get all the windows and spray chemtrails and stuff just a couple days before whatever and you get these weird little cakes man trying to keep my immune system strong you know good many eat healthy eat the fresh stuff and have to have aloe vera shake so if you haven't watched the video I put together on that and check it out listen I'm one brake go with the it's a hog news network and Destin check out and sponsors over there and I don't think that the others on either top should necessarily have to hear it every time so I wanted to just jump in say hello real quick sure well you had two motors minutes on the birth tell you that I'm apologize for pressing the wrong button there last commercial gonna be out there cuz that you're not getting some really interesting stuff I've been listening patiently oh you know the principal and put it on the board here are no promising you know accidents happen yeah managed this is human this is better it's part of the we feel merciless of our radio anyway let's get back to the show mark cover Vatican break take a camera thanks mom the only way out if you expose the overtime indicates no ads in the world order here we are one together long detailed ordered the l43 humanity and sneeze Jonah in the drive-in thou of the calm you get your non-hybrid feedback now with the only economic crisis who's George's and other types of disasters now is the time to be ready to click on the heirloom organics banner at the top of our block we will paint today to cure your future in the future of your family in hard time heirloom organic seed charlie Oh Joseph John King and AC Griffith Thursday and Sunday evening at 8:00 p.m. Eastern for fatal aquario on the Intel hub news network [Music] [Music] okay we're back after that final break here on what on earth is happening simulcasting on the intel hub news network so we were talking about the zodiac and the sun's journey on it that the ancients symbolically depicted by creating a wheel of the zodiac houses because it is a band of stars that form a circle in the heavens and they depicted this symbolically by making the houses into a wheel quartering them into four quadrants by placing a cross upon that wheel and then symbolically placing the Sun upon that cross in order to depict and demonstrate the sun's journey through the houses of the zodiac during the course of the year so I'm in the process of beginning to tell this esoteric story okay of what the Christian religion is actually all about and it is all about astrology it's about the Sun of the sky and its journey in the heavens begins in the spring equinox passes through Aries okay it is still young like a young lamb it then comes to Taurus the midpoint of spring the mid house of the spring season but it is gaining in its strength because the Sun is rising in the northern hemisphere it is coming from its zero point at the spring equinox in which the angle that the Sun makes with respect to the earth's equator is zero degrees and it is beginning to come up in power in strength in heat okay in the northern hemisphere so it is rising slowly in its angle with respect to the equator in the northern hemisphere it's at the midpoint it has become a charging bowl because it is gaining in its strength Taurus the midpoint of the house of tars is the sabot on May first known as Vall purchase knocked okay this is one of the main Sabbats of the year in the pagan traditions that basically use a show theology and zodiacal symbolism the next house is Gemini the twins okay when the Sun comes in to these houses it is approaching the summer solstice when it crosses the line between Gemini and cancer the next house Cancer the crab it has come to its highest point when it hits that midpoint between those two houses it has come to its highest point that it's going to go to in the northern hemisphere of the earth twenty-three point five degrees north this is called the summer solstice the high point of the Sun that's the beginning of the summer season so the Sun passes then through cancer the crab until it hits leo the lion that's the midpoint of summer the Sun has become a roaring lion the king of beasts with its huge main representative of the Rays of the Sun in summer its strongest season okay the midpoint of Leo is August 1st which is lamas that is the midpoint where the both the Sabbat of the summer season here's where the Christian symbolism begins to come into play at the end of summer the Sun goes into the house of Virgo now virgo is the virgin and again we just talked about the virgin birth the reason that the houses of Virgo and Leo play into some symbolism is because thousands of years ago this is where the spring equinox actually was at again the equinox precesses or moves backwards through the houses of the zodiac so if we count we see that over ten thousand years ago five zodiacal houses the Sun was between Virgo and Leo almost six thousand years okay it is now in Pisces so we're talking about almost on the other side of the zodiac let's say about a little over five thousand years ago this is symbolically depicted by the Sphinx the Sphinx has the head of a virgin and the body of a lion depicting that the zodiacal year when the this things would look at the spring equinox on the eastern horizon would begin in Virgo and end in Leo the body being a woman I'm sorry the face being a woman and the body being a lion or the tail ended up being a lion so this is a zodiac in stone at Giza and there are many others like that throughout the world symbolically depicting that the the Sun had one particular head which was the season that it began the year in and the the body and we're a hind end of it is a completely other animal okay the zodiac representing the animals of the sky or the sky beings in which the mythos of the zodiacal stories are constructed in the virgin birth as we talked about what it really represents okay if we understand that the son has a birthday and a death day in this story we're coming to that in a moment let's just keep in mind where virgo is in this story so it is at the is the sixth of the twelve houses okay so Aries is the first tarce the second Gemini the third cancer the fourth leo the fifth and then Virgo the sixth house this is that house through which the Sun passes just before it hits the autumn equinox or the fall season this is the time of the year when the Sun again is at a zero degree angle with respect to the equator of the earth yet it is beginning to go down into the southern hemisphere so it is beginning to fall or descend in its power okay to go into the southern hemisphere in other words the point where it comes above the southern hemisphere is the spring equinox and the point where it goes below into the southern hemisphere is the autumn equinox so this would be around September 21st the Sun that enters the house of Libra which is depicted as the scales now in the time that in the time that um the Sun esta is in Virgo it is visually above a constellation known as the Southern Cross when it's beginning to hit this point of the autumn equinox okay the now it's not in the the constellation of crooks the Southern Cross it is above it okay it is above the constellation in the southern hemisphere known as crooks cross this is called the Southern Cross so if you look at the Sun while it's in the house of Virgo okay if you just look at any stuff if you look at any sky a globe and you look at the path of the Sun as its entering Virgo you'll see that below that there is a constellation in the southern hemisphere called crooks CR u X the cross in Latin that means the Southern Cross the Sun is on or on top of the Southern Cross at the time it enters it is actually uh in the house of Virgo and beginning to enter Libra okay so this is the time of the year that the ancients said that the Sun was on the cross now if that doesn't mean that it's inside the crooks constellation the Sun you're not going to see it inside the crooks constellation okay at the equinoxes you're going to you're going to see it above crooks meaning it is on top of the cross symbolically so this is the time that the Sun was placed on the cross and began to die think about this symbolism it's placed on the cross and it is now in the season where it is declining in its strength and is about to die or is dying beginning the process of dying okay it then passes through Libra and then through Scorpio the scorpion the midpoint of autumn and the midpoint of this season is October 31st that's known as soin or Halloween okay another Sabbath the midpoint of autumn tests now Scorpio is the time when the Sun is really beginning to descend in its strength okay it's made it halfway through the autumn season is approaching its death point at winter at the winter solstice the lowest it ever goes with respect to the equator so when it's at Scorpio it is said to have been stung by the venom of the scorpion and it is now in rapid decline the power of the Sun is now in rapid decline until it hits the constellation Sagittarius okay and then finally it hits the winter solstice which is the lowest point of the Sun the death of the Sun symbolically has occurred when the Sun is at its lowest point in the southern hemisphere 23.5 degrees south with respect to the earth's equator the ancients said that the Sun had now died on the cross of the zodiac the process of its death began at the autumn equinox when it started falling into the southern hemisphere now it's as low as it's going to go in the southern hemisphere and therefore this is the death point of the Sun okay so the Sun is at 23.5 degrees south the lowest it's going to go its lowest strength and love in the mouth and visually visually there it it visually the Sun stops moving with respect to day a warm and you know I'm that again the man up here he's getting into low teens right oh one second forget some audio crossover here okay so uh I see hold on I see that Bob says we have a caller all right we have a few minutes left I am going to I'll take this call and we'll get we'll finish up this story of the Sun on the zodiac next week so a bob if you can hear me if you want to put the caller through who call it in the blog talk well we'll take that right now hey LM are here mean word yes the car poll around there well I'll talk is all that stuff well you have Lyman tonight online he wanted to say hello as usual he's snow listening basically okay no problem so that we lost him at mute and was a canned over there shell I had a personal but go ahead bonds and today there we go right hello dokie I hear me guys yes how you doing Bob good mark I don't I think interrupted gander on at all and I'm interrupting I apologize to the archives people who listen this ladies and gentlemen I apologize I just want to say how important all this stuff is more the everyday person love me the women who this might seem a bit tedious now I'm not trying to take frame art but it is desperately important I'm gonna tell people watch these doors are called this use and I'm quoting loss ratio the twelve fans of the zodiac as means to imprison us further in their nature to the control now I'm getting the mayor took control but they use marked quotas they used it says I guess twelve opportunities to imprison us they calculate the most opportune moment moments of time using the Stars I he against us and Mark what he is doing is helping us take back that knowledge thank you again Mark I find myself thanking you for what you're doing on what you're speaking about and also you mentioned the festival of selling or selling there's also a witches festival known as Walpurgisnacht you know those you could comment on that in a future show thanks mark for all that you do you got a bob thing thanks so much and Bob yer you're never interrupting here feel free to call in at anytime as should anyone else who has something to contribute we have unlimited amounts of time because we'll just pick this up next week like we always do you know we go through it until the time is up for the show like it is a rapidly approaching now we have about a minute left in the show and then we pick up next week so not a problem at all we will continue with this story of the zodiac and the Sun upon it when we get together next week here at the same time on what on earth is happening Bob I want to thank you and yes I briefly mentioned while purchase not which is the Sabbath at the midpoint of spring it is the high point of the dark occult year and we'll talk about what that means on another show when we get into some of the aspects of dark occultism when it comes to a solar cult so that's all we have time for here in my own what on earth is happening folks I'm your host mark passio website what on earth is happening calm Network the Intel hub news network calm I'll see you here next Tuesday night good night everyone [Music] you

What On Earth Is Happening Show #039

Topics: *Mind Control Methodologies, Religion, Astrotheology, Zodiac, Sun Saviors, Astrology, Mystery Traditions*

[Music] welcome one and all you're listening to what on earth is happening right here on the Intel hub news network I'm your host mark passio today is Tuesday December 21st 2010 the winter solstice my web site what on earth is happening calm the networks website the Intel hub news network calm we have a good show lined up for you here today we're going to be continuing our talk on Astro theology religion as Astro theology and indeed religion as one of the 14 methodologies of mind control that we'll be covering on this show before we do that I want to give the call in numbers and I have a few event announcements you want to call into the show at any time feel free no taboo topics ever on this show you have your choice of two calling numbers you can call the talk stream network at seven twenty four four four four seven four four four once again seven two four triple four seven triple four you call that number the call ID number that you will be prompted for is eight three five one five once again the call ID number for what on earth is happening eight three five one five you can also call the blog talk network that's six four six seven two seven three three eight seven once again six four six seven two seven three three eight seven I have a few event announcements that are for events that are coming up in the Philadelphia area we are doing a third fundraiser for the free or mine conference which is coming up in April some kind of bad news about that regarding the ability to raise funding I'll get into that in just a moment but we are going to host a third fundraiser this was arranged before we kind of started to recognize that we're having some issues as far as a monetary concerns go and bring people in from out of town but we had previously booked this fundraiser with germ books and gallery a great bookstore in the fish town section of Philadelphia so this event is going to be Sunday January 16 2011 at two o'clock pm at germ books and gallery germ books is at two 2005 Frankfort Avenue 2005 Frankfort Avenue in Philadelphia the admission for this event is $10 all proceeds will go to the free your mind conference there will also be a donation made by Dave the proprietor of germ books of twenty percent for any book that is sold during the fundraiser I think that toward the free your mind conference I think that was very kind of Dave to offer that as part of this event the free your mind conference fundraiser number three Saturday January 16 2011 at 2 p.m. at Jaron books this is going to feature two very special one-of-a-kind presentations one-time-only presentations I will be giving a lecture in quite a presentation and lecture entitled everything I needed to know in life I learned by watching The Wizard of Oz this will be an exploration of the esoteric occult symbolism contained in the perennial classic movie The Wizard of Oz patterned after the book of course by Alf frank bum also Michael Austin Melton a co-host of the free your mind conference he is also a field investigator for Pennsylvania mutual UFO network he will be giving a presentation entitled the history of mind control in America the history of mind control in America so I'll redo a little a paragraph couple paragraph I guess you could say update that I gave on the free your mind website and also on my site about how we've been encountering problems with the fundraising effort for the conference the the goals of this conference I don't think we're too out there to raise about you know nine thousand dollars to host this event is an extravagant amount of money compared to what some people spend on other endeavors but you know none of us who are hosting the conference are rich per se and you know we've hosted many fundraisers over the last couple months and made a lot of pleas for help through our own mailing lists and websites and there's been very very little response so unfortunately due to the lack of funds and poor advance ticket sales so far for the conference we currently lack the ability to provide the travel expenses for many of the speakers who we were planning to bring in from outside of the Philadelphia area unless this situation changes the free your mind conference will likely have to be scaled back significantly maybe to a single day instead of two days I cannot even find the words to express how sad and disappointed I am about this in a city of millions of people who regularly spend a lot of money on entertainment of all kinds we could not raise seven thousand dollars over a period of six month period for an educational effort that is directly related to whether or not we will live as free beings on this planet in our near future it really displays where our priorities as a species lie and at least for me it paints a clearer picture of what the future holds in store for humanity so I said uh you know as part of the announcement for this fundraiser with that having been said in any event Michael Milton and I will be giving these unique one-time-only presentations on January 16th and regardless of what happens with the fur your mind conference it should be a great day at German books and I guarantee that if you come out to this event you will learn a lot so that was my you know update and I guess you could say plea to the people of the surrounding area or wherever they may be to support the efforts of this conference but you know sadly I just feel to be quite honest with the listening audience that most people do not really understand what is going on around them they don't understand mind control they don't think it's a problem they think the problems are all sin political and and social um and it's something much deeper than that I you know I can't even express how much deeper than that it is if you listen to the show you could you know kind of get an idea of how much deeper the problem really goes but there are so few people that really understand those dynamics that it's uh it is a paltry few who do get it it's not a matter of who who isn't undermine Condor mind-control it's a matter of who isn't under my control as I've said many times and very very few people understand the the psychological manipulations that are really taking place uh and are being wielded as a weapon against our species sadly because they are under those manipulations and you know you can't get somebody who's hypnotized to you know be able to see what the hypnotist is doing to them unfortunately they need to come out of the hypnosis to do that so it's kind of like a catch-22 and the only thing that really will provide that is a willpower strength of will looking at the truth objectively without any emotional attachment to it and deciding to go wherever that path and that journey leads and sadly you know I I it's come to a point where I feel that there are so few who are willing to do that but um there's there's very little chance of anybody really understanding the deeper dynamics of what's going on that that being said I'm still not going to stop doing what I'm doing why because it's the right thing to do because it's you see people going over a cliff and they don't know they're going over a cliff you warn them until they actually go over the cliff you know if they don't want to listen they don't want to pull back you know the my responsibility was taken care of and I did what I was charged to do and that's the way I look at this so does that mean I'm going to give up no I'm not going to give up speaking the truth and telling people about what's really going on which I do understand I do know what is actually taking place as far as the methods of mind control I try to do my best to expose them and talk about them in a clear and understandable way here on the show but you can't actually make people listen if they want to get hurt they want to get hurt and nothing short of their suffering and the immensity of suffering that they're going to need to go through is going to awaken them so good luck because of um you know the path that most people are on can't lead to anything except suffering and chaos and it appears that that's what they want and that is what they shall have so you know with that having been said I'll move on to the next event announcement Saturday January 22nd truth freedom prosperity will be hosting a networking social at Liberty's pub on the second floor at second and Fairmount streets in Philadelphia this will also kind of double as another for your mind fundraiser they're going to be making some of the leadership at truth freedom prosperity is going to be making a plea to some of their membership to contribute to the free your mind conference effort do I think that will be successful to be honest I don't really think enough people understand as I've said what's really going on as far as mind control is concerned you don't hear them bringing this up in other events you see a very small core group of people that do understand it and grasp it but it's a tiny amount in comparison to the numbers of people that do even belong to these activist groups and while this is one of the best activist groups in the area many of their I'd say the majority the majority of their membership do not really grasp the dynamic again about the human psyche the occult you know they don't they don't think there's anything occult happening they don't believe in the occult they don't believe in mind control period you know they again a lot of them think it's all political financial motivations that have look that have largely to do with greed and they don't understand that this is about the human soul is what this is about folks this is about the human soul let's make no mistake about it okay let's put it right out on the table and very clear and easy to understand terms that mints note words this is about the human soul and the problem with most people is they don't believe in the human soul they think that this is a you know a biological machinery is what we are and they think the only thing that's motivating the factors that are going on that we don't like is greed well it's about so much far beyond that okay that's one of the symptoms that's not the one thing that's going on that's not the root factor okay that's one of the the vehicles for this control because ultimately what's about what it's about is owning your soul okay now there it is said right out in the open and that takes place do the control of the human mind that's how that takes place and you know what they largely got just about everybody on this world just about everyone the people that are even fighting these people all right I'm going to take I'm going to take a segue from this because if you can't tell I'm a little bit frustrated and you can't tell you know that things aren't exactly really going well and it's not just because of the conference it's just the general dynamic the general overwhelming um general feeling I mean the last conference fundraiser we did there was hardly anybody there because you can't even do anything in the month of December people are under such mind control with the holiday season which we're going to talk about tonight okay we're going to talk about the death and rebirth of the Sun all right the death and birth of the Sun we're at the death day of the Sun folks did you know that today is the son's death day okay and it's all about the Christian religion and it's all about how the the Christ the people actually worship in the Christian religion and a modern Christian religion anyway is the actual Sun in the heavens they've convinced people to actually worship the Sun believe it or not okay and Christians who will doubt this and will insist that that isn't the case and they're worshipping a story and we've been talking about this over the last couple weeks but I'm gonna really lay it out today I'm going to go through the story of the zodiac I began doing that last week but we didn't really get a chance to finish that I'm going to recap that go through go through that whole basic process again of how the Sun journeys through the zodiac and indeed that is the story of Christianity the people have been deluded into worshipping so um we'll do that coming up but you know you can't you can't even do anything in the month of December anymore it's a wash you know because it's so close to this Christmas holiday that people trample themselves over to get to cheap goods manufactured uh you know in third world countries you know to give to people that they couldn't give a damn about for the rest of the year because they're hypocrites and you know they think that they give somebody a gift and that means uh you know that they're a good person or something you know and they do this all by rote it's all mind control it's all it is it's all the whole holiday is because of that you can't even plan anything for the for this whole month in general people don't can't do anything everything centers around that the whole the whole frenzy of Christmas shopping in and uh you know getting ready for this you know couple of days you spend with people that you don't even really want to be around and can't be honest enough to admit that not only to them but to yourself now I don't participate in the Christmas holidays folks and it's nothing it has been taken away from me that I miss in anyway because my family is completely unconscious and they want their suffering just like other people most other people do there's hardly anybody in this family that that is conscious or active there's a couple of people that grasp it to a very minor extent and they do nothing with that knowledge or next to nothing with it okay so you know I don't spend my time around people like that they may be blood-related to me but they're not of my heart so you know I'm not attached to that and I'm not going to you know go around pretending like I want to be around people that I don't really want to be around so I mean you know just call that callous or harsh but that's how it is you know I I spend time with people who are really trying to help people truly in the world and do the right thing that's who I prefer to spend my time around and I've given up my life to do this giving it up giving up all the desires I had of what I wanted to do will accomplish with my personal being with my personal existence here on earth to do this act and that's all I do that that's you know aside from the point the main point of that the mind control of the Christmas season is so strong you can't even compete with it by even scheduling an event even remotely around it so hopefully you know I figured I'll give it one more month in the month of January to see if we get any kind of a response and if anybody is really interested in this maybe once the mind control of these ridiculous holiday season the holy days are over and people actually you know then come back to the real world instead of this this day that they go around with during the season and that exists nowhere except in their own minds it's same day as at any other day of the year folks you know there's nothing different or special about it you want to treat people well and you want to have a spirit of brotherly and sisterly love do it throughout the entire year 365 days a year try that instead of believing there's something special about the season that surrounds the Sun the time of year that the Sun Goes Down to the via the Tropic of Capricorn ok because there's nothing special about it other than it gets cold so anyway going back to this second fundraiser event in January January 22nd Liberty's second and Fairmount Street this is hosted by truth freedom prosperity and it will kind of double as another fundraiser event again they'll be making an appeal for people to help out with the conference for more info on this group go to truth freedom prosperity org and then finally the free your mind conference itself a conference on consciousness mind control in the occult set for April 9th and April 10th 2011 10 a.m. to 8 p.m. on both days this is a true Bohol 414 Green Street in Philadelphia the admission price is $20 per day in advance $30 per day at the door confront speakers Erin McCollum Alford lever Andrew basiago Bob Tuscan farad you're dozing yawn Irvin John Nicholson Larkin Rose Laura Eisenhower mark motika mark passio Mel fàbregas Michael Kelly and Suzanne Taylor now as far as I'm concerned I don't I can't really guarantee every one of those speakers will be there now because of you know the poor response with donations and ticket sales so you know we'll see what happens we'll try to bring in as many people as humanly possible but unless people step up and want this event it doesn't happen on its own and that's all I'll really say about it so let's jump into the show what I want to do before we do that is I want to make a correction to something that I said inadvertently last week I was talking about a Dominator who had died and was repenting about a war he was instrumental in on his deathbed and I incorrectly said that that was a Holdren John Holdren and now John Holdren is not the person who died in the middle of last week or early last week I should say it was Richard Holbrooke Holbrooke I got the names of mixed up in my head I did not actually have the article that I was reading in front of me and you know the last names are similar so I apologize for that John Holdren is the sciences art of Barack Obama Richard Holbrooke was special emissary to Afghanistan and you know you can see the names the last names begin with saying three letters so I got a little bit confused there and I apologize for that John Holdren is alive and well folks it was Richard Holbrooke Richard Holbrooke who died and was the globalists who kind of repented on his deathbed about the war in Afghanistan so I apologize for that mistake and uh there's the retraction so I hear the intro music for the first break playing when we come back we're going to jump right back into the story of Astro theology when it comes to so dr. bass mr. Naimark a CEO you're listening to water this happened right back upon a very wealthy US citizen is predicting that in 2011 we will witness the most important day in America in more than 50 years he says it will change everything about our lives the way you shop travel and desk educate your children and even how you take care of your help and family now this man has made some outrageous predictions over the year but the crazy part is he's usually right you see he predicted the clouds of Geum and Mae Freddie Mac and America's biggest mall owner General Growth Properties a few years ago in fact Bareilles called his work a dire prophecy now this has nothing to do with the stock market but it could have a huge impact on almost every aspect of your life and recently he created a video which you can watch online for free detailing as biggest and most important predictions in the act it's a real eye-opener I can't stress this enough you should at least watch this free video online today he explains everything you need to know including simple steps you can take to protect yourself you can find the video at www.americanoutback.net DW end of America the number 8 comm watch this free video at WWE end of America EECOM are you still paying your credit cards and so-called bank alone thinking that you owe the money you feel like it's your moral obligation but can't see an end in sight well what if I told you that in truth you don't know it's single penny and that the bank's know this they hope you don't find out here's where we come in we to prosper calm specializes in a profound debt repudiation ethic which challenges the validity of your so-called debts morally frees you from the burdens and protects your property our system is often superior to settlement bankruptcy or consolidation which often leave you in a worse situation if you feel the moral obligation to take care of yourself and your family then I urge you to consider taking action right now the economy will not wait if you want to know more so you can prosper through the economic collapse all while staying honorable and true to yourself they call eight seven seven four one seven eight three nine three that's eight seven seven four one seven eight three nine three or visit three to prosper calm it will where clock offences and all I don't STDs control of the population total tyranny is amongst us a burden of Mary net on our shoulder be on the way out if to expose the global crime syndicate known as a new world order together we are all one together nah inhale Voyager's the L for 3G many agencies do not in the fight Eatontown club.com [Music] all right folks were back on what on earth is happening I'm your host mark pass here the website what on earth is happening calm last week we left off talking about the story of the Sun as it progresses through the houses of the zodiac and how this is actually a reference to the modern day religion of Christianity Christianity is actually borrowing from this ancient story of the zodiacal Trek of the Sun and it is incorporating that into its biblical allegories and most people don't see this and they don't understand that in fact what they're really worshipping is the story of the Sun not the Sun som but the Sun s UN and we started this story but I'm going to recap it this week to do it all in one shot you know I often say you can uh you know help people to really instill something in their mind by repeating it again so you know I didn't really get a chance to finish this last week but I'm going to pick it up from the beginning now what I want to do is direct people toward my website and if you go to the podcast tap podcasts tab on the website so at what on earth is happening calm you go there and then you click the tab up at the top that says podcasts the most recent podcast posted on the page is show number 38 that was last week's show if you click image under the related images if you click image number 16 you will see an image of the zodiac with um the cross as the ancient split quartered the zodiac by placing this cross over top of it an equal armed cross okay and then upon that cross they would place the Sun and then perceived it basically tell the story of how the Sun proceeds through the constellations of the zodiac and we started doing this last week I'm going to pick it up and we'll talk about the spring equinox okay so this is the time of the year when the angle that the earth makes with respect to its plane of orbit around the Sun okay the Sun striking the earth the sunlight striking the earth okay is that basically a zero degree angle with respect to the earth's equator okay so the earth is tilted with respect to the Sun at a twenty three point five degree angle as the earth goes around the Sun this makes the arc of the Sun as it rises and sets in the sky okay go upwards and then downwards and it keeps doing this through the course of an entire year cycle it will rise up to its highest point at the summer solstice and go back to zero at the autumn equinox and go all the way down to twenty three point five South with respect 23.5 degrees south with respect to the equator at the winter solstice that's where we're at now we'll get to that in a moment but if you picture the Sun at the spring equinox okay it is at the dividing line in between the constellations places and Aries in this Simpson Baalak image that I underestimate this explanation easier to grasp by looking at an image okay so you look at the line that divides Pisces and Aries Aries being the first house of the scenario zodiac all right the spring equinox is at that dividing line this means that this that the earth receives equal the earth receives sunlight at a zero degree angle with respect to its equator that the Sun is actually striking the earth basically equally it's not in the northern hemisphere it's not in the southern hemisphere so there is an equal amount of day and night because the Earth spins on this on its axis and that axis of rotation is actually completely perpendicular to the angle at which the Sun is striking the earth therefore the northern hemisphere doesn't receive more sunlight and the southern hemisphere doesn't receive more sunlight they receive the same amount at this day called the equinox okay that's what equinox means equal night equal night it's same amount of light and darkness all right now the Sun rises into the northern hemisphere begins its journey right from the equator upward into the northern hemisphere as the year progresses as the year progresses the Sun can be seen during it in front of different zodiacal constellations as the year goes on so it starts in Aries and then in this season where it is gaining strength because it is starting to move northward so we're looking at this all from the perspective of those living in the northern hemisphere and there's a reason for that the religious traditions come from the northern hemisphere most of the people of this planet live in the northern hemisphere I think it's a 70/30 split if I'm not mistaken approximately the population that lives in the northern hemisphere compared to the southern hemisphere okay so the northern hemisphere is what we're considering the spring season during this time of the year when the Sun is in Aries all right it is coming farther northward therefore it is gaining in its strength so when it hits the constellation of Taurus the ancients would say that the Sun had become a bolt in its charge it was gaining strength it was coming on strong okay like a bull now the word bull is used in finance bull markets when when stocks are going up okay because this is the sperm midpoint of spring it's the defining constellation for spring Taurus the Bull this is the most important o cultic holiday of the year occurs during the midpoint of this constellation Taurus May 1st while purchase nacht st. valper juses night it is known as it is also called Beltane ok May Day May 1st now the symbolism May is the fifth month of the year and it's the first day that this is celebrated on so 5:1 and there's a lot of symbolism surrounding the number 51 of course there is the the covert base at Groom

Lake called area 51 ok there is P D D or presidential decision directive 51 which is concerned with martial law made a is a distress call ok the the spring fertility rites are celebrated during the May season ok specifically May 1st that's what this was in the pagan ancient pagan year fertility rites often a sacrifice we'll talk about the season of sacrifice soon not just yet but the sacrifice was often made to the earth and to the Sun to ensure a bountiful harvest because this is this is planting season you plant during this time ok you actually plant earlier than this you plant in the beginning of spring but this is the time when you're really trying to make sure that you're going to get a harvest that is going to sustain you through the winter months because the harvest would come in during the later part of the summer season but if the crops aren't thriving here it's a it's a very unlikely that you're going to be sustained throughout the harsh winter that lies ahead during the basically five to six months when things grow poorly or not at all okay so the midpoint of spring Val purchase knocked or Beltane this is considered a very high holiday in the pagan occult year okay the highest actually so let's move on past the spring season that the the Sun then would progress past Gemini the twins and then it would reach the summer solstice the highest point that it's going to go in the Northern Hemisphere it would be at the Tropic of Cancer on the earth which is at twenty three and a half degrees northern latitude because this is where the Sun the angle that the Sun is striking the earth is at during this time of the year it's the highest point it's going to go twenty-three point five degrees north latitude in relation to the equator okay so it's the highest arc of the Sun that it makes as it as if the Sun goes across the sky from east to west this is the highest arc that it makes during the year it's the longest day of the year therefore in the northern hemisphere okay it passes through cancer the crab and then it arrives at Leo the Lion at the midpoint of summer so the Sun has become a roaring lion with a huge main representing the Rays of the Sun at its full strength during this time of the year and the midpoint of this season happens at the at the midpoint of Leo okay this is August first this is called Lamas day or midsummer okay so this is a secondary Sabbath or holy day in the occult year or pagan year the solar cult year is what we're really talking about when it comes to Astro theology okay now we're going to enter the time of year when the Christian symbolism becomes apparent because after Leo we enter the house of Virgo the virgin and as I said the ancients depicted when the Sun would rise at the spring equinox between Virgo and Leo because the the the seasons of these the equinoxes precess backwards through the zodiac so who went backward in time around 10,000 or so odd years ago the spring equinox would have occurred between Leo and Virgo okay so this is depicted symbolically instincts the beginning of their scenario a year was Virgo depicted as the head of the Sphinx Virgo the virgin and then the body of the Sphinx is the tail end of the year which is Leo the Lion okay so that's a zodiac in stone that is on the Giza Plateau facing east toward the Rising Sun at the equinox Virgo the virgin the birth giver of the Sun saying she would give birth to the son that was the beginning of the zodiac the beginning of the spring equinox when the Sun would be given birth and be born into the northern hemisphere you have to look at look at this symbol as the vertical line that goes from I'm sorry the horizontal line that goes from equinox to equinox the horizontal arm of the Cross of these solstices and equinoxes as being the dividing point between them when the Sun is in the northern hemisphere and when the Sun is in the southern hemisphere so the arch at the top from Aries to Virgo okay aries taurus gemini cancer leo Virgo okay is considered the favorable season the favored season of the year the Sun is in the northern hemisphere it's when crops thrive it's when there's warm weather life in general thrives in the northern hemisphere the dark season okay or the misfortunate season however you want to look at it they had many words for it would be the seasons that the the times of the year below that horizontal arm of that cross okay so the bottom arc going from Libra to Pisces libra Scorpio Sagittarius Capricorn Aquarius and Pisces this is the dark season of the year in the ancient world they really only considered two seasons the time when the Sun was in the northern hemisphere in the time when it was in the southern hemisphere that was it they didn't really consider that there were four seasons like we do they considered a temperate or one time of the year and then a cold time of year an extreme time of year a dark time of year okay in general so that is not to say they weren't aware of the you know times that the Sun is at its peak and and lowest point as we're going to talk about particularly the low point because that is today and then I didn't plan this like this you know people may think I plan to talk about this concept on the winter solstice I did not it just worked out like that that's how synchro mysticism works and uh you know this just happens to be that the show that I came up to at this time of the year and uh you know happens to be the very topic we're talking about on the equinox itself I'm sorry on the Solstice itself the winter solstice so when that when the Sun is in Virgo okay it is approaching a place in the in the sky when it is getting ready to go near the southern hemisphere it's going into the southern hemisphere dropping below the equator point and there is a constellation in the southern hemisphere known as crooks well if you look at Virgo okay and then you go below the constellation Virgo there's a constellation they're called crooks CR u X this is the word for cross in Latin the ancients would say that this time of year the Sun had been placed upon the cross of Brooks Southern Cross there's the intro music we're on this tax break to continue to talk about asteroid theology related to enough solar cycle comeback are you still paying your credit cards and so-called bank loans thinking that you owe the money you feel like it's your moral obligation but can't see an end in sight well what if I told you that in truth you don't know a single penny and that the bank's know this and hope you don't find out here's where we come in free to prosper calm specializes in a profound debt repudiation method which challenges the validity of your so-called bets morally frees you from the burdens and protects your properly Allen system is often superior to spell and encrypts your consolidation which often leave you in a worse situation if you feel the moral obligation to take care of yourself and your family then I urge you to consider taking action right now the economy will not wait if you want to know more so you can prosper through the economic collapse all while staying honorable and true to yourself Finkle eight seven seven four one seven eight three nine three that's eight seven seven four one seven eight three nine three or visit free to prosper calm right now hey if ye Thursdays and Sunday evening at 8:00 p.m. Eastern the freedom League radio on the intent of music they very wealthy us Nichkhun is predicting that in 2011 we will witness the most important day in America in more than two years he says it will change everything about our lives the way you shop travel invest educate your children and even how you take care of your health and family now the man is made to outrage its predictions over the years but the crazy part is he's usually right you see he predicted the collapse of GM Danny Mae Freddie Mac and America's biggest mall owner General Growth Properties a few years ago in fact Bareilles called his work a dire prophecy now this has nothing to do with the stock market they could have a huge impact amount with every aspect of your life and recently he created a video which you can watch online for free detailing the biggest and most important prediction yet and it's a real eye-opener I can't stress this enough you should at least watch the free video online today he explains everything you need to know including simple sketches you can see to protect yourself you can find the video at WWE wh calm although this video may be offensive to some audiences it's worth checking out again that's WWE end of America the number eight comm watch this free video at WCW end of America eight calm you are risky TV Intel hub network compression [Music] by piece [Music] ok everybody we're back on what on earth is happening on your host mark passio we are talking about the solar cycle as the Sun goes through the 12 houses of the zodiac and how this relates to Christianity and we're going to get to that in a moment we're going to really start to see how this relates to the story of Jesus and we're beginning that process right now because I was describing what happens when the Sun begins its trek into the southern hemisphere this is the beginning of the season that we call fall because the Sun is beginning to lose its strength it is now not only at the midpoint of its power but it is now waning in strength or dying okay so it is said in the ancient world that the Sun was put upon the cross during this time of the year so it began its suffering and its descent okay it is said to be on the cross because it is above the constellation crooks in the southern sky during this time of the year okay if we look at the constellation of Virgo the virgin we can see that below that in the southern hemisphere is a constellation called crooks if you look at image 17 on podcast number 38 that I posted last week you'll see an image of crooks the Southern Cross constellation okay so the Sun is said to be placed upon this cross at this time of the year the autumn equinox that's September the 21st okay again this is a time of the year that the angle that the sun's rays strike the earth with or basically at a zero degree angle with respect to the equator of the earth so oh it is again equal amounts of sunlight in the northern and southern hemisphere all right so that's called an equinox and this is the autumn equinox because the Sun is now entering beginning to enter the southern hemisphere and is losing strength okay so it passes through the house of Libra and then it passes through Scorpio Scorpio the scorpion is the time of year when the Sun is really beginning to leave scrunt because it is said to have been stung by the venom of the scorpion okay so this is the midpoint of the fall season or autumn and this time of the year the midpoint of Scorpio is another sabot and it is called soin or holo mass or Halloween okay so this is another one of the four main Sabbats of the solar cult year the pagan or occult year in general after the Sun passes through Scorpio it enters Sagittarius which is essentially where it is that now okay and when it when it comes to the dividing line between Sagittarius and Capricorn it is now at the lowest point that it is going to go during its course of the year it's at its lowest point of power and strength it is at 23.5 degrees south latitude with respect to the equator of the earth 23.5 degrees south latitude is the angle at which it strikes the southern hemisphere so the Sun is completely as low as it's going to go in the southern hemisphere and it's arc in the northern hemisphere is the lowest therefore this is the shortest day of the year and that's today folks the winter solstice and now the winter solstice happens on December 21st or 22nd okay when it happens on the 22nd it is visually to the good I actually what regardless what happens visually to the naked eye it appears not to move the arc of the Sun with respect to its position in the sky appears to stay stationary for a course of three days okay so this was said to be the time period of death for the Sun and if you look at slide number eighteen on this series of images if you're following along on the website hopefully people can go up and get some of these images because I think they make this pretty clear um this is the time of the year that the Sun is said to have died upon the cross of the zodiac okay it is on the the bottom arm of the vertical arm of this Cross which represents the solstices so the winter solstices the winter solstice is the bottom arm of this cross this equal armed cross the quarters the zodiac and this represents the time of the year that the Sun is at its lowest point of power it is at the lowest place in the southern hemisphere it is said to it is said to be have died upon the cross upon which it was hung three zodiac houses earlier okay so we saw at the autumn equinox the Sun is placed upon the cross of crooks and then at the winter solstice it dies upon the cross of the zodiac itself so the cross symbolism is repeated and the death upon the cross symbolism comes forward here so this is the death day of the Sun December 21st 22nd visually to the naked eye the arc of the Sun and its progress southward halt it stops you can't see it making any noticeable change to the naked eye three days later you can begin to notice to the naked eye the visual position of the Sun the change in the position of the Sun visually okay and it begins to move back northward because of course it is simply now the position of the earth is changing with relation to the son and now the sun's angle slowly starts to come back northward toward the northern hemisphere again so the days start to get longer again during this time of the year the winter season they slowly get longer okay the first day of winter is the shortest day of the year the winter solstice that's today three days later okay we see the symbolism in Christianity three days later okay the Sun is born again because it is said to be moving northward again it is seem to be moving northward again so it's it's not dead anymore it's not still anymore the soul still solstice the still Sun soul fifths means the still Sun okay the scientific name for the Sun is Sol Sol one represents the soul okay the light within us the life within us because it is the life-giving force and if it does not come back into the the rise up above the horizon life doesn't continue on the earth if it doesn't you know rise back up into the northern hemisphere life doesn't continue within in the northern hemisphere because nothing would grow okay we are dependent upon the Sun for life that is the light bringer it brings light warmth energy heat ability to grow food etc no life exists without the Sun and yeah that's an allegory too you know again I said before understand the s attack components of this don't just look at the asteroid theology either that's just the cover story believing in the asteroid theology is the most ridiculous thing that you could possibly do because that you're buying an actual cover story that's been put there by Barkha Cultus for you to believe in so that you don't understand the esoteric tradition that underlies it you know do I think the words of Jesus the people of the being people call the Christ are worth living by absolutely I strive to do that in every day extreme power can be found in the teachings that this master put forward however if you believe the actual cover story about the religion about the religion about Christ that the dominators are putting forward its mind control you know you think about what a being like that would do during these times well he would challenge the status quo he wouldn't go along with this deception he wouldn't go along with this corruption and he would tell people the only way and he really only gave I mean the words attributed to Jesus whether you believe he existed as a physical being or not you know I'm up in the air over that because there's not a lot of historical evidence to support that however there's no way a religion gets as popular as it does without at least a teacher teaching this stuff you know and I mean the core mystery tradition that underlies Christianity and the gnostic tradition okay then may have been a group of teachers who knows and who cares does it matter what matters is the actual mystery tradition that underlies the words that are attributed to that person whether he existed or not in physical form okay whether it's just a story that there is wisdom in the words if we pay attention and live by them and that doesn't I wouldn't say that I'm Christian as far as a religion goes but I think that my life I attempt to align my life with the embodiment of the esoteric aspects of the Christian teachings is what I will say okay I don't consider that I have a religion I have a spiritual philosophy by which I live my life and I think I try to align that well to the golden rule that was taught by who beat you people claim is Jesus okay yes you are yahushua whatever you want to believe that his name was now the point I'm trying to make here is get past the the exoteric okay explanation of the religion and even get past the asteroid theology now this is where most people stop they say that's all asteroid theology no it isn't this is a something to get you to understand the esoteric aspects of it you know light has died from the world and it needs to be reborn again if we are to have life that is in any way you know something that resembles something that we want to experience and believe me we're not only at the Winter Solstice today folks we're at the Winter Solstice when it comes to this grand cycle we are at a spiritual death the light of the world has died it's as low as it's going to go we are trapped in materialism we are trapped in ego bound consciousness as a species and the light the Sun the light of the world the truth the way needs to be reborn okay that's what the esoteric meaning of Christ Mass is about Christ consciousness being reborn into the world okay so this happens three days after the death of the Sun the winter solstice 20 December 22nd three days later December 25th Christ's birthday the son's birthday it is now moving back toward the northern hemisphere it has been born again from its death point it is right now resurrecting back up toward the northern hemisphere this is the winter season the Sun progresses through Capricorn and then through Aquarius the water bringer this is the midwinter season when you're starting to hit um you know February and March so this is uh I should say February yeah so you know the the winter season brings some falls with it the water bringer represents the thawing of the ice as we're moving past midwinter toward the spring equinox as we get toward Pisces okay so it moves to Aquarius the water bringer and then through Pisces now the midpoint of Aquarius is another Sabbath okay this is um Candlemas or what was known in the UH the I'm trying to think the druidic tradition I believe as Imbolc okay IM v LLC in bulk so Candlemas or in bulk this is February 2nd February 2nd the midpoint of Aquarius also the midpoint of the winter season so that gives us our four main Sabbats which are the midpoints of the year they form this cross which is Taurus Leo Scorpio and Aquarius the bull the lion the Eagle which is Scorpio which the Eagle is another constellation that is in the area of the sky is Scorpio called Aquila which is the eagle and the man or Aquarius or some people call that the angel so you've heard the good lion of the man the bull and the the eagle okay these are the Gospels writers Matthew Mark Luke and John they're the angels of the corners the four Archangels okay but this represents what's called the great cross or the Galactic cross the cross of the Galactic Alignment which is formed by these four midpoints of the seasons okay so that the the the equal armed cross that we started off with representing the the solstices and equinoxes is the solar cross and then the Galactic cross is the four midpoints and the four of solar cult holidays that we talked about were all purchased not or Beltane which is the midpoint of spring the Lamas day or mid midsummer which is the midpoint of summer hamamass or sewing which is the midpoint of autumn and Candlemas or in bulk which is the midpoint of winter okay just wanted to get that out of the way before we wrap up our story of the now resurrection of the Sun because when we now enter the the midpoint on between Pisces and Aries which would begin the process all over again the following year okay we hit the spring equinox which is where we began okay and now the Sun is on its way up again in the spring from the southern hemisphere its tomb okay where it was dead okay for the six months of the dark season from Libra to Pisces it was in its tomb but specifically it would began dying during the first three constellations Libra Scorpio and Sagittarius so the point when the Sun is hung upon the cross at the autumn equinox follow me here okay bear with me and follow me you're looking at the image it makes it much easier the autumn equinox the Sun was put upon the cross it died upon the cross at the winter solstice okay three zodiacal houses passed during that transition from when it is put on the cross to when it dies so these are symbolically hours okay the houses symbolically represent hours Jesus is said to have hung upon the cross for three hours before he expired okay when he is now dead on the cross that is the winter solstice the Sun had died upon this cross of the zodiac at the winter solstice if we count Capricorn aquarius and places we see that now three days now here there symbolically in this lower left quadrant of the zodiac there symbolically representing days now okay that from the time when the Sun is dead to the time when it has arisen from the southern hemisphere its tomb okay after it had died until the point where it rises again which is the spring equinox the spring equinox happens around March 19th March 21st I should say around March 1920 it's something like that okay so we now see symbolically the houses of the zodiac in this story representing hours of the day that Jesus or the Sun hangs upon the cross before he dies and it also represents days from the time he dies to the time he rises into the northern hemisphere from his tomb he emerges from his tomb which is called the dis lower quota this lower arc the lower arch that is made by the six seasons of the non favored or dark time of the year until he rises into the the favored season of the year for the northern hemisphere which is the top of this ah a section thumb wheel okay from Equinox to Equinox we take the top half and that's the time when the Sun is in the northern hemisphere now when is Easter celebrated the resurrection of the Sun well again this is all has to do with astronomy Easter is always celebrated you can verify this on any site that will tell you how Easter is calculated the church is all too happy to tell people this Easter is celebrated on the first son day because of course it's all about the Sun that's the day of worship of Christianity the Sun day ok Easter is celebrated on the first Sunday after the first full moon after the spring equinox the first Sunday after the first full moon after the spring equinox so the spring equinox happens you find the first full moon that happens after that and then the first Sunday after the first full moon that's Easter Sunday that's how it's calculated and there's a reason for that the reason is the moon goddess which represents Isis or Mary okay Isis in the Egyptian tradition Semiramis in the Babylonian tradition okay a Diana in the Roman tradition Aphrodite you can name a million names for the goddess we can go on and on just like you can name a million names for the solar Sun Savior hero okay but essentially um Mary the moon goddess as we talked about last week and somewhere in these sets of images there are images of Mary and her dark cloak because she represents the night sky she is the goddess of the night she is the goddess of the moon you'll see her standing with a crescent moon um she has a dark cloak with stars all over it and giving birth to the child jesus or Horus however you want to look at it um the moon which is the representation of this goddess has to become full or impregnated in other words it is is in its fullness before it actually gives birth to the child that she bears into the world which is the Sun because the night sky bears the Sun into the world each day at dawn on the horizon the horas zone I mean this is so once you understand this it's so obvious it's the solar symbolism is everywhere in Christianity you go to any church it is unbelievable how much solar symbolism this is embedded in it I mean the host itself has an equal armed cross on it the priest wears an armed crosses on it on his uh garments you know the cross itself is the symbol of Christianity the cross of the zodiac with the Sun hanging upon the cross the ancients looked at the Sun as gods Sun you know that doesn't long anybody on the earth it long was the God and it gives us life and if it doesn't resurrect we don't live so the Sun needs to rise again in order to give us a life and you know this is just a an allegory but if you know and people believe in this seriously and take it serious and kill each other over it that's how brainwashed and hypnotized they are but if we really analyze this and look at it there's a deeper tradition that underlies all of this and that's the story of the actual importance of light the actual importance of knowledge the actual importance of willpower and living according to the golden rule all the things that are attributed in the words that that the the so called Messiah Jesus spoken not not the story about him but the actual words and living according those teachings which is easier said than done are you still paying your credit cards and so-called bank loans thinking that you owe the money do you feel like it's your moral obligation but can't see an end in sight well what if I told you that in - you don't know what single penny and that the bank's know this and hope you don't find out here where we come in we to prosper comm specializes a profound debt repudiation ethic which challenges the validity in your so called debts Worley pretty - from the burdens and protects your property our system is often superior to settlement bankruptcy or consolidation which often lead in a worse situation if you feel the moral obligation to take care of yourself and your family then I urge you to consider taking action right now the economy will not wait if you want to know more so you can prosper through the economic collapse all while staying honorable and true to yourself then call eight seven seven four one seven eight three nine three that's eight seven seven four one seven eight three nine three or visit three to prosper calm right now hey if ye Shepherd he hopes to be Intel hub check out my lifestyle every Sunday at 4:00 p.m. central Anaheim you can check it out from my website the Intel huh radio comm Wendy Joe Joseph John King and AC Griffith Thursday and Sunday evening at 8:00 p.m. Eastern freedom week radio on the internet love news these very wealthy US citizen is predicting that in 2011 we will witness the most important day in America in more than 50 years he says it will change everything about our lives the way you shop travel invest educate your children and even how you take care of your health and family now this man has made some outrageous predictions over the year but the crazy part is he's usually right you see he predicted the collapse of GM Fannie Mae Freddie Mac and America's biggest mall owners General Growth Properties a few years ago in fact Bareilles called his work a dire prophecy now this has nothing to do with the stock market but it could have a huge impact on almost every aspect of your life and we're summation created a video which you can watch online for free these only the biggest and look important forget you yet and it's a real eye-opener I can't stress this enough you should at least watch this free video online today he explains everything you need to know including simple steps you can take to protect yourself you can find the video at WWE end of America eight.com although this video may be offensive to some audiences it's worth checking out again that's WWWF America the number 8 com watch this free video at WWE end of America a calm you are risking the Intel hub news network question piece by piece [Music] okay we're back what we left I was talking about the importance of really embodying the real underlying esoteric teachings as opposed to focusing on the the exoteric cover story that we're given you know via the religion that is peddled to the masses to control them but even going past the no Astra theological understanding you know not stopping there and saying oh I know it's all astro theology understanding that the astra theology tells a mystical story underneath that is about you know our journey in life were born into the world and then we you know our light gets put out basically by all the mind-controlling conditioning and it's up to us to use our will and our conscience to really bare ourselves back into the world you know a second birth you know being born again being resurrected from that mind control condition to be a light in the world that can act as a way to help people to understand the way to live so that we can have life of any sufficient quality here on the earth so if it's a very powerful mystical allegory once you really understand what it's really saying on a deeper level not to get trapped even in the Astro theology of it which is what you know other people are Heat even getting trapped at a deeper level they're taking the Astro theology literally and believing in that patterning a religion that they actually believe in in a serious way on that lie you know I mean yet is the story of the Sun but you know people stop there and say oh well that means it's all bunk and it's all nonsense well no if the extra theology story is put there to not have you look into the deeper tradition because was the dominators don't want you acting like the Christ would have acted had even here today they want anything but that they don't want Christ consciousness inhabiting people of this planet that's the last thing they want you won't be able to control people if that were the case but continue to continue with this you know explanation of Astro theology um I want to read a section of a book that talks about how this is uh extremely similar to so many other gods of the ancient world the story that we see in the New Testament so this is um from a book called the biggest secret by David Icke he says okay a little quiz Who am I talking about he was born to a virgin by Immaculate Conception through the intervention of the Holy Spirit this fulfilled an ancient prophecy when he was born the ruling tyrant wanted to kill him his parents had to flee to safety all male children under the age of two were slain by the ruler as he sought to kill the child angels and shepherds were at his birth and he was given gifts of gold frankincense and myrrh he was worshipped as the savior of men and let a moral and humble life he performed miracles which included healing sick giving sight to the blind casting out Devils and raising the dead he was put to death on the cross between two thieves he descended into hell and rose from the dead to ascend back to heaven sounds exactly like Jesus doesn't it but it's not that is how they describe the Eastern Saviour known as the rich not one thousand two hundred years before Jesus is claimed to have been born if you wanted a savior God who died so our sins could be forgiven take your pick from the ancient world because there are a stream of them all originating with the Aryan race that came out of the Near East and the Caucasus Mountains so he lists a bunch of them here are just some of the Sun God some of God heroes who played the lead role in stories which mirror those attributed to Jesus and almost all were worshipped long before Jesus was was even heard of and he gives a full list of them I have my own list but I've compiled here do some of my research and I'll leave that list off now this may take a little while but I think it will emphasize a point here is a list of ancient Sun Savior gods all who are attributed with the qualities that Jesus is attributed with as 12 helpers is called the Son of God dies upon a cross often as resurrected three days later his born of a virgin has Mirror Mirror miraculous powers okay etc etc etc just about every detail of the story down the line is virtually identical if not differs in small ways a dad adonis al Qaida's jamon raw Attis val bali bedroom brem rila Buddha Satya Cadmus creat a Dave etat Dionysos arrows theta Foley dental he'll Horace Ishi Indra ischium ciao Krishna Mikado Mithra Odin horas Osiris Prometheus Quetzal Codel Sally pout Tammuz 4tn wa Toba Shama Shama marxists zou zou are and Zoroaster now that's over 40 gods all of which predate Christianity every one of those gods was worshipped in BC times not one of them postdates I should say one or two of them does that's not true one or two of them does I believe capsule Codel is not um VC that's some Aztec so that is ad but it's the same story retold but just about every one of those predates Christianity now if that's not enough for you I mean I don't really know what to tell you I would highly recommend going up to my site and looking at some of the books that I uploaded I uploaded a ton of related documents over the last two weeks and that reading will keep you busy for a while and it's done by scholars who have would probably be able to describe this vet better than I can okay well I did my best there tell you that story of the zodiacal path of the Sun how it relates to Christianity and there's a lot of further research that you can do on Astro theology as related to Christianity posted in my podcast section particularly on shows 37 and 38 some of the documents I posted were stellar theology and Masonic astronomy astrobiology and scenario astronomy occult theocracy symbols sex and the stars the Christ conspiracy the Jesus mysteries a comparative list of pre-existing data de-christianized in the New Testament the parallels between Jesus and Horace Sun gods and the zeitgeist companion guide so a ton of reading up there there's a ton of videos up there I posted Jordan Maxwell on Astro theology Michael - sorry on on Astro theology Manley P Hall on Astro theology the video zeitgeist which is a pretty popular for having discussed part of this story as I said I don't feel it goes far enough in helping people to understand the underlying mystical tradition that has to do with you that has to do with yourself and you becoming a light in the world you know to help resurrect this planet out of its darkness but um you know I don't think that total atheism is is the answer I you know I believe that there is a creator force in the universe yeah I'm comfortable with calling it God you know that that underlies everything it is the universal underlying intelligence that gives everything life and and purpose so you know I'm about looking at the lies of religion and calling them for what it is and what religion has been set up in the name of to do and that is namely to control people you know in the name of presenting some sort of righteousness and moral path in life when you have priests who are abusing children and higher-ups in the in the Church of covering over their crime and offering to pay off families and then just moving them other parishes that they can continue to do the same abuse to other children you know I don't believe in any organized religion and that's what this whole section is about really talking about religion as methods of mind control and try to get people to see past the exoteric to the esoteric traditions that really underlie these cover stories that are given to the masses to control their minds so we're way past the top of the second hour I just kind of lost track of time let me give the calling numbers again and if anybody wants to call we cannot take calls in this hour seven two four four four four seven four four four that's the talk should call in number once again seven two four triple four seven triple four if you call that number punching the call ID which is eight three five one five call ID number four what on earth is happening is eight three five one five if you call the blog talk Network you can call six four six seven two seven three three eight seven once again secondary calling number six four six seven two seven three three eight seven no taboo topics call in and talk about whatever you like and please do avail yourself of some of the great information that is posted to the podcasts section you can download these documents get these images to study along with and uh that that's what they're out there for folks edify yourself educate yourself and you know make up your own mind about it don't believe me or take my word on relating the research that I've done and the the great work that other scholars have done and I think that you should take in as much information and then you know make your mind up based upon the totality of the information that you take in so let's um let's look at some other aspects of this okay look at DaVinci how he painted on being the Last Supper okay I'll post this image with the podcast this week if you look at this image of the Last Supper Leonardo da Vinci understood asteroid theology clearly but he also embedded in it not what I call this I talk about this a little bit in my presentation series and I talk about the real Da Vinci Code and one of the greatest examples of this is the image of the Last Supper I think one of the greatest historical paintings ever painted and the the wisdom that lies in it is just phenomenal because Jesus is seated at the middle of the table and he has his Twelve Apostles or helpers around him okay so these of course represent the twelve houses of the zodiac through which the Sun makes its annual trek in the sky Jesus of course represents the Sun okay and the Twelve Apostles represent the twelve houses of the zodiac but specifically they're broken into four groups each one of these groups of three okay there's four groups of three apostles they represent the seasons okay all the way at the left hand side the group of three would represent the winter season you see it has a dark half of the room and a light half of the room again depicting that split down the middle of the Northern Hemisphere and the southern hemisphere okay the light side represents the northern hemisphere the dark side represents the southern hemisphere these two major seasons that I was talking about you have six apostles in one that represents the lower portion of that zodiac wheel on the left-hand side okay with the bottom being winter the lowest point of light and then within the other three just to the left of Jesus in the image or in other words seated to his right would represent the fall season okay and to the right hand side of the image where you have the light half of the room okay on the right hand side the Apostles would represent um summer all the way to the right the highest point of the light and just to the left of Jesus no to his left hand in other words on your right as you're looking at the image but if you're seated as him on his left side would be the spring season and it's just absolutely phenomenal that DaVinci understood this you know it's just great and he painted it in this image like this for right in the open for all to see because you know they would have killed people coming out talking about this none but he availed it in a painting and only initiate who understood the real story would have been able to see this and understand what was being painted and there's something more to the story here if we go deeper than just you know looking at the astro theological aspects of it we can see that Jesus represents in this image the Savior the light of the world the way the truth and the life and this is you know more than symbolic it's telling people the inside this world there's chaos and strife and quarreling and suffering and you know it's not a good scene that's depicted they everybody's at each other's throats in other words okay the whole thing is there to depict people not being able to get along everybody has a kind of negative look on their face it's you know ostensibly predicting that he's saying that one of you will betray me but there's more to it than that da Vinci is basically depicting the human condition in his painting here and he is explaining the people you know if we look at the image the the only people that really the only person that really looks tranquil in the image is Jesus himself and behind him is a way out to the outside that's the only place where there's an entrance into the room or an exit from the room is really how it should be seen it should be looked at it's an exit from the room which represents the earth okay or at least from the current human condition out into a world that that kind of suffering isn't happening and that kind of quarrel in tension and strife isn't going on at and what DaVinci is saying is that the way out is through that Christ consciousness that Jesus is the way the truth and the life well if you pay attention to the words that he was attributed to speaking and live that way we'll get out of this world of you know polarity of you know wandering between the light and the dark of imbalance of self-inflicted suffering and it's just brilliant absolutely brilliant he was uh absolutely one of the true luminance of the world and his technical skill not only unmatched but his ability to put an allegory like that into your mind through an image is just unbelievable and I marvel at it it's you know I think it's one of the greatest paintings ever painted and um you know he knew he knew so much about this and now you know depicted and painted it for for all of future generations to be able to really grasp that message uh in symbolic imagery so the Last Supper I'll check it out you know and really understand how deep that image really goes there are some other things I want to talk about when it comes to a basic Astro theology when we're talking about the gods and we talked about this when we did the section on time which was a few weeks back we talked about the days of the week being given to the gods of the sky and these seven gods also represent qualities of the self um how they represent the seven chakras the energy wheels are vortexes the board two seas that are within the body and represent different different upwelling of energy that comes out of the glands of the bodies of the body and we talk about these energy vortices as chakras um the seven objects from Earth that can be seen in the night sky other than the stars are with the human eye observable with the human eye are the Sun Mercury Venus the moon Mars Jupiter and Saturn okay seven objects visible with the naked eye other than the stars and comets okay the Sun Mercury Venus Moon the moon Mars Jupiter and Saturn these are considered the quote gods of the ancient world all religions are ultimately based upon these gods the Sun Christianity okay Sunday mercury okay that's a Roman God he was Hermes in the Greek tradition he was both in the in tradition he's the messenger of the gods he's closest to God son of course he's the messenger for the other planets and he's the fastest planet he has the fastest orbital journey around the Sun I think it completes in about seventy nine days one year for Mercury so Venus you know the goddess this is a feminine presence in the host of gods along with the moon these are the goddesses Venus and the moon again the goddess has a million different names and go on and on venus aphrodite Hecate um isis Semiramis diana you know there's just tons of them Athena so Mars that's now we're past the Earth you know we're toward the other side uh orbitally you know this is about Mars orbit its orbit is outside the orbit of the earth Mars is the God of War so this is the masculine aspect the dominator presence so the days of the week also Venus is Friday was a von der adea's Venus's is of the French name for Friday but the priority is also named after the another name of the goddess which was Fria Fria in the Norse tradition modern day is the moons day of course moon day Monday Mars's day is Tuesday going backwards mercury um that's a Wednesday um you have to go to the French language to see that one it's a mercredi in French which is Mercury's day so Mars is Tuesday again the French language Mardy helps us to see that one Jupiter is a Roman god in the in the Norse tradition the god Thor was associated with Jupiter so this is Thor's day Jupiter's days fors day or Thursday and of course Saturn is Saturday that's pretty obvious so we looked at that one we looked into time but I would like to look at these as chakras of the body see the farther out we get from the Sun it's like the energy is slowly being ratcheted downwards so Saturn is known as the inhibitor in the ancient world the Saturnian cult is often the most law obsessed black robes are associated with the Saturnian cult of the dark aspect of the occult trappings with black robes is a Saturnian aspect Saturn alien so this is a base instinct the desire to control Saturn's Saturn is considered the inhibitor of the planets it's the via disciplinarian you can look at Saturn as how it was viewed in the ancient world it is the the inhibitor or disciplinary force that when we are not acting within natural law this is the force that kind of rules the day so Saturn is a kind of negative influence and it is based in the base chakra if we were to look at it as a chakra this planet is a base chakra okay moving up from there Jupiter is considered a desire planet this is associated with the sacrum chakra or the genital chakra going upward from there you know closer to the Sun and moving up in the chakras from the base chakra Saturn and the the sacrum chakra Jupiter we have Mars that's the solar plexus chakra and again Mars was associated with as the God of War the same the solar plexus chakra is considered guts okay that's our guts the solar plexus is right where our you know guts slash intestines you know we consider that the place of fortitude in the body or a courage it's the male aspect it's still you know the part that we have to unify with the higher aspects of our solve the higher chakras but it's important nonetheless therefore Mars is associated with the solar plexus chakra or the force of will moving upward we go to the feminine chakras which are the moon and Venus and the moon earth system is where we really were here to learn about care we're here to activate the heart chakra that's what then that's the position that it actually takes in the system of you know chakras I'll post an image that illustrates this with the podcast and if you go back and check it out it will make perfect sense and I think you'll be amazed that this is how the planets actually work and the the attributions how well they line up with what these are with what these chakras are attributed the qualities that they are attributed with so the heart chakra would be the moon earth complan complex a lot of astronomers don't even look at the earth as a planet in and of itself they call they call our system the the Earth Moon system not just the earth because the moon is unlike any other object in the solar system and it is just unheard of to have a moon of the size that we do and the qualities that we do and uh you know I've needed this briefly you know David Icke has a section and his new presentation where he talks about the moon possibly being artificial this is an old idea it's not his idea you know uh you know he accounts it he gives his account of this very well but there are many scholars that have talked about this and a lot of NASA astronauts have actually said you know we don't understand how the moon formed and you know some of them hint at don't actually come out and say or they crucified in a scientific field that the moon may be some sort of a construct an artificial construct this idea is kind of gaining some ground yeah and it's an interesting one to look at but a lot of astronomers look at the or earth moon system not just the earth itself as a planet they pick up on that when we come back here the midget plane will be right back a very wealthy US citizen is predicting that in 2011 we will witness the most important day in America in more than 50 years he says it will change everything about our lives the way you shop travel invest educate your children and even how you take care of your health and family now this man is made from outrageous predictions over the years but the crazy part is he's usually right you see he predicted the collapse with GM in Mae Freddie Mac and America's biggest mall owner

General Growth Properties a few years ago in fact her illness called his work a dire prophecy now this has nothing to do with the stock market but it could have a huge impact on almost every aspect of your life and recently he created a video which you can watch online for free detailing the biggest and most important prediction yet and it's a real eye-opener I can't stress this enough you should at least watch the free video online today he explains everything you need to know including simple steps you can take to protect yourself you can find the video at www.americanoutback.net the number 8 comm watch this free video at WWE end of America a calm are you still paying your credit cards and so-called bank loans thinking it you owe the money do you feel like it's your moral obligation but can't see an end in sight well what if I told you that in truth you don't know a single penny and that the banks move it in hope you don't find out is where we come in we to prosper got down specializes in a profound debt repudiation method which challenges the validity of your so-called best morally freeze you for the burdens and protect your property on system is offering superior to settlement bankruptcy or consolidation which often lead Norwood situation if you feel the moral obligation to take care of yourself and your family then I urge you to consider taking action right now the economy will not wait if you want to know more so you can prosper through the economic collapse all while staying honorable and true to yourself then call eight seven seven four one seven eight three nine three that's eight seven seven four one seven eight three nine three or visit for you to prosper calm right now and all I don't have the control of the population queue is amongst us a burning of humanity that on our shoulders the only way out if to expose the global crimes only chase know them at the new world order together we are all one together you know al Bulger the L for freedom and includes tuna in the pipe even L club.com [Music] okay everyone we're back on what on earth is happening I'm your host mark passio my website what on earth is happening comm network's website the Intel hub news network comm we were talking about the planets Astro theologically and how they were viewed as the gods of the ancient world and how you know basically our our lives works on this Sevenfold process seven days of the week you know how they were all attributed different qualities that lie within us so we're like a solar system each one of us and the chakras of the body are kind of like the representations of the planets that are in dwelling within us so we are like a solar system that we are indeed like a zodiac as well the qualities that embody the zodiac are all qualities that we need to develop each one of the houses has different qualities if you study astrology and these are all really indwelling qualities so it's the principle of Correspondence if we look at the hermetic principle of the Hermetic tradition principles once again that the universe is self-similar across scales and that the microcosm reflects the macrocosm and macrocosm is a reflection of the microcosm in other words the very large is a reflection of the very small or the universe you know kind of bum is comprised of all the small bits that comprise it of course but even within those small bits the entirety is contained so that's the principle of a holic of a holographic nature of reality in other words the whole is contained within the parts as well as the parts comprising the whole arm we were looking at the planets as chakras and we had gotten to the earth-moon system which is the heart chakra of the solar system that's why all the activity is really happening in in this solar system anyway on earth it represents the heart chakra of this solar system and that's why what is taking place here is so important and we shouldn't let it be trivialized you hear people saying oh we're so so small and so insignificant it doesn't matter what happens here bunk it absolutely matters with what happens here okay uh Ian crane a really enlightened gentleman from England he gives some phenomenal presentations on Codex Alimentarius the BP oil spill and other topics in the world order in general and he relates a quote and usually using it at the end of his presentations I can't quite remember who it's by but he says what we do in life echoes in eternity and I wholeheartedly concur with that what happens here does matter I'm not telling you to get so worked up and crazy about it that you know you are yourself sick but the events that play out here have a purpose and they do matter and they matter in a wider scale in a bigger scale and what's happening here with the individuals is just a reflection of what's happening on a grander scale in the universe I started off the show tonight saying that a lot of the people in the freedom movement the so-called freedom movement even people who consider themselves leaders in this movement don't really understand the dynamic that's taking place they don't grasp the occult they don't understand anything about the mystical traditions they take everything at face value they think it's all about politics they think it's all about nothing but money they believe in the con except of money as something that's real and how holds real value which is mind control okay they don't acknowledge or understand mind control words methods and ultimately I'm going to say it right out in the open it's because they don't know themselves period the end all knowledge worth having is self-knowledge and that means knowledge about how the human psyche works and they don't understand their own their own indwelling qualities because they have never taken up studies such as these and that's why they can never really solve the problems that they want to cry about that that they're seeing play out in their external seemingly external reality when it's all about being generated from within but because they don't understand that and they don't want to change ultimately what's within and their perception they think this is all something that's being done to them instead of something they're creating a causality causality is what it's all altum Utley really about the sixth hermetic principle the principle of cause and effect effect invariably unwaveringly follows calls and what the people in the freedom movement and you know sorry to be the bad guy I need there has to be the bad guy I guess because no one else is saying this I seem to be the only one saying this I'll tell you what I was on a show this past Friday I advertised it it pains my heart almost to say I'm almost sad I went on the show because people are not talking about the real issues here folks they're not they're not talking about what's really happening they're talking about all the external components of it consciousness is hardly even mentioned and the reason it's not is because people don't understand it so-called leaders in this movement don't understand it and are talking about external external external external solutions how about the solution of understanding how consciousness works and then understanding how people who know how this works a thousand times better than then the bulk of humanity does and have known this for thousands of years have used this knowledge to manipulate people into the golems that they are how about that how about we start doing that and yeah it's harsh language I'm not here to be friends with people that's why the show isn't so so tremendously popular it's not a friendly tone or an inviting um you know non-threatening tone we're at war there's a war in consciousness going on and it's about your soul but that's what's really going on here folks people don't want to accept that they don't want to believe it because they don't acknowledge where they are they don't want to acknowledge the deep dark depths to which we've come truly oh they want to skirt the issue and talk about it peripherally you know monetary issues and political reforms and all of that but get down to the core issues of the human psyche and what drives causality in the world and why we experience what we experience and why we experience the suffering that we do all I don't want to hear it I don't want to hear that mind control what via cults I don't want to hear any natural law what get out of here with that take golf as long as we abide in partial darkness we will continue to be conquered a gentleman I've never met made that statement by he goes by the name of Aquinas I guess named after Thomas Aquinas I'm not sure but I'll tell you what those are words of wisdom if I ever heard them and this this person wrote this essay on Liberty I'd love to meet him anybody knows who he is please direct him my way I'd love I'd love to speak with him because his knowledge is extensive from that short essay anyone who truly understands the dynamic going on will recognize the wisdom in his words so I'll just throw that out there if anybody uh you know knows who he is hey we got a few minutes left I see we have a couple callers here we go caller you're on what on earth is happening what do you have for us mark good evening it's bad am i coming in I know I've been through the last few broadcasts Bob you sound great man thanks for calling man always a pleasure to hear from you I was a pleasure to call it a mark it maybe foreboding to a lot of people but I really love your show and I know mark doesn't make a penny off this this is all his need to share truth it's not for us it's it's a factor you know what he feels he has to do this lifetime in mark there are those of us out here I feel bad because I feel like I'm benefiting from some kind of travail you have to go through but but inadvertently I am benefiting and a lot of us are listening to you a couple things artificial moon as a concept yes gaining a lot of ground even and I know I'm a guy of films I'm on the sleeve but even the movies over the last 10 15 20 years all the way back to the early movies talk about this artificial moon that's no moon it's a space station and yeah right y'all right yeah hinting hinting at it yeah yeah you want to make I wonder what Lucas really knew you know that that's true and that's just on the on the Star Wars level of it and you know we hit that ad nauseam I won't bore the people but point number two um I'm sorry point number one moon again but that there's an author that wrote the most recent book besides David Icke was somebody named I want to call him Christopher Knight or Robert Christopher Knight or something but the it's all very Templar sounding and I don't trust it in my gut I don't have any backing for it and I think if I dug I would find that this is a a free Masonic cover to divert people from knowing because somehow and this is really going out on the limb mark and I apologize but I feel somehow someway they're able to use algorithms to get a feeling almost like this web bot project they get a feeling for what people that the avenues of truth will lead to and they preempt it through their their their mass media programming or pre programming and this moon thing is part of it so there is truth to this artificial moon however it is different from what they are trying to call the sack us into before our gold mine and but no I'd like to recommend I'd like to recommend a book for people to check out that contains the the general concept within and it's not the main focus of the book but it's an excellent book nonetheless it's called gods of air and darkness by Richard Mooney of all names his name is Mooney mo oh and ey and he puts out a lot of great questions in this book he doesn't answer too many of them he postulates a whole lot of questions in the book it's kind of written in erich von daniken style like you know could this have been you know line of questioning about the ancient origins of our solar system and it's a fascinating book and it's from the 1970s so it's written quite a while ago Richard Mooney gods of air and darkness maybe I'll post a link to it in the podcast section we have a minute and a half left Bob go ahead bring up your second point is there another caller on hold uh yeah there is if you want to uh let me take that I can do that if you want wrapping are it's up to you good night sir thank you you got it Bob thank you always a pleasure caller from Southeast Pennsylvania you're on what on earth is happening a market it's Eric here in Doylestown Eric how are you man we got about a little low over a minute and a half you can take us out man what do you have for us all right well Bob Bob from Cincinnati is absolutely brilliant I think you need to have him on as a guest in the whole show but I'd love to yeah that'd be great and then I could call into and uh I was thinking about the whole mind control thing in like how like you know I was when I was watching football I was thinking like how the New World Order is like a league and then you know yet and only you have different teams you have different divisions and you know like what and they call it a club like a ball club like the New York page New England Patriots bulk Club so the New York Post would be one of their clubs as part of the week you know what I mean and the school system would be another Club and it's more it's different just this whole institution of mind control because I know a lot of people that go to colleges and everything and they're not stupid people but they've just been in this whole thing so long they don't I mean you get it on television you get it from your friends and your family here from school you get it from work and you just become this institution and that's that's what's happening with you when you try to get them out of it they take it very uncomfortable and they don't want to talk about anything fearful I forget about talking about FEMA camps or the vaccines are killing you you know they look at all those different aspects as different positions on that team that all work toward the same goal you know they're all they're all working toward to advance the agenda you know like one's a linebacker one one's the quarterback etc and they're all looking to you know advance down the field and uh you know put their agenda into effect different players on that same team with the same man they sit and use that analogy ultimately the NFL's the one winning you know it's not the New England Patriots winning with the Eagles and um it's ultimately NFL yep well I rock we're we're at the end of the show my friend I thank you for calling and that's all we have time for tonight on what on earth is happening everybody thanks for listening I'll see you guys next week next Tuesday night I'm Mark passio you've been listening to what on earth is happening in everyone [Music] you

What On Earth Is Happening Show #040

Topics: *Mind Control Methodologies, Religion, Chakras, Astrotheology, Islam, Judaism, Three Modalities of Thought, Temple Of Solomon*

[Music] welcome one and all welcome wherever you may be this is what on earth is happening on your host mark passio we're broadcasting live right here on the Intel Hub News Network my website what on earth is happening dot-com the network's website the Intel hub news network calm today is Tuesday December 28th 2010 and this is the last what on earth is happening show in the year of 2010 next week we'll be coming to you from the year 2011 that is if you believe in the concept of time as we talked about before on this show there is really only the ever-present moment of now that's all there really is but that aside we have a good show lined up here today we're going to continue talking about religion as a method of mind control I'll be doing this probably this week and next and then we'll be moving on to a new topic but I think that this topic is so critically important that I want to expand on the other two major world religions we've discussed Christianity in depth and I'd like to discuss Islam and Judaism and then talk about them in a holistic framework kind of a model that I have noticed but I'm not the first a overarching model of Correspondence that takes into account these three great religions and kind of relates them to the individual consciousness and the human brain and this is going to be kind of a very abstract and somewhat out-there concept but if you follow along with me and I think some of the images in the podcast that I'll put up you know I usually put up images related images which with each podcast on my podcast page so that after the show people if they want to go back and listen again to the shows can get a visual representation of some of the ideas that I talk about on the show I'll also sometimes post links to books documents and videos so do avail yourself of that information on my website what on earth is happening by going to that website and then clicking the podcasts tab where you can listen to free archives of every one of these broadcasts and like I said get a supporting material on those pages for each podcast so let me give the calling numbers and then I'm going to read a couple of event announcements and then we can get started feel free to call in at any time I love I like taking calls the callers to the show are always great and there are no taboo topics here I'm only going to get one call-in number here today because I don't know if anyone is odd screening the blog talk line a Bob usually does that but Bob Tuscon is on vacation this week so I'm just going to go with the talks you call a number for tonight we'll go back to a dual calling number next week so for tonight the callin number for the show is seven two four four four four seven four four four once again the calling number seven two four four four four seven four four four the call ID number that you will be prompted for for what on earth is happening is eight three five one five once again the call ID number for this show is eight three five one five no tableau topics call them and talk about whatever you like and hopefully we'll get a few callers and we can take some calls here this evening I have a couple of event announcements for events coming up in my area again I read these to promote local activism because that's what it is ultimately all about is once you know doing something with that knowledge once you know what's really going on here become active and take that information to other people in your community so coming up next month at germ books and gallery free your mind conference fundraiser number three this is the 3rd fundraiser for the upcoming for your mind conference in April this will be taking place Sunday January 16 2011 at 2 o'clock p.m. the admission is $10 for two very special presentations by two of the co-hosts of the free your mind conference one being myself Marc passio I'll be presenting a brand new presentation that I've put together entitled everything I needed to know in life I learned by watching The Wizard of Oz and this will be an exploration of the esoteric occult symbolism contained in the perennial classic movie The Wizard of Oz of course derived from the book by Al frank Baum also giving a special presentation another co-host of the free or mind conference Michael Austin Melton Michael Milton is a field investigator from the mutual UFO network of Pennsylvania and he will be giving a presentation entitled the history of mind control in America the history of mind control in America it should be very fascinating this is coming up at germ books germ books is in 2005 Frankford Avenue 2005 Frankford Avenue in Philadelphia for more information check out germ books calm or for your mind conference calm Saturday January 22nd 2011 the activist group truth freedom prosperity will be hosting a networking social this social event will be taking place at Liberty's pub Liberty's is at the corner of 2nd and Fairmount in Philadelphia and the social gathering the networking social for truth freedom prosperity will be held on the second floor of Liberty's pub this will also kind of double as a another free your mind conference fundraising appeal because we're still kind of in dire straits for some cash to bring in some of the out-of-town speakers it's not really looking too good we only raise a slightly less than $1,500 in addition to the hall money so we raised close 3,500 overall we really needed to raise close to nine thousand dollars so we fell well short of our goal for the fundraising for the event so unfortunately it may need to be scaled back if we don't get the funds that we need to bring in some of the speakers from out of town because there are flights and hotel rooms uh you know can be somewhat expensive so that having been said Saturday January 22nd I believe they're going to start this at 7 o'clock p.m. and go throughout the evening truth freedom prosperity presents 2011 networking social at Liberty's on second and Fairmount in Philadelphia for more information on this great activist group please visit their website at www.ge.com mind control and the occult Saturday April 9th and Sunday April 10 2011 at Liuba hall ru ba hall Ruba is at 414 Green Street for one four Green Street in Philadelphia the doors will be opening at 9:00 a.m. the program for each day will begin at 10:00 a.m. admission is $20.00 per day per person in advance and $30 per day per person at the door the free your mind conference is a unique two-day event in Philadelphia featuring multiple speakers and diverse educational materials for the purpose of raising public awareness of the critically important topics of mass mind control techniques the covert and subversive influences upon our consciousness and behavior trauma based and ritualized abuse and the practical mental and emotional healing methodologies available for those affected by these devices the featured speakers Erin McCallum Alfred Webber Andrew basiago Bob skin sour your dozous yawn Irvin John Nicholson Larkin Rose Laura Eisenhower mark motika mark passio Mel fàbregas Michael Kelly and Suzanne Taylor for more information on this unique event please visit www.carmensognonvi.com/newsletter running in this house so I apologize if that creates any background noise interference you'll have to bear with me on that we had a huge snowstorm in Philadelphia a big nor'easter a couple of days back and we got about I guess 12 to 14 inches of snow on the ground so winners in full swing early in the season this year I don't mind that I'm a winter person myself I like the cold I enjoy the snow doesn't bother me a bit driving can be a pain sometimes but hey you know take things as they come but with that having been said let's jump into hourly talking about last week we were I ended the show we were talking about the the planets we were talking about the planets as the the ancient septon or gods that the seven gods of the ancient world and these are the planets that can be seen with the naked eye the naked eye can't see anything beyond Saturn you know aside from other stars and some galaxies but with the naked eye you really can only see in our solar system out to Saturn the planets beyond Saturn aren't visible without the aid of some kind of optic optics device so there's the seven objects from the earth that could be seen with the naked eye in the ancient world are the Sun and the moon of course and then the planet can be seen our Mercury Venus Mars Jupiter and Saturn so these are the seven ancient quote gods of the ancient world that are the gods of Astro theology and specifically the two gods of Astro theology are the Sun and the moon and then of course there are the other planets and the stars and in that pantheon of gods were in that sect or cult however you want to look at it of Astro theology Saturn is the ruling deity because Saturn is the farthest planet therefore it's that can be seen with the eye and therefore its orbit is the greatest in its orbit encapsulate the orbit of all the other planets inward toward the Sun therefore Saturn was seen as the ruler of the planets so in the planetary bodies Saturn is the high you know highest aspect of that hierarchy of quote gods and then of course there are the the stars which are the small lights of the heavens in addition to the planets and so that forms the third major cult of Astro theology being the stars and planets or the stellar cult as it was known so you have the solar cult the lunar called M stands a stellar cult so the cult of the Sun the cult of the moon and the cult of the stars and planets and you know we were we left off talking about how yes we can look at the astro theological aspects of the basis for religion but really we need to go to deeper and more I guess you could say synchro mystic aspects or the aspects of this that really teach us about ourselves in our own psyche so what I was doing at the end of the show last week before we go into talking about you know this is just kind of a bridge into talking about some of the other religions that other two major religions in addition to Christianity being Islam and Judaism I want to just go over this model of the the chakra systems of the body of Vedic a spiritualist tradition the chakras these wheels of energy that are found within the body near glandular activity and that are really kind of gauges for health or disease and they are internal energy upwellings that exist within ourselves and more than that they are talked about that they relate to and correspond to this is going to be a big topic of the show today is correspondence um these correspond to different aspects of the personality and what what the really enlightened ancients weren't what we're doing was not really worshiping these external planetary bodies as gods per se this is what it may have evolved into as any tradition sort of devolves from its original intent but what they really understood is that these were aspects symbolic aspects of fundamental aspects of the personality that exists within within the self within the human psyche just like we talked about Christianity you know you have the external Asheboro theological a story that is given to the masses the exoteric story and then you know beneath that lies the esoteric astro theological aspects of christianity which we discussed at length last week the story of the Sun and the houses of the zodiac the helpers of the Sun the Saviour myth you know that has been has been told throughout the ancient world you know probably hundreds of times I think I gave over 40 examples last week and how it's passed down to us today as Christianity uh but there's a deeper tradition that lies beneath that even it gets to the heart of the matter and the truth that underlies different religious traditions and that is always about the self it is always about our psyche and our aspects of our true selves and what really are deeper motivations are as an individual and the species and the ancients were really in touch with that and they understood it well and so they you know they symbolized this through the you know the symbolic deification of these planets as gods but they understood this was either they weren't the actual gods that this was symbolic and you know they didn't really worship the Sun per se now some of them did I'm not going to say that that wasn't happening okay I'm talking about the people who really came up with these original traditions and understood this to be just an aspect of the principle of Correspondence that the universe is so similar across scales okay that that which is above is like to that which is below and it is stated in the Hermetic tradition okay that we live in a whole a holistic holographic reality in which the very small is a or the microcosm is a reflection of the macrocosm with a very large and vice-versa the very large is a reflection of the very small the whole is contained within all of its parts okay and each part reflects the totality of the whole it can be said a million different ways but it generates the same basic holographic fractal principles that underlie reality and that we are really now only rediscovering through quantum mechanics and other scientific fields of the modern day so um to go back to this model that I was are starting to break down an outline last week the Vedic chakra systems okay they again are about these energy upwellings within the body but more than that they're about different aspects of the self or the psyche so we looked at the root chakra okay and this is what I correspondent to the planet Saturn and there's an image up there on the last podcast on the page I believe it was podcast third 9 tonight's show will be number 40 so if you go up to the site and go to the podcast page somewhere in the related images for podcast 39 you'll see an image of the planets and then the next one after that you'll see an image of the planets as the chakras of the body so I'll start this over again today and lay out the planets in their correspondences to these chakras I'll name the chakras talk about the colors of them as well because if you look at the image you can see the related colors okay and you know we can see how these will relate to different aspects of the self okay so Saturn in the ancient world was called the inhibitor or the disciplinarian this is corresponds to the root chakra the root chakra in the Vedic tradition was called called the mooladhara chakra so the mooladhara chakra as a matter of fact when we get into talking about Judaism I'm going to begin to break down some Kabbalistic knowledge from the tradition of Kabbalah and I will do this to the best of my ability to the extent that I have studied Kabbalah myself because I think initiating people in addition is a very important thing to do and a very important thing to help people to understand what this tradition was originally intended as I've said in in the past on the show that this section on religion was going to be sort of an introduction or an initiation into different occult schools of thought and that is what we're going to start getting into when we talk about Judaism in particular because I'm going to start again breaking down some of the Kabbalistic tradition but I'll pick up this chakra correspondences when we come back after this break you're listening to what on earth is happening right here on the Intel hub news network we'll be right back folks [Music] in a war where collector hazards and all right honestly use control of the population so we'll charity is amongst us the burden of humanity met on our shoulders the only way if to expose the global crime syndicate known as the New World Order together we are all one together law in town soldiers the battle for free humanity and soon join up in the fight Eatontown of calm [Music] a very wealthy US citizen is predicting that in 2011 we will witness the most important day in America in more than 50 years he says it will change everything about our lives the way you shop travel invest educate your children and even how you take care of your health and family now this man has made some outrageous predictions over the years but the crazy part is he's usually right Ephesian predicted the collapse of GM in May Freddie Mac and America's biggest mall owner General Growth Properties a few years ago in fact Bironas called his work a dire prosecutor now this has nothing to do with the stock market but it could have a huge impact on almost every aspect of your life and recently he created a video which you can watch online for free detailing the biggest and most important prediction yet and it's the real eye-opener I can't stress this enough you should at least watch this free video online today he explains everything you need to know including simple steps you can take to protect yourself you can find the video at WWE end of America eight.com although this video may be offensive to some audiences it's worth checking out again that's WWE end of America the number 8 com watch the free video at WWE end of America 8 calm you are lifting TV Intel hub network I'm Russian with order 15 by piece secure your future get their non-hybrid feedback now with aleni economic crisis food shortages and other toxic disasters now is the time to be ready just click on the heirloom organics banner at the top of our BlogTalkRadio page today to cure your future and the future of your family in hard times heirloom organic seed when BJ Johnson 1990 here's a Thursday and one degree at 8:00 p.m. Eastern Parsippany trading and control hub three-bedroom okay we're back on what on earth is happening under host mark passio what we were getting into before the break was the shopper system and how this kind of corresponds to a planetary system and this is a principle of Correspondence as it is laid out in the Hermetic tradition because we are all kind of a solar system in and of ourselves we are a zodiac in and of ourselves we're a galaxy in and of ourselves and we're a universe in and of ourselves and really this is what I'm trying to get across here is that studying these traditions there is a positive aspect of all of them because if we understand that then the knowledge that is really worth having is knowledge of self and how we work and how our sites actually operate and that knowledge is what will actually free us from the tyranny that we're experiencing because it is all done through psychological manipulations which I call mind control because that's what it is okay a lot of people don't like that term tough that's what it is deal with it okay um it's real it's happening it's ongoing it's been going on since before you were born and we need to come to terms with that and the way to really get in touch with that knowledge in many cases is to study vehicle and the study hidden systems of knowledge that are reserved basically for the initiator or the esoteric aspects of them of Society so we're looking at the chakra system and like I said I'm going to look we're going to look when we talk about Judaism in the Judaic tradition of the underlying today tradition with a look at Kabbalah and this will kind of relate to this as well because the Kabbalistic symbolism relates to the shopper system as well so the the planet Saturn is what we were talking about that's kind of what bridging into that brief aside there was known as the inhibitor or the disciplinarian of the solar system it is the inhibitory aspect the one that comes in when we're out of balance and makes its influence known okay it has to correct it's a correct a correction device okay so this is why law is often associated with a Saturnian cult you know judge is wearing black robes we'll get into that one talk about the the religion of Judaism but Saturn again looked at as the the king of the planets or the the top of the hierarchy when it came to the planets because it because it had the widest orbit and so there and it contained all the other planets but this relates this idea relates to the base chakra of the body now the base chakra is actually at the very root of the spinal column the base of the spine and this is traditionally associated with base consciousness or instinctual behavior okay so this is a fight-or-flight mode this is a you know actual combative consciousness this is a very low state of awareness know a controller aspect in other words that which responds to something of reactively or with a need to control okay often with a need to uh you know straighten something out or set something right or correct course as well but really not without too much direction they're just with a strong hand very masculine energy so this chakra was is traditionally given the color red red is a correspondence to the left brain as we've talked about before on the show when we talk to money the red frequencies Carly to the red the left side of the brain okay the the male aspects of the personality the masculine I should say aspects of the personality this is yang energy yang energy in its full swing really takes place within the root chakra this is um tribal instincts this is you know caveman consciousness let's call it okay the very base consciousness alright um domination control etc and this is the lowest of this energy yet there's a positive side to this there's a positive side to this as well because without some sort of a drive like that there wouldn't be really any survival again yeah it's the fight-or-flight mechanism and it's Dominator aspects but it's also the force the motivates you physically stay alive okay and to live in the physical world of a motor skills the need for food recognizing when you're under attack from the you know predators or a dangerous you're in a dangerous environment this is the this is a necessary although low consciousness quality that exists within us the idea is to continuously raise our energy upwards so that we're ruled we rule ourselves through the higher aspects of the personality a higher aspects of consciousness the higher energy energies of a higher chakra systems and we don't get trapped in the lower ones which is what really we are we have done to ourselves collectively as a species so the mooladhara chakra is traditionally colored red interestingly it's shaped as a square okay a block or you know regimented object in Freemasonry again the square is which this corresponds to as well as Kabbalah the the square is a symbol of base consciousness as well okay being a tool of a builder a square okay a 90-degree angle not really found in nature and it represents base consciousness in Freemasonry until it is turned around okay or in other words it is uprighted so that we operate our base instincts and you know then we leave the square and go toward the compasses which is compassion and higher consciousness or again relating to the higher chakras so Saturn relates to this chakra and you see I put that at the base chakra of the image now we go forward to the next chakra and we come to Jupiter a Jupiter is the planet that it corresponds with a desire with sexual energy and it is the correspondence to the sacrum chakra or some people call this the genital chakra the genital area of the body is actually very slightly higher than the genitals but it's associated with that general area of the body and uh it's um this is called the swad the swadisthana chakra chakra the swadisthana chakra and um I'm sorry the swadisthana chakra and this is the shape that is corresponds to this is a crescent moon okay it's often a wound shape or an egg shape something similar to that the color the corresponds to this chakra is orange orange and Jupiter in fact does actually have sort of an orange and yellowish tint to it brownish orange yellowish interesting correspondence there but what this chakra represents and what the planet in general represents a desire and again that corresponds to sexual energy of course when it is in a lust aspect but it also corresponds to the desire to want to know the desire to want to improve oneself the desire to want to gain or attain or aspire to higher levels of knowledge and development within the self so this is a kind of a of a positive influence and it is a step up from the just base needs being met and you know survival only mentality so we really need to at least get to that before anything further unfolds to where our higher the higher levels of our nature and this is often depicted as you know the beginning of initiation okay the desire to want to start to learn about the personality start to learn about the psyche start to understand more about the self okay as was written in the Delphic on the delphic oracle in greece in their mystery tradition know the self and you will know the universe and the gods and this is what the planet Jupiter kind of begins to open up through initiation through the wanting the desire to go forward toward truth and out of pure base consciousness or animalistic consciousness so that is the second chakra and that would in this solar system is solar system week that we all carry within ourselves that would correspond to the planet Jupiter or the sacrum chakra okay so moving forward to the next planet inward and the next chakra would be Mars Mars is the God of War okay Mars corresponds to the solar plexus chakra solar plexus being right near the the diaphragm okay uh you know the stomach area the guts in other words because this chakra represents will willpower is what the chakra represents it represents courage this chakra is called in the Vedic tradition the manipura chakra again corresponding with the solar plexus and it's color is yellow and that's interesting because you know when we lack courage people say that we're yellow it's a you know a phrase that it we generally reserved for people who are cowardly or don't have guts or don't have will okay don't have courage so interesting how the language reflects some of this and you know Mars is the God of War okay the god of you know pure mail will power and actually conquering god of conquering others warfare um pure willpower exerted okay getting things done right the the actual ability to actualize something not just talk about it think about it but then but actually do it okay so that's willpower and this is one of the most important aspects see that this this chakra is abut the highest of the lowest three chakras but it if it is used properly if it is unified with the higher chakras including the heart chakra is one of the most important because this is what actually gets us to activate ourselves and take action in the physical world that this chakra has to be ruled by the higher chakras for us to take proper action in the world but still it is a quite important aspect of the self because we can think all we want about what's you know what we know to be true we can know in our hearts that it's true we can believe it we can you know you know feel positive emotion about it but unless we actually use our will Center our willpower to actually get things done in the physical domain in which we live and operate nothing actually changes nothing actually gets done this is partly why the situation continues the way that it is so few people have activated will centers within themselves so this is a very important aspect of this whole chakra system in the Vedic tradition of the Indus Valley you know India in general and um Mars corresponds the planet Mars the masculine planet of Mars corresponds with this solar plexus chakra or the montipora chakra so the next chakra going forward in this system is the anahatha chakra this is the heart chakra and everyone knows where the heart is that in the body this is the color associated with this is green you can see we're stepping through the visible color spectrum of light we started with red then moved upward to orange the higher the frequency the higher the chakra higher the frequency of right light the higher the frequency of the chakra and the higher it is in the body along the middle of the body the spinal column okay so these energy wheels correspond with the frequencies of light and they correspond with the planets again this show is highly about correspondences but they as will even see more of a little bit later so we go to the anahata chakra this is the earth-moon system okay so a lot of scientists don't even talk about this as a single planetary system we can talk about it almost as a dual planet the Earth Moon okay because our moon is exhibits we talked about this a little bit in the last couple weeks exhibits qualities that no other moon in our solar system does it is bigger in proportion Airy size to the planet than any other moon and uh you know we touched upon the controversial subject a little bit that the moon may not even be a natural satellite and you know there's a lot of speculation going on about that and I posted a book called gods of air and darkness on my podcast section last week that touches upon this topic a little bit but it's a very good book that talks about ancient lost ancient civilizations and human origins the origins of our current civilization and it proposes a lot of intriguing questions I highly recommend it it's written back in the 70s by Richard Mooney and you know the earth moons system okay taken together the moon of course is seen from the earth so the earth is not contained in the this uh you know system of gods of the ancient world because we're on it we're viewing things from that perspective so it's not included in the objects we see in the sky but the moon is so ultimately what we're getting at here is that the heart chakra is all about what's really going on here on the earth this is a this is a place that souls really incarnate to to learn about compassion natural law um understanding of the self care crew care that's what this whole experience is about in case you haven't figured that out you have to care enough to make a change you have to care enough to change yourself okay it's all about care it's all about developing true care care toward the higher aspects of consciousness and the care to really motivate people to evolve to higher states of awareness and consciousness so that the species evolves in in consciousness so we'll pick up from that point when you come back and read another commercial break on mark passio you're listening what on earth is happening right here on the insole hub news network well the US citizen is predicting that in 2011 we will witness the most important day in America in more than 50 years he says it will change everything about our lives the way you shop travel invest educate your children and even how you take care of your health and family now this man has made some outrageous predictions over the years but the crazy part is he's usually right he's even predicted the collapse of GM jen-mei friend nack and America's biggest mall owner General Growth Properties a few years ago in fact her illness called his work a dire prophecy now this has nothing to do with the stock market but it could have a huge impact on almost every aspect of your life and recently he created a video which you can watch online for free detailing the biggest and most important prediction yet and it's a real eye-opener I can't stress this enough you should at least watch the free video online today he explains everything you need to know including simple steps you can take to protect yourself you can find the video at www.h calm although this video may be offensive to some audio tape is worth check now again that's wwww at WWWE america eight.com are you still paying your credit cards and so-called bank loans thinking that you owe the money do you feel like it's your moral obligation but can't see an end in sight well what if I told you that in truth you don't know what single penny and that the bank noticed and hope you don't find out here's where we come in we to prosper calm specializes in a profound debt repudiation weapon which challenges the validity of your so-called that's morally freezing from the burdens and protect your property on system is often superior to settlement bankruptcy or consolidation which often leave you in a war situation if you feel the moral obligation to take care of your and your family then I courage you to consider taking action right now the economy will not wait if you want to know more so you can prosper through the economic collapse all while staying honorable and true to yourself they call eight seven seven four one seven eight three nine three that's eight seven seven four one seven eight three nine three or busy free to prosper calm right now and all I want at least control of the population so give me the mantra the burden of humanity yes when our shoulders the only way is to expose the global crime syndicate known as the New World Order together we all want together you know and L Bulger's the battle for what reason any pieces do not in the fight in down up calm [Music] [Music] okay we're back and I was talking about the heart chakra and its correspondence to the planet Earth and how we're really here to learn the dynamics of true care that's what it's ultimately all about understanding that we're one understanding that as one suffers all suffer and interestingly the the color of the heart chakra in the Vedic system or the unhappy chakra is green we talked about green as being the balance frequency is the middle in the middle the dead center of the visible spectrum of light it represents mediation or balance it represents love energy which is totally tied to the connected the concept of care it represents the balance between the left and right brain hemispheres it represents the colour of nature green energy this this is a green planet green and blue but in general the you know all the the natural forces that grow here on the earth on the land are green you know green is the color that we need to take in as far as food goes to really have health in the body you know the dark green leafy vegetables alkalize the body keep us healthy provide basically you know the nutrients that we need and um this is completely tied together with the forces of nature of the Sacred Feminine energy the the energy of balance and love and again it's tied together with concept of balance between the brain hemispheres and of course the the visible spectrum light energy okay so green is that balance or fall Crone point between the two opposite extremes that we need to you know come to the really understand what is needed here what we need to do how we need to change the level of care that we need to develop in order to really make this great change come about which is basically coming out of a purely left brain mail Dominator system of control hierarchy compartmentalization and you know the erosion of rights and freedom to a balanced holistic society that reintegrates the Sacred Feminine you know the goddess so to speak and respects natural law and freedom and embodies it and lives it and puts it into practice and the heart chakra is really what we need to connect to to do that that's as simply as I can put it and again this corresponds to the earth the earth is the heart chakra of this solar system period so just sit and meditate on that and think about that for a moment some people may not think that there's anything to this correspondence but there is and you know if you just open it your mind and your eyes you will see it and it isn't just you know I'm putting images together to make this work out like this okay really sit think about it think about what we said look at some of the images and you know meditate upon it or contemplate upon it I should say so the next chakra now we're getting into the highest chakras the higher chakras the high the ones above the heart shop or the heart chakra again acting as a fokker more a balance point between the lower chakras and the higher shoppers we're getting the three higher chakras which are the throat chakra or the third eye chakra and the crown chakra so the throat or the shuddha chakra is corresponds to the planet Venus Venus is the next closest planet inward toward the Sun this is the speech center of course the throat where our vocal cords are at and this starts to open us up into higher levels of knowledge and awareness and most of all creativity because this relates with the color blue which corresponds to the right hemisphere of the brain and this is about how we use our voice this is about what do we talk about no it's uh what kind of things concern us in our mind so we actually express that through our words we do it in a way that is uh no frivolous that is vain that is um you know of vapid that you know is concerned with absolute nonsense and things that don't really matter you know are we talking all day about sports and celebrity gospel you know you know gossiping about our friends and you know things like that or are we really trying to get messages across to people that matter that are about what's really going on there about what's really going on within us you know and I mean as a whole as a people within us okay um it's so important what we use our voice to do it's so important that we care enough to use our voice so many people know what's going on don't talk they you know there are people out there who know exactly what is up and what is taking place and yet they don't activate themselves through the heart chakra to make their way into that let's talk about this you know aspect the throat chakra you know I this was a the case with myself only years ago I sat on so much of what I knew to be the case for years for years I was involved in the dark occult knew what was basically being done didn't have the full picture but knew enough to start speaking out about it okay and I didn't for years because I wanted corroboration from many different sources I was insecure I was too insecure in my knowledge to say oh if I put this out there I maybe I'm wrong maybe I won't be I'll be ridiculed maybe I you know I'll be doing more damage than good by putting this information out but now I almost look back and want to kick myself for not speaking out earlier because you know I'm not sure whether we're too late now sometimes but the point I'm trying to make here and I told the story before on the show I you know went down to a meeting in Virginia you know on I think it was on the topic of the Mayan cat it was on the topic of the Mayan calendar actually yes it was and a woman at this meeting said you there's so much knowledge you're carrying with you what are you doing with it how are you speaking this back out into the world to try to enlighten other people and I said no and she said what makes you think you're allowed to do that with the kind of knowledge you're carrying she said you need to have a outlet for this like a release valve pressure release valve Oh or you're going to do harm to yourself and what makes you think that you're even allowed to sit on this kind of information and not put it out back out there into the world to help others you know that you'd be doing wrong by not doing and you know I sat and thought about that for a while that's kind of what spurred me on to even start doing my presentations led to this show and all the other activities I'm involved with so um starting to speak out is one of the most important aspects on the road to truth and you know it's encouraging that many people are activating in that way but more people need to a lot more so that's the throat chakra with the vishuddha chakra the planet Venus and again that's the goddess the right brain corresponds with the it's right next to the Earth Moon system as well it's almost a twin of the earth of you know size planet Venus is okay and you know it's connected right next to the green energy of the heart chakra you go upward to the blue energy and that's you know you cared enough and now you're actually speaking okay when we have to unite see three things need to be united actually all of these need to be united but the key factors are that the heart chakra and the chakras that surrounded immediately which is that the throat and solar plexus so you have the emotions and then how your knowledge is expressed through the voice they work we're going to get to knowledge in a minute and then uniting that with the will center which is the solar plexus chakra okay so Venus and Mars have two brought together by the heart chakra which is the earth okay the male and female it's very interesting how it works out this way in you know the solar system you know the whole idea men are from Mars Women are from Venus Mars the God of War you know the yeah masculine yang energy and then Venus the goddess the sacred feminine energy not a coincidence that it works out like that the ancients were telling us something you know so let's move on to the next chakra the two highest ones are the third iron crown the third eye chakra is called the Ozma chakra and its color is purple some people will call this indigo and distinguish it from purple and then say that the crown chakra is a purple or violet and white okay let's just call it purple for now and we can see that this chakra relates to the third high what is the about the balance of the brain hemispheres and the activation of the pineal gland okay that's the gland that we're talking about here when we talk about the third eye chakra but moreover this represents the awakening of knowledge and what it really represents is not just mundane knowledge not just knowledge about the external world but true knowledge of self and how the self operates in the physical world and the dynamics that are going on in the physical world the truth about this reality is what this chakra is also ultimately all about and of course that is corresponds with the planet Mercury okay the messenger of the gods in the Roman tradition in the Greek tradition he was Hermes in the Hermetic tradition he is Hermes Trismegistus and the Egyptian tradition he is both the scribe of the gods and we can go on and all with names for him but essentially mercury is the closest planet to the Sun hence he is the messenger of the god of this solar system okay and you know they say when they ascribed something to be mercurial it represents having high you know minded topics it's something that is very cerebral it has to do with the brain the mind and this is a you know about our thoughts this chakra what we spend our time thinking about what we spend our mental energy in pursuit of are we pursuing the truth or are we concerned about you know memorizing statistics about what happened in football season you know what I mean okay just uh you know so many people have brilliant minds and use them for garbage nonsense trivia can't tell you how many people spend time memorizing trivia trivial facts though they call it trivia people can know so much about so many little tiny things but the the point is um you know they're not really spending their time on anything that is really bettering themselves or humanity you know they're not thinking about the bigger picture they're spending their time time focused on the trees instead of pulling back and seeing the forest you know I was talking with my friend earlier and we were talking about doctors and scientists and how some of them have brilliant minds and know practically nothing that's worth knowing because you know I likened it to a you know a desk you know people somebody's work desk with a million things laid out on it right and I said to my friend earlier today these people's minds are like what they're doing is they're focusing they're in a drawer in that desk and then they're in a tiny little container in that drawer and then they're focused on looking at a little tiny notch that was made in a in a paperclip inside one of these containers inside one of the drawers and they study that little notch and know every little aspect of it oh they we can measure the angle of the notch and that's the end of this paperclip with exactitude and we can you know understand how the notch got there and what the material is made out of you go on and on into infinitum of the trivia and the specialization about what you can know about that little tiny tiny aspect of that corner of the world but they don't even know that they're in a drawer on a desk in a room in a house on a block in a city in a cunt you see where I'm going with this they don't pull back and get the bigger picture their whole world is that little tiny area of specialization and this is what I would say is a person that of course does not have access to this the energy of this chakra because this chakra is about holistic knowledge it isn't about left brain logical knowledge only it is about specialization it's about holistic intelligence the coming together of the left were logical and the right or creative or intuitive brain hemispheres and merging them as one in this chemical wedding ok the chemical wedding of the merger between the aspects of the left brain and the right brain which we've talked about many times here on on this show in the past ok so that is the planet

Mercury it represents the magician qualities the magical qualities of the individual really coming online in knowledge in a holistic sense ok and finally we come to the crown chakra and of course this is the Sun this is the light the Savior energy mrs. B it's called the sahasrara chakra in the Vedic tradition and this is connection to oneness is how I can best describe it this is cosmic consciousness some people call it Christ consciousness of course we saw how the concept of the Christ is associated with the Sun and again the ancients that really understood this knowledge from an esoteric perspective that we're not worshipping the Sun in understanding how these correspondences work any more than I am worshiping the Sun ok this is a symbol it's symbolic God's Sun we didn't put the Sun there God did okay it doesn't belong to anyone it belongs to the Creator in other words so it's the son of God ok and this is um you know it represents really coming on to the true light of one's true nature it's under that we are one not just with everybody else around us but with everything that this is all an experience it's a contract that we are having an experience we are not the body we are not even the mind we are experiencing the body in the mind we are a spiritual being having a physical experience not the other way around and once we connect with that we can't really be controlled that's what the dominators and the occult is the Darko cultists I should say of this world don't want us understanding and connecting with because once we do game over for them game over because everything that is perpetuating this system every body every individual that continues to perpetuate their male Dominator nonsense system okay they're complete crap bs system that they've set up and people believe in and support and hold up like their life depends on it is dependent upon one thing and one thing only and that is identification with the body as the self we talk about this many many times when we talk about the barriers to the realization of the true self the $0.05 illusion okay you know ego identification you know staying trapped in physical only consciousness left brain only consciousness and identification with the ego who are the roles that we play in life and believing that they are us instead of what we are which is infinite consciousness having an experience in the physical domain period and that's done to evolve the spirit to higher states of awareness that's why we basically come into this domain where we do the work and that's that understanding that's really knowing it not just saying it not just repeating it but knowing it within us that's really the activation of that crown chakra and once that's activated that person cannot be controlled in the physical sense they're not going to go along with the dominators agenda no matter what it means because they don't care what happens to their body they're not going to accept they're not going to want to control anybody because they know that that's ridiculous nonsensical you're you're only harming yourself and violating your own rights and violate violation of someone else's and you're not going to go along with control you're not going to go along with the nonsense of control control are being controlled and you know that's what it's alternately about and the ancients who put these systems together really ultimately understood this this knowledge has been really kind of watered down it's been perverted it's been you know outrightly uh you know obfuscated and obscured and it's come down through different traditions and muddied ways very muddy ways and that's why people you know don't understand it they don't know what it's all that's ultimately about a true activation of care true activation of intelligence true activation of will not playing the game of you know control at all on either side of it being a controller or accepting control and being a slave and then you know too many people in the world really think that all of these occult systems are somehow negative or bad or evil and this is a childish mentality there is no such thing as all people who study the tradition of Kabbalah being bad or evil any more than its sense of sensical to say all Christians are bad and evil no they're they're you know people who are interpreting things in different ways there are really good positive Christians in the world who you know look at their tradition and know the difference between right and wrong and live that way and their kabbalists you do the same and there are Freemasons who do the same okay and there are Rosicrucians who do the same etc etc you know it's when we're talking about the dark aspects of the occult these these traditions have all had falls in the past they have all fallen and they've fallen into wrong hands they want to use their knowledge for control you want to use their knowledge to manipulate because these are all whole systems of knowledge that are about the self they're about aspects of us and if we know them and other people don't if we were so inclined we could use this to manipulate other people and they have done this that's what has been done with these traditions sadly and that's why we're in the mess that we're in because people don't know these and these things and they're still occulted meaning hidden and I've said before on the show the answer is going to come what we really need to move toward is making the occult no longer the occult because it is not hidden anymore it is known and I absolutely disagree with the people who say that that's not necessary that that we can do that we can create a peaceful world we can create a world that's sustainable we can create a world that's based in freedom and we can still have a whole bunch of ignorant people in it it'll never ever ever ever work that way you know oh people say oh not everybody needs to get this to get what's going on yeah everybody needs to get it no shortcuts no well five ten percent of people understand it and they're going to be the leaders and then you have the same situation repeating itself in another cycle and the same thing will have to be done over and over again because it will descend it'll turn into a system of control and we'll be right back where we started or where we ended up I should say and it's a naive position the people even within the freedom movement who think only a few percentage of people need to understand the truth to take over the reins right bold is what I answer back with that ok we need to educate people thoroughly we need to put this knowledge out into the world until it becomes part of the collective consciousness ok it does need to be known by almost everyone and you know the people who think that that's not the case are this kind of the same people to think some mystical Savior is going to descend from the clouds and rescue us a man another friend joke all the time the Tooth Fairy is going to be here any day to wave a magic wand and rescue the planet just like all the aliens from whatever distant star system they're coming from this week are going to swoop down and pick up the garbage that we've created in our environment you know our mass psychosis you know in our diseased psyche they're going to swoop down clean up all of our garbage for us and then cradle us in their bosom for all eternity and rescue us from ourselves good luck with that don't don't sit around waiting for that and expect that to happen because you'll be waiting a long long long time okay it's up to us to do this work for ourselves and for no other reason that it's then it's the right thing to do and for no other reason then it's the truth but again you know abdication is one of the strongest weapons that uh you know our is continually dangled in front of us like a carrot by the elite they always want us to abdicate our responsibility to really really understand really know pass the buck on you know that's all just pass the buck it's not your responsibility you don't need to know this in any kind of fullness year especially I'll need to teach it to anybody else just you know think that you have it figured out enough and then move move along and you know let the chips fall where they may and all the time they're running right to the bank as a result of that application you know they have it's like I said and other teachers have said like Michael sorry on his at his analogy for it the elite don't look at 7 billion people they look at one consciousness to be whose neck is to be put into one collar that's it and that that's how they they work they work with systems dynamics that's how they work whole systems they don't think of people as individuals they think of a whole culture a society you know like a little petri dish okay call the culture okay with all the millions or billions of cells in that dish and they put do an operation to that whole dish and it affects the entire thing that's how these elite think they don't think in terms of I'm a unique individual special person with my own unique talents abilities and you know aspects of my psyche and personality no it's seven billion is one consciousness to be controlled that's it and that's you know again people don't want to hear it but that's part of the reason they're so successful they think in terms of systems dynamics and we don't meaning the bulk of humanity and that's why they can pretty much have our way with us because we are we are not evolved thinkers and they are and you know I'm not picking up for them or you know trying to say that you know I'm like what they're doing in anyway but I have respect for you know the enemy or I you know the other opponent playing on the other side of the chessboard kicking our ass pretty much that yeah I have respect for it because they know all of this information you think the elite don't understand these aspects of the self they know them with totality with perfection they could do what they do unless they need us and you know again I'm just going to respond one more time to people who say oh well the bulk of humanity doesn't need to understand this you're crazy if that's what you think you're crazy that's that's all I can say about it because there are no shortcuts in this game there are no shortcuts when it comes to self-knowledge people have to actually do the work for themselves because they cared enough to do it period the end so um that's all I'll say about that and that kind of concludes the UH you know correspondence aspect of what I was trying to do with the chakras and the planets and I think that's a kind of a valuable exercise and you know it's a good meditation to go through or you know not it's only really a meditation it's a good contemplation I don't know if I ever talked about the three modes of thought but that's kind of a good thing to understand in um looking at religion as well because our society engages in two basic modes of mental activity and primarily it engages in one which is concentration this is active alert thought okay and now I'm segwaying into this from the you know breakdown of the chakra systems in correlation to the planets because again I'm saying you don't even want to meditate upon this if you want to do this as like kind of like an exercise to you know look at these different aspects of the self and see these correspondences with caught the collars and the planets etc you want to contemplate on it and there's a big difference so the first mode of human thought that I was alluding to his concentration this is active alert thought left brain thought but this is important for people who are primarily right brained and don't want to engage in the male masculine consciousness you know there's a lot of people who are imbalanced toward the right brain you know they're the the spiritual type I only want to use the word spiritual type the New Age type which we talk about the New Age movement ok the New Age type never really wants to engage with actual tangible things that are done on the earth on the ground floor ok actually doing work on the gameboard floor ok with knowledge that is gained from higher-up meaning you know we look at the whole game as a big chess game that's being played between the forces of light and dark and if you're going to actually move the pieces on the board you need to exercise the will to move the pieces you can't sit there and go oh I know all this knowledge of how things work at higher levels but I don't want to soil myself by having to touch that piece on that board and then the the dark occult this comes in swoops down on the board makes a few moves and checkmates you okay then that's what's really happening so we need to understand that concentration while it is the predominant mode of thought in the world and that's you know sometimes can be not good because people never engage in anything else but left-brain thought that's part of what's keeping us in this manufactured reality nobody's engaging the feminine aspects of thought the you know intuitive and creative aspects of our consciousness but um you know when we are - right brain it could be damaging as well we can't really get anything done we drift in this you know kz a you know a quasi spiritual state which isn't really a high level of spiritual attainment it's a it's a trap if you asked me and people want to meditate all the time I've given the example of dick Sutton uh that the teacher who tells a story about a friend of his back in the 70s who you know meditated so much he couldn't concentrate on any work and couldn't get anything done but he was having a problem in his brain went to a doctor his doctor did a brain scan and the brain scan showed that his neocortex had actually been destabilized in a similar way that drugs can be stabilized neocortex of the brain and he said you know I know you're not high you know but you're scanning like your hive right now now I he did blood work on my guess and didn't find any drugs in the system he said I meditate on the hours a day hours and hours a day he said well that's what it is he's always in a right brain state never engaging the physical reality that he lives in that his body you know is carried in we need to not totally be engaged in the physical world the point where we identify with it but we don't need to neglect it either you know that this is this is what led to a religion completely conquering and taking over the world pretty much is this a right brain state of consciousness now we'll go into the opposite imbalance a left brain state government is taking over the world because religion is the binding upon the left brain that keeps people trapped in the right brain all the time you know and then controllers who understand that how that works can keep people enslaved practically spiritually okay through what they believe it's a form of mind control and you know government is the opposite it's binding upon the right eminent creative intuitive part of the brain to have a total control system come in and take over there both forms of mind control they just work on different parts of the brain so concentration important can help balance when you're in too much of a right brain modality pot smokers you know the XR excessive with it you know I'm not saying are we talking about you know cannabis as being an entheogenic compound it could help people get out of excessively left brain modalities but there's a balance that needs to be struck as what I'm getting at not making the pendulum swing from one side to be too far to the other side so I'm going to take a break right there and give the call and number again cuz I'm Way past the top of the hour again anybody wants to call in the call in number seven two four four four four seven four four four once again a calling number seven twenty four triple four seven triple for the call ID number that you will be prompted for when you call in is eight three five one five call ID number for what on earth is happening eight three five one five so back to the modalities of human thought concentration left brain modality meditation right brain modality we've talked about both of these the middle or mediating modality of thought is contemplation and look right in all these words I think I've mentioned this before on the show but I'll say it again con sin tration right we break down the words this is green language this is our chemical language okay we've talked about green language you only really see it if the consciousness is a team to the green frequency it's not red it's not blue it's not left brain it's not right brain it's in the middle concentration concent con means come together or together or with in Latin it's a prefix and send centric Concentra concentration right and then the last part of these words so you have come together or together center in the middle center right and a tion and these words concentration meditation contemplation Asian okay a tion at ion okay this is green language it's word pun language okay at I on the eye is on your acts the state of consciousness that makes the eye on okay on is another word for light okay on means Sun or the light a on eye on the eye on not off not in a state of off were being blind but on alert awake and an ion is a positively charged particle could be a negatively charged particle too but it means that the energy is present you know there is energy their electricity awakening ion okay so concentration can help us to come together at the center to bring the ion if we're in a too much of a right brain state that's why it's a left brain modality of consciousness that can help us balance consciousness if we use it properly meditation needy okay Medi means in the middle the center anion same thing it can help us to come to the center to center ourselves if we're to and a left brain state that's why people favor the method of meditation because we're largely left brain physical task oriented society identified with the physical world so meditation if we're in left brain modality predominantly and help us to come to the middle again or balance consciousness but the best way to do it the best way to do it is to use contemplation we'll talk about that right after these words you're listening to what on earth is happening right here on the Intel hub news network we'll be right back [Music] he will wear kalapa hazards in all of Italy in controlling the population total care he is amongst us the burden of humanity left on our shoulders the only way out is to expose the global crime syndicate known as a new world order together we are all one together we are you know soldiers the battle of the humanity and soon enough in the fight ENL of calm a very multi US citizen is predicting that in 2011 we will witness the most important day in America in more than 50 years he said and will change everything about our lives the way you shop travel and best educating our children and even how you take care of your health and family now this man has made some outrageous predictions over the years but the crazy part is he's usually right you see he predicted the collapse of GM and may threaten neck and America's biggest mall owner General Growth Properties of you you in fact Bironas called his work a dire prophecy now this has nothing to do with the stock market but it could have a huge impact on almost every aspect of your life and recently he created a video which you can watch online for free detailing the biggest and most important prediction yet and it's a real eye-opener I can't stress this enough you should at least watch the free video online today he explains everything you need to know including simple steps you can take to protect yourself you can find the video at www.wku.edu/oucampus - some audiences it's worth checking out again that's wwm of America the number 8 comm watch this free video app WWWE mmm Erica a calm you are listening to the Intel hub network rustling did you order piece by piece secure your future get your non-hybrid team pack now with the leading economic crisis food shortages and other toxic disasters now is the time to be ready just click on the heirloom organics banner at the top of our blog pod where you'll be today secure your future and the future of your family in hard time heirloom organic seed Wendy Jennifer Johnson and we computed Thursday and Sunday thank you sir Siddalee Raymond you say huh okay we're back on what on earth is happening I want to wrap up the concept I was talking about before the break we have a couple more segments to go on the show I want to try to get through a few pieces of material here I had gotten to the point where I was talking about three modes of consciousness concentration which can assist in balancing right brain imbalance consciousness because it's a left brain modality meditation which can assist in balancing left brain dominant consciousness because it's a right brain modality of thought actually quieting the thoughts so that we can come to a place of balance for those who are too left brained and the the one that I described is really the best modality of thought but it is a lost one or it is practically not engaged in and there's a reason for that and that is contemplation we see that that is also a green language word because cons together and then we have the word temple in the middle of the word and indeed the brain hemispheres are in the temple of the head okay between the temples this is a reference to the temple of Solomon again being the Sun in the moon or the left brain and the right brain so so contemplation is khan temple at ion okay and I know that's a strange you know sounding way of saying that word but if you think about it in green language terms if you even understand what I mean by green language word pun language or wordplay language what is being said by contemplation is together at the bringing the temples together the left and right brain at eye on the place at the center which is the third eye chakra or the human pineal gland so this is one of the best ways of activating the balance between the hemispheres of the brain across the corpus callosum the the bridge which actually ties these two brain hemispheres together and passes information back and forth between the two because um it is a form of daydreaming it is a form of active yet imaginary thought simultaneously it engages both brain hemispheres okay and this is why it is so heavily discouraged people discourage daydreaming and just about anything okay uh it's like a taboo it is something that is not to be done it's it's like a forbidden thing in our society and there's a reason for that because daydreaming engages both brain hemispheres equally again it is active and yet it is creative and imaginary simultaneously so you're you're using both hemispheres of the brain when you do it when you contemplate upon something not deeply concentrating on it yet not meditating requiring thought completely but actually actively engaging it but in a creative way and that's what this society doesn't want anyone doing that's the lost mode of thought with a lost mode of prayer some people actually call it a simple daydream for the manifestation of one's own intentions and the solving of problems that we may encounter try it sometime and I'll guarantee you if you can get into that mode of consciousness because it's not even easy to get into okay most people fall into either not being active enough in which they slip into a form of meditation or being too active in which they start concentrating or try to force the issue contemplation is a very subtle balance between these two modes and when we hit it right dead center you know pun intended there okay it's amazing the kind of things that you can come up with in that state of consciousness and that's why it's so round upon by the dominator culture so the modes of thought again that's also connected with religion in many ways because you know it is about the manifestation of what we want to see happen and how we want to change ourselves and people call that prayer but prayer is kind of a fallen form of that that that is descended in this simple begging you know just placating ourselves to a no desire of some God or begging that God for manifesting our desires for us um in which case we don't really learn anything the answer is just given to us you know we didn't have to do any work to achieve it or learn about any aspect of ourselves we just magically get something I've never believed in that mode of prayer but you know actively engaging in something like um a contemplation makes a lot more sense to me anyway but I want to talk about the other religions we talked about Christianity last week briefly I want to discuss Islam and Judaism as the other Astro theological cults of the ancient world and how these are fit into a model that I have noticed and many other people have noticed of this correspondence principle that I've been talking about all night when it comes to the earth itself as a living holistic dynamic system that we're all a part of and it's kind of controversial it's kind of something that people have a hard time seeing where when they even do hear reject it outright you know that they just think it's nonsense and I'm going to put it out there anyway I don't really care I see the correspondences in this I think it's powerful when we see the correspondences in this model that I'm going to mention hopefully I can get to it by the end of the show tonight but think of it as you will believe believe don't believe it you know I say you know don't believe anything you know if you see the correspondence and you value this model you know maybe try to relate it to somebody else but you know if you think it's it's nonsense you're within your freewill right to think that way but I see something in um you know of recognize a pattern in how the religions of the world have played out in the modern era and the geographic positioning of the concentrations of these and you know other things that I'm going to get into when I talk about this earth brain model but briefly on Islam Islam is the lunar astrological cult as we saw that Christianity was the solar cult of the ancient world handed down to us today as a modern religion Islam is a lunar cult based on the goddess principle or the moon okay and its symbol is a crescent moon in star okay um that's telling right there in that the main symbol again the main symbol for Christianity is the cross and we saw how that's actually the cross of the zodiac which the Sun is placed upon and then the story of the sun's Trek and the zodiac was pattern around that cross with a quadrant the four quadrants are quartering of the zodiac wheel the Islamic religion is based on the moon or lunar cult but also as I said one like we talked about the story of Isis Horace and Osiris in the Egyptian tradition the Sacred Feminine goddess of the ancient world as she was worshipped in the cultures and cosmologies of the ancient world was also patterned after the galaxy itself not just the moon but it was the moon the night sky with the stars you know in their manifestation you know at night okay so the full again we saw Mary's image with a dark cloak with night sky stars embedded in it okay but um and this is Isis because this equates the Isis in the Egyptian tradition because it's not just the moon goddess that's not just what the goddess represented her what Isis in particular represented it was the moon it was the night itself it was the blackness of the night sky with all the stars embedded in it and it was the galaxy itself all of these things is what the goddess represented and some of her their names were meet okay and that of course you can see her depicted as you know bridging over the the two horizons with you know she's acting as an arch and all the stars are in her body and also that's the galaxy the Milky Way galaxy is a gigantic band in if you can get into a place that's dark enough in the modern world without enough light pollution you'll see the band of the Milky Way in the sky okay it's the plane of the galaxy and well you can see that and that would you know the Maya called the cosmic River the ancients looked at it you know in the Egyptian tradition and the Babylonian tradition has a great goddess that was arched over the world okay just a symbol of course but nonetheless the point I'm trying to make is that this goddess is who the Islamic religion is patterned after and is given to see each major world religion is given to one of the three ancient astronaut occult we of course have talked about the Sun already and now we're getting into the lunar cult the cult of the moon or the goddess okay and this is Isis Isis and we see that the name Islam comes from Isis it begins with the same letters as our name is okay and it means submission the word is long as submission to what it means means submission to God and this is a right-brain characteristic okay some submitting oneself becoming submissive again that's that's yin energy it's the passive energy the the dark aspect not darkened sense of vile or evil but dark in the sense of it is it is not the active solar quality the masculine quality this is the lunar night equivalent okay passive non active energy of yin energy or goddess energy okay so Islam is uh it's some of its traditions actually pattern themselves after the worship of the goddess and the galaxy in addition to its symbol being the symbol that moon in its crescent aspect which again we talked about in the Babylonian tradition um Semiramis the goddess her name was Semiramis was considered uh you know a dove sometimes depicted as now but definitely looked at as a dove okay again the Dove is the moon in its crescent aspect making its crack across the sky just like Horus in his uh you know aspect as a golden Falcon or hawk as the Sun making his truck across the sky as a huge bird again it's again purely symbolic they didn't really think a dove was going across the sky or Falcon was going across the sky and that's what the Sun and the moon were these are symbols they depicted them symbolically so I said on the show and talked about time one of the center central rituals of Islam is the journey to Mecca the pilgrimage to Mecca that serious adherence to the Islamic faith make and when they go there they have to strip of their clothing and wear a simple white robe there's a reason that it's white they go to the center at Mecca which there's a large black box okay if you type in the Kaaba the Kaaba at Mecca this is the center of the Islamic religion okay and it's this huge black draped building that's cubical that all the adherents of Islam when they make this pilgrimage make revolutions around in their white robes could see many pictures of this videos of it around this black central cube now that's a strange depiction right there however it's very telling once you understand the Astra theological basis of the religion as the religion of the moon or the goddess or the galaxy and the night sky with all the stars embedded in it and again I just went through the whole idea that each of us is a solar system or a star a Sun carrying these different planets in the Septon eree of the body which is the chakra system just went through that okay this is what the occultist who really was a dark occult this had aspirations being a white occultist but I don't feel he could ever make that transition he couldn't put set down the ego aside enough to really do that Aleister Crowley meant when he said every man and woman is a star well he meant that he understood this correspondence system he understood that we're all a solar system he understood you know how this you know religion was actually viewing people but if see it's a debasement of it because they're symbolically making them they're not really understanding that that they're symbolically making them just dress in a white woven and act as a star to go around the center of the galaxy that this black cube at at Mecca the Kaaba representing the supermassive Galactic black hole at the center of our Milky Way galaxy which is a classical depiction of how mots was viewed in the Egyptian tradition the goddess of the night sky with all of the stars embedded in it Jamaat's suns is where the word Mason comes from Mason the sons of Maude's the Egyptian goddess of the night sky and galaxy the the stars the Suns okay or stars the lights the points of light of the stellar tradition okay this the the stars in the night sky and they are mocks Suns not being the galaxy or the fabric of space herself traditionally called mute in older Egyptian traditions Isis in newer ones this is the basic underlying tradition that underlies Islam it is given this is one of the modern religions that is given to one of the three cults of the ancient world the astro theological cults of the ancient world and this one happens to be patterned after the moon or galactic goddess and it's right there in their rituals so I'll probably post a video of the celebration around and rotation of Islamic of the Islamic faithful around the Kaaba stone at Mecca the Kaaba building I should say head Mecca so [Music] tons of correspondence is there to look into as far as Astro theology is concerned the Judaic tradition okay so Judaism it's the if this is really the mother tradition of both Christianity and Islam okay it is older than both of them and as we're going to see and I'm going to spend a great amount of time probably the whole show next week start of talking about the Kabbalistic tradition Kabbalah and how it is the root of Judaism and Judaism is sort of a fallen version of it and how to really understand Kabbalah is also to understand the self and how that has a dark tradition to it as well again all of these occult schools have a light in the dark side we have to become more mature in our understanding that these traditions can help to enlighten ourselves enlighten us and help us to enlighten others or they can be used to manipulate and control is just information it is how it is used it determines its outcome okay we can't get into the idea that all Freemasons are evil people all people who study Islam are evil people all people who study Judaism are evil people all people who practice Kabbalah are evil people it doesn't work that way that's a simple tunes a viewpoint of any aspect of the world okay now you know we can talk about you know blanket statements when it comes to not understanding natural law and you know trying to add one polarity and get another yeah these are these are absolutes you're not going to do that you know you're if you're violating somebody else's natural law your raw natural law rights you're wrong okay all the time not some of the time all of the time the people who are doing something like that are always ignorant not passing the time not 75% 100% there are times that blind statements apply when it comes to the study of different mystical traditions I don't think we can employ blanket statements we have to understand the context in which the knowledge is being studied and used and I think there very many people now that are starting to come on to that understanding and not look at it like oh I shouldn't be looking into this or that or that you need to take it all in as much as possible and then use it for good because you know what natural law is and you know what sovereignty is and you know what right/wrong are period and these things will help you to gain a greater appreciation of the self and the aspects of the personality so all I want to really say about the Jewish tradition the tradition of Judaism at this point is it is the stellar cult it is the religion that is given to the small lights of the heavens again now we've already seen Christianity is given to the Sun or the solar cult Islam is given to the moon the lunar cult of Astro theology and Judaism is given to the spell our cult the cult of the stars and planets and this is the reason that the god of Judaism which in their biblical texts in the Torah is called Elohim one of the names for God Elohim is a plural word in Hebrew as a matter of fact it's plural feminine they're talking about now Judaism as a religion specifically espouses a singular masculine God however the word for God in their religious texts is Elohim which is feminine plural and the reason for this is it is the astra theological gods that this religion is given to are a myriad of stars in the heavens and the planets that can be seen with the naked eye these are the gods of the Judaic religion there isn't actually one as a matter of fact the whole idea of monotheism is doesn't really specifically apply to Judaism people think oh it's a monotheistic religion Judaism is a religion in which one God is chosen out of many they were originally believed in by the original um tenets of this religion the original up priests of this root priest class of this religion I should say okay in their original teachings it was taught that they believed in and worship they worshiped one God out of many that were believed in so there wasn't that they thought that there was only one God this is how it comes down to us in modern terminology but they actually it was a pantheistic religion as far as that they believed that there was more God than just one but they chose one specific God out of the many that they felt to exist okay that's that the way that it is come down to us as a monotheistic religion now the name Elohim again is about the stellar aspect of this ancient astrological cult the stellar cult and the stellar called people of the somatic region of the world so that's the reason that this word Elohim is pluralized because that's what it's ultimately really referring to in the astra theological interpretation at least because we can get into other dynamics and other interpretations of why that word is plural eyes but again we have to look at also that saturn is one of the main gods of this religion this is a Saturnian based religion in addition to being the star based religion and just I mean as simple as it gets folks it's right in front of us the symbol of this religion is a star I mean right in front of us that the cross of the zodiac is the symbol of Christianity the moon is the symbol of Islam and the star is the symbol of Judaism it's right and their symbols how much more in-your-face doesn't need to be is what I want to know right in the very symbol the stellar cult has the star on it it's stamped as the symbol of its religion the lunar cult the symbol that is given to that religion is the moon and the cross which we talked about the importance of the symbol of the Cross when it comes to understanding the movement and story of the Sun as the ancients told it and saw it visually depicted it is given to the religion of Christianity which is the solar based religion it's right in the symbols out in the open out in the open and still people will debate that this is the origin of religion that astra theology has anything to do with it Saturn being uh that again the god of the planetary system as this stellar cult saw it because it's the farthest body that can be seen with the naked eye and hence its orbit contained all the rest and therefore it was the father of the planets okay it had the widest range I guess you could say that he that it took all the other planets into account in its big ring in its arc okay its orbit and they called the planet L which means God they called Saturn l PL from this term we get the word elite from this term we get the word um elder okay followers of this sector nian basecoat it's derivative of light we get the word illuminated from it okay and again there's something to the bringing together of these symbols too you know the upward pointing triangle called the blade masculine energy the downward pointing triangle called the chalice the feminine energy these are archetypal symbols bringing them together we get this Seal of Solomon the Sun in the moon so I want it alright I'm going to talk about the principle of correspondence to start out with next week to lay out this earth brain theory okay and it'll be a controversial one hopefully we'll get more callers I have a couple of callers on the line I've one caller on the line I'm going to go to them now we'll wrap up the show with a call and you know talk about a few things going out but I'll save getting into this principle of correspondence for next week brought up a whole lot of things on the show tonight I'll post some images I'll post a podcast they have a video of the rights to take place at Mecca and we'll get into the principle of correspondence as it relates with the brain and the earth and the religions next week and then I'll probably spend the remainder of the show talking about the Kabbalistic tradition segwaying into that because again I'm going to begin outright initiation into different occult schools of thought on this show as we move forward particularly as we get closer to the section we're going to talk about symbology and in that section we're you know I want to lay out some things on Kabbalah before we do that and then on that section I'm going to build heavily into Freemasonry so I look forward to an occult initiation in the coming weeks ladies and gentlemen on this show our caller it's a non-member in the chat forum on talk show you're live on what on earth is happening what do you have for us this evening put inner path you were reading for this initiation we are waiting patiently it is your nemesis your old friend Bob from Cincinnati my friend Bob how are you I'm good how about you tonight mark I'm doing well you are you are pounding it out here and the connections yes these parallel the the the chakras are the planets are representations of the planets are representations of the spheres of the

Kabbalah this is amazing I mean I didn't even know what a Kabbalistic tree was two years ago and now you're telling me that there are these connections between these major of important things in our lives this is unbelievable how this knowledge has been hidden away even from a person like me and I guess I can only speak for my own realization of this is that I'm a guy who kind of dig a dug for this kind of stuff for for decades and yet only within the last few years it seems that all of this is pouring out you are a change agent and we appreciate what you're speaking about and before I step back I would like to say I'm just going to step back I'm not going to run away like I normally do mark but the the the Kaaba this giant black cube in Mecca that that the masses swirl around that that the Muslims swirl around in holy ecstasy this is the same black cube that is worn as you already know mark on the forehead of his supposed nemesis the holy man the rabbi the Jew when he is in earnest prayer he wears a tiny small black cube strapped to his forehead and thus just in the base of it is your Dino there sharing a commonality and that is amazing and exciting to examine absolutely absolutely and these traditions all really converge and of this is the reason that some researchers I can't remember the exact individual who coined this phrase but when I first heard it I almost fell off my chair laughing called them the desert sky God religions that's what these all are because they all ultimately come from the same you know basic region of the world okay you have Egypt you have the Semitic region you have Babylonia you have you know Turkey and uh and Saudi Arabia and Iran Iraq etc okay particularly Iraq because that was where Sumeria was okay and all of these um you know you have Phoenicia Cana which is what we call Israel now there okay and all of these um basic religions derive from the same region of the earth which is the Middle East essentially what we call the region called the Middle East now okay and I'm going to talk about that next week when I talk about the principle of Correspondence you know I'm going to spend next week on probably have to show on the principle correspondence and then the other half on Kabbalah and these these concepts relate to each other because we have to understand that as our consciousness is moving evolving or in some cases devolving collectively we're going to see things play out in the external reality that we live in that correspond to those movements and consciousness it's inevitable because consciousness is everything it's tied together with everything that that we are everything that we are surrounded by everything that we experience and I'm going to hopefully hopefully my intention here is to get people to look at as happens with the very small will be reflected in the large pattern the very large pattern that we see play out and that's the model that I'm going to lay out for those who have seen my video they they're they've seen this and are familiar with it but I'm going to do my best to try to break it down in in symbols and words next week on the air and I think people will get a lot of it if they follow what I'm saying and kind of contemplated again you don't need to concentrate on it you don't even meditate it just contemplate it that's what I asked so Bob I want to thank you for bringing up great points as always and I'm glad that you're you know enjoying it and looking forward to looking deeper into some of these occult traditions because um yes well no and I agree and mark thank you again I ridiculous that I say it again but you're you're explaining things to the majority of us out here and we appreciate it you know I'll be honest mark you are the first person as sent before and since that introduced to me and I think this is very important if one is to understand Hermeticism and the profundity or the profoundness of it I'm speaking and I apologize guys but anyway the Temple of Solomon this is not is he up to this point even now they're trying to convince people this is a physical structure and maybe it was and maybe it was and I wish you that's not my pose here my point here what UNPO zhing or putting out here is that mark was the first and only person to share with us that the Temple of Solomon is consciousness is a product of cause and that oh my god that is a game-changer mark thank you I'm putting it out there thank you sir have a wonderful evening mark the Temple of Solomon as the kingdom of heaven is within that's a great way to end the show ladies and gentlemen sprit II much all we have time for we got about you know 20 seconds 30 seconds left in the show I want to thank everybody for listening um have a great new year have a safe celebration on New Year's Eve and tune in next Tuesday night same same time for our further explanation and further delving into religion and we'll be looking at some deeper traditions as we just talked about so once again you've been listening to what on earth is happening my website is what on earth is happening comm and networks website the Intel hub news network thanks a lot everybody that's all we have time for this evening goodnight you

What On Earth Is Happening Show #041

Topics: *Mind Control Methodologies, Religion, Astrotheology, Principle Of Correspondence, Zionism, Kabbalah*

freedom man that's what it's all about [Music] [Music] welcome you are listening - what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of Earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches it's critical moment of choice and now here is your host Mark Pascoe [Music] welcome ladies and gentlemen you're listening to what on earth is happening right here on the intel Hogg news network I'm your host mark passio my website ww- what on earth is happening calm the networks website the Intel hub news network calm today is Tuesday January 4 2011 happy new year everyone this is the first show of 2011 for what on earth is happening and we have a good show lined up today we're going to be continuing our ongoing discussion of religion as a methodology of mind control and in today's show I'm going to kind of probably wrap up this topic if I can but it will all act as a bridge into other topics particularly into symbolism which will be our next topic as we continue to unfold the methodologies of mind control right here on this program today we're going to be talking about the hermetic principle of Correspondence as it relates to religion I kind of you know ended the show last week a meeting that we would be getting into this but didn't really have time to do that last week so we'll pick that up this week and we're going I'm going to lay out kind of a theory but also sort of a an observation really and many other people have made this observation I'm not the first and I won't be the last it's a way that the principle of Correspondence really does indeed relate to religion and the way that the modern big three religious traditions what I've called on my website as other researchers have called them the desert sky God religions namely Christianity Islam and Judaism how they have basically worked their way into statuses of power in the world as major religions and how that happened geographically and where their geographic positions are in relation to the earth today in their big disk concentrations and now we'll be looking at how that really relates to consciousness on a small scale so these things are related they correspond to each other there are people who will deny this fact and say that that isn't the case but I'm going to try to make that case here tonight on the program and help to get people to see that that is in fact what is going on and it hopefully if I can communicate this effectively will help people to understand that the principle of Correspondence in as it is explained in the Hermetic tradition is true and it is really what modern scientists that studied chaos theory like fractals or that study quantum mechanics are really saying about the nature of reality that it is holographic that it is a self-similar in all of its respects in other words that the universe is self-similar across scales so we'll be looking at that tonight and we'll be getting into Kabbalah a little a little bit tonight the Kabbalistic tradition and how this is the really elute tradition in all of occultism modern Western schools of occultism in particular and I've said that I was going to begin initiating people into different occult schools of thought and tonight hopefully we will touch upon Kabbalah greatly and I'll relate that to some of the things we talked about in the last couple weeks mainly the chakra system in the Vedic tradition so that's coming up I want to give the call-in numbers for the show and I want to read a couple of event announcements all we start to show with that to highlight some activity going on in the area because that's ultimately what it's all about is taking action so the calling numbers if you should feel so inclined to call in feel free at any time no tableau topics here calling and talk about whatever you like seven two four four four four seven four four four that's the first calling number once again seven two four four four four seven four four four the call ID number eight three five one five eight three five one five is the call ID for what on earth is if you want to call into the blog talk Network instead on the Intel hub you can call six four six seven two seven three three eight seven once again the blog talk call-in number is six four six seven two seven three three eight seven so I have a same three event announcements that I read last week I'll repeat them again this week there will be a third fundraiser for the free or mind conference coming up at germ Books and gallery on Sunday January 16 2011 at 2 o'clock p.m. it's a $10 admission all proceeds go toward the for your mind conference books at germ books and gallery will 20% of all book sales during the fundraiser event will go to the free your mind conference the proprietor of germ books David Williams was so kind to set up that deal for the day so if you buy any books at a germ of fantastic establishment here in Philadelphia probably the best bookstore in the tri-state area 20% of the proceeds on the sales of those books will go toward the fundraising effort for the free your mind conference this fundraising effort will feature two special presentations I will be giving one entitled everything I needed to know in life I learned by watching The Wizard of Oz which will be an exploration of the esoteric occult symbolism contained in the perennial classic movie The Wizard of Oz based on the book by Al Frank Baum also Michael Austin Melton another co-host of the free your mind conference he is a field investigator of Pennsylvania mutual UFO network will be presenting a talk called the history of mind control in America this event will take place at germ Books which is at 2005 Frankfort Avenue that's 2005 Frankford Avenue in Philadelphia PA 19154 more information please visit germ bucks com for your mind conference calm on Saturday January 22nd 2011 the activist group truth freedom prosperity will be hosting a a beginning of year networking social for all members of truth freedom prosperity and all prospective members and a body that wants to come out and check out this group and what their philosophies are and what their activities are all about you can come out to Liberty's Liberty's is at second and Fairmount Street in the Northern Liberties section of Philadelphia and the fun I'm sorry the networking social for TFP will be on the second floor of Liberty's starting at 7 o'clock p.m. that's Saturday January 22nd 7 o'clock p.m. Liberty's second and Fairmount truth freedom prosperity networking social for more information please visit truth freedom prosperity org that's truth freedom prosperity o RG finally the free your mind conference a conference on consciousness mind control and the occult Saturday April 9th and Sunday April 10 2011 at Liuba hall our UBA UBA hall Liuba is at 414 Green Street in Philadelphia the doors will be opening at 9:00 a.m. both days the program will begin at 10:00 a.m. both days admission is $20.00 per day in advance and $30 per day if you purchase your tickets at the door the free your mind conference is a unique two-day event set for April 9th and 10th 2011 in Philadelphia featuring multiple speakers and diverse educational materials for the purpose of raising public awareness of the critically important topics of mass mind control techniques the covert and subversive influences upon our consciousness and behavior trauma based and ritualized abuse and the practical mental and emotion healing methodologies available for those affected by these devices the featured speakers Aaron McCallum Alfred Webber Andrew basiago Bob Tuscan Sauer your dozous John Irvin John Nicholson Larkin Rose Laura Eisenhower Mark motika Mark passio Mel fàbregas Michael Kelly and Suzanne Taylor for more information on this conference please visit www.kcc.hawaii.edu look at to try to relate some of these topics while we talk about them and particularly later in the show when I get into Kabbalah I'm going to be talking about one of the main symbols of a Kabbalistic tradition which is the Seth erotic Tree of Life and I have three different variations three different interpretations of the Tree of Life on those images there so if you want to follow along with some of the symbology that I'll be talking about you can take a look at those images on my website so what on earth is happening calm click the radio button on the left hand side of the page in the in the navigation column that will take you to the radio listen page and right on there you'll see images for tonight's show and there's five links there okay so to recap briefly oh and this is related to image number one what we have talked about over the last few weeks is religion as a method of mind control and how religious traditions are really based on Astro theology Astro theology being the worship of heavenly bodies as gods for the most part now again when kind of talked about the ancients didn't really per se look at these bodies as gods per se they were interpretations they were symbols in in the higher traditions of Astro theology of course that may have perhaps fallen and become a literal interpretation in some astrological traditions but certainly in the modern religious traditions Astro theology is what the religion has really become about and people are kind of accepting at face value an exoteric story or a story that is given to the masses of people as opposed to the esoteric core meaning or core tradition which is reserved for initiates of a mystery tradition so they're not seeing that their religion is based upon asteroid theology and moreover what they're really being held back from understanding is the core tradition that really does contain a seed of truth and that is what the Astro theologic exoteric tradition is there to really hold people back from hence the name religion meaning to hold back so we talked about this over the last many weeks I believe starting at podcast number 37 if I'm not mistaken and you can go back and listen to those podcasts they're all all archived on my site in the podcast section we talked about the three major Astro theologically based religions as the the three major religions of the modern world mainly Christianity Islam and Judaism now tonight we're going to talk about the core tradition that underlies Judaism in which today is and kind of grew out of but it's more over Kabbalah is the mystical tradition that the Western occult tradition has grown out of as well so to study Western occultism is to study Kabbalah there is no separating the two really when you study Kabbalah other traditions are intertwined within it as well and maybe perhaps we'll start to touch on some of these traditions like Tarot the study of the tarot deck the book of life so to speak is completely intertwined with Kabbalah and can't be separated from from a study of it either also astrology is intertwine with of the study of Kabbalah and Tarot and that is as I've said before probably my weakest occult science when I you know break break it down and understand what I I've become aware of in my studies but I'll touch upon a little bit of the astrological basis of it as well if I can so we're going to be looking at Kabbalah a little bit later on as the the tradition that Judaism came into the world as an outgrowth of so this first chart that I put up on the site image number one is entitled the desert sky God religions all of these religions came out of the ancient world in the area that we call the Middle East of the somatic region of the world you know the area that we call Iraq and Iran now and in Israel and Egypt that general area of the world geographically so there are three basic ancient astrological --tz-- that grew out of the ancient world there was the cult of the Sun otherwise known as the solar cult the cult of the moon or the lunar cult and the cult of the stars and planets or the lesser lights of the heavens you know the Sun and the moon being the greater lights and then the stars and planets being the pinpoints of light or the smaller lights of the heavens and this of course refers to the stellar cult okay stellar being the the term for star um so each religion of the modern world each major world religion is given to one of these cults of the ancient world they're just an outgrowth of these ancient astrological priests clasp cults and they come down into the modern world in the exoteric tradition as a major world religion the solar cult its modern incarnation being Christianity the lunar cults modern incarnation being Islam and the stellar cults modern incarnation being Judaism so I have a chart there showing this progression with the cult of Astro theology the associated revered celestial objects the modern world religion that it corresponds to and the major symbol of that religion which if you simply look at the symbol right there in the symbol is the revered celestial object of the asteroid theological cult that were talking about the religion of Christianity has as its main symbol the cross we you know with the Sun upon it as we saw before this is the zodiacal cross of the the 12 zodiac all houses which it when it is a quartered or formed into four quadrants forms the the seasons of the year and the ancients would then place the Sun on this cross of the zodiac and show its progression throughout the the scenarios OD AK year and formulate a story upon its progress and it's moving through its twelve houses or helpers and of course we saw how this was the story of Christianity at least in the exoteric tradition the lunar cult is based upon the worship of the moon or the goddess principle and Islam is the modern incarnation of that and it's symbol being the moon you see the moon and of a small star called the sovereign and the divine being one of the main symbols of the Islamic tradition and today is being the speller call to the cult of the stars its symbol is of course the Jewish star okay that symbol is actually much older than the Judaic tradition it goes back far into the ancient world even beyond the Egyptian tradition and the egyptian mystery traditions this is very ancient of India in the Egyptian and Solomonic tradition it comes down to us as the Seal of Solomon of course modern Jews refer to this as Star of David however this is a union of the chalice and the blade two very ancient arced archetypal archaic symbols from our ancient past as human beings and one upward-pointing triangle of course being the blade representing the male aspects of aspects of the personality and of consciousness the left brain in other words it's a phallic shape of the tip of a spear a thrusting principle an active principle and of course the the chalice the inverted equilateral triangle being the feminine principle or the womb of creation the creative or intuitive force or the right brain principle and these two things unified coming together form the Seal of Solomon and again in the word Solomon we have the word soul or Sun and Moon moan okay so Lamone the Sun and Moon coming together so that's you know the real original occultic origin of that symbol and that goes far beyond even when these religions were formulated that symbolism is derived from as is we cross an equal on cross it's much more ancient it goes back right into and take our antiquity as a species so these religions of course borrow upon ancient symbolism if they didn't invent it because of course these are invented traditions that come out of these older traditions of astro theology which are born of even older archaic traditions that we refer to as the mystery tradition so what I want to begin billing today for the first part of the show is talking about how these religions have moved through the geographical regions of the earth where they're concentrated at and what this kind of really means from a perspective of looking at things from a holistic in a holistic way in a way that we see the correspondences and it's not in ways that we're making up correspondences I want to hopefully get people to see that this is a correspondence that does in fact exist and it's a difficult thing to do I've attempted to do this with people in the past I put it in my video presentation series and I'm going to try to elaborate on it a bit more tonight but when you lay out something like this that is a very large pattern recognition concept okay this this takes pattern recognition to understand the principle of Correspondence if the person's right brain is not very developed they're not going to see this and I'm not talking about seeing things that aren't really there or inventing patterns that aren't there I'm talking about actually using a little bit of left brain understanding as far as geography and as far as the breakdown of the human brain is concerned and then using the right brain approach to understand that these things are intricately related they're inextricable they have to be studied in conjunction with each other because they relate a fundamental occult principle to us namely the hermetic principle of Correspondence which is the second hermetic principle and this principle states that the universe is self-similar across scales or as it is said in the Hermetic tradition that which is above is like to that which is below and that which is below is like to that which is above in other words the microcosm is a reflection of the macrocosm in other words the very small is a of the very large and vice-versa the macrocosm or the very large is a reflection of the microcosm with a very small and a lot of people will be very resistant to this concept because of their left brain propensity okay imbalance toward the left brain will make people say all no that isn't happening that isn't how it is you're seeing things you're looking for patterns you're seeing what you want to see well I'm going to lay out my case and as I said last week if that's the way you want to look at it fine I'm not I can't force anybody to see something that they don't want to see but for the people who find this aspect interesting to study it will open up new understanding to you if you really grasp the principle of Correspondence in this one particular aspect and this is what I call the earth brain aspect or the earth brain correspondence ok the theory of the earth brain ok I won't say it's absolute fact I wouldn't say it's purely a theory either however I'd say it's a pattern that I feel that I've recognized and I'm not the first I've heard this for many other people

I've spoken to some friends who said I've recognized this years ago and when I was bringing it up to them they already heard about it and not for reading about it either from contemplating it from thinking about the religions from thinking about the brain and they understood this intuitively so again some people see this pattern some do not and some refuse to but I'm going to lay it out here tonight and make of it what you will feel free to call in at any time comment on it talk about it I'll get to your calls after we break down some of these concepts so if you look at image number two if you're following along on the website um if you're not I will do my best to try to explain this in his detailed way as possible such that you'll understand what those of us who are look that the images are looking at and of course these images will be on the podcast on my website as are many related images to be out the the shows and the topics that we talked about on these shows okay so I usually put up the podcast for the show the day after I clean up the broadcast a little bit in an audio editor put the intro music in there you know you know in a nicer cleaned up form I reapplied it to the site and then I I link to it on the podcast section and then I put some related images documents videos if there are any for those who want to go up there and download all of that material that is all free of course and maintained on a weekly basis saw on the website so let's get into it the theory of Correspondence as is related to the major world religions and particularly as it is related to the human brain okay if we look at the three astrologically based religions of the world the three great religions of the world as they have been called the major religions the ones that have the most adherents we will see an interesting aspect unfold Christianity okay is a solar cult religion as we have seen in studying Astro theology here on this show and now in many of the documents that I've uploaded to the podcast section it is male based we saw how the feminine is removed from Christianity in the aspect of the Holy Spirit the concept of the goddess or Mary being removed and you know the Holy Ghost or Holy Spirit taking the place of the Sacred Feminine and the Trinity this really particularly paints it as a male-dominated religion all of them are male-dominated religions but uh in particular women are not permitted to serve as a priest of this class I don't believe they're permitted to serve as priests in any of the major world religions which is utter nonsense but that being the case I ascribe to the solar cult religion the symbol of the blade as we've already talked about so I put that on top of an image of the Sun and I put it right underneath the symbol of the major world religion of Christianity being the cross with the Sun behind the cross so if we look at the concentration of this religion it is predominant in the Western world a Western civilization this is the predominant religion so while this religion was born in the Middle East it gravitated to Europe and then you know gravitated up through through the Middle East through Asia Minor up into Europe across the Mediterranean and then of course across the Atlantic Ocean specifically during the Spanish conquest and the conquest of North America through you know colonization of you know Columbus and the other explorers that came over here and then finally colonize this region however this whole western hemisphere of the earth the predominant religion is Christianity now of course all religions are are everywhere throughout the world you'd be hard-pressed to go to any specific given country and not find some adherence to any given world religion any given occult tradition or mystical tradition but what we're talking about is major concentrations here trends we're looking at patterns okay this isn't a catch-all a blanket statement here all right understand we're looking at major trends or patterns the Western world its major religion in the Western civilization of the earth is Christianity I think that's pretty undeniable okay if we correlate or correspond the western hemisphere of the earth okay to the Western or left hemisphere of the human brain okay we can see that the predominant aspects of the left brain are masculine solar qualities as we've looked at many times on the show and will continue to the aspects of consciousness that are yang based based upon male masculine energies I should say masculine okay solar active aggressive dominant logical linear okay all of these qualities that comprise left brain thinking now indeed the entire globe the entire population of the earth has male Dominator aspects ruling over it but specifically from the western hemisphere of the earth contains the most dominant aggressive culture on the earth namely the United States of America which has become quote the policeman of the world you know it has become one of the biggest militarized States the biggest militarized a not one of the V okay and it has become the aggressor of the the black government so to speak the government in hiding the you know the hidden world government if you will that's really the international banking cartel system that controls governments throughout the world but America is its lapdog it is its attack dog when when countries don't fall in line for what the international banking cartels and the cultists that run that one they send in America to do their dirty work for them that's what the role of this country has become that's what the role of its military has become whether soldiers out there want to admit that or not tough that's what it is okay you know they want to make apologies for you know what their institution does because they're a part of it and they don't want to believe that it is becoming evil and corrupt and is run by psycho passing and evil people but that's the case deal with it grow up understand that that's absolutely what it has become and has been for a long long long time okay so this region of the world okay has become like the left brain gone haywire okay so specifically the United States region which would correspond to the left temporal lobe of the brain okay this aspect is purely male Dominator in its essence and that is the part of the brain the left side of the neocortex that if it is engaged chronically in and there is no balance okay to counterbalance it on the right side of the brain with creativity intuition feminine nurturing okay imagination etc simply passive aspects being being engaged in then what will happen is the personality will be become male dominator or controlling because it will be essentially ruled by the r-complex of the brain which is the lowest base brain and we've talked about this many times the reptilian brain ok the r-complex these two aspects of the brain these two these two constructs within the brain they are complex in the left hemisphere of the neocortex kind of work in conjunction with each other once this purely left brain imbalance toward the left brain hemisphere has become chronic that has been built it has been perpetuated has been ongoing for a long time okay the are complex of the brain will eventually rule the personality somebody will become male Dominator they will become physical this world is all there is obsessed with the physical obsessed with the material obsessed with survival this world is all there is thinking the lowest really the lowest form of consciousness that anybody can really have because it doesn't take into account compassion it doesn't take into account any emotional considerations it is a Psychopaths personality the second major world religion is one that we saw was based on the lunar cult of Astro theology the lunar aspects of the personality or the feminine the yin aspects as I have depicted here some symbolically with the inverted equilateral triangle the symbol the archaic symbol known as the chalice with a room over the moon an image of the moon because this is the lunar cult the religion of course is that of course is based upon the Astra theological cult of the moon is Islam and talked about how it's related to the goddess I wanted to make clear I posted the images of the Hajj which is the pilgrimage to Mecca and the via circumambulation around the Kaaba when the shrine of the Kaaba is reached in Mecca for Islamic pilgrims that make this journey hopefully at least they attempt to at least once in their life and I posted a video of it I posted two very interesting short video clips hopefully people will find them interesting I posted one of the movement the circumambulation around the Kaaba and I wanted to make clear what that represents Astro theologically is the counterclockwise rotation of the stars of the Milky Way galaxy around the supermassive black hole that lies at the center of the Milky Way that is what this is symbolically depicting because as we saw last week in the week before Islam is based upon the goddess tradition the Sacred Feminine tradition the balloon our cult and it is not just the cult of the moon okay it is not just the astra theological sect that worships the moon it is also given to the goddess uh that depicts me that simplifies the night sky okay symbolizes the night sky the the the aspects of darkness okay from which matter arises void okay we'll talk about this when we get into Kabbalah as well because there are different versions of void in Kabbalah or nothingness with blackness emptiness from which ability arises okay creativity emerges okay from which matter is given rise to all matter so this is the the other aspect of the goddess tradition we have to understand it is not just about the moon is also about the blackness of night okay it is also about the galaxy because the galaxy is considered the the the potentiality from which all of the stars emerge the stars are are embedded in galaxies and galactic clusters okay there and I don't mean clusters of galaxies I mean stars come together there they don't really exist in interstellar space between galaxies they exist in galaxies in galactic configurations okay so the goddess was more than just the moon and she's more than just the night sky she also represented the the energy that holds the galaxy in its form that's what the goddess tradition was symbolizing okay so that this was looked at as the great mother that gave birth to all of the stars that are her sons okay and this is what the Islamic tradition is symbolizing with the Hajj pilgrimage and the circumambulation the counterclockwise circumambulation of the Kaabah so I posted an image of this walking around the Kaaba in a counterclockwise fashion by thousands of Muslims and it's it's very fascinating understand that it is based upon Astro theology and you're seeing a symbolic representation of a spiral galaxy a you know like the one we live in the Milky Way galaxy is spiral galaxy there is a black hole a supermassive black hole at the center of that galaxy around which the stars form a counterclockwise rotation so this is what is being symbolically enacted at the Holyland of Mecca in the Islamic tradition and of course all the clearance to this tradition wear white to symbolize themselves as a star we talked about each being being like a star in in the aspect that we carry these chakra centers these are rotating gatherings of energy centered around glandular activity in the body that is called chakras in the Vedic tradition okay and we saw how these correspond to different planets in the solar system so we're like a mini solar system okay in the tradition of the the chakra tradition of the Vedic tradition of the Indus Valley it's an interesting study to take up studying comparative religions and all of their interconnections and how they relate to one another in different ways but uh what I wanted to say about Islam is uh with the video that I had posted the second video is very rare a very rare glimpse inside the Kaaba building itself and some people will look at that is sacrilege okay that that is posted and some people look at it's sacrilege that that was even taken well you know if you're following this show you understand I don't see anything sacred in modern religions they are all getting people to focus on things outside of themselves so they never really get to the heart of the matter so they never really get to the core tradition that underlies all of this garbage nonsense of symbolism and of beliefs and of just doing actions and not really understanding why you're doing it not asking questions and following along with rote behavior and dogma okay because that's all it's about is control that's all of these religions are about control period the end just like government it's just the opposite form of mind control we talked about them being you know one is a binding upon the right brain that's what government is of the left brain out of control the male dominate are out of control left brain and it's a bond upon the right creative and intuitive and nurturing and feminine brain well religion is the exact opposite it's a binding that's placed upon the left brain which is the logical and analytic and you know reason aspect of the brain ok so that it can so that you can get people to accept all kinds of nonsensical beliefs and dogmatic approaches to life that don't really make any sense and only really benefit the priests class that is really doing it just to get people to fall in the line and do what they say ok so it's also based on control but it's just the opposite method for people that you know aren't going to fall into a left brain aspect of of control you put them under a right brain aspect of control shut their left brain off and they become passive servants and that's what people who would who are extremists and extremist adherence to religion have become don't question you know just accept these are all right brained out of control right brain qualities when when the right brain goes haywire the person doesn't really accept the accept doesn't really a question I'm sorry they accept everything that is basically told dogmatically because somebody else knows better than me and this is just the you know the Word of God as it's handed down to me through the prophets and the priests class so Who am I to question it all done is a method of control okay so we saw how the oh just to go back to that video to wrap that part of this up um highly interesting video I mean take a look at it the inside of the kaabah building scene for the first time you could see this on my podcast page in podcast number 40 that was last week and I posted this video millions and millions and millions of Muslims throughout history have not got a chance to see what is inside this building reserved only for the priests class there's nothing super interesting in there either it's a an altar there's a lot of marble and some uh some metalworking and there's some incense burners and it's uh it's fairly interesting as far as artistic of its artistic nature but it's not like you're going to see anything that's uh you know so amazing that it'll blow your mind but um just thought it was interesting in in putting the circumambulation of the Kaaba building up there I came across that video and felt that I would share it on the site for those who might find it interesting to take a peek inside the Kaaba itself so um the lunar aspects of the of consciousness as we talked about are passive they are feminine they're intuitive creative these are the right brain qualities and again these are very important in balancing the brain hemispheres because this is what's really missing in our culture these aspects of the brain or what people are what keep people in the the unquestioning mode that they go along with they're not developing the positive aspects of the right brain they're trapped in all of the lower aspects of it which is don't question authority lay down don't stand up for yourself just be a slave you know if they really turn on the imagination and create a power of the right brain we will get out of this mess that we're in very quickly as a species that's really what's required on all of our parts and so on this image here I've placed the moon with the symbol of the chalice the Sacred Feminine and the symbol of Islam being the crescent moon with the star a small star and I put this next to the right hemisphere of the human brain because if we look at geographically where the moon our cult or the Islamic tradition spread to it is clearly the eastern hemisphere of the earth clearly the major religion of the eastern hemisphere yes Buddhism is very big yes Hinduism is very big but clearly the biggest religion of the eastern hemisphere and as a matter of fact as far as adherents go it is the largest religion in the world is Islam based upon the astro theological cult of the moon okay so we see the western hemisphere adopting the solar male religion based upon the Sun and the law obsessed a Old Testament male dominator father God Creator God okay and we see the right hemisphere of the earth being the predominant religion there being the lunar cult religion that is based upon submission to God the word Islam means submission to God that's what it means so right in the word you have the passive qualities of the right brain the right brain gone haywire really being expressed the the dogmatic non questioning aspects of any given religion are probably the strongest in Islam as a matter of fact you simply do it because that is what is mandated by the originators of the religious tradition well I hear the intro music playing for the break that we have coming up it's a good spot to take a break and cover the left brain and the right brain aspects we'll get to the third one after we come back from this break on mark passio you're listening to what on earth is happening from intel huh a very wealthy US citizen is predicting that in 2011 we will witness the most important day in America in more than 50 years he says it will change everything about our lives the way you shop travel and nest educate your children and even how you take care of your health and family now this man has made some outrageous predictions over the years but the crazy part is he's usually right you see he predicted the collapse of GM finme Freddie Mac and America's biggest mall owner General Growth Properties a few years ago in fact Barone is called his work a dire prophecy now this has nothing to do with the stock market but it could have a huge impact on almost every aspect of your life and replay he created a video which you can watch online for free detailing the biggest and most important prediction net and it's a real eye-opener I can't stress this enough you should at least watch this free video online today he explains everything you need to know including that you can take to protect yourself you can find the video at WWE end of the market dot-com although this video may be offensive to some audiences it's worth checking out again that's wwm of america the number 8 comm watch the free video app WWWE MF america 8 calm are you still paying your credit cards in so-called bank loans thinking that you owe the money do you feel like it's your moral obligation but can't see an end in sight well what if I told you that in truth you don't know a single penny and that the bank's know this and hope you don't find out here's where we come in we to prosper calm specializes in a profound debt repudiation method which challenges the validity of your so called debts morally frees you from the burdens and protect your property Allen system is often superior to settlement bankruptcy or consolidation which often leave you in a war situation if you feel the moral obligation to take care of yourself and your family then I urge you to consider taking action right now the economy will not wait if you want to know more so you can prosper through the economic collapse almost an honorable and true to yourself then call eight seven seven four one seven eight three nine three that's eight seven seven four one seven eight three nine three or visit three to prosper calm right now in will wear kalapa papers and all the way going 50 you control of the population solitary baby monsters a burning of humanity met on our shoulders the only way if to approach the global crime syndicate known as the New World Order together we are one together we are a male soldier the battle for freedom and eight into Chiana in the fight the Intel of calm [Music] okay we're back on what on earth is happening on the Intel hub news network I'm your host mark Cassio before the break there we were talking about the theory of Correspondence as it is related to the major world religions and specifically as it is related to the human brain is the earth itself a brain is the living system of the earth similar to a human brain what I'm trying to get out here is as many of the consciousnesses that comprise the whole the totality of the people on the earth think and behave you will see patterns unfold that correspond to the way their brains operate and their consciousness operates you will see these patterns unfold on a large scale that is a reflection of what is happening at the smaller scale level but in many many individuals okay so we saw a male-driven masculine quality aspect of religion okay I hear music coming up again I'm not sure we're going to do another here that quickly among what happened [Music] apologizing barrage isn't this is an actual issue here anyone anyone the network is hearing that picking up that music [Music] [Music] I'm not sure why we were getting on music hopefully uh hopefully that will uh that's still going on see if I could not well it looks like it stopped there hopefully that won't bear with the mic [Music] okay I'm just going to put that on hold for the blog talk listeners when I get confirmation that that's cleared up coming in from the network and I will go back to that but we're still broadcasting on talk shoes so I'll just continue and pick up from where I left off we were talking about the principle of Correspondence as it relates to religions and we saw that the left brain of aspect religion namely Christianity was based upon the solar cult which is the left brain principle and its adherents are largely gathered in the western hemisphere of the earth left hemisphere look as we look at it directionally okay the lunar based cult based upon the moon after I spoke Li I came back on I heard that your America computer music tomorrow do come on do we have it cleared up on the network and Bob yeah it was it was cleared up I'm not sure what exactly happened I can hear you now you were breaking up by slightly but we're back now is it cleared up on your yes it is thank you no problem at a problem we'll let you jump right back in the show mark as always it's a pleasure to be here to help you in your program and I look forward to listening although I have to be honest I was on another call no I'm not sure what happened but we'll get it smoothed out eventually thanks mom thank you okay so we're back broadcasting on both networks here so I was just saying as I went to the blog talk all we're just looking at the correspondences between the human brain and the distribution of religions in the world on the geographical surface of the earth and understand that the neocortex is really the outside covering of the the the gray matter of the brain it isn't that all of the gray matter it is really the outside portion of it the whole gray matter of the brain is called the telencephalon but the the neocortex is actually the covering of the telencephalon yet the outside which is where all the neural firing of the brain neurons are actually fire to create different connections and neural pattern pattern firing within the brain and it's interesting that we live on the surface of the earth which is corresponds to the neocortex of the telencephalon okay when it comes to the brain the solar or left brain aspect of consciousness okay the masculine aspect of consciousness this solar cult came down into the modern world as Christianity okay it is gathered in the western hemisphere of the earth which corresponds to the left brain if we were to look at the planet holistically as a brain with two hemispheres we have a Western Hemisphere or left brain hemisphere and an eastern hemisphere or right brain hemisphere the passive or lunar based religion which is Islam is based upon the cult of the moon in astro theological terms and it is the adherence to this religion are largely gathered on the other side of the planet from where the solar cult religion adherents are gathered they largely live on the eastern hemisphere or the right brain if we were to look at the earth holistically as a brain with these two hemispheres and isn't it interesting that there is a ideological war between these two factions or religions specifically after 9/11 with the Western left brain religionist Americans going after the fundamentalist Islamists you know Islamic factions that they believe did 9/11 that are largely focused on the right hemisphere of the earth of the eastern hemisphere so it's like the left brain attacking the right brain we have a third major world religion however in that is Judaism and that is centered in Israel in the middle Middle East a so it's in the middle the dividing line so to speak it's symbol as the star as we saw the stellar cult as the lesser lights of the heavens the Stars and the planets with Saturn being the primary object because we spoke about that last week it is the major planet of the of the planetary system that surrounds our Sun because it is the farthest object with the naked eye at least that can be seen so the ancients viewed at it viewed it as the ruler of the other planet since it has the largest orbit and thereby its orbit encircles all of the other planets the Saturnian based religion based upon the God of the Old Testament of course is based in the Middle East and still largely resides in the Middle East of course adherence to Judaism found all over the world in just about every country however their concentration of course is greatest in Israel which is in the Middle East and this part of the earth as I've talked about in my presentation and will try to help people to understand what its function is symbolically or what you could say what you could call synchronistically okay and it's I think it's more than just a synchronistic connection or a synchronicity that is expressing itself in a kind of like a higher consciousness way or a mystical way synchro mysticism I talked about before it's a fascinating topic to look into I highly encourage everyone to do just that but the Middle East itself is where Western civilization or now we're talking about the left brain of the earth okay symbolically it's the Middle East is where Western civilization gets most of its oil from now you can say well it's not the biggest concentration of oil that's understood there are concentrations of oil that are even larger in other geographical areas of the earth but this is where we get the oil that we are using from now if we look at these two hemispheres as brain hemispheres on the earth okay that would place the Middle East at the back of the head which is where the cerebellum is that behind brain now this is part of the r-complex the brain stem and cerebellum form the r-complex our complex specifically the cerebellum delegates motor skill to the body this is the part of the brain that conducts motor reflexes or in other words it helps us to move properly when we command you know our limbs to move or our bodies to move our you know any aspect that controls respiration it controls you know our ability to walk manipulate objects etc motor skills period so think about it what is making motion possible or in other words transportation on a large scale of people the motion of people is the oil or the energy resources that are being extracted from this region of the earth in other words the brain on a large scale is being powered by the r-complex of the global earth brain just like on a smaller scale the consciousnesses of the people on the earth are being powered by the r-complex of the brain this is why we're still on oil as our main method of energy production this is why we're addicted to this fuel in a repetitive way in a purely survivalist instinctual me I need to have it or we'll die type of thinking repetitive ritualized perpetual thinking movements these are all are complex behaviors I know that it's a difficult concept to really conceptualize about but just try to think about it in a way that your corresponding these things look at the small how are most people thinking and look at the large what's happening on the large scale the left brain is attacking the right brain over the control of the hind brain of the earth think about it to perpetuate behind brain being in control of the whole keeping us on that energy paradigm of Middle Eastern oil and again we can get into you know controversial subjects related with how the Judaic religion has been used as a cover you know a David Ickes been talking about this greatly I just posted a great article on his site about Zionism and it's a topic most people won't go to but I very briefly mention it in my presentation and you know I talked about how Zionism is a political ideology there's nothing to do with religion anybody can be a Zionist and not have to be Jewish that the equation of these two things is nonsense they're not in any way equal to each other as a matter of fact they're diametrically opposed to each other philosophically and people who adhere to the true today tradition based upon the Torah want nothing to do with Zionism because they know what it is it's a radical out of control mail dominator political ideology and you know of anybody who equates Zionism with to two days and doesn't understand at all either of these things and a lot of people equate Judaism with all Jewish people as well and I don't think that's the case either as you know it is based upon the tribe of Judah and not all of the tribes of Israel Judaism is a specific tribal religion but you know these are controversial topics because of the ways that people will try to equate certain uh you know understandings to anti-semitic uh you know anti-semitic beliefs or opinions and they have it has nothing to do with that um you know Zionism is uh is something that is hidden behind a you know by its adherents and they want to equate that with all Judaism so that they can hide behind the race card and hide behind you know saying that anybody who disagrees with their political ideology is against doing part yes you need me to jump in here as the token Jew of the network sure why not I know you're very knowledgable upon this topic Bob and you discussed this many times on your show so sure if I want to have chimed in on that since we're talking about the three major religions as it relates to the the principle of Correspondence and the earth brain and I was you know just uh have it taking an aside when we're talking about the the geographic placement of Judaism in the Middle East and how that corresponds to the cerebellum of the earth brain and how the the oil reserves of the whole Middle Eastern region particularly in the region of Saudi Arabia and I you know Iran Iraq all are related to the the motor skills of the of the brain because on earth on a mass scale this is the place where we're getting the energy to power the motion of the people of the earth and I took an aside to go into the difference the diametrical opposed difference between Zionism and Judaism and how neither one of these things are are equated in any form however Zionists who are political ideologues want to insist that these things are somehow equivalents so you could chime in from from that point well that's absolutely right mark and a lot of people don't realize this but the Jews are the most of the Jews today from Eastern Europe our cause arcs they come from the cause arc region that's for what I understand so they're not the same people from the somatic background in the Fertile Crescent and if we go back to the basis of all the world's major religions which is the creation the the Sumerian creation in the Sumerian creation man they let you know that this religion is a mind control tactic used to brainwash people so that the political structure could come up with a means of convincing people to be submissive to their authority or the authority in this case of religion and that's how I see it and I wanted to jump in real briefly and say that if you're critical of Zionism for instance which is a political agenda in the world today that has created a lot of problems it doesn't matter who you are we're all human beings at the end of the day and the divide and conquer in this is something not to get caught up in the labels and the thing appointing is something to not get to not get caught up in and that being said those that are critical of Zionism or some of the more Satanist a sort of methods of the Kabbalah or whatever they should be labeled as bigots or anti-semitic or whatever you know this has me coming from a Jewish background when I say something about the Israel or critical of these things I would never be considered anti-semitic because I'm from a Jewish background right somehow there's this double standard and I just wanted to chime in and lend my supports all open-minded free thinkers well I thank you for that bobbing I appreciate your view on that and I absolutely agree and I kind of equated the Zionist ideology with captain ISM I equated it with dark luciferianism equated it with dark cobble ISM because we're going to jump into this when I start to talk about Kabbalah and I would have been remiss if not at least mentioning Zionism and how it is diametrically opposed to true Judaism which is a peaceful religion that really you know I still believe that is a form of mind control as all religions are but it is attempting to teach people more morality and you know adherence to natural law God's law as they see it Zionism however is nothing of the sort as you've said and as I've said previously it is a political ideology that is based upon control and specifically controlling people through mind control techniques ultimately all of these dark aspects of occultism any occult thinking no matter how it is hidden the dark controlling aspects of it really have taken over everything they have taken over all of these institutional bodies they own the Vatican okay so there are there are darker cultists that really own and control the direction of Christianity they have taken over at the highest levels of the Islamic religion they have taken over at the highest levels of the Judaic religion they own the religions just like they own the government's just like they own the banks just like they own the schools okay they've taken over through infiltration and that's the important thing to keep in mind I like David Ickes position on the whole Zionism thing as he calls its Rothschild Zionism because he equates it with the international banking cartels that really um you know took over the Federal Reserve System owned the Federal Reserve System and are really controlling all the governments of the world through the international banking system that is set up as a means of control and as a means of basically pillaging countries and robbing them of their natural resources and putting them under the thumb of immense debt so I just thought it was interesting to note that we have a war that is going on between the left brain and right brain of the earth and 9/11 was something that was responsible for that being set into motion I want to talk about a little bit we come back from this break you're listening to what on earth is happening on the in Tahoe are you still paying your credit cards and so-called banker loans thinking that you are the money you feel like it's your moral obligation but can't see an end in sight well what if I told you that in truth you don't know a single penny and that the bank's know this and hope you don't find out here's where when you come in three to prosperous calm specializes in a profound debt repudiation method which challenges the validity of your so-called debts morally frees you from the burdens and protect your property our system is often superior to settlement bankruptcy or consolidation which often leave you at worse situation if you feel the moral obligation to take care of yourself and your family then I urge you to consider taking action right now the economy will not wait if you want to know more so you can prosper through the economic collapse all while staying on our roll true to yourself then call eight seven seven four one seven eight three nine three that's eight seven seven four one seven eight three nine three or visit three to prosper calm right now [Music] hey it's me shepherd he hopefully in come check out my lifestyle every Sunday at 4 p.m. Central Standard Time you can check it out from my website the Intel Hubbell radio.com join me Gerald Joseph John King and AC Griffith Thursday's and Sunday evenings at 8:00 p.m. Eastern the freedom with radio on the Intel above they very wealthy US citizen is predicting that in 2011 we will witness the most important day in America in more than 50 years he says it will change everything about our lives the way you shop travel and invest educate your children and even how you take care of your health and family now this man that made some outrageous predictions over the years but the crazy part is he's usually right we see he predicted the collapse of GM Fannie Mae Freddie Mac and America's biggest mall other General Growth Properties of two years ago in fact Bironas called his work a dire prophecy now all this has nothing to do with the stock market but it could have a huge impact on almost every aspect of your life and recently he created a video which you can watch online for free detailing the biggest and most important prediction yet and it's a real eye-opener I can't stress this enough you should at least watch this free video online today he explains everything you need and Oh including simple steps you can take to protect yourself you can find the video at WWE end of America eight.com although this video may be offensive to some audiences it's worth checking out again that's wwm of america the number 8 comm watch this free video s www end of America 8 calm you are listening to the Intel hub network correction we will order P by P ok we're back on what on earth is happening before the break I was talking about the the correspondence principle as it relates to the human brain and a major world religions we had broken down all the world religions the Astra Theological cults from which they are derived their geographical placement and how this correlates to the brain and the functions of the brain and how this is telling us a story on a grand scale on the large scale the macro cosmic scale and it's very interesting to note that you know and I deliberately kind of set it up like this in the image as three pillars okay we're three lines okay that you have Christianity on the Left Judaism in the middle Islam on the right because I want to start helping the people to understand the dialectical approach of 9/11 we're going to look at 9/11 when we look at the 14th methodology of mind control being the Hegelian dialectic or what I call chaos sorcery and we'll look at that in depth but I want to briefly mention that on the air here today because if we look at the dark version of hegelian dialectic as we talked about when we talked about controlled opposition on this show being artificial con like resolution or what has been called by researchers like David Icke problem reaction solution it's creating a problem and then managing the the chaos of the problem that is created so that you can come in and step in with a predetermined solution that you want it all along you know put people in a confused state of consciousness through some kind of really a chaotic situation and then that's your opportunity to come in and step in pose of the Savior and offer your predetermined solution which is what you wanted in the first place and in people's confused state of consciousness and fearful state of consciousness because of the problem that has been created they are very willing to step aside late their rights aside lay their logic aside and let somebody else handle the problem for for them if it means that things will go back to some state of uh of order and it's their order it's the controllers order that set the whole is set the whole chaos in the motion that they're ultimately trying to create so this is a order out of chaos in a very dark sense of the of the meaning of that term of that phrase so this is dark Hegelian ism or we can look at this as like I said simple artificial conflict resolution done in the name of sorcery I call it chaos sorcery it's been called chaos magic by different researchers but on 9/11 I believe we saw this in action and it was if you look at the project for the new American Century calling for a new Pearl Harbor and their documents like rebuilding America's defenses and you understand that they were essentially trying to maintain the hegemony had demonic domination of the planet by the Western Hemisphere specifically the Anglo American complex and specifically the United States is war machine they needed to create a problem and this was done through a lot of Zionists that worked with the the project for the new American Century and other think-tank organizations so it's very very involved the US CIA was involved the Israeli Mossad was involved the Pakistani ISI other intelligence agencies and we'll get a little bit into the mechanics of it but I don't want to get focused in that when we start to talk about this in earnest in several weeks we're going to really talk about the symbolic aspects of this and that's what I'm kind of using this as a little bit of a foreshadowing of we have to understand that there was a force in the middle that was controlling the opposition so looking at this graphic we can see that if we look at it not just from a religious perspective but from a perspective of something that recently happened in the world a dark cabal that was you know essentially Zionists acting as um this uh this mediating force created a problem that really wasn't what it appeared to be and in doing so they set two opposing sides off against each other in a conflict in a war in the Middle Eastern region of the earth absolutely amazing synchronistically if we understand that if we really understand what 9/11 really was okay not the official story if we reject that whole ridiculous bogus notion which I think anybody listening to this show it doesn't think that that's the real version of events if if you do I really feel sorry for you I'm not I wouldn't even try to argue with you about that because the cognitive dissonance would have to be so strong for you to believe that at this late date that go right ahead and believe what you want you know I'm not going to try to convince anybody other other wise of that I you know rather not bang my head against that wall but we'll talk about the symbolic significance --is of the 9/11 event in upcoming shows and this is kind of a predecessor that and it's a good jump off point to start talking about Kabbalah because as we see if we look at the main symbol of the Kabbalistic tradition which is there in image number three on the radio show page four images for tonight if you're still looking at that um this is a representation of the Kabbalistic tree which is also comprised of three basic pillars or paths and these pillars or paths are shown in this first image image number three which has all of these um spheres and paths that form the Kabbalistic tree of we're going to I'm going to break them down here tonight in the last half-hour of the show and now hopefully uh I can do this in that amount of time if not we'll continue with this next show and then jump off into another topic or you know this would kind of lead into symbolism as well which it's a nice intro for that as well but let's start to look at this symbol of this occult tradition and we can consider this would be very very brief introduction or initiation into the occult tradition of Kabbalah now the first thing I want to say about Kabbalah is that like other occult traditions we have to get out of this childish notion that some people still have that there is only one side to this that there is a dark side to it and there is no light side to it well this is nonsense all traditions have a light and a dark side to them it is how knowledge is used occult simply means hidden and this isn't a cult tradition it has been hidden through the ages it has been hidden for different reasons some people have had to hide it because they know the power that it contains in transforming consciousness and how male dominators and their times would try to kill them for using it in that way okay in its positive transformative aspect a male dominator a dark occultists always want to hide their methodologies because they don't want people to understand their methods of mind control because if they understand them they come out of them you can't keep people under mind control who deeply understand the methodologies of mind control you know it's an oxymoron you know once you really start to understand these methods if you understand that they're being used you're coming out of that level of control simply by the nature of understanding the methods that they're used to put people under it so Kabbalah is the same way it is a tool it is knowledge of self ultimately as we're going to see as all of this is okay that's why I always relate it back to the self the religions are ultimately about deeper traditions that relate to the self they want to hide that from you they want to conceal that they don't want you to look at the real tradition they want you focus on their exoteric stories that they give you to believe in and focus on that has nothing to do with the self okay they don't want you to understand the principle of correspondence because then you're going to see larger patterns at work in nature and at work in human society and you're going to understand that as the small goes so so goes the very large and vice-versa and that's a powerful concept if you can really grasp it and wrap your mind around it well as with any occult tradition they want to hide it from you you know they want to even paint the idea in your mind that occult is the equivalent of evil occult which it which it is not it is a tool it is hidden knowledge and his knowledge that has been hidden for various reasons I feel it means now is the time that it needs to be revealed and not hidden anymore and that will lead the true human freedom which is why I'm going to teach every occult tradition that I understand that I have come to know that I've come to put into practice in my life and Kabbalah is one of the most influential on my path of development I feel I have a fairly decent foundation and understanding in some of its symbology and I'll do my best to give a brief introduction of course you know I'm not going to go into huge long extremely in-depth teachings of it but I'm still learning about it myself but I will break down some of its main symbology particularly the Tree of Life explain what it is explain what the different elements of it are and hopefully get people to understand how this relates to themselves and their own consciousness so that's the first thing all occult traditions are neither good nor evil they are used by people with different intentions and the intentions could be good or evil I will hopefully do my best to embody the light side of this tradition and explain it out to people as in the respect that it could be a powerful transformative tool in consciousness for them so let's look at this symbol known as the Tree of Life this is called the sefirot ik Tree of Life cephiro is usually spelled SBF iro t cetera sometimes spelled SBP hir OT the Sethi wrote are these spheres these circular symbols on this Tree of Life pattern you see I've given three different Tree of Life images on the site because they all contain slightly different information and I'm looking at the first one number three and I'll use that as the main one just refer to some of the other things that are on images 4 and 5 as we go along there are 10/10 fears on this tree and these are called cephiro okay ACEF era is a singular okay set so the sati wrote means emanations emanations is what it means it means an upwelling okay an emanation it means an expression that's what Seth wrote means so each one of these spheres are an expression or an emanation okay and it is said that they are an expression of God and I would say that they're not only an expression of that but they're an expression of individual consciousness as well they're an expression of the Monad of consciousness not just the totality of consciousness that we call God okay if we look at the Kabbalistic tradition we will understand that there are in fact two aspects of this Tree of Life one is a microcosmic aspect or the indwelling aspects of consciousness and one is a macro cosmic aspect tree which is a reflection of the universe and the cosmic principles and cosmic laws that are found in nature okay we will really see this when we look at the tradition of Tarot and to study the Kabbalah is to study the Tarot and there's really no no separating these things as I briefly stated before no one inherently contains the other so to study the tradition of Kabbalah we have to understand we're taking on a tradition in the study of the tradition of Tarot as well I will also make the statement before I get into the symbology that to study the symbol of Kabbalah is to study the Western mystery tradition occultic schools of thought in general and specifically it is to study one in particular and that is Freemasonry Kabbalah and Freemasonry are completely interwoven and anyone who tell you that they are not either does not know or is lying because they absolutely are completely interwoven and I will do my best to help show that correspondence as well so these three traditions are tied to each other as is the astrology tradition okay the astrology occult science again that is one that I am NOT as strong as in my studies of the others but I'll do my best where I can to incorporate that as well let's look at the sefirot tree of life of the Kabbalah and help to basically help people to understand how this correlates to human consciousness so we see these ten Sephirot or examinations upon this tree symbol they call this the Tree of Life okay and if we were to begin to label them or name them okay let's start at the top and come down because the numbering system is it begins at the very top so if you look at the top spear or circle there it says kept air which means crown that is traditionally viewed as as the first set for room this is called the Ancient of Days now I'm not going to explain this one first I'm going to work my way up okay from the bottom but I want to talk about them in the order that they're usually spoken about as far as a numbering system goes first so I'm going to name them and I'm going to tell you what their number is I'm going to tell you what the Hebrew word means um for each cetera okay et cetera okay that kept air is number one it means crown okay the second one we would now go over to the right hand side and it's called Hoch ma Hoch ma means wisdom okay and this is number two the second Secor cetera okay Benna is the third we're going over to the left hand side now okay so along the right hand side if you're following this in the image it says pillar of mercy okay so this is the right hand path or the pillar of mirth mercy okay the path of mercy the left hand path or the left hand pillar is the pillar of judgment or the pillar of severity okay the middle path which is the all-important synthesis of the two is the pillar of harmony or the pillar of mildness some people also refer to this as the pillar of the will okay so we start at number one to tear crown we go to the right hand path the top of it okay that's hokum ah wisdom that's number two cetera number two sefa wrote number three is the NA understanding we're on the left hand side now okay now we go back to the right hand pillar in the middle and that is has said that compassion or otherwise simply mercy okay has said and that is number four number five we would go straight across to the pillar of judgment or severity in the middle of that pillar that is Gabara which means strength or severity okay now we come to the middle pillar right in the middle the sphere labeled TIF eret TIF eret means beauty beauty okay that's sphere number six spear number seven we're going to the right diagonally okay and then we're at the bottom of the pillar of mercy now and that is net saw neck saw means endurance it also means victory okay net saw now we go over that is sphere number seven spear number eight we go across all the way to the left to the bottom of the pillar of severity the color of judgment this is hold-hold means majesty or splendor splendor okay that is fear number eight then we come back to the middle pillar okay the one just above the bottom it's called yes ode yes ode is foundation foundation that is sphere number nine and then the bottom spear upon which the tree rests okay is mal coupe mal coot is kingdom kingdom and that is sphere number ten that's very interesting the numeral numerologically if you add all of the numbers of the cetera set the road up okay you add them all up and then you do gematria reduction upon them meaning you keep adding the numbers down until you come up with a single-digit it equals one okay so this is a tradition that is really based upon fundamental fundamental unity unity okay you start at one you really get back to one okay this is like a round-trip journey you have to look at it okay it's the energy of the creator separating himself into the physical world and then assisting the journey back up into a journey of oneness which many traditions have talked about that that is the breathing out and breathing in of God so to speak okay it is the cyclicals ernie of the soul okay it is the forgetting and then remembering process okay all different traditions speak about this we can look at mal coupe okay being the physical world okay and this is where I'm going to start it's ten is its number one zero male and female the phallus and the egg okay when we add them together we get one which is where we started at up at the top and tear the crown the Ancient of Days got the Godhead this is our last break coming up we'll get back to this right after these words on mark passio you're listening to what on earth is happening on the intel hub news network [Music] are you still paying your credit cards and so-called bank loans thinking that you owe the money do you feel like it's your moral obligation but can't see an end in sight well what if I told you that in truth you don't know what single penny and that the banks nor this and hope you don't find out here's where we come in we to prosper calm specializes in a profound debt repudiation method which challenges the validity of your so called debts morally frees you from the burdens and protect your property how interesting is often superior to sit on the bankruptcy or consolidation which often leave you in a worse situation if you feel the moral obligation to take care of yourself and your family then I urge you to consider taking action right now the economy will not wait if you want to know more so you can prosper see the economic collapse all while staying honorable and true to yourself then call eight seven seven four one seven eight three nine three that's eight seven seven four one seven eight three nine three or visit three to prosper calm right now hey it's me Shepard he hope to the NFL ha check out my lifestyle every Sunday at 4 p.m. Central Standard Time you can check it out from my website the Intel Hub radio.com joining Joe Joseph John King and AC Griffith Thursdays and Sunday evening at 8:00 p.m. Eastern freedom with radio on the Intel of New Life State very wealthy US citizen is predicting that in 2011 we will witness the most important day in America in more than 50 years he says it will change everything about our lives the way you shop travel invest educate your children and even how you take care of your health and family now this man has made some outrageous predictions over the year but the crazy part is he's usually right you see he predicted the collapse of GM Fannie Mae Freddie Mac and America's biggest mall owner General Growth Properties a few years ago in fact Bironas called his work a dire prophecy now this has nothing to do with the stock market but it could have a huge impact on almost every aspect of your life then recently he created a video which you can watch online for free detailing the biggest and most important prediction yet and it's a real eye-opener I can't stress this enough you should at least watch this free video online today he explains everything you need to know including simple steps you can take to protect yourself you can find the video at WWE end of America eight.com although this video may be offensive to some audiences it's worth checking out again that's WWE end of America the number 8 comm watch the free video at WWE end of America eight.com you are risking to the Intel hub network compression annual order P by P [Music] ok ladies and gentlemen we're back on what on earth is happening I was breaking down the symbolism of the Kabbalistic Tree of Life was beginning to look at the bottom spear on the tree known as Maul coupe which means kingdom this is a representation of the physical world the physical reality the material realm if you look at the image which is image number five okay it has the word Kingdom on on this bottom sphere which is what mal coupe means it has number ten and it shows the four distinct elements that comprise the material realm when you have the alchemical symbols of earth air water and fire there you see the colors that are associated with them in the Kabbalistic tradition and you see that the sefirot itself is broken indeed of these four quadrants each given to one of the material elements of the physical world earth air water and fire this some realm in the Kabbalistic tradition is the the lowest or the farthest away from cosmic consciousness or the Godhead that one can really get in some circles it is looked at as hell itself because it hell by definition is separation from God and God consciousness so mal kook you know is the realm of suffering it is the realm of forgetting okay um it is the realm of identification with the material elements okay ego identification based consciousness and if we understand that the two pillars that that are the left-hand side paths and the right-hand side path the pillar of severity in the pillar of Mercy are really simply dualistic aspects on the same forces okay if we bring them together visually now do this exercise with me bring these two opposing pillars together along the middle pillar so that the spheres overlap each other and you understand that we have a representation of the chakra system that I spoke about last week when you would then have seven spheres only because three of them would merge okay these six spheres would merge into three and you already have four unitary spheres along the middle pillar in other positions so these would merge to create the seven chakras and indeed that's what this is they call the entire tree of life in the Kabbalistic tradition the ladder to God and what it means is the ladder from Mal coupe which is at the bottom to cut tear which is at the top it is the ascendance of the energies that we talked about last week going from the base chakra to the crown chakra it's the same tradition viewed symbolically differently and I'm going to break down each one and explain the correspondences explain how this would relate to the chakra system and explain what each sphere really represents within the self because that's what this tradition is about it's not something that is outside of us is something that is it is within so mal couth is the kingdom or is identification with base matter this is the base fundamental base consciousness essentially from which we have to extricate ourselves and move back to a higher level of awareness which would be symbolically represent rented represented by the top sepharad known as kotero a crown okay so malkuth would correspond with the base chakra it corresponds with ego identification and routing oneself in the material world and being purely identified with that survival instinct fighter flight that this would be the Saturnian aspect that we talked about last week when we look at the that the planets as being correspondences to the chakra system within the body okay so now the idea is if you stay in Mal couth you're in hell okay I think that's pretty clear to anyone who's listening to this show that this is where we're stuck we're stuck in what they call the lowest of the four worlds of Kabbalah and this is called hacia hacia is the Material Plane okay and that's where you're at when you're in ma kook and really we're all here because we're all in the Material Plane but the idea is is to transcend that through working with our consciousness and building it up to higher levels of awareness so that we are not identified with the physical and material plane even though we may exist within it this is what you know the teacher called the people called Jesus in in his words in the New Testament he is attributed with these words when he says be in the world but not of it okay so the first step toward leaving identification with the physical domain or hacia or ma-kun okay is to get to the sphere of yes owed so there's there's tons of Kabbalistic meditations of about the spirit yes owed there is a Solomonic traditions deal with the power of this sphere and it's very important and I'm going to really be talking about this a lot when I get into the presentation on The Wizard of Oz because not at the free or mind fundraiser in a couple of weeks because uh to a large extent this sphere plays into that movie is one of its most important characters I won't say much more about that so I won't give too much away I'll probably do that presentation on the air as well I believe that was requested here on the show so uh after after the presentation happens in German books I probably will give it again on the air here but the sphere via sewed is the first step toward getting out of with the material world or ego identification this is the correspondence to the the genital or the sacrum chakra okay because this has to do with desire desire to improve oneself desire to begin the process of transcending base consciousness okay so this is wanting wanting or desire to improve and that's really the first step toward anything okay in our journey in consciousness you have to want it you have to have a desire for truth you have to have a desire for higher knowledge you have to have a desire to improve yourself you have to have a desire to get out of here oh and base consciousness if the desire isn't there you're stuck you're what one of the dark occult is called the unbe gun so yes so it is the beginning of initiation okay this is the beginning of the desire to begin the whole long journey it's it's recognizing there's some place to go at all okay it's not wanting to stay in the confines that have been created around us in the physical world in this evolutionary trap really that is what the new world order as it is called is the trap that if it is a a degradation of human consciousness and a you know trying to keep evolutionary progress in consciousness stagnated okay so yes so is called foundation it corresponds with the the sacrum chakra which is the desire Center okay for the planet Jupiter okay now in the Kabbalistic tradition the planetary attributions do not correspond with the chakra attributions as I am talking about them so understand that I'm not you know if you look at image number four you can see some planetary attributions and they correspond this with the moon but the moon is also a feminine desired principle as well okay so there are Kabbalistic attributions in planetary terms with these spheres I'm relating them with the tradition that I unfurled last week when I talk about the chakras as being corresponding to planets in the solar system okay so this is a this is my twist on this or my take on it okay so a yes sowed desire okay the foundation it is the beginning of initiation wanting to know knowing that you're in darkness and there's a long journey ahead but it is still not being totally identified with you know all of the you know seeming pleasures of the physical world okay it is knowing that there is someplace else to go from there now the next two chakras are related to each other okay so hold which is Splendor okay whereas it is called the number three majesty or m-net saw which is victory or as they call it in image number three endurance okay they all relate to the will they all relate to drive they relate to the male energy and if you bring these two together okay that one is an internal aspect okay so hold would relate to courage which is an internal quality all of the qualities on the pillar on the left hand side which is called the pillar of severity or internal aspects and all of the pillars on the right hand side are external aspects so that the left-hand pillar and the Kabbalistic tradition is the lunar pillar the right hand tradition is the solar pillar or masculine ok lunar feminine is on the left in the Kabbalistic tradition and the solar or masculine teller is on the right okay the sphere of hold represents courage they call it majesty or splendor okay and then willpower to do things in the external world to actually activate things and get them done is next saw or victory in words okay so these are the solar plexus chakra as is related with the chakra tradition that I spoke about previously okay and this would I would correspond this level to the planet Mars as we talked about that is the male aspect the will aspect of the planetary system so um this has everything to do with the will the two aspects of it internal aspect which is courage and then the external aspect which is actual using of the the ability that we have to do things in the physical world which I would simply refer to as external will okay moving up from there we come to Tiferet okay now again we're out of the realm that the Kabbalists talk about is the very base level of consciousness which is the physical plane which is hacia which soon as we move to yes so we went up above that and we went to this realm called yet Zera yet zero is um it is the I believe they call it the tree it's the Kriya is at the creative realm or the mental realm I think it's the creative realm I'm not sure I'll look that up and be definitive on that next week when we continue this but we're in the realm called yet zero which is above the physical plane okay so we're in a higher level of consciousness and we're working with different forces now than purely material forces so we've seen the desire forces and the will forces now we're getting into the real connective force the generative force and this is the heart energy this is the care energy and unfortunately that's all we really have time for here this week I will pick up on this next week I didn't get a chance to take the one caller that's on there caller I apologize for that please call in next week for the show I'll be continuing this breakdown of the Kabbalistic Tree of Life and the symbology that it contain I hope you've enjoyed listening tonight ladies and gentlemen we'll pick up where I left off next week you've been listening to what on earth is happening right here on the Intel hub news network I'm your host mark pasty I'll see you all next week [Music] [Music] [Music] you [Music]

What On Earth Is Happening Show #042

Topics: *Kabbalah, Tree Of Life*

welcome one and all you're listening to what on earth is happening right here on the Intel hub news network I'm your host mark passio today is Tuesday January 11th 2011 its 111 11 today all one's pretty synchronous that we're going to be talking about Kabbalah a mystery tradition that is connected with numerology in a in a big way tonight and what we'll be doing is breaking down this tradition in detail I'll be talking about different aspects of it we have some images up on the radio show page of the website at what on earth is happening dot-com if you go to the radio listen page you'll see there are eight images for tonight's show listed underneath the player and I'll be referring to those this evening what we have been doing on the show for many many weeks is discussing different methodologies of mind control and we've gone through 12 of the 14 already I'm taking a break in that progression to start to break into some actual occult teachings and Kabbalah is one of the first traditions that I decided to begin to go over with the audience and hopefully this will act as sort of an initiation of a kind for people that want to learn more about it and I will post some documents and videos this week I didn't do that last week I just basically went with the basic symbolic images for the show last week but on the podcast page this week I'll try to post references to some books and videos for people to do further study on their own so we have covered a ton of mind-control techniques I briefly just want to not review them but just go over the ones we've covered so far and talk about the ones that will be coming up in the weeks to come we've talked about obfuscation we've gone over world view poisoning the exploitation of primal fears was mind control technique number three number four was the divide and conquer strategy number five was indoctrination of the educational so-called education systems of the world number six was controlled opposition were basic dialectics number seven was the monetary system a huge one number eight was the control of the mass media number nine was food and medicine and all the harmful things that we find in you know the what we consider nourishment and medicine in this day and age number ten was the illusion of time number eleven was the denial hassle and ridicule factors and number twelve was religion which we've been talking about as Astro theology and as a method of mind control over the last several weeks here on what on earth is happening last week I began to get into the Kabbalistic tradition and we're going to continue that this week and please do go up to the website and check out some of the images that I have posted there on the radio listen page and you'll be able to follow along in depth with those images so before we do that I just want to give the call in numbers and read the event announcements and then we'll jump right into our study of Kabbalah this evening I have three event announcements for tonight and actually one change from the event announcements I've been reading over the last couple of weeks the first is the free your mind conference fundraiser number three this is happening at germ Books and gallery at 2005 Frankfort Avenue in Philadelphia as a quick side note germ germs proprietor David Williams announced sadly this past week that germ will be closing its doors and that's horrible news it's just really very that a bookstore of this quality is closing up shop this is probably the best book store for esoteric information in the entire Philadelphia tri-state region if not the East Coast altogether it's a one-of-a-kind place and I'm really sad to see it go and it will be missed by everybody that used that bookstore as a resource as a gathering place you know for for friends and other people interested in the same types of information so I want to wish my best to Dave and you know let him know that we really appreciate that he's kept that store going for this long hopefully maybe someone else can get involved there and possibly take it over or continue it I don't know you know what the situation is as far as the store or the rent goes but I would love to see it continue because it was one of the the best bookstores I've ever seen so this will be one of the last events at the term books current location the free your mind conference fundraiser cent Sunday January 16 2011 at 2:00 o'clock pm at germ bucks the admission is $10 and Michael Melton who was going to give a speech entitled the history of mind control in America at this event unfortunately will not be available to do that he has to attend to some family issues that came up so and he let me know that in advance so he will not be in town during this weekend and therefore his lecture will not be going on at germ on on the other hand what will be happening is I will extend my Wizard of Oz presentation into to cover more ground and to go further in depth so I'll have a little bit more time to really expand on the topics that I was going to talk about in my presentation on The Wizard of Oz my presentation for this event is entitled everything I needed to know in life I learned by watching The Wizard of Oz an exploration of the esoteric occult symbolism contained in the perennial classic movie based on the book by Alf frank Baum so this is going to be my contribution for the fundraiser effort for the free your mind conference this is the third one we'll probably be doing one more in February and that will be the last one before we actually have to wrap up fundraisers and really start to get the the travel arrangements complete completed for the conference so if you're anywhere near the Philadelphia area please do come out and support the goals of the free your mind conference I'll be reading about what that's all about in a moment so that's event announcement number one another change is that the truth freedom prosperity networking social which I've been announcing over the last couple of weeks that was going to be happening at Liberty's is postponed I don't have a rescheduled date yet but it is not happening on January 22nd so scratch that from your calendar if you are planning on attending that one instead I will read an event announcement for truth freedom prosperity this is their upcoming free documentary screening and discussion night and it has a new venue it is no longer at the ethical Society of Philadelphia it is now taking place at media Bureau Studios which is at 7:24 North fourth Street 7:00 I'm sorry 725 North fourth street 725 North fourth Street in Philadelphia okay that's in the Northern Liberty section it's near fourth and brown so this month they are going to be screening melt up and I'll read the description for that in a moment but this is happening on January 26th that's a Wednesday night January 26th at 6:45 p.m. they're going to get started so the truth freedom prosperity documentary screening and discussions have been moved there are no on the third Monday of the month they are now on the last Wednesday of the month in Philadelphia truth freedom prosperity documentary screenings on the last Wednesday of every month and the new venue is media Bureau studios at fourth and brown in Philadelphia ok so this month are showing melt up and melt up is the beginning of a US currency crisis and hyperinflation so that's what this documentary is basically going to be on the truth freedom prosperity documentary screening and discussion evenings are free however the organizer for these events pays for the room out of his pocket so any donations are welcome so that's that event announcement and finally the free your mind conference itself a conference on consciousness mind control in the occult Saturday April 9th and Sunday April 10th 2011 at Ruby Hall for 14 Green Street in Philadelphia the doors open at 9 a.m. the program begins at 10 a.m. on both days admission price is 20 dollars in advance and $30 at the door for your mind is a unique two-day conference scheduled for April 9th and 10th featuring multiple speakers and diverse educational materials for the purpose of raising public awareness of the critically important topics of mass mind control techniques the covert and subversive influences upon our consciousness and behavior trauma based and ritualized abuse and the practical mental and emotional healing methodologies for those affected by these devices the featured speakers Erin McCallum Alfred Webber Andrew basiago Bob Tuscan Sauer your dozous Yan Irvin John Nicholson Larkin Rose Laura Eisenhower mark motika mark passio Michael Kelly and Suzanne Taylor now we have a few changes to the lineup of speakers as well today and we have a couple of new speakers and we have one speaker that has I believe cancelled and is not going to be able to be there that is Mel fàbregas will most likely not be making the conference unless something changes but it looks like he had some other obligations so Mel fàbregas is off of the speaker lineup but just added two new speakers Joseph Joseph Mehra and Paul Marco so Joseph Mehra and Paul Marco two new speakers added to the freer mind lineup I'll be posting their BIOS to the website later this week or early next week so please check out the conference website for more information at WWF reader mine conference calm that's all the event announcements I have for today let's give the calling numbers and then jump right into the topic for tonight too calling numbers for the show I'll give the talks you callin number first that's seven two four four four four seven four four four once again the talk shook all in number seven twenty four triple four seven triple for the call ID number four what on earth is happening is eight three five one five you'll be prompted for that enter the numbers eight three five one five for the call ID if you want to call into the BlogTalkRadio if you're listening on that network call into six for six seven two seven three three eight seven once again the blog talk call-in number six four six seven two seven three three eight seven so tonight we are going to take a break from talking about mind control techniques to discussing occult traditions and as I said last week we have to get out of the notion of thinking about occult if anyone still does think about this word in the sense that it is a purely evil we need to really become a little bit more mature in our understanding of what the occult is and it is simply hidden or esoteric information information that has been generally taken out of human wide circulation for human consumption and it has been reserved for an initiated class people who want this knowledge and what this hidden knowledge basically really all comes down to and all is about is the self it is about the qualities of the self it is about the relationship between the individual and the cosmos or the divine underlying intelligence of the universe however you want to look at that it is about the human subconscious it is about the qualities of the personality the qualities of the human psyche the mind the aspects of the brain it's all about us that's what it is about that's why we're in the situation that we're in as a species ladies and gentlemen because this information has generally been taken out of circulation and reserved for a specific class of people when you limit information that people have access to and only a small group have access to set information specifically when that information is as important as what we'll be talking about tonight is what happens over time is that information becomes abused it becomes hoarded it becomes used as a weapon because it is a means to an end which is power in the minds of people who want control want domination and it's a piece of cake if you can keep information and knowledge from people and using that same information begin to manipulate them with that information without their knowing because they have no access to it look at it as psychology if a psychologist real wanted to do a number on a person who's very immature and naive and doesn't understand a lot about how the human psyche works it would probably be a piece of cake for them to do that because they know all about how the inner workings of the mind work and the person that they would be wielding that information on like a weapon does not so they would almost be powerless to defend themselves against those methodologies unless they became aware of them and that's what this is all about that's what mind-control is all about mind control is basically using information that other people have been denied access to as a weapon against them and the only way they can really come out of that is to be initiated meaning they developed a desire to understand that information because they understand how important it is and because they begin to understand that it's being used against them they develop the initiative energy and effort to learn about how that works how that those processes are the human psyche work so that's what the process of coming out of mind-control is all about and that's why I'm teaching occult methodologies on teaching occult philosophies and ideologies and there is no blanket good or bad when it comes to this it is how it is used this information is simply a tool to which we have access and it depends upon the level of consciousness of the practitioner as to how this information will be used or employed in one's life so with that having been said let's begin again our discussion of Kabbalah which is an ancient Judaic mystical tradition that is the underlying and foundational tradition that really underlies and supports all the Western mystery mystery traditions in general specifically it is connected with the Hermetic tradition it is also connected with Freemasonry it is also connected with the study of Tarot and other traditions as well as we'll see tonight so I'm going to cover a lot of ground here I'm going to move kind of fast and if there's any questions please call in no taboo topics always free to call in and discuss whatever you want on this program so last week we began to break down the major symbol of Kabbalah which is the Tree of Life pattern and we will I'll do this again I will review this and you basically start from scratch on this the sefirot ik Tree of Life is the main symbol of the Kabbalistic tradition this is a symbolic tree that is drawn with ten Spears or circles okay and these are called Seth I wrote Seth I wrote is it means emanation okay it's plural word Sephiroth is the singular and emanation or a basic essence or quality something that arises okay that's what this is what this word means okay so if you hear this the tree of the Seth I wrote or the sethi erotic Tree of Life you'll know we're talking about the Kabbalistic Tree of Life and these images are that I'm going to be referring to it's much it's going to be much easier if you're looking at the images as we're talking about this are on what on earth is happening on the radio listening page you'll see the button for that from the left-hand side of the website and you'll see images for Tonight Show January 11th 2011 and there are eight links there that will play in a little pop-up window okay so if you want to follow along with the images that will make this broadcast much easier on you that's where to find them the the Safi wrote or the emanations the spheres on this tree of life are connected by different paths okay in an arrangement and these paths represent different aspects they represent Hebrew characters of the Hebrew alphabet okay they represent tarot cards went because Tarot and Cabala need to be studied in conjunction with each other okay Tarot is also all about the qualities of the self and the universe they call it the book of life and it is basically a pictorial symbolic representation of the soul's journey through life as is the Tree of Life as well as we will see now these ten Sephirot they are spoken about in the tradition of the Kabbalah as emanations or qualities and there are prescriptions against adding or taking away you'll see this as a recurrent theme when you study religion in general specifically Judaism the Torah the study of the Torah and the ancient books of the Kabbalah like the Zohar they there is a prescription often given in these books that it is considered blasphemy or something tragic will occur if anything is removed or added so books of the Bible you'll often hear this warning and you see this come up in the Kabbalistic tradition specifically in the Zohar because there are 10 Safiye wrote on the Tree of Life in Kabbalah there are not 9 and there are not 11 okay and this is said in the Zohar that it is considered you know a blasphemy to speak of either 9 separate or 11 separate and we see that number 9 11 come up in a ritual that was enacted in 2001 and 9/11 is a dark it is a black magic number let's just put it that way this is a number loved by d'arco cultists it comes down to the number 92 because you add the two ones together and you know we'll talk about in the future of what the number 93 is all about when we get to the action about 911 the next two sections there one of the reasons I'm even doing this breakdown of Kabbalah now is because it is going to be instrumental in understanding 911 which was a dark Kabbalistic ritual a dark Masonic ritual as well a dark ritual of clapotis magic or sorcery if you will for people that still don't want to accept that 911 is an occult event it was an event that is completely centered around ocultism you're a naive child and that that's all I'm going to say about it I'm not going to try to prove that this is the case I'm gonna state it because I understand I'm gonna be give backing evidence for this when we talk about it but as foreshadowing to that we won't be doing that tonight but as for shouting shadowing to that I just want to say definitively it was an occult event period I don't think that that's not my opinion I know that with certainty okay and the reason that people don't believe that it was an occult event is twofold one they know nothing about the occult they're ignorant they're not just nation' meaning they don't know it and there can't be expected to know it they're nation' they don't know about the occult and they don't want to know about it and the second reason is the reason they give for not wanting to know about it which is I don't believe in that stuff and here's my warning about that statement and this is a left-brain statement that comes out of people's mouths only super left-brain scientific types logical types types that think that they're gonna solve the world's problems through politics or monetary reform okay think this way because they don't know what the real problem is they don't know what the real root cause of the problems that are going on in our world are which is what we all we talk about on this show the people who think like that who say I don't believe in that stuff so it can't be what you know how it went down or can't have anything to do with that event they don't understand a basic principle you don't need to believe in something as long as someone else believes in it and they're willing to act upon their beliefs your belief isn't required if somebody else has the will to act upon their belief system it doesn't matter whether you believe in what they believe in I give the example if a Christian fundamentalist group wanted to come armed with ak-47s and shoot up an abortion clinic and you happen to be sitting in a restaurant next to the abortion clinic and some bullets flew through the windows and shot you did you need to believe in their ideology for you to be affected by their actions of course you did it ok so to say I don't believe in the occult and therefore that has no bearing or influence upon my life is bunk and it's a childish naive position to take and it's one that only super left-brained morons take so to put it in quite frank language ok idiots think like that any intelligent person understands there could be any given number of crazy ideologies that people out there subscribe to and if they're willing to act upon those beliefs it could affect your life at any given time that's just the straight truth about that that that situation so I'm letting you know 9/11 is an occult ritual in advance before we even talk about that and it doesn't make a difference whether you believe in the beliefs that this ritual is based upon or not other people do and we'll be briefly touching upon that tonight when we get to the section about clip otic sorcery ok so let's get back to our breakdown of the Kabbalistic tree the tree is composed again I let into this that aside there on 9/11 because we were talking about the ten Sephirot on the tree not 9 not 11 these numbers when spoken of in relation to the sefirot on the Tree of Life are considered blasphemous in the Kabbalistic tradition so of course this ritual was named after this concept of blasphemy it's because it's dark kabul ism it's not true Kabbalah okay again there are light aspects to all ocultism and dark aspects to all occultism it's the consciousness of the wielder of the information and that's critical to keep in mind and needs to be re-imposed continuously because there are people who insist that all occultism is evil there are people who insist that all of it you know is nonsense and doesn't have anything to do with anything going on in the world and these are people who clearly do not understand the dynamics that are taking place clearly do not understand them and I'm doing my best to desperately try to get this information out there for anybody who will listen and make a further study of this because you understand this is all about you that's what this is all about and other people understand this and they're using it as a weapon against you so it would behoove people to learn this information because to initiate oneself into higher levels of awareness about the self about the human psyche the soul is what we're really talking about here okay is the one of the best ways if not the best way to begin to come out of their levels of manipulation and control and to empower oneself to work against these dominators that are doing a number on the human population so the ten Sephirot it is prescribed prescribed not to think about not to consider any more than nine any more than ten or any less than ten so not nine not eleven and you will see on the image there seems to be eleven spheres but this one that is completely behind the tree if you can make out the letters it says dot DAA th dot okay dot is called the hidden realm okay it is not one of the cephiro it is a hidden sphere or a a truly occulted realm and some people in Kabbalah speak of this realm as the void of the subconscious the the realm that we go into to connect to higher levels of consciousness through meditation it is the unspoken it is the the abyss the veiled aspect of ourselves okay it is the part that really and part of ourselves that we really connect with when we are silent when we go into wordless contemplation or meditation and this connects us to the infinite source and the the realm of dot and I'm kind of jumping ahead to something that is more advanced you know I just want to talk about this in relation to that it is not one of the cetera there are ten and this is not one of them it is not considered one of the emanations on the tree but rather dot is considered one of the the places from which the tree emerges so this is kind of the I guess you could call it the realm of the birthing of the Tree of Life okay the Berk like the birthing of the soul and these are all the soul qualities so it's like kind of a cosmic womb of sorts okay and it is a hidden realm some people call it the realm of hidden knowledge it is kind of likened to the Akash in other traditions in Eastern traditions okay so if you've heard of the Akashic records this is some some people liken this to what dr. presents' in Kabbalah and there are different interpretations on this so my word is not the final one but I'm giving you my understanding of it from my readings and study okay so let's start to break down the tenth okay so okay for listeners who were listening in on talks you I'm not sure that that was a break it looked like some music had kicked in I'm I put blog talk on hold and if that clears up I will go back to the call this happened last week not sure why some kind of a glitch on the network and but let's jump right back into our discussion and I'll chime in on the blog talk line in a moment to see if that is cleared up so the the first realm on the tree the first set wrote is cat tear that is up at the top okay this is the crown okay this is the Ancient of Days as they call it in Kabbalah and what this is is basically cosmic consciousness it's the highest level of awareness and mal coot down at the bottom of the tree where the tree stands upon the base of it is the physical world it is the material realm this is you know a material identified state of awareness and then the other spheres are all different aspects and qualities of of the self so at the top we have kept air and then to the right on what is called the pillar of Mercy we have Hoch MA okay Hoch ma means wisdom it's what we do with what we know on the left hand side from Hoch MA we have been ah bi na H this means understanding so this is simple knowledge okay has said on the right hand side on the pillar of Mercy the this right hand path of the tree they means mercy has said on the left hand side of the pillar of severity right in the middle for which it is named is deborah which means severity these are different aspects of how we can deal with our selves with others in the world we can exercise self-control which would be like guevara or we can exit act exercise influence upon others which would be less said Tiferet in the very middle of the tree is the heart this is the care qualities of the individual I'm going to check back with blog talk real quick from the burdens and protect your property I want system is often superior today ok they are in the in the call so in the ad play right now so I'll go back to the commercial and hold on through that okay here we go you want to know more so you can prosper through the economic collapse all while staying honorable and true to yourself then call eight seven seven four one seven eight three nine three that's eight seven seven four one seven eight three nine three or visit free to prosper calm right now hey Mark can you hear me now yes how are you good I have no idea what's happening why that music keeps playing over you that's okay could you hear that music yeah I heard it come in and I thought it was the break so I just uh you know put muted myself and waited like thirty seconds and the first thing faded out but then another song faded in and it wasn't a commercial so yeah yeah so I don't know that gonna talk to you and just told them hold on and tried to clear it up I went back to blog talk and then I heard the commercial in there so no problem it's probably just people mess all right well yeah probably somebody's messing with us hacked into our stuff or something anyways we'll come back from the real break great and I'm still scheduled to come up there to Philly one way or the other whether or not you guys have enough money to throw me anything or not we do Bob we're gonna take care of you well you know you know my all I needed was just a little bit of money maybe towards the the plane ticket yes well there there will be there will be funds for you I'm gonna make sure of that all right no worries and by then we'll have the network fully up and running and we'll be able to simulcast it and do all that fantastic okay man stand by your shows coming back you got it and welcome back to what on earth is happening with your host mark patio years mark okay so we were discussing the Tree of Life in the Kabbalah and we had a little bit of technical problems those are cleared up and I was talking about how there's ten sefirot or emanations on this tree and they didn't represent different aspects of the personality the psyche soul qualities in other words and they're arranged on three vertical paths so if you look at image number one on the site you will see that there is three pillars or paths the pillar of severity is on the left the pillar of mercy is on the right and the pillar of mildness sometimes referred to as the pillar of will is between the two in the middle referred to as the Middle Pillar simply sometimes so the pillar of severity we shouldn't look at is something that is a dark or evil it is internal these are internal or Yin qualities of the individual the pillar of Mercy are thee so the the pillar of severity on the left hand side is the lunar pillar the pillar of Mercy on the right hand side is the solar pillar these are the active qualities or the masculine qualities the yang energy qualities of the individual the pillar of mildness or will in the middle are the synthesis between the two or they are unitary qualities of the individual that lean either toward the active or passive the masculine or feminine okay so kept Terror at the top this is the the sefirot number one now how they how they go in order I was starting to tell people this last week but this is the order you start at the top and that's one where it says cat ter okay then you go to the right and that's the second one hokum ah then back to the left and that's been ah so we're gonna go in like a lightning bolt pattern okay so it's gonna go from the top then to the right then to the left back to the right back to the left okay then we would go to TIF eret in the middle then down to the bottom of the pillar of Mercy Mercy net saw and then hold so I'll give you the order real quick okay Qatar is number one number two is Hoke MA on the right the pillow top of the pillar of Mercy number three is Benna at the top of the pillar of severity number four is has said that's the middle of the pillar of Mercy on the chart there okay that means mercy cat ter means crown hokhmah means wisdom veena is understanding that's three okay four has said on the middle of the right-hand pillar means mercy to the left of the of has said is deborah that's at the left hand side of the the middle of the pillar of severity Deborah is severity okay the middle of the tree right on the middle pillar is TIF eret okay TIF eret is beauty this corresponds to the heart or care okay next saw okay that's TIF erectus number six net saw is number seven that's at the very base of the pillar of mercy on the right hand side net saw that's victory okay it would correspond to will power hold on the left hand side at the bottom of the pillar of severity that's a fee wrote number eight code is splendor okay yes sewed in the middle on the Middle Pillar just above maku th-that's cephiro cetera number nine okay and this is foundation and then mal coupe is the bottom one at the very base of the tree okay and this is the physical plane this is the material world it means Kingdom so let's start there and if you're looking at image number one it says Kabbalah tree of life it has the tree itself the pillars listed all of the cephiro are labeled and then there are attributions on the right and you see that there are four realms that this tree is divided up into we'll get into those in a moment and how they correlate to different aspects of the personality as well so malkuth the bottom of the tree sefirot number 10 okay and you see it has a symbol there where it's uh it's the symbol of Earth and it's broken into four it's an equal armed cross with a circle around it the four quadrants deep this represents earth air water and fire or the material realm the material plane and malkuth is the base base level of awareness and consciousness it is our physical instincts it is our simply physical life lives okay it is the the the physical aspects of the individual some people call them the animalistic attributes okay these are simply base instincts and survival needs that's what Maalouf represents it corresponds to the base chakra okay and I'll go over that in a moment when we look at image number two okay above mal couth is yes sowed now I'll talk about the Kabbalistic worlds as I talk about the Sapphira set I wrote okay so mulku is the bottom of this tree and this corresponds to the the Kabbalistic world there are four worlds in Kabbalah as they are known and this is the lowest of the four okay it's called Ostia assi aah aah see ah is the physical world or the Material Plane as we've already talked about that's what mal couth is associated with and this is on the image I've given that the Hebrew character hey because they're in the four-letter name of God in Hebrew it's called the Tetragrammaton the four-letter name of God is yo hey Bob hey that comes transliterated English as YHVH which we pronounce Yahweh or Jehovah Jehovah okay and this this is the final character in the name it corresponds to the element of Earth which I've put there over on the right hand side with its alchemical symbol so hacia is the physical world the Material Plane or the element of Earth and it corresponds with ma-kun now as we move above and out of the pure identification with the physical world we have other attributes that we develop in the course of our lives and we basically start to go up into higher planes of development the first is the mental plane then the emotional plane then the plane of the will and these correspond with different cephiro okay specifically they correspond with what are called the triangles there are three triangles that form the other nine cetera okay so we have yes sewed code and net saw and that's the world of yet zero the formative world or the mental plane okay well I'll be getting to these as we explain each separate in detail yes sewed is the next Sephirah and this means foundation now this is the desire aspect of the personality and again it could be positive or negative but in its positive aspect it represents desire to want to to want to improve oneself desire to want to get out of the purely materialistically identified realm and get to a higher level of consciousness so to come out of milk ma-kun and to go up into higher levels of development is what yes owed really represents it's the beginnings of initiation and as we saw last week and a few weeks ago when we studied these chakras this sphere would correspond to the sacrum chakra okay which is the desire chakra near the genitals of the body so this is the the the desire center of the individual and this is the the first place that we connect for beginning or initiation into higher levels of knowledge and awareness above yes ode to the left is hold okay Sephiroth number eight and this is splendor and another word that I would use in place of that would simply be courage because this is the this horizontal bar that connects hold and that saw represents the the the solar plexus chakra okay and this is hold and that saw together represent the solar plexus because the solar plexus represents the will center of the body or guts in general courage so it's not just courage but it's then action okay so code would be the internal qualities of that aspect of willpower and which is courage and net saw is the external attributes which is taking action in the world or actual willpower to do things so that's called victory net saw so these two together there it's it's at what's called a dualistic chakra one or a dualistic cephiro that's why they're all met that bar that actually is like kind of like a rung on again the Kabbalistic tree is often referred to as the ladder to God and that's very important because a symbolic representation of this tree was destroyed on 9/11 thereby destroying the ladder to God you see how dark you know the symbolism you know was all about when you start to study this you understand what the practitioners of that ritual were really saying to us of what they were trying to do cut off the human race from the their divine nature but and they're doing a wonderful job at that and we're helping them do it but to go back to the analysis of the tree houghton it saw if you bring them together they form the solar plexus chakra okay in the middle and it's imp there's simply two different aspects of that those qualities within the individual again the pillar of severity you could look at that as the internal qualities so node would represent courage and the external qualities with on the pillar of Mercy net saw would represent actual action in the world getting things done willpower to get things done okay now this is where we left off last week with different ok temperate is beauty that's the very middle of the Tree of Life and you see it has the most connections to it because this is what the universe centers around and it is it's given the attribute of the Sun in the Kabbalistic tradition ok I liken it to the earth in the

the system of the chakras okay because that's the the the heart chakra of the solar system and indeed Tiffa rent represents the heart chakra as well and this is the realm of beauty or care or concern it is love essentially love energy the generative principle care that's what TIFF erect is all about and when when in the Christian tradition they say none come to the Father but through me and these are words attributed to Jesus we see that ket air is the father and that's the Ancient of Days okay and that represents the you know actual God or the Creator God okay Tiferet represents that the son of that quality okay of that force which it's attribution is the son we see in Astro theology how Jesus is a representation of the son which we studied in previous weeks and we can see that it is the path along the middle pillar that you must pass through to get to Qatar from mal kook okay that yes so diz on the Middle Pillar as well right before we just lost our blog talked connection I'm going to add it back in folks bear with me I'm not sure if that's connecting or why it isn't but it looks like we dropped out a blog talk we're still broadcasting on top shoot so no worries may have to get a podcast over to them tomorrow but technical problems persist it happens what can I say so that's why I record live here and you know everything is backed up so you know I take no chances so I'll just continue and if a blog talk comes back in we'll add it back let me drop that connection and try this one more time folks hold on no doesn't seem what oh there it is okay alright if anybody can okay not sure not sure if anybody can hear us on blog talk but I'll try to well continue so hopefully that problem is cleared up but here we go TIF eret is the care center and that is the middle of the Tree of Life the most connections are made to this because again this represents the generative principle and this is what really the universe is centered around so it is probably the most important Sapphira on the Tree of Life as far as I'm concerned this is what we really have to get in touch with if we're if we are going to get up to the high levels of this this climb in consciousness and you know so it is true none come to the Father but through through the Sun this is a Kabbalistic allegory so to speak okay it's it's a Kabbalistic attribution that's really being spoken there for those who understand it above TIF eret to the left you get to set the wrote number five which is Gabby rah that means severity and again this is a quality that of self-control working upon oneself you know of sometimes needing to reel in qualities within ourselves that are out of control this is the the thing that I call Dominion self mastery or simply machee ving sovereignty being a being that as you think so you feel and so you act and then action is connected with this because these are two aspects of the same chakra Gabara and has said when they come together when we bring them together on the Middle Pillar they represent the throat chakra okay and this is all about influence how we can we can speak severely or with mercy okay we can we can chastise or we can encourage okay we can invoke fear or we could inspire okay so different aspects of the way we speak this is you know these two spheres are about how we interact with ourselves and with others in the world so has said is mercy and this is influence of others and it could be dark influence as well when we talk about you know there's a corresponding treat of this in clapotis Kabbalah which is called the tree of death and all of the attributes are all about the pure negative qualities within the individual and you know how they can influence other people to do their bidding and do their will and manipulate their mind so I'll be briefly talking about clip both later in the show but has said on the pillar of Mercy is influence of other people around you okay being an inspiration helping to helping to help others to attain higher levels of awareness if we use it in the proper aspect okay Bernard the this is a set number three set for number three now and this is on the top of the pillar of severity on the left hand side the naam means understanding and understanding is an intellectual quality and it is simply pure knowing and it is the the internal quality again it is what we the knowledge that we carry within us through our experiences through our readings through our studies through you know who we talk to who we pay attention to what we watch and listen to as far as media goes etc these are these are all the mental qualities of of the individual the right hand side and it looks like blog talk dropped out again I apologize for that folks I'll try this one more time if this doesn't work I'm going to just disconnect from blog talk so we're not interrupted any further okay I'm not getting a connection so I'm going to drop out of blog talk and we're just going to continue on talks you and I'll have to send Bob a podcast tomorrow that's all so bina is the internal qualities of knowledge okay and it is simply what we know okay so this is again on the pillar of severity which is the internal pillar so it is simply knowledge or understanding and once again mark Pascal has dropped from the air on the Intel hub news network seems like somebody's messing with our feed tonight that's okay we'll continue to present this sort of information and we'll be moving off a BlogTalkRadio as soon as possible so if you're tuning into mark patios what on earth is happening and you want to know more visit his website what on earth is happening dot-com and also visit my website vellai dot-com of course I'm Bob tusk and the host of truth be told radio right before Mark's program on Tuesdays and my shows Monday through Friday at 7 o'clock let's see here where did Mark go hopefully he'll be reconnecting shortly not sure why he keeps getting dropped must be something with our message they don't want you to hear about this stuff folks for whatever reason the powers that shouldn't be continue to interfere with our communications but we will continue to present this information as we do Monday through Friday on the Intel Hub news network let's see here maybe we'll take a quick commercial break and when we get back hopefully we'll be reconnected with our good friend mark past Yellin his shows live on earth is happening that's what understand noon with mark passio don't call anywhere a pub and are you still paying your credit cards and so-called bank loans thinking that you owe the money do you feel like it's your moral obligation but can't see an end in sight well what if I told you that in truth you don't owe a single penny and that the bank's know this and hope you don't find out here's where we come in free to prosper calm specializes in a profound debt repudiation method which challenges the validity of your so called debts morally frees you from the burdens and protects your property our system is often superior to settlement bankruptcy or consolidation which often leave you in a worse situation if you feel the moral obligation to take care of yourself and your family then I urge you to consider taking action right now the economy will not wait if you want to know more so you can prosper through the economic collapse all while staying honorable and true to yourself then call eight seven seven four one seven eight three nine three that's eight seven seven four one seven eight three nine three or visit free to prosper calm right now hey it's me Shepard the host of the Intel hub check out my live show every Sunday at 4 p.m. Central Standard Time you can check it out from my website the Intel hub radio.com join me Joe Joseph John King and AC Griffith Thursdays and Sunday evenings at 8:00 p.m. Eastern for freedom link radio on the intent of news matters a very wealthy US citizen is predicting that in 2011 we will witness the most important day in America in more than 50 years he says it will change everything about our lives the way you shop travel invest educate your children and even how you take care of your health and family now this man has made some outrageous predictions over the years but the crazy part is he's usually right you see he predicted the collapse of GM Fannie Mae Freddie Mac and America's biggest mall owner General Growth Properties a few years ago in fact Bironas called his work a dire prophecy now this has nothing to do with the stock market but it have a huge impact on almost every aspect of your life and recently he created a video which you can watch online for free detailing his biggest and most important prediction yet and it's a real eye-opener I can't stress this enough you should at least watch this free video online today he explains everything you need to know including simple steps you can take to protect yourself you can find the video at WWE end of America eight.com although this video may be offensive to some audiences it's worth checking out again that's w w end of America the number 8 com watch this free video at WWE end of America I ain't calm you are listening to the Intel Hub news network crushing the New World Order piece by piece welcome to talk soon please enter the call ID followed by the pound key you may access the call up to 15 minutes aboard scheduled start time and we're trying to connect cheer with Mark passio from what on earth is happening with these tools by the pound key enter your PIN followed by the pound key if you are not a talk-show member press 1 then pound to get access to you are now joining the call alright we've joined his talk show account this is what on earth is happening with your host mark passio see if I can connect to him off the air here yeah things happen folks with a little bit of technical difficulties you never know what's going to happen when you're talking about things like that of which we talked about on this network here please leave your message for all right let's try him one more time if not we'll get to a best-of oh wait there is I think that's him calling up right now mark is this you today I'm on Oprah's Chris what's going on man Bob then I was listening to the show on talk show and also there's an Bob talk he's having trouble with you he lost you twice and then as soon as he disconnected few I guess permanently going to send you a podcast tomorrow then we lost the signal on I also say no one talked to you and I can't I can't listen to him now at all I think what happened Chris is that he dropped off the internet and that prevents him from doing his show I just tried to call his personal cell list if we can try to call him again and get in touch with mark now that I see that he's not online I think that has a lot to do with some of the technical problems is simply you know a matter of his internet going out okay well I'll let you get back just wonder what you know was going on no thank you because I'm trying to figure it out for a Ferrari to connect with Marc gun and Chris stand by protect back with images all hey Marc Bob yeah I think my internet connection is completely out we're having a massive Blizzard in Philadelphia right now so I don't know what that I'm very very interesting uh well you're on the air least on blog talks and I I thought it was you know we had some weird problems before with the music and then you dropped off and then came back and I thought it was maybe blog talks and we just heard from one of your listeners Chris was listening on talk-show I am connected to your talk-show although I don't think they can hear me because I would have to unmute my connection to them and you just came back on line something okay back up there yep I see our page is loading all along sucker alright folks don't worry mark I love coming on by a log back in to talk show all right and once you log back in to talk show give us a call over here at blog talking scalp I'll do that Amin or you know what you don't even have to call us on blog talk if you find me in your talk show I'm connected to it so as long as we hear you on on the talk show that's all that matters okay great so all right mark thanks for bearing with us with these you know unfortunate but technical difficulties we have to deal with we're not on FM or AM folks so we don't have these big generators powering us keeping us you know on the air when the power goes out we rely on the Internet and what are we going to do folks when the internet is no more yes that's right folks there's the possibility that the internet will dissolve we've heard about internet too and some of these plans for a commercialized internet well what are we going to do when we don't have access to the Internet well hopefully we'll have internet forever right folks but realistically probably won't just heard from Bob from Cincinnati's in our blog talk chat he says tell mark to go for it we can hear him through you Bob and he says this stuff is powerful yeah we're going to continue to talk about this stuff hopefully he's connecting to the talk show and we'll hear him any second now and see mark I can't hear you where'd you go mark passio of course his website what on earth is happening com let's see mark are you connecting to talk show he's writing me right now I can see him writing me let's see here what is he gonna say you know on skype you can tell when somebody's writing to you let's see here just called blog talk alright he's on our blog talk switchboard very good here is none other than Mark passio reign arson robbery folks back on the air mark hey Bob alright so let let's try this again and I'll be standing by intently just in case I have to connect to view your cell or something Bob real quick I just want to let you know the talk show I don't think I'm broadcasting on there because I could not dial back in so okay I don't know if I don't know if all that will be going out over talk sure I just want to let the uh you know listeners know that um I could try to dial in one more time it was giving me a busy signal I've never heard that from talk shoe before yeah well not if it gave it to me as well and then I dialed back one more time in it and it allowed me to go in uh you might want to just stick with with one feed both tonight and we'll have to try yeah okay what are you trying to add it to your conference busy Sal again oh you were able to hear anything on that but I couldn't hear anything from that line okay well fair enough what we'll just keep going on the blog talk radio feed in the Intel hub news network hopefully if we can manage can you still hear me mark and he dropped again folks this is funny this internet connection went out let's come on itself hopefully he'll just do it sell the phone for the show from the cell rather for the rest of the program hey Bob mark pass you know what on earth is happening man um so it looks like I dropped out again I still look like I'm in through Skype but there was like hardly any audio coming through at all it was just all garbled I have a feeling that has to do with the blizzards the blizzard that's coming through and we like to think of because you know usually my connection is rock solid and reliable but it parked it right here in that connection is up and down so all right already built through the through the cell phone if you don't mind I was going to say yeah just do it through the cell phone we can hear you loud and clear Bob from Cincinnati's listening we got our friend Eric and we're ready to go anybody want to come in and all you know I could take a couple calls there's anybody hanging it on four calls ah let's see maybe chris has a comment or two I'll ask him over here and I said I'll continue after taking a call - sure okay and we also have the callin lines open at toll-free eight seven seven five nine eight eighty five forty nine that's toll-free at eight seven seven five nine eight eighty five forty nine and mark why don't you recap as to where you were and I'll see if anybody wants to speak on her right so I was needed to the realm of basic knowledge the knowledge that we carry around with us it's an internal quality because it's simply what we know not what we do with what we know what we do with what we know would relate to hawkmoth which is Cephalon number two at the at the top of the pillar of Mercy so several separate of number two Hoch mom at the top of the pillar of Mercy on the right hand side would would relate to what we do with what we know and that is wisdom that's what hope not is connected with wisdom so that is the last set for all before Qatar Qatar is of course the crown which represents the highest level of cause of consciousness that human beings can attain to and it is on the top of the pillar of mildness or the middle pillar so if you look to the right of this chart you will see different Patra bution x' given to these levels of the tree the three triangles yes so the three sets are on the form a triangle between the assad hold and that saw just above mal kook what represents the world called yet zero or the formative world this is the mental plane it is the alchemical attribution of air so you know earth air water and fire are how the alchemical attributions progress in upward progression earth being the lowest and fire being highest these correspondent for worlds in kabbalah with asean being the lowest form the physical or material plane and then yet deira above that which is the formative world on the world of formation which is where ideas begin to take shape briea is the world above f0 and this represents the creative world or the emotional plane so this is the alchemical symbol of water as if you see it there on the chart this is an internal quality okay and this the triangle that is represented on the Kabbalistic tree is the one that is formed with Lisa 3 cetera of Tiferet Deborah and have said it's an on word pointing triangle as a put-on yes M is a downward pointing triangle added the triangle that is formed by yes owed and neck saw or the world of yet zero so Umbria is the I guess you could call it the Sacred Feminine aspect of the worlds of Kabbalah it is the internal aspects in the purely creative world some people call this the DIA I'm trying to think of the main part yeah not not the spiritual plane but the the astral plane the Ashville world or the astral plane now above that is one more realm that is even a higher in consciousness and it is closer to pure source without any form at all and it's called absolute absolute is the archetypal realm this is all the world of just pure our title imagery it's a pure idea it's pure spirit if you will okay it's alchemical fire it's the realm of will and spirit from which things that come into formation are originated so this is given the Hebrew character yode which is a the first name in the Tetragrammaton and it also corresponds with the alchemical symbol or fire so these four worlds are at different aspects of the individual and it represents basically off see Oz the physical world that represents what we have our physical attributes the situation we might be born into what resources we have in the world it could correspond with money it could correspond with you know what our talents our basic talents are that zero is the formative of mental plane this would correspond with you know how we use our mind it would it would basically relate to the things that we study and take into ourselves intellectually and our capacities in that regard briea the creative world where the emotional plane is how we use our heart and again Tiferet is based on this world this is basically care it's our water you know how do you carry your water in other words so this is the realm that has to do with the generative principle the creative world care how what we care about is what we create absolutely archetypal world is the world of pure spirit or the plane of will it's ultimately what drives everything and that's the archetype of world and that's all chemically attributed to the concept of fire now moving to the next image here to move along in these concepts we see the Tree of Life and its relationship to the chakras I was briefly explaining this last week but I made a visual representation of it we talked about the planetary system corresponding to the shoppers of the body and here we see a chart in image number two that basically relates all of these concepts together we collapsed the three dualistic separate into one along the middle pillar we would get the seven chakras the base were more mooladhara chakra the root chakra and I correspond that to Saturn in the attributions related to the planets when it comes to correlating them with the chakras of the body the fear of yes owed on the Tree of Life corresponds to the sacrum chakra the swadisthana chakra I correspond that the Jupiter along the Anna Terry solar system chakra points if you will they hold and mix off with both correlate to of the solar plexus chakra or the planet Mars Tiferet is the or beauty would correspond to the heart chakra as we talk about the the anahatha chakra that is okay the fruit chocolate would have issued the chakra corresponds to the this years of deborah and has said progressing upward on the Tree of Life again another dualistic setter wrote which when combined form the throat chakra Bonanno claw when they come together form the Ozma chakra with the third eye chakra or the planet Mercury the throat chakra of course corresponds to Venus heart chakra winner okay um benign hope ma correspond to the third eye chakra or mercury they are they're the mercurial aspects and what we know and then what we decide to do with what we know and care represents the crown chakra again this is pure being higher level of awareness cosmic consciousness Christ consciousness if you will and this corresponds to the saw saw saw saw saw us water chakra or the crown chakra of the body there are the seven chakras as it relates to the seven levels of the Kabbalistic Tree of Life we see that this if we move from image number three we see that this is what the menorah which is a Jewish candelabra that is used during Passover this is about the Tree of Life as well it's a different orientation of the Tree of Life and the turn cetera a mark at seven yes I thought you agreed that you wouldn't talk about this Jewish stuff on the air you know you know I'm Jewish and I don't want anything to get out about our secret plan the world through the world no problem I'll keep it on the down-low I don't know if you heard payday Monsanto show on Saturday mark but he started going off on Zionism and everything and you know I I did the same interruption of course it's a joke amongst the people that listen to the network that the Jews run run our media station I happen to come from a Jewish family but I am more than happy to hear about all these sorts of symbolisms whether they come from the the Jewish traditions the Masonic traditions it doesn't matter me I'm interested in true sorry interrupt mark go right ahead no problem as I said previously on chose in the past people who think that it's all one group you know oh it's our Alvers i honest it's all the freemasons it's all the the DAR Kabbalists it's all the Jesuits it's all the Vatican they don't understand the interconnections of these secret societies and how they work is one guiding it in hand it's a very complex web of interconnections and it works through the banking system that works in religious structures it works through government it's it's not cut and dried it's not a simplified thing with one set of people at the top that are all part of one organization they it's psychopaths who have infiltrated all institutions that are based on hierarchy and compartmentalization this is why I spend so much time talking about the structure of power of core power which is illusory power but the structures of control are more important than the organizations that actually work toward that control it's important to know about them but we have to understand the how and the why even more so than the what the why is the most important the how is right under that then we understand the what and analyze it you know from a left-right perspective about who who is it who is involvement you know what those organizations are all about and how they work but we have to understand this is a complex interweaving strata of secret society networks working together and it's no one group there are good in bed and all and all you know philosophies and ideologies as far as the way human beings use them so I'm sure there are you know people in the Jesuit Order who are good-hearted people and though people in I know plenty of people in Freemasonry that are very good people and are welcome for the betterment of mankind you know people in the Kabbalistic tradition there are tons of good people all of these things however can be twisted and perverted and used for selfish reasons and for reasons of control so again we have to elevate our understanding of this into a more mature perspective as opposed to this childish notion of all one group of people and they're doing it all let me just add one quick addendum or in addition to that we were talking about this as well on the payday Monsanto to show and definitely want to plug his show mark as you know he's from the Philly area and absolutely he'll be at the freer mine conference definitely just to be there as a student just like I am and also to mingle and perhaps maybe have a performance of sorts I want have to work that out with him off air but anyways that's besides the point I was going to say real quickly that we were talking about the fact that most Jews they have no idea about the the Kabbalistic traditions if you will they have no idea the average Jew is more aware of his corned beef sandwich and his pickle and his you know his bankroll or whatever and they don't really know the first thing about this they don't know that when they're calling someone goyim that that's referring to other human beings that are not

Jewish as cattle they don't know this they just think of it as non Jews being goyim so the average Jew is a sheeple and there's just as much brainwashed victim as the average freemason who maybe doesn't know the true nature of it and so on absolutely and that's that's what I'm doing this for is to bring awareness and hopefully inspire people to study a tradition that is rich in its understanding of human consciousness like Kabbalah because so much can be gained from a spotty of this a deep in-depth study and again I couldn't possibly on the air but how many weeks we really covered this cover all of the different aspects of the Kabbalistic tradition is a lifelong study now mark what a bit yes well let me interject here one of the aspects of the Kabbalistic study that you were just about to talk to him and before my big Jewish mouth interrupted and I say that with all love folks anyways one of the things you're going to say and it piqued my interest was something about the menorah tell me more yes so the menorah is actually a representation of the Tree of Life if you look on my site on the radio page image number three is an actual depiction of the menorah and it shows how it corresponds to different offsets I wrote on the Tree of Life there are seven candle holders on the menorah and they are basically in a u-shaped pattern in three u shapes that cross a Middle Pillar being the little candle so if you look at that middle candle as Middle Pillar okay and you have the three external set the wrote okay on the left representing the path of severity the pillar of severity being code Deborah and Dena okay as your by the way to the left eight is hold five is getting rough three is enough okay on the left hand side right on the right hand side we have starting from the outside net saw have said and hokum ah going up on the path of mercy on the right hand side so the very top or the middle a candle holder at the top would be kept hair okay and then along the middle of the tree where the three u-shaped holders cross the middle candlestick we would have the three other the to stretch a rope and then the hidden realm on the middle tiller being a knot at the top underneath kept hair TIF eret right in the middle on the second rung and then the metal wrong and then at the bottom yes so and it's you know difficult to understand that by just an explanation over the phone but if you look at the image it becomes very clear of course the base where the actual bottom of the entire candelabra would be Malcolm or the physical realm which is the base where the thing that turns up the rest of the tree all right I think there's got the break music yes it is here's the break however are you still paying your credit cards and so-called bank loans thinking that you owe the money do you feel like it's your moral obligation but can't see an end in sight well what if I told you that in truth you don't owe a single penny and that the bank's know this and hope you don't find out here's where we come in free to prosper calm specializes in a profound debt repudiation method which challenges the validity of your so called debts morally frees you from the burdens and protects your property our system is often superior to settlement bankruptcy or consolidation which often leave you in a worse situation if you feel the moral obligation to take care of yourself and your family then I urge you to consider taking action right now the economy will not wait if you want to know more so you can prosper through the economic collapse all while staying honorable and true to yourself then call eight seven seven four one seven eight three nine three that's eight seven seven four one seven eight three nine three or visit free to prosper calm right now hey it's me Shepard the host of the Intel hub check out my live show every Sunday at 4 p.m. Central Standard Time you can check it out from my website the Intel hub radio.com join me Joe Joseph John King and AC Griffith Thursdays and Sunday evenings at 8:00 p.m. Eastern for freedom link radio on the intent of news night a very wealthy US citizen is predicting that in 2011 we will witness the most important day in America in more than 50 years he says it will change everything about our lives the way you shop travel invest educate your children and even how you take care of your health and family now this man has made some outrageous predictions over the years but the crazy part is he's usually right you see he predicted the collapse of GM Fannie Mae Freddie Mac and America's biggest mall owner General Growth Properties a few years ago in fact Bironas called his work a dire prophecy now this has nothing to do with the stock market but it could have a huge impact on almost every aspect of your life and recently he created a video which you can watch online for free detailing his biggest and most important prediction yet and it's a real eye-opener I can't stress this enough you should at least watch this free video online today he explains everything you need to know including simple steps you can take to protect yourself you can find the video @ww end of America eight.com although this video may be offensive to some audiences it's worth checking out again that's WWE end of America the number 8 com watch the free video at WWE end of America 8 calm you are listening to the Intel hub news network crushing the New World Order piece by piece okay folks welcome back what on earth is happening with Mark pastels your host that's the last break for today's show we're going through the rest of the program for the next half hour commercial-free what on earth is happening here we go mark we have a question for you from the chat room Bob from Cincinnati wants to know so we now understand the spears and pillars of the Kabbalah how do these Kaaba lists use that this as a vehicle for power or dark occultism mark oh I would say main chiefly in two ways the first is the simple understanding that these are representations symbolic representations of qualities that are in dwelling within the individual and within consciousness itself in understanding that simply understanding the motivations of human beings and being able to basically predict their patterns of behavior because you know they do not have that same understanding that you do about the human psyche puts you at a distinct advantage over them in whatever aspect or particular manipulation or machination you want to perform so the knowledge itself of these different cell qualities if you will now if they are held by people who have a propensity to desire control in the first place can act as a mechanism for power and being a weapon to be held over the heads of people who are simply dwelling in ignorance pure ignorance and that they're growing and ignorance um is themselves again such knowledge is the real answer to all of the problems that are plaguing us as a species if we don't know the self we are going to be basically manipulated for as far out of the foreseeable future as we can imagine we have to understand what drives us what our motivations are we have to understand what the aspects of consciousness are how they work how natural mall works and this is what the tradition of Kabbalah is Kabbalah is a visual and it is also a tradition of only a spoken past their own oral tradition with symbols okay but the word

Kabbalah actually means to receive by the way so this is the reception of the knowledge of natural law principles is what this ultimately is all about as is Freemasonry in its pure form in its unadulterated form so what they have just by the sheer fact that they have and control this knowledge in general not they control it but they have attempted to control and hoard it in the past and infiltrate it and then water down the tradition so that they keep the true tradition and then water it down for the exoteric masses to teach them the exoteric aspects of it so just by the nature that they are in a position that they have this knowledge and are in some positions to infiltrated these traditions and control them puts them at this distinct advantage over people who are in complete ignorance incomplete nations of this knowledge in some cases and in other cases are in ignorance of it refused to acknowledge its importance and learning um the second way they do this is through the symbolism itself symbolism speaks to us at a subconscious type of level it does not need to be understood just like we don't need to believe in a tradition for it to have an effect on us if other people are acting upon the belief in that tradition or ideology symbolism does not need to be understood consciously for it to have an effect on the subconscious mind this is why it is used in advertising movies subliminal messages in news in media in military in police and it is used in these mega rituals that they trot out every time and again to really bring negative change to the people of the earth so they can have more control 9/11 being the chief example of Kabbalistic symbolism our type of Kabbalistic symbolism employed on mass scale so that that would be my answer of how the simple understanding of this knowledge if you know is not used in the right way can be use as a vehicle for control now people will say well knowing that why would you teach this and I would say because is my position and I feel that humanity will never be free until the occult there's no longer the occult meaning until those hidden knowledge is brought out into the light of day we grow up realizing realize that this exists it can be used in a positive or negative way and we need to make the willful decision to choose it to use in a positive way for the elevation of human consciousness and I don't think there's any more time to dilly-dally when it relates to that or to ignore the fact that this is what really must be done for the people that understand this who are called this they are coming up and speaking the truth about this now at this time in history and that's on par ton sir myself to be part of that process and I will continue to do that for as long as I am able and that that is uh that is the reason I'd say you know guerdon and evil can be and you could choose to use any of this knowledge that I've been talking about on this show for good or ill and I don't take the position of fear that says well because it has the potential to be used for something negative then it needs to be hush-hush and then kept for the initiated no that's I don't I don't feel that that's right something just smacks of me of elitism and control for that and I think that's the problem that is the problem is that this hasn't been widely taught so moving on to the next topic because we only have about 20 minutes left in the show and I'll try to wrap the last few concepts on Kabbalah and we can move on to some more sacred symbolism in the next show or talk about the other soul qualities that are spoken about in Kabbalah as it relates to before worlds and this is image number 4 and you see the Kabbalistic teacher lawn model Duquette in the background here this was taken from one of his documentary films on Kabbalah which I may post it in web site if I could find a decent capture of it online we see at the bottom there nephesh the animal soul this is correlates to if you look at the four worlds this correlates to off Fiat or the physical plane he calls it the animal soul this is just basically the root instincts of the individual above that correspond to yet Dara is relock which is the mind guide this is our intellectual capacities of course this corresponds to the evolved character in the Tetragrammaton which is a visual nice visual depiction there on the left okay above that this would correspond to the world of briea which is neshama neshama is intuition this is the Sacred Feminine koala again that world correspondent with water and it's the first hey character in yo team Pompey and above that we have the universal life force okay we're alchemical fire this is absolute in the worlds of Kabbalah in the four worlds and this is this universal life force is known as Jia so these are the four life qualities or soul qualities in Kabbalah we see over and over again that one four seven and ten are sacred numbers in the Kabbalistic tradition these are these come up over and over again there's four other principles I want to talk about concepts these are the three levels of nothingness that are spoken about in Kabbalah and then the dark realm or the hell world called clip oak so if you look at image number five you often see this depicted above the Tree of Life these three levels of nothing as they talked about in the Kabbalah of the void these are realms that are realms of the Creator intelligence itself and they are called behind so far which is the boundless light which is above cat air this cat air again is that we're talking about we talk about the Kabbalistic tree this is the Divine's of breaking up into different aspects so it can experience itself in in the physical world the physical domain or dimension that we live in so this is about the elevation of human consciousness two levels of higher levels of awareness ending with care and then above that we have you know the unified realm that they look at as having three levels to it and so forth being the values light this is kind of what they refer to as the light and Freemasonry when they say Fiat looks let there be light you know the Creator listen first words of the Creator spoken in Genesis the light of the Creator in Kaaba in Kabbalah this is considered behind so for what is called boundless or limitless light above that realm you have something that is even beyond the light which is the potentiality of creation which is the boundless itself this is just there's there's no physical dimension to it what celebrities just boundlessness and limitlessness people look at this as pure empty space and you know the nothingness between the stars so to speak and then finally you have behind which is just nothing pure void the absolute potentiality that is underlies all of creation the know that from which the everything emerges the silence from which all vibration emerges so these are kind of very heavy tract concepts but I figured I put them in there nonetheless because they are considered important concepts in Kabbalah and finally underneath the Tree of Life there is a realm as well this is the concept of Correspondence in the Hermetic tradition which is also taught in the Kabbalistic tradition of as above so below as there are regions above the tree there are regions below the tree and I put this region in red and labeled it is known as the Pope the Pope is the dark realm deep subconscious realms that underlie physical creation some people say are the hell worlds that sometimes this incarnate consciousnesses may want to enter our physical dimension from and you hear about different researchers talking about that what's really going on is that people are actually inhabited by other consciousness is from other dimensions that want control and want feel for fear and this is what clip opens closes this hello world where it is basically the deepest and darkest research recesses of the human subconscious to connect with other dimensions of existence that are very dark and not geared toward the elevation or mastery of the individual but toward the control of the individual and dark Kabbalists practice what is known as clapotis Kabbalah and in the Kabbalah Kabbalah there is a whole nother tree which I have not talked about which is called the tree of death not the tree of life so if you look to further study on that research clip otic Kabbalah this is the black magical side of Kabbalah and this is what the sorcerers of the world use it is one of the methodologies aims to gain access to our subconscious and control us and put us on strings like puppets through our desires and our fears it's this is the realm of fear is what how I would describe clip hope ok clip Hulk is the realm of fear is the realm of dot negative energy okay it is the it's the Antichrist realm so to speak this is the not that the realm of the light of the Creator as behind sofa or on sofa nine are but this is the realm of the demon world okay so that's all I'll say about it for now but it's an interesting study it's a little difficult to get information on clapotis Kabbalah maybe I can post some because I do have some in my library and I'll try to do my best to put some good resources up on the website for people to look into further and I'll do that sometime tomorrow so finally I'm going to wrap up tonight with a breakdown of Kabbalah when it comes to the Tarot and this is an even more fascinating study in my opinion Tarot is one of my favorite mystical traditions it is a very rich tradition symbolically and spiritually and if you really understand what these causes are speaking to us it's a beautiful tradition so on images number seven and eight on the website we see two trees on the first tree number two number seven I didn't get a chance to label it I put this up last minute and I'll label it probably for the podcast images we see the microcosmic Tree of Life okay image number eight is known as the macrocosmic tree now these all of these cards form the Major Arcana of the Tarot Dec Major Arcana is Arcana means knowledge and the major knowledge of higher realm of knowledge this is the knowledge of the soul and the universe and its relationship teacher the relationship to each other the lower realms are the realms of the personality okay the lower knowledge the Minor Arcana okay and these are the decks in the Tarot and they correlate to the playing card decks okay so maybe next week we can just do a study of Tarot because I'm taking a break from again the mind control techniques because I want people to firm background of where some of the symbology that we're going to talk about comes from until we even start to break down all the different symbols that we're going to break down in the next section we talk about symbolism as a form of mind control a method of murine control but you know perhaps next week we can look at Cairo for the whole show but just want me to show how these are cards in there in the Major Arcana relate to the Kabbalistic tradition and the Tree of Life to go back to the Minor Arcana for a moment the suits the suits are of these are for minor decks are coins some people refer to them as disks okay coins or discs or Pentacles they're referred to as in some decks so coins flash disks / Pentacles depending on the deck that you have course that corresponds to the element on earth and again these are our resources this would be the world of hacia in Kabbalah okay and earth would represent are the resources that we have to employ in life and how we use them and that on the regular playing card that this would be the suit of diamonds and because it's about their riches or money and your physical worldly things okay moving upward when we then have the deck of swords okay so swords would correspond to the mental plane okay or air and it would be yet here on the Kabbalistic tree in the regular playing card deck these will be spades and these represent our intellect okay a cutting quality of cutting qualities of the intellect swords okay upward from that when we go to cups cups would represent the emotional plane and this would be real on the Kabbalistic tree okay this is the alchemical quality of water hand cups it's you know chalices the Sacred Feminine in other words the emotions okay on the regular playing card deck the cups are correspond with hearts the suit of hearts and then the highest deck would be the other Minor Arcana would be ones which correspond to fire or will okay this is the realm of obsolete in Kabbalah and on the regular playing card deck this would be clubs now you'll notice in the regular playing card back the entire Major Arcana is missing representing taking knowledge of the self and its relationship to the universe out of the playing card back and relegating it to just the game okay none of those images are in the modern deck of playing cards okay the fifth element is left out of the equation which is the same spirit so if we look at these two tree depictions images number seven and eight as it relates with the Tarot I have laid the Major Arcana cards out according to according to their numbers in the same positions as the Sephiroth on Tree of Life okay now the dot seers okay which is the second down from the top on the Middle Pillar the second card we look at the very top card on number seven that's the magician underneath that I put the soul or the fool okay this represents soul on the microcosmic tree if you look at the corresponding position in image number eight on the site okay and these may be different images in the podcast you have to understand that so these are just the images for the live show maybe I'll just keep them in that position to avoid confusion and tackle on anything underneath you know if I add anything else so the the world is corresponds to the position in of dot on the macrocosmic tree so these are what these two trees are about the first one is all the qualities of the individual as it makes its journey through life and the second is about the qualities that we see enacted in the world okay so I'll start at ma-kun and I'll cleave at the bottom is the material world okay on the first tree the micro microcosmic tree and this is the Wheel of Fortune card so this is the material plane okay above that we have Mohammed and he corresponds to yes owed yes owed is a desire for knowledge and initiation when seen Bahamut holding the lamp understanding he's in darkness and wants to you know move on in search of light to be initiated he's the initiate okay the strength card which represents internal qualities of courage and the victim chariot card which is in the sphere of victory okay this is the solar plexus chakra courage and we'll okay so we have the mal coupe at the bottom the material plane I made it red the soap sphere which is orange there the Hermit and the yellow sphere which corresponds to the solar plexus it's the the courage card or strength and this chariot will okay so this is a hope be strengthened and met top would be the chariot then the lovers is to at the heart chakra and there in green okay and we go up to the heirophant and the emperor so this is the throat chakra these are the way we interact - would not present a get off severity self-control Emperor would represent have said mercy or influencing others and then we have at the top bar just below katare we have the Empress there on the Left representing understanding of the NA and the high priestess on the right representing wisdom or Houk mom so the Empress would be the knowledge we carry with us the high priestess would be wisdom what we do with what we know and then of course there is self mastery representing the magician elevation to higher levels of awareness and consciousness use at the top of the microcosmic tree which is the goal in the physical world of the fool okay but ultimately they grow from this whole tree grows from the zero points which is the fool and it's a that represent the soul's journey into into a state of incarnation on the earth plane okay so that's a microcosmic tree the macrocosmic tree deals with the forces of nature and natural law in the external domain or the universe seemingly external I shouldn't say so we have the judgment card at the bottom representing mal crew for being kind of stuck in the Material Plane yeah you can look at it as rising from the Material Plane the angel is calling one upward out of the material realm and awakening them from their slumber from their tomb from their graves okay knowing the trumpet the judgment card corresponding to MA coupe above that we have the Sun the moon and the star the three cards are corresponding to the triangle that represents that dealer okay these are the qualities that we've been talking about over the last several weeks which is a you know correspond to the religions have a minute and a half I'll try to break this down quickly and they're open containing next week with a further exploration of the Tarot so above that we have the tower card representing change and the generative principle how changes great ultimately created through the heart and it was funny that that's where we left off last week when I started to break this down when I'm talking about the hard and temperate so only appropriate that we leave it off there this week I won't go any further I'll leave it there and we have about a minute left like I said we'll talk about more about power next week maybe I can complete this breakdown of the microcosmic and macrocosmic trees and then we can look at the tradition of the Tarot hopefully we won't have too many audio difficulties looks like that that was all Blizzard Blizzard related we have a word alone blizzard here Philadelphia okay um the best that's all we have time for folks I want to thank everybody for listening sorry I did mention is more halls you can listen to walk on or at this happening right here on the Intel hub news network I'll see everybody play here next week I chose

What On Earth Is Happening Show #043

Topics: *Tarot, Minor Arcana, Major Arcana, Tarot's Origin & Uses, Tarot's Connection To Kabbalah*

we're going to talk about Cairo tonight and specifically its relation to Kabbalah and then we will be breaking down the symbolism of the Tarot actually we'll be doing this kind of in conjunction at the same time simultaneously I'll be breaking down the symbolism and relating it to the Tarot tradition to the Kabbalah tradition I should say so we looked at the Tree of Life symbolism of Kabbalah last week and understood hopefully how this is connected with the human psyche and human consciousness it is all about the self it is knowledge of self I posted some really nice videos on Kabbalah very simple nothing in depth on the website in the podcast section along with some books on Kabbalah so for people that want to study further they can go up to my website they can click on to the podcast tab and I believe the show last week was show number 42 so that is up on the site and there's a host of documents up there for your perusal and download and you could throw them on any kind of a digital reader will read them on your computer and learn more about the Kabbalistic tradition there's also some movies that are very simple on what Kabbalah is what it can do for you basic basic material very introductory ok for this the student who is just beginning the the new initiates of speak ok I would hope that people will avail themselves of this information and study it further because it is a powerful and rich tradition if it is understood in the proper light and used in the right ways so that's what this is all about on the show knowledge is simply a means what we do with it is what really matters ok that's what true wisdom is all about and this information can be used for great good or great evil it depends upon the consciousness of the wielder of said information and I will continue to repeat that theme ad infinitum on this show because we have to understand what the occult is in a much more mature way and I think that we need to expose it further and further and further and take this into the realm where it becomes truly widespread and distributed distributed information that is the only way I think we're going to lead to anything in our world that resemble resembles true freedom in any way when the occult is no longer hidden when it when it is no longer the occult anymore when it becomes common sense that is my contention and that is why I do this show so with that in mind let's look at one of the oldest and most sacred tradition regarding self-knowledge and regarding the forces at work both within the individual unit of consciousness the soul so to speak what some occult philosophers have called the monad or the individual unit of self-awareness of consciousness and how that relates to the forces that are at work in nature in the macrocosmic realm in the universe and that's what the Tarot really teaches us if we are receptive to its message if we understand it as something simply more than a deck of cards if we understand it as a book that is really telling us the story of of ourselves and we need to turn inward to study that story and that's what the symbolism of the tarot card simply helps us to do it is a tool okay and it has been referred to as I said as the book of life okay as the book of truth as well and we can start to look at the imagery of the cards and how rich and detail they are if you've downloaded the PDF document with the deck what I want to just do it again I could never possibly possibly just as a caveat to all of this I could never possibly give anyone all of the knowledge of the Tarot and no matter how many shows I did it I can only hope to whet someone's appetite to study this further on their own because you can make a life time study of the Tarot you can because you can make a lifetime study of myself okay so this is just an introductory primer and that's all it is intended to be in no way is this intended to be extensive or thorough or comprehensive it's an introduction to the Tarot okay for the student that wants to look further into this and will take it seriously and go deeper and understand that this is a tradition that teaches about the self they are more than welcome to do so and i will as i did with kabbalah last week I will post some introductory material on Tarot for people that want to look further into it and that will be posted along with this podcast on the podcast section of my website so what is the teru teru is a deck of cards that tell a story a tapestry okay help us to explore consciousness as I've said and they are these cards are 78 in number in a true tarot deck 78 okay there are 22 trump cards or what is called the Major Arcana the Arcana is the word for knowledge okay is a latin word it means knowledge this means the major knowledge okay higher knowledge and what the Major Arcana represents are these trump cards what it represents is the connect in between the soul and the universe so this is the correspondence principle that we talked about in past weeks okay the Hermetic principle of that which is above is like to that which is below meaning that the universe is self-similar across all scales okay that which happens in the microcosmic world or the the small okay is reflected into the macrocosmic world or the very large so that which is taking place at a individual level is reflected outward into society and that's what our society becomes like depending on how many people embody that particular modality of consciousness it's very easy to understand actually you know if you keep putting a certain type of energy into any given system you will result with more of that kind of energy in that system okay you keep heating a pot of water you will get hotter water okay you keep adding colder water to an existing pool of water the overall temperature of the entire pool of water will become colder it's quite simple if we just apply our minds to try to understand this and that is what the major arcana suit or the part of the deck called the major arcana is all about it is about this relationship between microcosm and macrocosm and that's what i'm going to try to really get the listener to understand what the symbolism but i've posted to the site today okay so there are four other suits or subjects within the tarot deck of 78 cards so on the major arcana there are 22 cards okay 22 okay and they are numbered 0 through 21 so if you look at the PDF document that I've posted you will see that I start with a face of a deck face card this is Bay basically just showing you what the deck that I chose for the symbolism to explain the symbolism is and it's called the universal weight back and it shows you who made this deck who contributed to it so this deck is derived from the teachings of AE weight Arthur Edmund weight and that slide one or page one in this PDF document page two is where the Major Arcana starts and it starts with card number zero and then it goes forward all the way up to card twenty-one and these cards are numbered in Roman numerals so hopefully people are somewhat familiar with Roman numerals I could refer to the page numbers as well if Roman numerals confuses people but that is how they are that is how they are arranged on the PDF document now the other four subjects of the Tarot are wands cups swords & Pentacles wands cups swords & Pentacles okay and you'll see them below the twenty first card I should say the twenty second counting the zero card in of the Major Arcana wands we'll start below that and then you will see cups and then you will see swords and then you will see Pentacles if you're paging through we're scrolling through this PDF document what these four subjects represent is basically this is called the Minor Arcana by the way all four of these decks taken together is called the Minor Arcana and these four subjects represent different qualities of the self they represent I'll start with the lowest in energy see these decks are actually arranged in energy levels major arcana I put at the very beginning of the of the document that I assembled because this is the highest deck as far as knowledge and energy goes because this is the deck of the soul and the universal forces that are at work in nature okay so nothing is really higher in consciousness and energy than that and that's why it's considered the quintessence or the fifth element of the deck okay the element that describes the soul and the forces of nature okay so that's the highest in power going down from that we have wands okay and ones represents the element of fire fire and you'll see fire symbolism in the wands as they're drawn okay fire is now chemical symbol or representation and what it basically represents in the in our lives and in relation to ourselves is our actions okay our actions this is why it is the highest in power because our actions are what actually work in the physical world higher than anything else any other force any other elemental force it changes the material plane okay so these four decks represent what goes on in the material plane okay of them of the Minor Arcana fire being the highest in energy which is Wands okay in the regular playing card deck just doesn't as a an analog to the Tarot because that is where it is derived although in a bastardized form this would be the suit of clubs so Wands corresponds to the suit of clubs in the regular playing card deck now what you will notice immediately is in the regular playing card deck the entire Major Arcana has been removed and that's critical that is very telling in my estimation because it is showing you that the quintesson is not even considered important a Fifth Element spirit soul and natural law which is what the major arcana represents and it's been removed from the modern playing card that now it's just been made something we play with okay instead of something that is taken seriously interpreted read as a an allegory about the nature of self and natural law and that whole part of the deck has been thrown away except of course for the Joker card okay which is in correspondence to the fool card the first card of the Major Arcana it's the only card that is kept from the Trump cards of the Tarot so the yeah the correspondence between the plain deck we only have four suits okay and that's the suits correspondences to the suits of the Minor Arcana so going down to the next level lower in energy still important on the Material Plane but not as high of a level as actions or wands we have cups cups as below ones in the Minor Arcana so the wands the cups Pursuit represents our emotional qualities okay so while while wands represents the the plane of will or action ok cups represents the emotional plane okay or what is taking place within us the spirit in which we do things the spirit in which we take our actions so the emotional qualities okay of the self are embodied in the suit of cups okay now moving downward from there we see the suit of swords okay so swords represents our intellectual capacities and capabilities okay so swords is our mind okay and what we do with it swords is intellect okay and while that's important what we know you have to care enough to do something with what we know and then we have to actually develop the will to act that's why that's why um swords comes even below wands and cups okay so moving downward one more level the final and by the way let's look at the associations to the playing deck for for Wands it was clubs okay for cups it's hearts of course because this is the emotional symbol the heart okay for swords it is spades okay and then finally we come to Pentacles this suit is also called disks in some decks and coins in some other decks okay so this is Pentacles coins or disks depending on which deck you are may have access to um it's called Pentacles in the weight deck so this suit corresponds to our resources in the physical world okay it's the physical plane it's what we have as far as innate talents in a propensity or capabilities things we are seemingly born with or born able to do better than others um it is also our material resources in the physical world okay so it can represent money physical resources food house anything like that okay what we have at our disposal to use in a physical sense that is what the pentacle suit represents okay so as the material plane this is the lowest in consciousness slash energy and then we move up from there however this this part of the deck of the Minor Arcana equates to the Diamonds suit in the regular playing card deck so at the bottom level physical physical plane okay the material plane again this would correspond in Kabbalah to Ostia we talked about the four worlds of Kabbalah last week so this part of the Minor Arcana the Pentacles would equate with the diamonds in the playing card deck to the material plane or hacia the world called hacia in Kavala the plane of the material realm okay the physical world above that we have the suit of swords swords is correspondent to the spades suit in the regular playing card deck and this would be the world the world of formation in Kavala and that is yet zero okay so this is the intellectual realm okay this is intellect all right upward from there we go two cups this is the emotional plane hey this is Hearts and the regular playing card deck and then in the tradition of Kabbalah this would be the third world which is Brio okay and above that the top level would be wands of the Minor Arcana that's the highest energy of that part of the tarot deck wands represents fire it's our actions okay in the in the Kabbalistic tradition this would correspond to oxygen okay which is the archetypal world so that's the minor our Canon I'm not really going to say too much more than that okay we could also equate them to earth air water and fire okay earth Pentacles resources air intellect swords okay now we go upward we get two cups that's water emotional qualities and then up to Wands that's fire and that's our actions so here we have the same principle again thought emotion and action and what we do with what we have and what we know it's a repeating theme over and over in case you know in listening many weeks we haven't still seen this pattern or connection and hopefully people see it and understand it deeply by this point if you've been following these podcasts so that's the Minor Arcana and you can get into it in depth there's a whole lot more into it a connection with the tradition of astrology and it connects in with different star constellations it's a very fascinating study the Minor Arcana but that is not what I'm going to focus on here today rather I'm going to focus on the deck that is left out of modern playing cards the analogy to the the Tarot in the modern world the playing card deck we're going to look at the most important part of the deck and how this relates to the Kabbalistic tradition which is the Major Arcana so let's break down the cards of the Major Arcana and again I'm going to do this in conjunction in connection with in correlation to the Kabbalistic Tree of Life and as we said toward the end of the show last week there are really two different Kabbalistic trees when we study this in conjunction with the Tarot and they are what is called the microcosmic Tree of Life and this is the tree that describes the qualities of the self the individual the individual of universal consciousness the monad as it is called in different occult schools of thought okay the single unit okay the microcosm the soul all right then we can look at this tree quote-unquote this arrangement of cards in conjunction with the macrocosmic Tree of Life which is the universal forces of nature okay and that's what we're going to attempt and endeavor to do here you see these cards in their relationship with another tradition so we're building correspondences here and this is what all occultism really does see the left brain must step aside in the study of any of these schools of thought this is why the scientifically minded have so much of a problem with the occult this is why people will insist that this is another religion and it has nothing to do with religion zero to do with religion okay the other thing people will say is I don't want to study this or look into this or understand this because I don't believe in that this has nothing to do with beliefs either this has to do with knowing oneself and that's all the occult has ever been about that's all the mystery traditions have ever been about but in if someone has fallen in consciousness and yet has a whole lot of knowledge about self if they've fallen into the dynamic of fear the energy of fear okay they've fallen into fear-based consciousness meaning that they are afraid of lack of not having they are obsessed with the physical world okay they have become reptilian in their brain because they they are living from the lowest brain structure the r-complex of the brain the reptile brain okay and they're constantly in fear of what may happen to them in the physical world and therefore they want to take they want a hoard they want they want to have at the expense of other people not having they want to create dichotomy they want to create schism they want to have haves and have-nots which is where we're at in the world that we live in all right when this kind of a consciousness gets hold of information like this they will hoard it and they will use it as a weapon against people who may not be as aware as they are about how the the nature of the psyche works about how the mind itself works and then they will twist it pervert it and use it as a weapon and that's what the dark elements of occultism are that's what they are and that's what they have done and we need again I'll say this repeatedly we need to be more mature in our understanding of what the occult is it's simply hidden knowledge we need to understand it is how it is used to many people paint with a broad brush about this and say it's all negative it's all bad nonsense the reason that there are dominators want people to think that that have a vested interest like religions have a vested interest in having people think that is so you never understand the hidden knowledge that they do about how you work and therefore you can be manipulated like a puppet by the people that do have this no and that's it period accept that or don't accept it but that's the truth so the idea that I don't believe in this stuff right I've responded to this before as well you don't need to believe in it other people understand this information and are using it whether you believe in it or not if you understand how a law works and how you may manipulate that law to your advantage and other people do not understand how those laws work they're powerless to defend themselves against you who are at a much higher level of knowledge than they are dwelling in ignorance and you know pound your fists against the desk or against the wall all you want about that that's never going to be any different and you don't need to believe in it for this to be in effect in operation and to take that kind of an attitude is the attitude of a child that doesn't want to believe that something exists and has an effect upon their life it's it's the child who refuses to accept that one plus one equals two and wants it to equal three because they want one more of what they had they don't have okay and is pounding their their fists on the desk like a little little child saying why can't one plus one equal three because there is no answer to that it simply doesn't that's how it is so you know for people that don't want to accept that the occult has any influence in their life just you know click the stop button or the pause button or the mute button right now and go and turn the television on and enjoy being dominated and then eventually exterminated by the dark occultists of this world because that's the only thing that's on its way so for those who do want to go further and understand how these principles work and how they've been manipulated let's begin the delving into the major arcana the higher knowledge of the Tarot now just before we do this let's look at the word Tarot itself okay Tarot essentially is derived from the word for the goddess okay this is taro is a sacred feminine tradition okay it is a tradition that relates to the generative principle of nature which ultimately is true care so this tradition ultimately goes back to goddess worship the goddess traditions that predate all mystery traditions okay because it's about the nature of creation and creation has been seen as a feminine force because the universe came out of the void nothingness okay babies come out of the womb we all come out of the womb the waters of our mother the cosmic mother of the galaxy gives birth to the Stars and the solar systems that in which life inhabits and you know we have a chance to come into incarnation in the physical world and learn so this goes back to ancient goddess traditions and the oldest name one of the oldest names in recorded history in the goddess tradition comes from the Far East the goddess Tara okay a very similar in pronunciation okay same basic phonetic roots Tara and that spelled t-ara for those who want to look into this goddess she was a goddess of compassion mercy nurturing okay it is all about the generative principle which we've talked about what is the prime generator of our experience it is that which we care about it is that which we focus our attention on and that which we care enough about to take action in the physical plane to accomplish okay so that's what gives birth to the will is the heart care alright so that is where the name Tarot really comes from this goddess Tara has many different incarnations okay in the Egyptian tradition she is Isis or Hathor or not they were cow roots she was called an older Egyptian tradition touts ta - you are Tita roots now in other traditions in the Middle East her name phonetically morphed and became instead of taught works with a URT that we have a reversal and that became taw root with a soft tease down at the end thoth talk to Ruth Tallis hey Ruth is another name associated with this goddess tah Ruth and you can hear the similarity there to our English word truth truth truth truth okay it's just a blending it's the same basic phonetic variant blended so this is why this is called the book of truth it's the book of thoth the book of tara the book of the goddess it's ultimately the book of care all right and that is why it is referred to as the book of life because ultimately if we do not understand the generative principle of care and don't understand life period that's it so with that in mind about the root the phonetic root of where the word Tarot comes from and we will see this goddess in the deck visually depicted in the symbology let's look at the Major Arcana and I'm gonna do one more side before we jump into that and talk about what most people think the Tarot is and what it is not what it is and what it is not where I should say give people a wider understanding of what it is because they seem to think that this is all about fortune-telling okay so I would be remiss if I didn't even just at least cover the concept of fortune-telling or divination as it is called the attempt to predict the future through different reading of different symbols okay divination is one of the uses the uses of the tarot deck however - and you can use it that way and there's nothing wrong with that you know I don't I don't particularly have any problem with Tarot being used that way however I think that this is a lesser usage it can definitely work like that and help us to get in touch with our intuitive capacities to help us understand the direction that things the different courses of events may be headed in our lives or in the world absolutely the symbolism can do that but I think that that is an even lesser goal of the Tarot it is one of the lesser intense for which the Tarot was originally intended to be used another thing we can just briefly touch on is the origin of the tower which I'll get to in a minute but the original uses of the the major use of the Tarot is not for divination or fortune fortune telling it is for getting in touch with the self okay understanding the self better through the interpretation of the allegorical symbols that are contained on the cards and the reason that this was done is because in the past you had to tell it in encoded because you know ruthless barbarian rulers of ancient times would have killed people beheaded them burn them at the stake etc and all kinds of torture put them on the rack for even daring to express this knowledge verbally or in a written form so in order to circumvent their barbaric mindset they would encode the the story that they were actually telling an oral tradition story okay into symbols which as we say that the phrase symbols of a picture is worth a thousand words well the symbols worth a thousand pictures because they're so much contained within these rich tapestry of symbols that you could spend you know oh you know a day discussing just the symbolism of one card let alone the entire deck it is a book it is not just a deck of cards it is literally an entire book you know that you can read into repeatedly and in extreme depth if you are inclined to do so and so that's the original intent of the Tarot that's why it was encoded into imagery and the origin people say okay this is derived only from recent times you know the 14 or 15 or 1600s in Europe there's all kinds of claims to where the tower you know originated and working what the earliest deck is and the tower I'll just say this and you can look into this and research the origin the Tarot is much older than people give it credit for being it is derived from ancient mystery school traditions that date back to the the ancient Middle East and definitely go back into Egypt okay and the was absolutely used in conjunction with the Kabbalistic tradition and I would say it probably predates what we consider the Egyptian civilizations okay I would say this goes right back into ancient antiquity when you know Egypt was referred to as the land of Khem and probably even before that two lost civilizations of which very little recollection let alone records even remain so it is ancient ancient I would say this thousands of years old not hundreds okay and you will see a lot of Egyptian symbolism in the tarot cards kind of giving a you know a nod or a tip of the hat to the Egyptian civilization as being one of the lute lands the motherland's of where this rich symbolic tradition was derived so with that having been said about the usage of the Tarot and the origins of it let's look into the Major Arcana now okay so here we go and we'll start with the fool card card number zero so this is not this is page number two of the PDF document hopefully people who are listening have had a chance to download it I hope the server held up well and provided a decent download speed the document is only about six megabytes that's not too bad I tried to compress it well the images I think still look good if you don't if you view them at less than a hundred percent they they Crispin up a little bit and you know look a little bit sharper okay so this is page number two and this is card number zero of the major arcana this is called the fool okay it isn't a young boy or a young man going off on a quest he has a bag packed on a stick okay he as a flower uns hand he has a dog a white dog at his side and he is stepping off on a cliff okay what this card represents is the journey of the soul the journey of the soul through the physical plane through all of the planes all of the worlds as we talked about in the Kabbalistic tradition okay but it's its journey from the know thing which is where it begins and ends that's why it's card zero the cosmic egg okay this is an archetypal an archetype symbol okay representing infinity okay representing the beginning is the end and the end at the beginning okay it represents no beginning and no end okay they're both joined as one infinity they the unified field the source of all consciousness all right a journey not a destination so the fool is going on this journey because he doesn't know that's why he is taking the journey he is needs experience that's why he's referred to as befool this isn't necessarily a negative connotation this is saying this is the whole journey is done for experience and knowledge itself okay the fool carries very little with him this represents that we can take very little with us into other lives okay but there is some small amount it is what I talked about when we talked about nature versus nurture and how there is very little human nature and we come in with very little specific innate capabilities but we start and of us do and they are held over from other incarnations the flower represents purity a beginning in a pure State and this is what I've talked about we don't come in as homicidal murderers okay we come in in a basically pure state and we are conditioned into the ways that we think through the environmental conditions that are already in place in this world the dog represents the forces of nature that guide the journey of the soul but more specifically it represents the human intuition and the human imagination the guiding forces of the souls journey in life okay and you can already see how powerful the symbolism is in these cards if you're paying any attention taking any of this to heart or taking any of it seriously and scientific types and left-brain types will just say oh it's all nonsense well go right ahead and continue to believe that and let yourself be not understand the the holistic nature of yourself live as half a person in just the left brain never make any connection to the higher consciousness of the right mind ok and let yourself be used as a tool because that's what most people like that are tools for other people with horrible intentions for them and everyone else that just know more about how the psyche and and these forces work and how to manipulate people and that's why morons like that morons like that will go and build atomic weaponry or hydrogen weaponry for psychopaths ok yeah they've got it got you a whole lot you accomplished a lot with just the pure left brain and you can say hey you you're it's harsh the way you're learning it yet it's harsh right I'm not here to make friends with people ok I'm here to explain to people we're heading off a cliff into a ravine and not the one that the fool was headed off because he's going into the abyss 'ip that the the universal pool of consciousness is what he's stepping off into that journey he's not going over into a fiery abyss of pure destruction which is what the human race has headed off into because they won't make that journey that The Fool is making they won't initiate themselves to understand themselves they want to remain in ignorance and think that they can prosper and once again nothing else to say about that except it doesn't work that way why because it doesn't because there are laws in this realm and you're bound by them the end so people will still insist that that's not the case and all I can do is acknowledge that there are idiots out there like that and the word idiot means one who does not know the self that's what the actual etymology of that word it comes down to and that's exactly what people like that are idiots and uh again I'm not here to make friends on the untested bringing this knowledge out into the light of day so the people who do want to study it can study it and I'm going to call that which is the way I see it and you know the left-brained the left-brained and balanced among us are never going to get this they're not going to get this until they suffer enough and the only thing I can do is wish that that suffering comes to them as quickly as possible and as brutally and bluntly as possible so that they can get over it and get on with understanding if not they'll probably choose to uh not learn and die in this life and uh you know not having initiated themselves into this journey and have to do it all over again many many times as many times and it takes because they're never getting out of here without confronting this so the fools journey is into self that's what the fool's journey ultimately is toward a higher understanding of self and higher levels of consciousness the ultimate goal of the fool is to master the self the lower-level self self mastery is what the new Tarot is teaching us ok so I would like people to refer to image number one on the website if they have access to it to to go up there to the radio lesson page and look at image number one for tonight's show which is the microcosmic Tree of Life okay we started talking about this last week and I'm going to proceed in order I'm going to go in actually reverse order okay of the cards I'm going to go from the bottom of this tree to the top of the tree in reverse order of the set they wrote of the Tree of Life The Fool you will see the full card depicted in the space right below the top of the tree which is where the magician card which is card number one in the in the trump cards okay in the Major Arcana cards is positioned now the full card is not positioned as one of the Sethi wrote of The Tree of Life okay it is not one of the separate it is positioned in what is called the realm of dot dot okay da 80 or da a th okay depending on how you know different different schools of Kabbalah spell it transliterated I should say from the Hebrew that is where I am positioning the full card and I am coloring it in white I am putting this outline of this hazy outline of energy if you're looking at this microcosm the Tree of Life card card number one a image number one on the website for the images for tonight on the radio listen Paige okay this white hazy energy represents that this is the realm of the know thing this is the realm of the hidden okay because the soul forces are initially hidden and have to be discovered by us okay and they don't exist in they don't have their origin in the physical world they are not is the realm of hidden knowledge hidden awareness it is what is really considered the root the true root of the tree of life from which the Tree of Life Springs okay so this is the know thing it's non material it's non-physical The Tree of Life comes out of it as an extension of the spiritual realm okay it's the the Stargate leading to these the the realm of pure spirit or pure consciousness pure awareness and that is where we're putting the full card to depict that this card is not one of the ten cards of the microcosmic tree of life itself rather the the soul okay the actual spirit is where this tree comes from all right that's why it's positioned there that's very important to understand and again these are all symbols trying to teach an important thing about the nature of the reality in which we live all right we have to keep that in mind it says in a religion this is just a tapestry of symbols to teach a lesson to teach information about what we are doing here what this realm is and if we're going to change it and make it better what is required of us and we need to receive that knowledge from the higher self okay which is what that realm of dot represents that's what the whole Kabbalistic tradition is the process of receiving that's what the word Kabbalah means okay so start at card number 10 Roman numeral ten at the bottom of the microcosmic tree this is what I gave the deck of the tarot cards to the listening audience to refer to okay so because of the discrepancy of the first two cards the first card in the PDF document being the face card and then the second being the zero card which we just talked about card ten in the major arcana is on page twelve so we're always going to be two pages the page numbers will always be two pages greater than the card okay just keep that in mind alright so if you go to page twelve on the PDF document you will see card number ten the wheel of fortune so the wheel of fortune represents the material plane this represents the physical world it corresponds to as we see an image number one on the microcosmic Tree of Life maku which we talked about last week being the physical world it is the world in which we operate it's the world in which we have to use all of the other forces to make change happen and it is the realm in which we experience suffering that is proportional to the level of ignorance we exist in okay the level I should say of ignorance apathy and laziness / cowardice that we live in to the extent that those qualities are present in us we will experience greater suffering they are inversely proportional as their that's directly proportional okay it is suffering that we experience is inversely proportional but how much intelligence care and will and courage we have okay so as we have more of those we have less suffering as we have less of those we have more suffering okay what is depicted on this card is the wheel of suffering the wheel of as it is called in the Buddhist tradition samsara okay and it is also a reference to us in as to the direction that we need to go if we are to get out of that perpetual cycle of suffering we have to seek Tara okay that's why that word Tarot is on the car we have to seek the truth we have to seek the goddess so to speak okay we have to seek the Sacred Feminine generative force that is hidden in nature an our nature in the heart in order to get out of that realm that cycle of suffering in the physical domain and that's what this Sphinx represents he is um away show ER so to speak okay he has this sword of truth and we have to intuitively recognize that there is a pathway to higher consciousness know that we're not there we're not in it and in the beginning of our initiative initiative yeah in the beginning of our journey as an initiate okay and have a leap of faith that the fool is taking because that's what that is it's not a suicide it's a leap of faith that there is such a thing as truth and that we can understand it and that is what will help us to get out of identification with the purely physical and material we see around the outside of the card the angels of the corners as is referred to the bull represents Taurus they because these are constellations on the zodiac this is the great cross and we see the two crosses depicted in the middle of the wheel of fortune now what I'm realizing here is that this is all of the symbolism which i think is very important is probably going to take a little bit longer to describe we will probably go into a second week on Tarot hopefully I can wrap up the microcosmic tree tonight and then next week we'll look at the macro cosmic tree I think this is very important and it really will begin to take the listeners mind into understanding symbolism and and realizing how rich symbolism really is that it is a language in and of itself and that we have to become versed in this symbolism we have to become symbol literate hey it's an entire language that we need to learn because the dominators the dark occultists of this world are always using the symbolism all around us they're using it and they're using it to subvert human consciousness so that they can continue to get away with what they've been getting away with and we need to learn this language if we're going to really truly be able to break out of their mind manipulation so this is why I'm doing this now there's a reason there's always a method to the madness on this show okay I'm doing this in a very specific linear progression that is set up in kind of a left brained way because the mind has to be taken out of its conditioning in a very specific way because if you don't establish building blocks and you start talking about something here way down the road and the the foundational principles have not been established early on somebody just listening is gonna say what are you talking about you know that's why it's important to listen to the podcasts of this show in order so new listeners may you know find themselves at a disadvantage you know maybe they can grasp some of it you know there they familiarize themselves with some of these terms and and concepts in their own readings or in their own life through different forms of media however a brand new beginner you know probably would want to go and listen to the early podcasts and you know take the journey from the beginning up to this point but I'm doing this so that we can get a richer understanding and appreciation of how symbolism works and how it is used so that when we go into the symbolism section that will be easier for the listener to to grasp also I will be really breaking out a lot of occult symbolism in the symbolism section and that's why I'm doing this now to basically familiarize the listeners with a lot of occult symbolism so that will be easier to to grasp when we get to that section okay so back to the wheel of fortune card okay we have the angels of the corners this is all these are also the Gospel writers Matthew Mark Luke and John these are the four Archangels Michael Raphael Aria and Uriel okay these are the four elements earth air water and fire okay on and on the four seasons spring summer fall and winter okay so Taurus is earth okay it is the spring season the midpoint of spring the middle house of spring in their zodiac all right the lion represents Leo this is fire okay so this is the midpoint of summer okay the Eagle represents Scorpio Aquila the ego constellation is in near the constellation of Scorpio so this is fall and this is water okay and the angel represents Aquarius the water bringer and this is the midpoint of winter okay so this is air so again this is how they relate to the form Minor Arcana decks Taurus would be Pentacles Leo would be once the the Eagle would be cups and the angel would be swords hearing the intro music for this break we'll be right back on what on earth is happening I'm your host mark hey Bob how are you mark how about you I'm doing well all congratulations on your standing-room-only presentation out in Philadelphia everything I needed to know I learned by watching The Wizard of Oz mark cast airbrakes be a coke icon Wizard of Oz down I wish I could have been there Wow mark yeah it went pretty well I'm gonna I'll give this presentation on the air soon shortly I'll give it so uh maybe uh maybe even um you know in two weeks maybe we can wrap up the Tarot tradition next week and then I can give that presentation in a couple of weeks right here on here thank you mark Debbie wonderful I'm gonna hurry up and get out of everything you can finish I just wanted to shout out congratulations you knew I was going to be a success and it was putting it out there it's pretty advanced thank you for chittering exhibit I'm waiting impatiently as it appears dig for the free your mind concert three men will be there Jeanette deserves all kind of a it's going to be a good one Freeman got back to me a few days ago and let me know that he would be available and we're gonna bring Freeman in to speak and he's going to have a presentation that will knock everybody out wonderful I don't forget guys Bob Tuscon will be there that's right as a matter of fact as a matter of fact Bob as a sidenote at them at the free your mind fundraiser the other day a gentleman I don't know if he wants me to mention his name on aerosol keep'em anonymous but he's a friend of mine he came and sponsored you with a check as a speaker he gave us a check that covers your travel expenses and so we know that we have the money set aside for you boy one foot one person I don't believe that you do know he works through another group that I work with in this area and you know like I said I'd rather not say things I don't know whether he wants me to acknowledge his name but I'll introduce you to him at the at the show and let me know that he made that possible donation either and that just really makes my night so thank you so much I'm I'm glad to be there I am nobody I'm just somebody out there trying to break free from the chains of mind control that are so prevalent today in this world and I see my family my brothers and sisters out there you know deep in this stuff and I just hope to wake them up and covered the the roots of how I see this mind control and and at the conference for your mind conference what it what a better place to do it I'm honored that Siemens gonna be there a lot of great speakers a marked a CEO of course left not to have performance as usual and just really looking forward to that will be in April folk so don't miss that yes hey ed mark one last thing sure I Bob Cincinnati scheduled to be I join us all right awesome looking forward to meeting them in person like I told Bob off the air some high water or whatnot I'm gonna be there my family's already prepared for that Sarah I'm looking for the meeting both the gentlemen knowledgeably futures and thank you choosing anonymous donor out there who sponsored Bob trust in present at the four-year mine concert you are a hero this is going to be great I feel a lot of energy building this process I was able to plug the freedom on conference on a radio show ESP my assistant on blog talk radio so I am excited and it's just going to be great great I'm glad people are really looking forward to it it has been a difficult journey and putting this together and I have you know kind of had ups and downs emotionally about it it seems like as it's coming a little bit closer things are where more things are working out for the better in relation to it so hopefully that will continue we're going to have a organizers meeting coming up next week for it and you know hopefully we can pull together the last remaining pull together the last remaining resources that we need to make this a real success again I you know implore people if you can if you can you know reach out and help make a donation it would be extremely appreciated I mean you know I don't want to ask anybody be able to do things beyond their capability of course you know they have to basically take care of themselves and their families first and foremost but if you are in a position and you support the goals of this conference we could use donations to help bring in some of the other speakers so I have to you know ask a they say ask and you shall receive I've put it out there and not there it is so Bob I want to thank you for calling in always a pleasure to hear from you Bob from Cincinnati well and I'll definitely be seeing you out in uh in philia in April and um thanks for all that you do too and helping to uh you know promote our efforts that's my pleasure mark if you get a chance maybe share the address business you're on the treadmill show where they can send cash or perhaps check or money order made out to cash the freedom on process for a coffin and just one last name mark and I'm sorry interrupting the Trump impression is so important to this alchemical transformation and you know you're trying to gather so many important said of the 22 weeks that we've been on the air and this is exciting for a lot of us the protective the one thing you called it the Fifth Element and how these dark occultist have laughed at us unknowing out here with their moody title v elements a loss of nipple officers or the philosophers seven the original harry potter books the rest of the villages called Harry Potter and the Philosopher's Stone right there in America they gave us Harry Potter and the Sorcerer's Stone right I talked about this extensively in my Wizard of Oz presentation Bob because I make reference to the philosopher's stone in that presentation and I talked about how they remained that book in the United States to the Sorcerer's Stone yeah you're sharing knowledge and then you talk about Terra equaling the truth compare the generative principles that goddess and what you and then I hear that I hear the president standing at the podium in his war on terror that's right I want one day that you can share your knowledge about the process with seven processing of the alchemical transformation yes yes tonight thank you Mark good night gentlemen good night Bob and I I have those processes in my Wizard of Oz presentation and so we can look at that when I give that presentation on the air I actually went with a three-fold process which was the original process which had been added on to and created a Sevenfold and even a 12 fold process in some alchemical traditions the oldest of which I believe in my studies was a three-step process similar to the three stages of Freemasonry etc and the threefold aspect of consciousness so in my Wizard of Oz presentation I do actually break down the alchemical processes in the threefold stage which is the oldest alchemical tradition so when when I give that present on the air I'll be given that information so Bob always a pleasure and always great questions and comments and a pleasure to hear from you Bob Tuscon if we have any more callers just put them through just jump in and put put them on because I love my taking calls and you know callers will come first if I see any calls on the talk shoe board I will go right to you but be patient if I don't see right away hold on the line and I will get to I'll give the call in numbers again for the last 35 minutes if anybody wants to call in feel free to do so no taboo topics talk about anything you like here on the show the calling numbers seven two four four four four seven four four four if you call that number seven twenty four triple four seven triple for the call ID number that you let me ask for is eight three five one five that's eight three five one five you could call the alternative call in line on the blog talk Network at six four six seven two seven three three eight seven once again six four six seven two seven three three eight seven we were talking about the angels of the corners we kind of wrapped up that section which is the Wheel of Fortune card just the important thing to keep in mind with this card it is that represents the physical plane it represents the the soul journey into the state of incarnation or being born into the physical world and the it alludes to the pathway out of it being through the keeper of truth which is represented there by the Sphinx one of the keepers of the the halls of knowledge the halls of Records so to speak as symbolized in ancient Egypt now on the wheel itself you will see the name tarot written as a circle ta ro and then back to the original T okay now again this is there's many things in here okay hidden things hidden little gems you'll see the four Hebrew characters yo hey Bob hey which is the Tetragrammaton we talked about that last week in the Kabbalistic tradition these are references to the four worlds of Kabbalah these are references to the four elements of nature he's a represent representative of the name of God in Hebrew which is transliterated as YHVH Yahweh or Jehovah we see the two crosses okay the two crosses representing the solar cross or what is known as the cross of the solar system or the cross of st. George the straight up and down cross like a plus sign and then we see the the greater cross representing the cross of the galaxy okay which is a reference to these quote angels or constellations of the four corners of the zodiac and that is called that x-shaped cross is called the cross of st. Andrew okay so I will break down the word Tarot on this wheel in just a moment but I see we have a caller on the line so here we go whisper in wind caller you are on what on earth is happening what do you have for us today yeah he said that the the imagery and the a deck of cards was used to find oneself I think basically you said now would that include necromancing your ancestors and your descendants to find yourself there well I would say that this is one of the usages that some people in some traditions that study Tarot may use it for to get in touch with what we consider the spiritual world or the the realm of the Hereafter this is not one of its original intended usages as I believe divination itself is not this is something that again I think that the intuitive capacities these cards in studying the symbolism can put you into touch with can help to bring out in us okay but I don't think that it's one of the high of usages of these cards a cultists who are serious students of the self serious students of the human psyche use these cards for the story that they tell in their rich symbolism for the archetypal imagery and symbology that is contained in the cards rather than for pure divination but I would say that they can be used for those purposes that would be my answer to your question is that answer your question yeah I would just say that how could one find one's self if they did not find their ancestors because they are nothing without them and they are nothing without them you know what I mean sure and these cards come from our ancestors and they really do tell a rich tradition of where we came from you know if you really delve down deep into them that they're telling us that this is the study of the ancient past as well I think one of the main ways that we are controlled is by being cut off from our origins if you cut away people from their origins you are in absolute position to control to wield control over them so that's the reason a weapon to forget your ancestors the kings of the earth know who their ancestors are that's what they want want you to forget yours if you get a vision with Mother Mary they're gonna call that a miracle but if you talk with your ancestors they're gonna call you a witch right wise one isn't it I agree I agree and you bring up a good point so I want to thank you for calling in a great point so yeah there are a multitude of uses for the Tarot I'm I am basically attempting to explain what I consider to be the richest use of them but it is not the only one so that caller raises a good point and he raises a great point about the the really important idea of connection to our ancestry and of human origins which if that can be controlled and cut off from us it's a piece of cake to basically wield influence and control over other people if they don't know where they've come from not knowing where you've come from means ultimately you don't know where you're going and sadly that's the case for too many of us so Thank You caller great point anyone else if anyone else calls in Bob just throw them right on and you know break in on top of me and I will monitor the blonde talk the talk shoe line so um continuing on this Wheel of Fortune card there is the word tarot ta ro okay now if we look at the other arrangements of the letters on this wheel okay we can see that there is something in it there is a hidden a full sentence not only just words in other languages in it but there is a full sentence okay so the first word that is hidden in this arrangement of letters is rota ro ta which is Latin for wheel wheel okay and we see a depiction of the wheel on this card as we've already referred to so Rotom means wheel okay so the word taro is in there itself so the wheel of taro okay what other words were arrangements of words are in here okay we see the word tio RA which is a Hebrew reference a transliteration of Torah Torah means law okay it's a reference to the first five books of the Bible Genesis Exodus Leviticus numbers and Deuteronomy okay so this is the Torah and what is considered the law in the Judaic tradition okay another word for Torah another concept that it is connected to is the truth itself okay and again then the goddess was considered the goddess of truth justice and natural law and her name is a main reference to with ta ro Tarot which is where the word Tara was derived from okay but also her name is hidden in a tea Oh our op tour okay so if we have a hard breath mark at the beginning we get hot or hot for Hathor Hathor is a name of the goddess in the Egyptian tradition Hathor is the goddess of love and care okay so we have another name for the goddess getting in this arrangement of letters okay we see the word if we go in the counterclockwise direction a couple of words appear one of them is a tour ato are and this is a Latin verb that means cultivate okay cultivate or generate essentially okay and we saw this is about the generative principle the cultivation of care okay another word in Latin that we derive from this arrangement of letters and all of these are in order these letters we're not going even across to other letters we're going in order along the outside of the wheel okay Oh RA t means it speaks he she or it speaks where we get the word or at or from a speaker okay so if we put all of these together right we can come up with a sentence that is what the Tarot is actually all about okay wheel ro ta Tarot ta ro the wheel of the Tarot okay ATO are I'm sorry aro TR wrote is our wrote is cultivates our roads okay the wheel of the Tarot cultivates okay or it is it acts as a generator okay then we could say Oh rocks Oh r18 it speaks right tío are a Torah the law right ATO are Hathor of hathor so the wheel of the Tarot cultivates it speaks the law of hathor the goddess that this is an entire sentence arranged within those four letters telling you what the Tarot is okay connection that is a circular a cyclical connection representing the self that is acts as a connection to the generative principle okay a wheel that is a cultivating wheel and what it ultimately helps us to do is understand the law of nature of the goddess it speaks the law of hathor that in and of itself to be able to do that with four letters is amazing okay and I'll put a breakdown of that in a slide on the site with the podcast I hope people are looking at some of the images that I post with the podcast as you can go back and download them and listen to these because they help to understand some of these concepts even better there's another break coming up I'll be right back folks we're back on what on earth is happening let's move to the next tarot card upward on the Kabbalistic Tree of Life I'm not the microcosmic Tree of Life if you're referring to image number one on the site we are going to now move up to card number to page number 11 on the PDF document and this is card number nine okay card number nine and it's called the Hermit the Hermit is the initiate who begins to leave the purely physical identified state of consciousness he knows that he has been dwelling in darkness and illusion and therefore he sets out as well on a journey the truth with a lamp of knowledge and inside you'll see the six pointed blazing star represent representing the Seal of Solomon which we've extensively talked about on this show in the past as the balance between the left and right brain hemispheres okay and that is what the Hermit seeks he knows that he is in a state of spiritual darkness and once light that's why he wears a darker robe okay he is not his robes are not pure they're not white they're gray okay dark or gray okay this is a connection to look at Gandalf the gray wizard in in Lord of the Rings who then becomes the white wizard through his process of self purification after he does battle with his internal demon which is the bowel Rock in Lord of the Rings this demon of smoke and fire okay after doing battle with him and conquering him which represents the darker aspects of the self he then emerges as the white wizard in the later parts of the the trilogy so the Hermit is the initiate okay he is the one who realizes he has a lot to learn and he is in darkness but wants to receive okay so this is associated with the desire center this is the sacrum chakra like the Wheel of Fortune card represents mile coupe or the base chakra you can refer to image number three for a correlation between the Tree of Life the cephalotes or the emanations along the tree of life on the Tree of Life symbol and the chakras of the body okay so this would be the desire chakra or what is referred to as the the sacrum chakra in the Vedic tradition okay it's called the swadisthana chakra okay so that is the sphere of yes sewed on The Tree of Life okay that is Foundation he is establishing a foundation through his desire to learn he is beginning to route himself in higher levels of awareness he is now out of Ostia and this is the first set wrote in the world called yet Zira the realm of formation okay moving upwards to the big cards that are colored yellow okay this is a dualistic chakra or a dualistic emanation along the Tree of Life because we have to look at these all in conjunction in reference to the Middle Pillar okay so this is a two-fold aspect of the will Center okay the the root chakra connects us with the physical plane the sacrum chakra representing yes Oh d'Or the Hermit okay if the desire center of wanting to improve ourselves wanting to gain more spiritual knowledge and then we have to apply will okay of course will has to be tempered by tear this is why the heart chakra is even above that but the yellow two yellow cards represent the two dual the dual nature of the will okay and this is an internal manifestation and an external one okay so the internal manifestation is the card to the left there on the pillar of severity and it is called strength this is associated with the Sephirah known as hold okay which we talked about last week can always go back to the podcast and refer to these and the images and books tons of information to cross correlate all of these okay but what that card represents is courage okay so this is an internal quality the strength to overcome fear that is within all right and that is card number eight card number eight you'll see a woman with a lion and she has an infinity symbol over her head meaning that she is kind of coordinated as an illuminant one who note does know the self okay she is holding the jaws of a lion close with her bare hands now that's a symbol for courage right there okay but it's a symbol that she is conquering her fears they she is conquering her internal fears all right so courage the strength card the sphere of hold on the tree on the left-hand pillar severity of severity okay the next card is chef he wrote cetera number seven on the Tree of Life and this would be associated with card number seven okay it's called the chariot and here we see as the secondary aspect of the plane of will okay of the the aspect of will this is the solar plexus chakra in the Vedic chakra system okay it's called the monitory chakra alright this is this card the chariot represents willpower to act in the world so we have internal courage and external willpower okay to actually get something done all right using the will that exists within us to get something done in the external world in the physical world that's why he is the chariot driver and the charioteer okay he uses the two forces okay the meta feminine force of care and the masculine force of actually action actually acting in the world okay represented by these two sphinxes okay the the Sacred Feminine is the dark one and the sacred masculine is the white one okay to actually take action in the world that's why he's holding a wand representing action and the suit of Wands okay and he is also crowned as an illuminant as you will see this theme repeated over and over again it's showing you this is one of the paths to illumination to what is really meant as enlightenment acting in the proper moral way that's what this card represents that's why it is on the pillar of action or the teller of mercy the right hand path of the Kabbalistic Tree of Life okay so again we could spend a whole show on each card I I want to move forward because we only have a few moments left and we'll continue this next week but I'm going to move a little bit faster card number six as we move up to the green or the middle of the Tree of Life the very hub which is the representative of the heart chakra or the anahatha chakra okay this is the lovers card of course because this is about lung this is about true care once again we see the twin forces of male and female represented by Adam and Eve and they are brought together by higher consciousness or an archangel I believe that would be the representative of we represent the Archangel Michael if I'm not mistaken and it's just basically saying higher forces is what that angel represents okay and that's what love puts us into touch with that's what true care puts us into touch with all right so the lovers card associated with the heart chakra okay on the Tree of Life that would be the sphere of Tiffa rent which means beauty and I neglected to mention the sphere called net saw is what we would associate the chariot with okay but TIF eret on the Tree of Life corresponds to the lovers card going forward to Sapphira number five this is the heirophant okay some Becks call this card simply the Pope okay the heirophant represents the aspects that we exercise within ourself for self-control Dominion as I've called it bringing the thoughts emotions and actions into harmony or unison in an act of our will so controlling our own thoughts emotions and actions the only thing we're really allowed to control that's the Hierophant card what he all ultimately represents and you will see that he is crowned sovereign okay and you'll see this over and over again all right he holds also a form of a wand because this is about a form of control but it is the kind of control that we do have a right to exercise because it is taking control over the kingdom of self and that's why this is called severity or Deborah on the Tree of Life and this card is blue is associated with the throat chakra or the destroyed of chakra okay so heirophant internal self control self Dominion okay and it also represents maintaining control over your own your own words and what you are doing with your word since an associative the throat chakra okay so it is about what do you use your voice energy to speak into creation what are you putting out there are you speaking the truth okay that's what this card is all about all right now well the next card card number four in the Major Arcana is the Emperor and this would be associated also with the throat chakra as this is another dualistic rung on the Tree of Life okay and this card would be associated with the sphere called has said which is mercy okay on the the pillar of Mercy the right hand pillar on the Tree of Life and the Emperor represents influencing others being an influence in the world okay through what you know what you care about and what you do how does your life inspire and influence other people are you an example like a good king okay setting an example for others on how and live and what to spend your time doing and what to spend your the resources that you have on and what to do with your mind etc and how to use your voice okay so this is the external influence that we exercise upon others around us in whatever way all right the Emperor again he also has a form of a wand and he has a globe representing the earth and what this really represents is that our actions go beyond us and influence the world all right he is also crowned as Emperor okay associated with Aries as well the RAM a fire sign okay it's on the active pillar so that is the emperor card and that is that that completes the throat chakra the two aspects of the throat chakra internal so control and then influence of others okay how we speak to ourselves to help ourselves move forward in consciousness and how we speak to others to influence them and you know then you use that in the capacity of truth these that to really make a contribution and to leave the world better than we found it going up to card number three the Empress card okay clearly we see that this is associated with the goddess as in the next card upward we have the heart and the symbol of Venus itself the planetary symbol for Venus clearly this is the symbol for Venus again crowned with stars because it's one of the planets again connected with the stellar cult the the astra theological cult of stars and planets as we talked about in past weeks this card is connected with the cetera called Dena Dena means understanding okay so this is simply and again this is these two chakras these two cards in purple here are associated with the third eye chakra which is the chakra so the Ozma chakra is the Empress and the High Priestess which represents the goddess this is you know about the realm of knowledge because we're at the third level of the Tree of Life and again the Empress in being a correspondence to the Sephiroth Dena is simply what we know okay it's an internal quality that's why it's on the pillar of severity going up to card number four here we see the goddess in the middle of the Temple of Solomon these three Masonic pillars of Shekinah and Boas okay also representing the tribes of Benjamin and Judah okay with the moon because she is the moon goddess the cross on her chest representing the heart chakra and also the giving birth to the son Savior on the cross of the zodiac Torah written on the on the book she's holding because she is the goddess of truth and law okay as she is connected with marks the Tree of Life is behind her you'll notice and it's a depicted as pomegranates and if you checked out the page on my podcast section for last week I posted a book called a garden of pomegranates by the occultist Israel regarding which talks about the Tree of Life and Kabbalah in general rich symbolism all over the card um this is the goddess of truth this is Torah herself okay depicted in the deck and she represents the sphere on the tree called Hoch ma oak ma is wisdom because of course she is the logos Sophia the word of wisdom itself okay wisdom is what we do with what we know so this is the active quality finally the magician represents self-mastery and Messrs all the forces of nature and the lower elements of the material world any wield the wand of power which connects us to the spirit ladies and gentlemen that's all we have time for this week on what on earth is happening I'll be getting to more symbolism of the Tarot coming up next week we'll look at them macrocosmic tree I'll wrap up the magician card a little bit but we'll see you next Tuesday night right here on one earth is happening on the Intel hub news network I'm your host mark passio thank you very much everyone for listening great callers we'll see you here next week good night

What On Earth Is Happening Show #044

Topics: *Tarot, Symbolism, Occultism, Major Arcana, Microcosmic Tree, Macrocosmic Tree, Natural Law, Tarot's Connection To Kabbalah*

let's jump right into the topic and again I encourage people to call in I'd like to take calls and there are no taboo topics here so calling and bring up whatever you like last week we left off discussing what is called the microcosmic tree of life again taro and Cabala must be studied in conjunction with each other they are complementary occult Sciences and what both of these traditions really are all about is understanding the self better I posted some videos on the podcast for Kabbalah and last week I posted some additional ones about Tarot and they both attempt to explain that these traditions ultimately are about knowing oneself better they are about understanding the forces that are at work within the human psyche and the symbolism is all really geared toward that goal help one go within help one understand that which is at work within oneself the better we know ourselves the more we are in tune with really the forces of nature and the less we are able to be manipulated externally by those who do understand human psyche and seek to twist and manipulate that knowledge and use it for their own selfish aims and agenda and they can only wield that knowledge as a weapon if they are doing that against ignorant people against people who are ignorant of self so this tradition is an allegorical and a symbolic one that needs to be understood as such in order to really hammer that message home and to open up one's mind to the understanding of these rich symbols they are very complex and multifaceted and need to be contemplated upon in order to be understood so with that having been said I want to direct everybody up to my website - either the podcast section or you can go right to the radio page by clicking the listen live button on the left hand side of the site and there you will see some images for tonight's show if you do that on the radio page if you go to the radio listen page underneath the player you'll see a link for five images and you can click those and bring up these images to follow along with some of the concepts I'll be talking about tonight increasingly on the show I will be relying on putting up some imagery along with each show so that people can follow along because we're really going to be getting into symbolism much more this is why I chose this this break we were discussing methodologies of mind control but I chose to put a break in into that and instead break down these two occult traditions as sort of an initiation into a higher awareness about the occult and its symbols because this will act as a prerequisite for the later section which we are going to get into in a couple of weeks when we talk about subversive symbolism as our thirteenth method of mind control a technique of mind control that being the language of symbolism used subversively against the human consciousness after we break down symbolism we will have all the necessary tools to understand the occult aspects of one of the most vile attacks and examples of false flag terrorism ever to take place in this country or in the world for that matter the events of 9/11 2001 which we will be breaking down in the future on this show when we talk about the 14th and final methodology of mind control that I'll be analyzing called chaos sorcery which is my term for the basic very dark usage of the Hegelian dialectic or what other researchers have termed problem reaction solution term I believe coined by the researcher David Icke I call it chaos sorcery because I believe that is more akin to what it really is all about because it is driven by a cultists who understand the mechanisms of fear and these are cultists employ this technique to great success and again this all of the breakdown of this symbolism and the symbolism that I'll be breaking down in the next section is a prelude to understanding that event as a dark occult ritual that can sound far-fetched to some individuals based on where their consciousness is right now but that's what this show is all about it's about putting building blocks together to help people to understand the tapestry that exists and help them to understand events that are playing out in a higher light of consciousness and reason so with that being said what I want to start with is if we look at image number one on the site or on the podcast from last week which whichever section you happen to be referring to on my website you will see the image of what is called the microcosmic Tree of Life of the Tarot this is a card arrangement that is created by the first eleven cards of the Major Arcana of the Tarot this is one of the five sub decks of the Tarot the Major Arcana the word Arcana again simply means knowledge so this is the higher knowledge of the tarot deck because it explains the forces that are existing within the individual unit of consciousness or the in other words the individual person or being okay what is called in occult different occult traditions the Monad the one okay the one unique droplet of consciousness within the ocean okay so in other words this is the very small or the microcosm that is a reflection of the very large or the macrocosm which are the universal natural law forces at work in nature and today that's what we'll be largely breaking down the macrocosmic Tree of Life of the Tarot's major arcana which is the second half of the major our Canada the second eleven the second group grouping of 11 cards because there are 22 cards of the major arcana sub deck okay so we'll be looking at the the second half of the Major Arcana cards tonight in depth before we do that and again this this macrocosmic Tree of Life is represented in image number two okay so that's largely what we will be referring to I also posted three other complimentary images to understand some of the symbolism and some of the concepts that we'll be breaking down and those are images three four and five on the site okay for tonight's show now one of them explains or visually depicts I should say how the Kabbalistic Tree of Life is a direct corollary it is an allegorical and symbolic corollary for the chakras of the body the energy centers that exist along the spinal column that are associated with glandular activity that basically regulates consciousness within the body okay so these seven chakras which is and this is from a Vedic tradition chakra simply means spinning wheel or vortices vortex okay this tradition is a an ancient tradition thousands of year that comes down to us from thousands of years ago through the region of the world known as the Indus Valley this is where India is now okay so it's an ancient occult tradition spiritual tradition and it relates to the Kabbalistic tradition now as we have seen in previous weeks I won't go into a full review of that but as we will also see again tonight when we break down the macrocosm The Tree of Life of the Tarot the fourth image represents the connections between Kabbalah and Tarot and the four worlds of Kabbalah as they relate to the four subjects of the Minor Arcana of the Tarot I hear the intro music for this first break so we'll get back to that right after these messages I'm your host Marc Paz you you're listening - what on earth is happening on the Intel Hub news network we'll be right back folks [Music] [Music] ok ladies and gentlemen we are back on what on earth is happening on your host mark passio I was told during the break that we have a caller on line Cathy you can put her through on the line yeah people a lot of people don't understand that symbols also have dual meanings and they're hung up on one interpretation of them and and often it's a negative a very negative interpretation of the symbol and a lot of people don't understand that very same symbol can have a positive interpretation as well sure you could send any information you have to mark at what on earth is happening calm mark great I appreciate it you too thank you Cathy great ok so anybody else wants to call in you go to the top of the list I tell Bob just basically put the callers through and let me know and you know don't get priority so back to the breakdown of some of the symbolism of the Tarot and hopefully we can do this effectively enough that we see how powerful some of this could have on our understanding of ourselves and the forces that are at work in nature what I want to start with is image number one okay actually before I do that I was just wrapping up the the breakdown of some of the images that are up on the website but uh image four and five image four is a very simple chart it shows the Kabbalistic Tree of Life and how the Minor Arcana cards which we talked about is the other four subjects of the whole tarot deck how they relate to what were called before worlds of the Kabbalistic tradition and we broke those down a few weeks back those were Ostia which is the physical world yet Zera which is the mental plane briea or the emotional aspects and then obsolete which we call the plane of will or the spiritual or our type of plane so those correspond that of course to the elements that those being earth air water and fire respectively and they correspondent to the four subjects known as the Minor Arcana decks and the material or resources the material world or resources that we have to work with or our talents and abilities correspond to earth which that was the coins or Pentacles sub deck of the Minor Arcana the suit of swords corresponding to air okay the air element which is about the intellectual capacities that we have the suit of cups corresponds to the element of water okay this is our emotional makeup and then of course the suit of Wands corresponding to the element of fire because that's our actions that's what we actually do in the physical world the actions that we take based upon what we know and how we feel and the resources that we have and the talents that we have in a physical world so that is also broken down according to what most researchers would call the power that is inherent in suits or in these subjects because the least powerful thing is simply the material substance or the resources we have to work with we often attribute that to the most important things but these are actually the that's actually the lowest in power our intellect would be the next most powerful thing as we go up this ladder okay then the emotions which guide the intellect have you know the next even more power allotted to them and then finally ultimately it's all really about the kind of actions we take what we actually do with our emotions which ultimately govern the ways that we think and the ways that we use our resources that we have at our disposal so the most important of these four principles and represented by the alchemical element of fire is our actions and that would be the suit of Wands in the myth in the Minor Arcana so that's an image that you could take a look at that's image number four there and we also you know related these worlds to the hebrew name of God which is the Tetragrammaton the four-letter name for God which is Yoda hey Bob hey starting from the top there the old character and then got moving downward yo hey Bob hey and this if we transliterate into the English language is transliterated as YHVH which comes down to us in the English pronunciation as Yahweh or Jehovah again names for God in the Judaic tradition so that's image number four image number five is a work up that I did based on the Wheel of Fortune card which we broke down pretty extensively last week and we talked about the hidden words that are comprised of the four letters that spell out the word Tarot ta are and if we complete the circle the back to the TTA are ot so I just showed there all of the words and where they're at Amala G's come from their actual root language well you know all the different words that can made from those three letters in in order okay in different orders and what that actually says to us in the contemplation of this particular card which is all about what the Tarot is it is the Wheel of Fortune okay it is the wheel of truth as I've turned it in this in this slide so the word wrote ah is there which means wheel and that comes from Latin the word rota means we live in Latin Tarot itself is a truncation of Tarot ta ro t a derivation of that word the word I wrote in Latin comes from the verb ro ro RA which means to cultivate or to grow Oh righto ra t means to speak from Latin or o or RA okay tora teo ra it comes from the Hebrew which means law the Torah are the first five books of the Bible in the Judaic tradition and finally after is a variant of hathor which is the egyptian goddess of love so putting all of these words together a sentence actually comes out of these different variants of these four letters and we we get the sentence the wheel of tarot cultivates it speaks the law of hathor or in a different translation of that we can simply say the wheel of Tarot brings order by telling us the law of love that's what this tradition actually is all about it is helping us to understand the forces at work around us that I have called and many other people throughout history who have studied these principles have called natural law and our relationship to these governing forces okay so we've looked at the monad or the individual unit of consciousness last week in the microcosmic Tree of Life now what I want to do before we get into the macroscopic or the universal forces is I want to briefly recap two of the cards from last week that I don't feel I went into enough depth on and that is the high priestess and the magician okay cards two and one in the deck now on the site underneath the images you'll see a related document okay and this is a PDF document I think it's about six megabytes you can download it from my site and it's just it's every card in the Tarot and I use of the universal wait deck originally designed by Arthur Edmund weight and this deck is a you know a basic deck it doesn't get into super esoteric symbolism it shows all of the critical symbolism of the Tarot I think it's a solid deck to use to understand the symbolism of the Tarot and I like the richness of the colors of the cards which is why I chose it to put up there there are so many different Tarot decks out there but this one is good for a beginner just studying the tradition I think my favorite deck happens to be just as an aside my absolute favorite deck happens to be the golden dawn magical deck and I was just lucky enough to be able to pick up a copy of this deck it's out of print and a lot of people who have this deck won a lot for it but the the symbolism emetic is very rich the colors are super vibrant and it has a lot of different attributions to astrology the Hebrew letters of the Hebrew alphabet the alchemical symbols embedded on the corners of the major arcana and it's just one of my favorite decks but I uploaded this deck because I think it's ultimately simpler it's better for beginners who are just looking into the Tarot and I'm like it better than the standard writer way Dec which is the one most people will be familiar with simply because I think the recoloring of this deck is just much more vibrant and the the colors jump out at you so that document is there all 78 cards are listed on the pages of the PDF and you can download that on my website so the the card number two of the major arcana the high priestess this is who the Tarot is essentially dedicated to again we looked at the name Terra and its different derivations coming down to us through different goddess traditions over the centuries and that's what this book is ultimately and the Tarot is a book okay because it's many many concepts encoded into it which you can discuss at length so that's technically a book of symbols okay they're encoding tons and tons of concepts into this rich symbolism we said a picture is worth a thousand words a symbol is worth a thousand pictures and a series of symbols are coming down into this encoded tradition that we call the Tarot is worth millions of words okay so when we look at the symbolism of the goddess this is what we be carol is named after this isn't our the goddess our Sultan and I hear the this music playing we've been having this problem but now I'm not the only visitor coming from when you see it Bob [Music] no we're not up to a great error at least I don't think our [Music] okay there we go it's about so that that actually has been happening I don't know if that's a problem with some computer on the network but that is chimed in over some you know I'm thinking in is mark yes every time I open the Skype call and a hold if I go to another spat call I pick maybe because I'm logged in I'm still on the switchboard both because I've logged in and I put it on hold somehow it's just that music on and I'll probably see if that if I don't well let's test a real quick yeah that might be in a setting though there might be a setting somewhere in Skype if you go into your control panel I had something to do with you think it have to do with my skype it's possible I'm not really certain I I don't I haven't used the feature like that in Skype but it is possible real quick come answer comes on okay let's see yep yeah Mon yes it did so that's that's what it is Oh a very all right well we identified it anyway I'm well note that interruption from now on no problem Bob I appreciate it thank you okay so going back to the the High Priestess card this is card number two on the a Major Arcana of the deck and if you look at the card of the High Priestess you will see that this goddess figure who represents hath or or Isis or Semiramis or any of the or Mary or any of the myriad of other names Diana you go on and on Aphrodite you know Ishtar in different traditions that this goddess was revered what she ultimately represents is the forces of natural law and she represents truth itself okay and she sits enshrined and veiled between these two pillars and we talked about these pillars as being symbolic and many different occult traditions of course we understand that they are the pillars of severity and mercy in the Kabbalistic tradition in the tradition of Freemasonry there are the pillars of Boaz and Jachin okay so again they are listed there oh they are labeled there I should say with the B and the J as the the pillars of Freemasonry often are this also represents the two tribes of Benjamin and Judah in a in a Judaic tradition and ancient Hebrew tribute traditions so she is holding the Torah which is the book of law okay this is natural law upon her chest in what would be her heart chakra is the cross okay this is showing that she bears into existence the the Savior okay the son liked okay that comes out of the void which the goddess often represented and we talked about this extensively when I went into the breakdown of different astra theological traditions okay so you can go back and refer to that in the section about religion and Astro theology which was several podcasts back all these topics are listed on the podcast page you see that she is associated with the Moon the crescent moon is at her feet the flowing dark robes again always a symbol that is given to the goddess because she is the goddess of the night sky okay we see that she is crowned again the Queen of Heaven okay the the the lunar goddess the moon the Dove we talked about the moon being a symbol depicted by the Dove in ancient occult traditions because it is the white dove that that crosses the sky that makes the journey across the night sky again this is a symbol not to be taken literally as a dove okay the Kabbalistic tree can clearly be seen behind her upon the veil she sits within the temple and this is the Tecna symbolic Temple of Solomon again this is a no actual building as many people insist that it is okay it is a symbolic building that is about our brain and the makeup of the human psyche okay it is the left brain the pillar of drops represents the left brain hemisphere the logical male solar brain the pillar of bolas or the dark pillar okay represents the right brain hemisphere the lunar forces it represents the the yin energy again the color of jocking would correspond to the yang energy this is the male dual aspect of consciousness we need to bridge these two and bring them together into a synthesis if we are going to arrive at harmony with truth or natural law which is with what this goddess represents symbolically okay so again and the veil is there because it is telling you this isn't something you see readily it is something that needs to be penetrated it is something that needs to be do you need to go within to discover because the temple represents the self the higher self and you don't reach oneness with that Sacred Feminine force or energy and natural law principles and truth until you go deeply into the self which is what the Temple of Solomon represents so I hope that clarifies more what this card represents and it corresponds on the microcosmic Tree of Life in the Kabbalah to the sphere the cephiro cetera known as Hoch MA okay Hoch MA in the Kabbalistic tradition represents wisdom so this goddess figure this symbol helps us to get in touch with the wisdom that is the knowledge that we have accumulated about all of the aspects of ourselves and about natural law and then to take proper moral action in the world based on that knowledge that's why it is on the pillar of Mercy which is the masculine pillar okay if we correspond this to the microcosmic Tree of Life and image number one it would be at the top of the right hand side all the way at the top that's called the pillar of Merson as we talked about it when we looked into the Kabbalistic tradition and the very top card on the right-hand pillar on the Kabbalistic tree or this microcosmic Tree of Life this that represents the sefirot known as hokhmah which is wisdom and wisdom is actually applying that which we know and have taken into ourselves as our understanding not just understanding in and of itself that's the sphere on the left side that's an internal quality and that's the cetera known as been ah okay or understanding just simply understanding wisdom is understanding applied in the world that is why this card comes just before the highest level of the macrocosmic tree taking proper moral action in the world is the thing that puts us the closest to the cosmic consciousness itself represented by the very top of the Kabbalistic tree okay which is kept air or the crown okay becoming truly illuminated okay unity consciousness bringing all of the forces of nature under one's command which is the magician okay so this is the very top of tree number one we're still breaking down a couple of things on the microcosmic tree to set up our journey into the macrocosmic tree tonight okay the magician card he is crowned as you see because he is connected with the concept of the crown or the cat tear cetera on the top of the tree of life he is illuminated he is covered with white he may be wearing a red and white robe but he is completely surrounded by a white glow this means he has become the illuminated one okay and people think that the word Illuminati always means something negative it does not there are positive illuminance in the world okay people who do know the self people who have mastered their internal forces represented by the four objects that are placed upon his table under his command yet he needs not wield them as weapons because now he is connected to the true wand or scepter of power which he holds in his right hand this is a an analogue to truth wisdom and unity consciousness ok the concept of as above so below is also depicted he is connected with the higher self through the wielding of that scepter of power ok representing he has conquered himself the lower case as self and he rules the kingdom of self okay as we've talked about the concept of Dominion he has dominion over himself the only thing you're allowed to have control over he controls his own thoughts his own emotions his own actions and he has brought them into unity he has brought them into unison with each other so actually he has become a being that as he thinks so he feels and so he acts and there is no contradiction between these 3 aspects of his consciousness okay so the four elements are under his command four elements of the material world is under his command this is what in the Christian tradition Jesus the words attributed to Jesus in the New Testament what he said when he said when you make the eye single okay when you when you make the two into one okay when you bring yourself into unity and what he termed the kingdom of heaven right that you can say to the mount mount move and the mountain will move the the command of the forces of nature of natural law are on the side of the one who has achieved self mastery and this is all about the self this isn't about serving any other God this isn't about to serve you know different dark occult traditions can twist it into that I'm trying to teach the pure original tradition of what these cards were originally intended to help the initiate where the student accomplish which is to know oneself and to come into unity consciousness to become the ruler of the kingdom of self so I heard the intro music yes we're coming up to our second break here so it's a good place to break it and we will continue with our breakdown of the the macroscopic forces of the macro cosmic tree of life when we come back after this next break [Music] welcome back folks who are back here on what on earth is happening I'm your host mark passio before the break we were talking about the magician card which is the top of the microcosmic tree of life the first tree of the Tarot and we're going to start getting into the breakdown of the macrocosmic tree which is the second 11 cards of the Major Arcana so just one final word about the magician you'll see he has one arm pointed up in one arm pointed down again this is a reference to the principle of Correspondence of Hermeticism and the idea that the universe is self-similar across scales and that the microcosm is a reflection of the macrocosm or that the very small is a reflection of the very large and vice versa so this is uh also represents that he has plugged in to the energy of higher consciousness and he is bringing it through himself through his actions in unity consciousness that he actually takes in the physical domain represented by his hand that is pointed down toward the earth okay so when one has achieved this state of self mastery and understands what their work is here on the ground they act in this capacity to bring those higher levels of awareness down to others who are also in the physical domain so it's a it's acting as a conduit I guess you could say he's a vehicle for that the transference of energy from higher states of awareness so that he can help to act as an alchemist to act as an influence on other people who are still in the material identified state of consciousness in the physical world and we need more magicians folks we need a lot more magicians that's all I have to say about that again the The Fool is in the position of dot which is the hidden sphere of knowledge from which the the Tree of Life actually emerges this is the know thing and we talked about that last week and the fool in this position represents the soul and spirit itself as the the source ok the connection to the source or the higher self so let's look at the macrocosmic tree this is image number to that we're going to not on the tarot book but on the website the second of the five images that I posted and you'll notice that it looks very similar except there are a new set of cards in the positions on the Tree of Life and these are cards 11 through 21 now the first card of the Major Arcana is the fool which we just talked about what that represents and he is in the position of docked and he was colored white because this is not on the Tree of Life or considered one of the emanations of the Tree of Life but it is from whence the Tree of Life comes okay symbol similarly on the macrocosmic Tree of Life we take the last card of the Major Arcana card number 21 okay the very last card because again this brings it full circle the beginning corresponds to the end and the end corresponds to the beginning and it works in a cyclical fashion as we are going to see as a theme throughout occult schools of thought okay and we see the circle again or the zero okay representing the know thing right now with this wreath of this card now if you're gonna look at this on the Tarot document you're gonna skip ahead to what is called major 21 the Major Arcana 21 that's what the image will be termed on this on the the page of the PDF document and it is simply called the world so this is image number 21 in the Major Arcana and it is called the world in some decks you will see this called the universe okay so this is the the playing field so to speak this is the actual physical world that we live in but it is also the spiritual world there are no real separations between those things okay people have termed this the body of God unified field the all it doesn't make a difference what you call it is the microcon macrocosm itself okay it is the all okay so again it is here depicted with this goddess figure that we saw on card number two but this is this is the the womb of creation okay so it represents the void itself you know the all Springs from the void or the no thing it's not really physical we talked about that when talk about physical worldly identification of matter now people get so left brain identified that they I they i purely identified with the physical world only but this world is anything but solid we looked at some aspects of quantum mechanics when we looked into the section on ego identification and identification with materialism I call that section of ma of understanding the the understanding of the barriers to the realization of the true self and that was many many weeks back but again you can go back in the podcast and check that out these barriers to self-realization included something I called $0.05 illusion okay identification with purely material physical reality and if we look at the particles that comprise the physical reality there nothing nothing but solid they're not solid at all they're actually pure energy and by in a state of vibration that's all it is it's condensed to a lower state of vibration and we call that physical matter but what this card is basically telling us symbolically is that really there is no material world per se okay it's all a spiritual construct it's a construct that we experience through mind okay like a lens and it's there for experience and learning and growth okay and that's what this goddess figure that represents the pure potentiality okay of everything represents and you see then that's brought into Chi in that doorway which is represented by this roof okay that's in the form of a zero just like the full card was card zero this is a correlation to that card that add V as above so below where the correspondence principle brought here again because the soul and the universe are essentially 1 and they are reflections of each other the microcosm reflects the macrocosm and vice versa so we see the angels of the corners as we described last week the lion Manville an eagle representing Aquarius I'm sorry representing Leo Aquarius Taurus and Scorpio the the ruling houses of the quadrants of the zodiac the ruling houses of each respective season summer summer spring fall and winter and these are the arms of what is called the great cross of the galaxy and again the galaxy is also connected as we saw when we looked at the Asheville theological traditions particularly when we looked at the Islamic tradition and it's connection to astrological concepts and worship was the the galaxy is connected to the goddess which is the goddess of pure potential and the void so we have all of these connections brought back on this card representing our position in the galaxy representing the the void of nothingness from which the material reality ultimately Springs because it's all energy in a state of manifestation that is derived from pure potential ok and she has two wands of power or two forces because this goddess is the bridge between the microcosm and the macrocosm ok she ultimately is the one that is in control if you want to look at it that way this is these are the forces of nature itself this is the goddess that represents natural law the the governing forces of our reality that you're not going to break and get away with period you're bound by them the end we've talked about this innumerable times throughout the shows and I'll continue to mention it but there are still people who don't believe there's any such thing as natural law principles that believe they can do whatever they want in this reality and get away with and they're delusional people natural law is always in effect always has been in effect always will be in effect you're bound by it forever and ever the end good luck thinking otherwise that's why that's why suffering exists ladies and gentlemen suffering exists because the people in this world who think that they're God and think that they own and control these forces which they don't refuse to acknowledge their existence and refuse to acknowledge that they're bound by these laws nonetheless that happens to be the truth they are we can come to understand these forces and work in harmony with them or we can continue to flaunt them continue to ignore them in which case we're going to continue to suffer endlessly vie and get over it as fast as you possibly can okay that's it and you know I I'm not gonna even be labor at that point because I've talked about it endlessly on the show go back and listen to some podcasts where I talk about natural law and even podcast number 36 in which I break it down in a presentation so this goddess represents the forces of natural law okay and that's what the world is governed by and it these laws are not derived from simply the physical again that's why it is arrow symbol is there okay representing that these are derived from the realm of potential or the realm of the spiritual realm they're not you can't see them by studying just the physical world you have to have a more holistic all-encompassing world you in order to discover these laws you're never going to discover them just been left brain logical analytical science they you need the wisdom of the right brain hemisphere the Sacred Feminine which is an analogue to the goddess herself a bringer of higher aspects of consciousness through the nurturing forces do this via the emotional qualities of the self and you need to bridge that with the analytical and logical qualities of the left brain that those can't be thrown out those masculine forces they need to be bridged and combined into a synthesis with the qualities of the right brain and that's why she holds these two scepters of power okay which she is this bridge between these male masculine and feminine forces she controls the whole game it is natural law you can look at that as a feminine nurturing mother not it not a strict disciplinarian or a vicious you know control freak or anything like that because these laws are not put into effect as a prison they are put into effect as a guide as guidelines on how to conduct ourselves and to reach self mastery so we do not have to experience suffering and this realm can become the paradise that was intended to be okay so let's start the breakdown of this tree and this goddess or this world card is put into the position of dot again as the hidden sphere on the sefirot ik tree to represent that this is where it ultimately all comes from okay and goes - it's a flow in a circle represented by that week around this goddess figure okay and that's my best attempt at a breakdown of the world card so let's build it up as we have done in the microcosmic tree from the base from the mulku position and again if you need a reference to these these words you can go back to the images of the the tree of life in the Kabbalah section to bring those images up on the website okay again this is a a building block form of study and teaching you have to grasp the concepts and some of the jargon in a previous teachings and study and then we are going to continue to use that as we go forward so again this is a stepwise progression that's what we have to understand that's what initiation is initiation is taking these building blocks and then stacking them and then in stacking them exactly just like you build a building and this is how we build an understanding a deep understanding of self and that's all these symbols are for ladies and gentlemen you can't build them into something that they're not it's not a religion it's not a belief system it's a tool that's it it's a tool symbols are ultimately tools now they do have an effect upon our subconscious and conscious minds but you know what they do that more so if we're completely ignorant to the language of symbolism once we understand and become symbol literate we can understand how symbols in any given position where aspect for being used that's the key to their true decoding okay not just looking at the symbol itself and saying oh that always represents this no a symbol may be used in one place to represent in something and then it can be used in a different place and represent something altogether different depending on who's using it and for what reason we need a more mature understanding of the language of symbolism I can't stress this enough and too many people in the so-called freedom movement who think all the occult is negative it's all horrible it's all of the devil that's all you know satanic do not understand because they have not really initiated themselves into this rich language of symbolism and these teachings and they do not understand that these can be applied for to be a full force of great good and I'm sorry but I'm never done to admit or acknowledge that some of what these people are saying that it's all negative and it's just all trying to put spin on something that's evil that's not the case this is a child's interpretation of something that they know very little about okay and you'll know who I'm talking about and you can you can go out and look at all different kinds of researchers there's nothing to talk about this is purely being negative okay now knowing what I've come forward and said on this show about human freedom do you think I would come and start to teach a tradition that is purely negative and can only be used for ill of course not okay I'm trying to help people gain a more holistic understanding of what the occult really is and what it's really used for in its pure form and what it is being used for in its adulterated form okay because there's a world of difference between those two usages and again I think we need to grow up and we need to be a little bit more mature about this okay so with that having been said let's break down this macrocosmic tree now okay in the mulku position which is the very bottom of the tree okay for the people who haven't yet I guess mastered the jargon and again these are just Hebrew terms from way back that relates as concepts that's all they don't get caught up in the jargon okay we're looking at the very bottom or the base of the tree along the middle pillar okay now that's depicted there in red on image number one on image number two I'm sorry okay so this is the judgment card and if we look at if you're following along with the PDF document you go to the judgment card this is card number 20 that's in Roman numerals to X's okay and it says judgment on the bottom it's an angel with a trumpet blowing the trumpet the trumpet has a cross attached to it and the there is a man a woman a child rising from sarcophagus from from sarcophagi the poor home sarcophagus ok they're rising from tombs let's just call it to be simple ok and this represents the call-out of purely material identified consciousness ok from base mundane material world oh is all there is state of awareness that's what this represents that's why it is in the mouth coot position in this ordering of these cards ok now again these are the forces of nature that are at work these are all natural law principles and forces we have a choice whether to go along with this calling this is a wake-up call that's what this card represents a wake-up out of base consciousness and that's why it is the very bottom of the tree you can't really do much of anything or make any movement upward in consciousness until you at least hear and begin the process of responding to this call which is the initiator knee ok toward higher spiritual understanding that's what this card ultimately represents the cross is a symbol of crossing over to something new a bridge you cross a bridge ok you go through a gate you make a crossing it's a journey from one paradigm or one world be one way of seeing the world to another way of seeing it ok that's why the cross they're depicted with the horn that is a vibratory energy some researchers like David I could call this truth vibrations and I love the term I love the concept I love the way he describes it you should read his book truth vibrations it's fantastic his first book that he put out after his wake up to this form of vibratory consciousness ok a great person it unimaginable level of courage to do what he does and stick with it through all the ridicule he's gotten over the years he's one of the people I can sitter an influence and an inspiration because of his courage to speak his mind regardless of what anyone thinks of him and I'd like to think that I go in in those footsteps so to speak because I don't care what anybody thinks of what I say and talk about you know I'm gonna speak it period so this is what the judgement card is about and it's not a negative card just because it says judgment you know it's it's the beginning of our exercising judgment of wanting to know the truth okay we don't do that then it can be seen as a negative card because then we are going to experience the judgement of natural law when we ignore it refuse to come into understanding and cooperation with it again to two meanings a lot of times symbols have dual meanings so again we go along with this wake-up call we exercise positive judgment we can rise up from our state of being dead okay spiritually and again this is what the dark occultists call us they call us the dead as a whole that's what they refer to the mass of humanity as the dead wonderful wonderful people okay and they do this because they say if you're in a state where your thoughts of emotions and actions aren't in unison okay if you're an ignorant person if you're an apathetic person if you're a lazy person or and a coward you're essentially dead all of the soul qualities are dead and so you're dead you're in you're in a coffin you're in a sarcophagus you're completely dead you're identified with the material realm you can be conditioned you can be manipulated you can be put into a state of hypnosis and trance at will and you know put on strings like a puppet and uh you know they don't they own you when you're in that state you're your complete slave to their form of dark manipulation in consciousness and that's why they call people like that the dead and i 100% concur that they are dead I'm I think it's a horrendous thing I think I get angry when I even think that people are that wicked that they talk about living beings like that but is it true absolutely it's true hard thing to admit didn't want to admit it four years of my life but I I can say when I'm wrong and this is the the the the real state of humanity isn't people waking up with their arms out to this call this is a pot a more positive interpretation of this card most people are lying in that coffin with the lid closed okay that's not me being negative that's just the truth that's just how it is right now it's our goal to help to sound that alarm which is what the angelic force is doing as a wake-up call to come out of this completely deadened state of awareness okay so I hope that helps to clarify the symbolism and deeper meaning of that card and again these are my deeper interpretations of these cards based upon my study and my initiation into the occult and it's a very holistic and integral interpretation okay from many different traditions and points of view and perspectives so I want to help the audience to keep that in mind there will be other interpretations of these symbols you should you should engage them all because no one's were is final on any of this this is an exploration and study of the self that's infinite okay the universe is infinite and so is the soul so is the spirit and so a study of these cards is infinite all right just that to say that as a caveat to the further study of this tradition all right so let's move to position number 9 on the sefirot ik tree which is the sphere of yes sewed okay and that's the foundation card okay now couth of course the red judgment card that position that represents what's called kingdom in all couth that's what it means we go up one to this orange card the called the Sun okay and again this would be the equivalent of the not the base chakra the base chakra is that judgment card that's not cool we go up one to the sacrum chakra okay this would be that some people call it the genital chakra okay the sacrum is the desire center okay so that's what the sphere of your soul or foundation on the Tree of Life represents okay and this is the Sun so this is the force that is calling us up out of that base level of consciousness okay this is the light okay the force of light calling us up out of that pure material identified consciousness okay and again we see it is the symbol of the Sun hey we saw how this is connected with the Christian tradition we saw how the Sun was connected with the Christian tradition in a show theology it's a solar sect of Astro theology the moon which is the next card which we'll get to in a moment what is the Islamic tradition okay the lunar sat the vascular theology the star was the Judaic religion that was the stellar cult or the stellar set of ashley theology the the cult of the stars and the planets the lesser lights of the heavens the smaller lights of the heavens so these three cards actually act in conjunction with each other in this triangle when we saw how that relates to the worlds of the Kabbalah this lower triangle represents yet zero yet zerah is the formate the world of formation and again these are the formed objects that represent the the heavenly bodies that comprise the material world okay it's the the Stars the planets the moon etc okay these are all of the heavenly bodies on which life depends and on which life lives in in the cosmos okay so we see that this corresponds with the formative world known as yet zero income this this triangle formed by the next three cards the Sun the moon and the star this the Sun in particular okay represents the force that is calling us up the light calling us upward out of that base level of consciousness represented by the the Malkin or judgment card okay so this is desire we need desire to move forward okay that's connected with the sacrum chakra okay or the planet Jupiter as we saw and looked at the connection to the tradition of the Vedic chakras when we put when we superimposed a solar system with our solar system with the planetary attributions on each chakra site again this is all a connected tapestry and I would highly encourage people to go back and listen to the podcasts and work with the imagery that's its key contemplated understand it's deeper meaning and it's deeper message to the self okay through the self all of this imagery should be contemplated on don't just look at it once or just you know dismiss it or you know give it a cursory examination the best thing to do is actually get a deck of these cards lay them in these positions and work with them in a mode of contemplation and I guarantee you insight will stream in okay if you're really taking it seriously and it will help you to understand better things that are really going on within and again that's what this is all ultimately about ladies and gentlemen okay so the sun card okay that's what's again pulling up pulling us up it's it's what the angel is working on behalf of really the light okay the forces of light now the moon and the star are in the solar plexus chakra position now on the Tree of Life these are the spheres on hold and nets off okay so hold on the left which is the pillar of severity and net saw on the right the pillar of mercy so we have an internal aspect and an external aspect of will of light okay of the forces of evolution calling us upward out of base consciousness which is represented by maku and this is saying that we need to activate the will these cards are in the will center positions the solar plexus chakra and therefore they're colored yellow okay so the moon represents that we need to have we need to connect okay with the higher forces that help us to develop courage okay and one of the one of the properties that enables that is getting in touch with the Sacred Feminine force within us or the right brain aspect okay and again that's what this left hand teller the pillar of bolas or the black or dark pillar ultimately represents these are all the internal Sacred Feminine Yin forces of consciousness okay indwelling now this is what the lunar principle is all about and hence the moon is on that pillar of severity okay corresponding to that but acting in the complimentary or some would say the dualistic role because this is a dualistic chakra center that has two basic principles courage and will is the star card okay so the star card is on the active side and it's shown this would be connected with the concept of the water bringer you see this water bringer pouring water out into a lake or screen and has one foot in the waters one foot on land this is again bridging the material and the spiritual worlds okay this is telling us yes while we need to develop courage within and while we need to use the spiritual principles that we don't actively see in the physical plane we need to do that work on the ground okay so this is about taking action it's the solar plexus Center okay it's about courage and will and that's what this star card in this position is basically symbolic of that we need to keep you know one foot in the spiritual plane one foot in the physical plane okay we need to be in this world but not of it and the work that needs to be done here needs to be done on the ground on the gameboard floor so to speak which is the material plane we can't get caught up in this idea of it because we understand that our true nature doesn't lie in the physical world that there's nothing to do here that's nonsense this is a cop-out okay this is a cop out of the right brain imbalanced well you know what I just generally refer to as the New Age the New Agers that have you know gone too much into a state of right brain imbalance all right thinking that there's nothing to be done here because they don't identify anymore with the physical world nonsense okay we need to make that connection to the spiritual realm but understand that there is work to be done here in the physical plane and that's what we are tasked to do to change the manifestations on the physical plane because the physical plane isn't really separate from the spiritual plane okay it's just that same energy condensed to a lower vibration so that so that the experience may be had and knowledge can be gained and growth and progress can be can be made as we move toward higher and higher levels of awareness moving back toward true unity with the all now this star card again represents that understanding that we need to be rooted in both worlds we need act as a bridge between both worlds and how important it is that there is actual action that needs to be taken in the physical domain that we cannot ignore that okay so that's what we're talking about now the yang forces at work okay so this is the male ass of the the natural law forces of creation okay and again that's why this is on the male pillar or the pillar of Mercy as it is called in Kabbalah okay so it would be the sphere of neck saw okay which means victory okay the sphere of hold the moon card means splendor okay now we move up now to the tower card colored in green because again this is associated with the heart chakra it is the balance point of the Tree of Life we talked about the color green being the middle of the visible spectrum being the balance color of nature being the color of the heart chakra the anahatha chakra in the Vedic tradition okay this card in the macrocosmic sense the tower represents the force of change and the universe is change that's why it is a hub it is the central hub of the macrocosmic tree everything is in a state of change at all times this is what the universe means the word universe means the one change it comes from unique in Latin a prefix which means one okay unity bring to oneness okay unison etc etc okay it means one uni okay and verse sorry the verb verse sorry and Latin means to change and there are people who you know one of the labor this point saying okay you look it up in a Latin dictionary it says to turn well it doesn't mean to physically turn it means to turn in the sense that leaves turn into another color in the fall they change colors to the seasons turn from one to the other like a wheel okay and that's what it represents okay change is what verse re ultimately means the universe is the one thing that is constantly changing in a state of dynamic flux that's what the word actually means when we break it into its etymological constituent elements okay this tower card often represents sudden change we see the crown being blown off the tower the people you know falling out of it being on fire again you could see the correspondence is here to 911 we'll talk about this card when we get into the symbology of the 911 event but what this card represents ultimately in this macrocosmic sense according to the forces of nature is that the forces of nature are ultimately governed by the principles of change and we cannot stay in a state of consciousness that doesn't want to accept change it wants to always keep things in a seeking to keep things in a steady state what we're going to experience suffering if that's the case things are always changing and our minds have to be fluid and go along with that change otherwise we're going to be like the oak tree and the wind that snaps when the wind gets too powerful okay we need to be fluid and be willing to bend with the forces of nature as they are coming in and affecting our consciousness that's what we're really experiencing right now there is a different vibratory state that is attempting to come in here and change things and there's so much resistance to by the people of this planet that don't want to change because so many of them have vested interests in the way things are and they've been running the show and they've been controlling things and they don't want anything to change you know one thing things to become different or more egalitarian or you know more free they like it in the controlled state that it is right now and have no problem with it continuing on like that into the foreseeable future okay but ultimately the people who are serving that force that dark force are going to snap like the oak tree snaps in a tremendous wind there is no stopping this force the higher will of the universe is going to see its will done regardless of what we want or any of us want here that's what people have to understand about this every body's going to ultimately get this you don't really have the choice so if you want to look at it in the highest aspect of it free will yes you could say as an illusion the only thing that how free will really applies is how much will you either cooperate with that force that's ultimately in control of this whole game or how much will you try to go against it in which case you'll create an enormity of suffering for yourself if you happen to step into that slipstream that flow of energy so the world can become like a paradise because you're getting the lesson that is intended by ultimately the higher will which you can call it whatever you want the unified field the the dynamic intelligence that underlies all creation you can call it God I don't care what you call it okay but you're not building against that force and ultimately winning and the problem is the bulk of humanity is going against that force and somehow we think we're going to escape unscathed how I describe this force of change that's represented by this tower card imagine that the the forces at work in the universe are like a hand okay and they're attempting to guide and shape let's say a huge aspect of a huge amount of clay okay remember um this is a nice anecdote that helps explain this concept you remember a silly putty or what do they call it play-doh right play-doh everybody played with this stuff when they were young different colors of uh you know soft clay you can mold and they get molds for you could press it through things you can make spaghetti you can make shapes everybody play with this at least people you know kids that I guess grew up in the same era as I did who are probably in their mid 30s now you had this stuff when you were young you definitely had to okay and you would put it through a mold you squish it through and now a shake would come out the other side well that's what humanity is and the forces of nature are the forces of change represented by this tower card and what the universe is or what this big chain that we're trying to go through we're gonna go through is like a mold or let's say it's a wall right and it's got a it's got a shape cut out right so the this big ball of clay right needs to go through this wall it needs to go through the shape let's say shaped like a star just be just to have you know an image in mind right and the natural law forces where these new vibrations coming in are saying well here's the big bulk of humanity represented by this ball of clay this play-doh right and it needs to go through this star-shaped gate or portal okay and there is no choice as to whether it's going through oh it's going through the question is is it going to Wallace on this side of this gate or portal is it going to realign itself in streamline itself and mold itself of its own volition and its own free will into a shape that is conducive to going through the the shape to cut out right without being splattered up against the wall and forced through okay this is why we call it a force of nature force it's going to be forced maybe you don't have a choice in natural law progression it's a force this is why it's called a force of nature ladies and gentlemen there is no choice to whether comply with that or not it's gonna happen the only choice is come much damage happens on this end of the transition where do we streamline ourselves and we already mold ourselves into a new form and we go through peacefully we'll be right back after these messages folks go ahead mark okay all right so we were talking about the tower card on the macrocosmic Tree of Life before we went to that last break and we saw how the tower card at the hub the heart chakra location represents change and indeed as we've talked about many times here the aspect of care okay is the generative principle it is what actually creates the reality that we experience okay and again this is the central aspect of the triangle that forms the world in the Kabbalistic tradition known as Brya I'm sorry known as above yeah no yes briea is the is the creative world okay so this is the world above yet zero which is what we talked about with the three cars the Sun the moon and the star this world of the triangle that is formed by the tower the devil and temp and the temperance card okay form the world known as Brya in Kabbalah the creative world and again this connects back with the with the generative principle okay of care and how much we align ourselves with the forces of natural law so the devil card okay which is the next card upward on the Tree of Life on the left hand side on the middle of the left hand pillar of the tree okay this is on the cover of severity and this card is in the position of the cetera known as Gabara which means severity and indeed it is a card depicting severity the devil card ultimately represents in its highest aspect going against the forces of natural law okay so this is our freewill decision not to engage higher levels of awareness not to engage self knowledge in which case we in have the option to enslave ourselves and you see there the two beings the male and the female that are chained and subordinate to the devil represented the representing the set on force okay which is the force of fear which is the force of devolution in in consciousness okay yet look at the chains look at card number 15 of the Major Arcana the devil card okay it may be a negative card and it's in its connotations and its implications and its symbolism but there is hope in this card actually because the chains are set lightly around the neck they're not fastened super tight choking the tubing's the male and female they are put upon them themselves they could lift these chains off of their neck at any time this symbolism is very specific it indicates that we have the freewill choice to discontinue our current ways that are basically flying in the face of natural law principles we can do that at any time we have the free will to do that and we can go over to the temperance card which represents again an angel okay with the flow this angel has the flow of energy going it is the alchemy card some decks call this alchemy some decks call this simply arts AR T the arts okay as you'll hear some occult Sciences referred to as particularly alchemy so this is the optimist card this is the on the pillar of Mercy the right-hand pillar the right hand path and this temperance card it represents the sefirot known as has said which means mercy okay so these are the central hubs of these two pillars and they represent going along with natural law or refusal to go along with natural law so that's temperance is becoming the optimist it is accepting the natural law forces it is that the positive aspects of natural law which are there to teach us are there to help us to evolve okay so you can look at this is natural law itself these two cards and one rep one represents our choice to go a long way that one represents our choice to disengage from it okay and both of them are connected to the tower card in this triangle of Brio as the creative world because this is how we create our reality we create our reality to either the learning of an acceptance of natural law forces or ignoring them in which case our life becomes severe if we accept them we understand them we accept them and we live in harmony with them we go toward the pillar of mercy and life becomes a flow guided by angelic forces okay if we go along with we refuse to go along with natural law forces that are there really for our betterment okay we enslave ourselves but we can choose on do that at any time because the chains are not set tightly okay it's our freewill decision to fly in the face of natural law okay and we are ruled by the suit on principle okay which is the opposed or the adversary the one who tears us apart from within because we are ultimately a non a non unified Bing we are exist in a state of duality okay depicted by the man and the woman separated and chained but they have chained themselves and that's what we're doing that's the path we're on folks nor know where humanity is you want to know the best example of what humanity is right now it's card number 15 of the major arcana the devil card that's what we've done to ourselves no one has done it to us we've done it to ourselves hey and people will disagree with that no panelist on the wall though pounder fits on the desk they'll curse my name for daring to say that it's other people's manipulation it's just this is all something being done to us we're victims poor humanity we're victims well you keep going right on ahead with that apologetic worldview okay and keep making excuses and keep pointing the finger outward okay and I'll keep helping people by helping them point their finger inward because that's where change happens that's why the change card is on the Middle Pillar and it's associated with the heart ladies and gentlemen that's where change happens within the individual and it's a one-on-one work that needs to be done from within with each individual person nobody can do it for you they can only inspire you or influence you or help you but you have to do the work yourself for change okay so that triangle helps explain the creative forces at work in the world now we go up to the top triangle the world of absolute and I hope I could explain this in ten minutes we'll see what we can do with not will carry us over a bit into the next show a brief word next week I was going to do the presentation I'd recently gave on The Wizard of Oz but I think I'm going to hold off on that a little bit because I think there is some more prerequisite symbolic understanding to go into before we could truly really understand that now of course I didn't you know lay out all of this symbolism the people that I gave the lecture to but on the show I kind of want to keep it to a progression and I think we should go into the symbolism aspects before even we cover the occult elements of The Wizard of Oz on the show so we'll do that in a few weeks I'm going to start getting into the symbolism and I was thinking about the idea of just having an all car calling show you know I haven't done that on the show yet we haven't had many guests on I still look to have guests on a lot of these topics in the future we're going to get in solution think in the future and we're going to go on with that for many many weeks when we get to the solutions but I think maybe we'll have a call-in show maybe I'll wrap up some of the deeper symbology of the Tarot and for like the first few minutes of the show and then we'll just do take all calls also the whole show it's something we haven't really done and I'd like to do so you know we can get people's take you know take the pulse of the community out there so to speak people think that's a good idea we can give it a shot next week but let's continue with the final three cards we have at the top triangle the death card okay the hanged man and justice okay so the death card up at the top left-hand side of the pillar of severity represents the forces of involution okay this represents the decay elements of nature that things always move into different forms things don't stay the same they are always changing into different forms energy remains but it takes on new forms and you know life passes through stages where it exists in incarnation and then it goes back into the know thing and then back into a state of physical being or incarnation and that is a cyclical process so this death card is what you can consider a force of involution and again it's on the internal aspect of the the the Kabbalistic tree on the pillar of severity okay the hangman card would seemingly be a negative card but I don't look at it that way as anyone who really understands the deeper esoteric meaning this is the evolutionary principles inherent in creation and this is the forces of nature coming working down coming down through the physical to evolve it okay represented by the initiate being put upon the world tree or the cross okay this is a crucified being but he isn't illuminate okay he is the forces of nature have been made known to him and therefore he has this halo around his head as an illuminated being and he is not actually suffering this is the the evolutionary forces coming into the flesh I guess you can look at it as coming down through the spiritual world and being grasped grasped while in the flesh so this is an initiate who has understood natural law and he understands that while it may bind him it is something that is therefore our evolutionary development and consciousness and it is that evolutionary force itself that this cart represents in the macro cosmic domain ok the Hanged Man card card number what is that ah that's 12 I believe my yes 12 okay so moving upward to the top level of the macrocosmic Tree of Life of the Kabbalah's major of the teros Major Arcana we have card number 11 okay and this is justice okay this is the pardon that represents balance this is the card that represents truth and this is the card that represents equilibrium and justice and that's why it is called that okay this is the goal of creation this is what the universe is seeking to accomplish this is the end result of the great work as it is called in the Hermetic tradition and the alchemical tradition the state of equilibrium you see again it's a king seated between two pillars he holds the Sword of Truth in his right hand proper moral action has been attained somebody is released from Basic Law they are king now they are the ultimate sovereign being the king because they do right for the sake of doing right not because they are bound by law and consequences ultimately this is the state stage of evolutionary development that the higher will of the universe that is driving all of this all of this movements all of these forces is trying to put into place in one's balance in one's equilibrium it once truth it wants justice and that's what this card ultimately represents and you see the scales of truth and justice there along with the sword of truth and the crowned king between the two pillars as an evolutionary synthesis between the cosmic male and female forces were the Yang and Yin energies now in older decks this card was actually reversed with the eighth card which is the strength card or a car that represents courage and this card was put into the position on the microcosmic tree of the sphere of hold okay in newer decks these cards are reversed to reflect that the courage principle is part of the microcosmic tree and that justice is the ultimate goal of the universe itself of the macro cosmic forces at work okay now I agree with the current placement of the cards as you're seeing them on these images but the reason that older occult traditions reverse these cards is because they crowned courage as the ultimate force of creation as the ultimate thing that the universe was trying to create because without it nothing really changes and gets done and we've emphasized over many weeks how important courage is to the spiritual journey so I would say that these cards are almost interchangeable as well I tend to go with the arrangement again as you see them on the images I've depicted however when you look at certain Tarot decks you will see these two cards reversed and that is why this is an an homage to courage itself saying that ultimately this is what the universe Revere's above all else and I couldn't agree more so I understand why this reversal was done people often claim that this is a black magic reversal or something like that it's nothing of the kind okay this is done because they were alluding to what the ultimate thing that we need more than anything else is and that is courage to move forward in consciousness and when we do that will become the sovereign king the Justice card and that's ultimately what the universe wants to give us freedom true freedom is what this card ultimately represents and it represents again being rising even above law to the Cosmic

Consciousness position okay this is what the universe is trying to ultimately create and it's freedom from law itself even the natural law okay because you won't need to be bound by the the three precautions of going against natural law because you'll follow it simply because the recognition then it is simply right and goodness and justice okay will be enshrined okay as king that's all that's all we really have time for here night folks

What On Earth Is Happening Show #045

Topics: *Open Lines Call-In Show, Symbolism, Sychromysticism, Zeitgeist, Venus Project, Resource-Based Economy, Alchemy, Philosopher's Stone, Overcoming Fear*

[Music] freedom for the people that is what this show is all about you're listening to what on earth is happening right here on the Intel hub news network I'm your host mark passio this show is live every Tuesday evening from 8:00 to 10:00 p.m. Eastern Time today is Tuesday February 1st 2011 thank you for tuning in wherever you may be and what we're going to do tonight is the first all call in what on earth is happening radio show we'll see how this goes I usually get phenomenal callers into the show and I'm looking forward to it we're going to have your calls all throughout the show for all two hours of the show this evening your comments your questions your concerns anything that you want to ask it's all on the table there are no taboo topics on this show there never are so that's going to be coming up in a moment I want to read a few event announcements for events coming up in the Philadelphia area and then I'll give the call-in numbers actually let me give the call-in numbers first so people can start to call in so here we go tonight all call-in show for the first time I'm doing this to kind of take a break from the heaviness of the material that we've been discussing over the last several weeks I've been breaking down different occult traditions and will continue to do that we'll be getting into the subversive use of symbolism and symbolism as a language in and of itself in the next few weeks here on the show but I figured you know let's take a break from the the ordinary you know the ordinary progression of topics and do something a little bit different to open things up so the the talks you call in number is seven two four four four four seven four four four once again you're going to call into the talk shoe Network you can call seven two four triple four seven triple four and put in the call ID number for what on earth is happening which is eight three five one five ID number for this show 8 3 5 1 5 if you're calling on the blog top Network if you're listening on that network there's also a call-in number there you can call in two six four six seven two seven three three eight seven once again the blog talk callin number six four six seven two seven three three eight seven hey and mark there's one more option I want to share for your listeners okay brought to you by the Intel hub news network it's a toll-free line graceless you want to call up market and you don't have the long distance which most people have long-distance now when they use cell phones and Skype and all that great shuttle but anyways toll-free eight seven seven five nine eight eighty five forty nine get out of cran write this down that's toll-free eight seven seven five nine eight eighty five forty nine what on earth is happening with Mark Basia Bob thank you very much so event announcements for events coming up in the Philly area again I always read event announcements because ultimately it's all about taking action and developing the courage to do so so the great activist group truth freedom prosperity is hosting their free documentary screening and discussion night this was cancelled last week in Philadelphia because we had a big snowstorm come through and it dumped 17 inches of snow on the Greater Philadelphia area last week so we did not meet last

Wednesday evening as was planned instead they have rescheduled for February 9th that's Wednesday February 9th at 7 o'clock p.m. at media Bureau Studios media Bureau is at 7:25 North fourth Street in Philadelphia that's the corner of 4th and Brown in the Northern Liberty section of the city ok this month are going to be showing melt up the beginning of a US currency crisis ok so that's going to be this next Wednesday evening of February 9th at 7 o'clock p.m. and then there will after the the documentary screening it will be followed by a discussion and question and answer session so come on out support the group truth freedom prosperity and for other events that they host please see their website at wymt.com prosperous org and finally the free your mind conference which is racing toward us we have about two months before it hits and it is looking really good things have smoothed out a bit we have we've confirmed all of the speakers it looks like they're all going to be able to be there and we're going to be able to afford to bring them so that's a good thing and this event should be one of the best events of its kind and one of the only events of its kind that I know of in the Philadelphia region so come on out to the free your mind conference a conference on consciousness mind control and the occult Saturday April 9th and Sunday April 10 2011 at rubra Hall rubra our UBA UBA hall at 414 Green Street in the Northern Liberty section of Philadelphia the doors open each day at 9:00 a.m. and the speakers will be starting at 10:00 a.m. admission is only twenty dollars per day in advance and if you choose to buy your tickets at the door tickets will only be thirty dollars for your mind is a unique two-day conference scheduled for April 9th and 10th in Philadelphia PA featuring multiple speakers and diverse educational materials for the purpose of raising public awareness of the critically important topics of mass mind control techniques the covert and subversive influences upon consciousness and behavior trauma based and ritualized abuse and the practical mental and emotional healing methodologies available for those affected by these devices the featured speakers Aaron McCallum alfred Weber Andrew basiago Bob tuscan farah your dozin freeman fly Yan Irvin John Nicholson Joseph Mara Larkin Rose Laura Eisenhower Mark motika Mark passio Michael Kelly Paul Marco and Suzanne Taylor that's a roster of 16 speakers over two days quite an impressive lineup of speakers and topics for more information on this great event please visit the conference website at WWE your mind conference calm that's free your mind conference calm all right so those are the event announcements you have the call in numbers and Bob if anybody is already waiting to call in just announce them and put them through no one has called into the talk shoe number as of yet so if anybody has called in to the blog Talk network go right ahead and put them through at any time all two hours your calls your questions your comments your concerns anything you want to talk about right here on what on earth is happening this evening my contingency until I see callers on the line is to begin to introduce the topic of subversive symbolism so I have that on the agenda should we not get many callers however what I'd like to do as a brief recap is just for perhaps new listeners who may be listening who don't know what this show is about or what I do here is just basically give them an over an overview of what we do here on what on earth is happening and some of the topics that we've covered thus far and encourage people to use the resources that are available and at their disposal on my web site so ultimately what this show is all about and what makes it different than other other broadcasts in the so-called freedom movement or truth movement is that what I attempt to do throughout the course of each show and to establish a tapestry okay is to get down to the primary causal factors of what is creating the experience that we are undergoing that's what this is all altum Utley about so if you take it right down to the base rudimentary level of what we're trying to do here we're trying to identify causal factors causation is what we have to understand and we need to understand how causation works to create the experience that we are actually living that is playing out before our eyes okay this is what many researchers at least in my understanding or estimation fail to do they point out the problems yet and they will have some effective solutions for the problems but what they fail to do is to identify the primary causal factors - what created the problems to begin with see if we have information about the causal agents of any given problem in within the understanding of the causal factor is the solution to the problem embedded within that okay that's why it's so necessary to go down to the very root of evil to understand causation so we can understand how we are actually generating that which we experience in the physical domain okay and that is all a factor of mind ultimately it's all ultimately a factor of mine and this is why mind control is so important and the methodologies of mind control are so important to understand ultimately what we're looking for is to develop the faculty to be able to distinguish truth from falsehood that's what we're altima looking to accomplish - and that is what consciousness ultimately is consciousness is ultimately becoming aware and living in harmony with truth and natural law natural law is a big topic of what we talk about on this show because we have to understand that we are bound by certain laws that simply exist in our inherent to the universe - creation itself and we are bound by those laws whether we like it or not whether we want to be or not or even whether we have understood those laws or not okay so the more we become conscious of those laws that underlie the physical aspect of our experience the better equipped we will be to create the experience that we want okay and the better equipped we will be to not create that which we do not want okay it sounds very simple but this understanding escapes 99.9% of people out there and this is why we're essentially living in the equivalent of a human madhouse okay and why so many things are being done to subvert human freedom and natural rights so we need to get down to causal factors if we're going to solve anything and what we ultimately need to develop is the ability to distinguish truth from falsehood and then a sea of information that we're being bombarded with much of which is disinformation that can be very difficult but we can do this effectively the better we know ourselves and how our own consciousness works so if we understand and delve into the human psyche and understand our primary motivational factors and primary root causal factors of what we experience and the things that actually go on in the human psyche the mind okay and the deeper parts of the mind the human subconscious as well we will develop that awareness and we will be less likely to be manipulated or fall prey to the techniques of mind control which is largely what the progression of this show has been here to expose we've been going on for a number of weeks now months actually talking about the techniques of mind control we've already covered 12 of them in a list of 14 proposed methods and there there are more but I generally talk about 14 different methods of mind control we have already covered 12 fairly extensively and over the next few weeks we will be getting into the final two and then talking about the agenda itself just a brief um prelude to what's going to be coming up after we do that after we talked about subversive symbolism and the the one of the biggest guns of mind control which is a problem reaction solution or what I term chaos sorcery okay then we're going to be getting into solution speak and we're going to talk about solutions or probably as many weeks as we've already have done the show okay we're going to talk about solutions to a point where we're going to highlight just about every solution that can be employed to fight this global dark agenda this is a mind-controlled agenda that is being propagated and foisted on to the people of the earth so that's going to be coming up in future weeks on what on earth is happening all right here we go we got our first caller of the evening caller from Southeast Pennsylvania you are live on what on earth is happening how are you and what do you have for us i market actually Chris from New Jersey how are you doing Chris how are you doing tonight good mark cam I haven't caught in a while with a single reason that I've been listening but you've been even teaching me so much about the Kabbalah and all the other mysticism that it's been more in receiving mode than transmitting mode yes that that's been the general the general state that has been going on over the last several weeks actually I noticed that calls of trickled off because I think people are tuned into the information following along with the graphics and it's almost been like a live or format of sorts so that's understandable but that's that's the reason I wanted to do this show to kind of take a break from that massive you know putting out there and downloading of intensive information for a little bit to just have some discussions so always a pleasure to hear from you now one of the things mark that I find it interesting when I started becoming more conscious so to speak and learning about consciousness is let us whether as synchronicity comes to you or you become more aware of it you do experience it and the other topic which you really haven't touched upon maybe because it's too expensive is syncro mysticism and I come to the understanding or I guess a guess to what syncro mysticism is is that things happen that seem like a coincidence but are it's not good so this is all just being done by a higher order of things that we don't understand absolutely synchro mysticism is a fascinating topic I was actually brought on to a show that was almost entirely about synchro mysticism by Kevin who often calls into the show he goes by the name Kevin tinfoil or karma the Jedi sometimes he has a show on talk show on the talk show network called caution tinfoil hat area and it sounds like you know it's kind of a you know a light-hearted type thing but it talks about pretty serious topics on it and he did a show all about Sync or mysticism in which he brought me on with um who I considered to be like a kind of an expert on synchro mysticism or who has brought this to the forefront particularly under the banner of that word jcots ii and uh we went back and forth a little bit and it was a really great show and um I think that synchro mysticism is one of the least understood phenomena out there I think people only are recently coming on to its understanding in recent years and it's it's relatively new to the human consciousness in general I think what it's ultimately about is there is a higher order of consciousness that is kind of attempting to show us um the interconnectedness of things I don't I wouldn't necessarily say that it's completely directing everything it's quite possible that that's what's happening but I tend to lean more toward it is simply showing us how things are all interrelated with each other and it is up to us to become to open up our minds more to become aware of these interconnections and then we will understand the purpose or the underlying meaning that is contained in those events 9/11 is a great example I think that's a huge synchronistic event we could talk about Sync or mysticism when we get into the breakdown of some of the symbolism of 9/11 because that's going to be coming up on the show in a few weeks and you know it it I don't necessarily think that things need to be orchestrated for them to be synchro mystic in nature again what synchronistic ism is for people who haven't looked into it and I think you should you know google it you know go on whatever search engine you prefer look it up watch some videos about it read some articles about it it's a fascinating topic for exploration but essentially it is finding higher levels of connectedness from a I guess you could say a entangled perspective okay or a higher consciousness perspective in what you would consider the seemingly mundane however this interconnectedness is displayed and it comes through often through the artistic process okay the idea that art is imitating life so to speak okay the the creative process seems to engage the syncro mystic unfoldment I guess you could say okay and as something required or took more creative energy to put out there into the universe and and that's why it often comes through in movies the synchronistic understanding movies are incredibly big creative projects from the storyline to the writing behind it to the the design upsets and and costumes and creating the story itself and then doing all the computer work that is necessary to do it to put these together there is so much creative energy engaged in making a movie particularly a big-budget Hollywood film and so many people are focusing their creative energy all toward the same goal that is when this synchronistic magic I guess starts to happen and and starts to speak to us it's not always an orchestrated thing when it comes to the movies people talk about predictive programming a lot when it comes to movies but I don't necessarily think it's always a deliberate effort it is simply something that is coming from a higher level of awareness that is being engaged when certain people are engaging deeply in the creative process all at once all together and all toward the same goal to create something and put it into the world so that's my take on sync or mysticism Chris what do you think of that you have anything additional to add or any other thoughts on it or any resources you might want to point people to the let them check it out more but I really think that the last part you say was where the creative process is linked up in some way with sync remissness ISM I think I think that's really true I always thought of it as you know we doubted the ability right now the cost is to see that the bigger pattern we they we know we may see a chessboard but there might be an even bigger chessboard then another big you know an even bigger chessboard and I think as our understanding increases we may see things that as they're synchronistic we may come to understand the reason you know why that occurred I also think it's part of the grand design of creation and I don't really have any any um references for people to go to go and look because I really haven't looked it up that much much myself I just surmised what it what it was it seems like I was pretty close sure sure any resources that you'd recommend for people out there that's I'm saying mark I really don't I had always looked into as intently as I should have I guess okay I like one called on the brave new world order calm I believe that jackpot sees website or you could just look up the name jackpot see I believe he spells his last name ko Tze if I'm not mistaken um uh there is uh let me see there is I'll open my web browser up here and see if I can find a couple more resources there is some good Google videos if you go to Google Video and you type sink well mysticism and you'll get a you'll get a few decent videos there is um let's see reality sandwich that's Daniel Pinchbeck s-- website he has some things on there about cinco mysticism again the brave new world order I'm sorry it's not the brave new world order calm I think it's the brave new world order dot blog spot.com the brave new world order dot blog spot.com and you need the word thaw in front so the brave new world order blog spot.com that's jcots e site and it is KO Tze um let's see there synchro mysticism dot blog spot.com okay there's also a Wikipedia page about it that basically you know gives an intro to it um there's something called the Octagon which is a synchro mysticism um site let's see I took that funny mark yeah yeah I know you just tried to turn in I would say started something like YouTube because videos kind of explain it better than reading an article about it because it's abstract concept and if you start with a simple um synchronous ISM video it kind of will take you through the progression to understand what what this is all about but again it's it's it is abstract you have to disengage the left brain uh you know pure logic pure intellectual mode if you're really going to appreciate this as as again something that is coming through from a higher level of awareness we have to really see this from a right-brained perspective because that's really what synchro mysticism is this is the right brain calling out to us it's the higher Sacred Feminine energy that is the creative force calling out to us to try to disengage from our material world identified left brain thinking that's that's really what I think the whole purpose of sync or mysticism is but I do think that it is something that is real I do think that it is something that is coming through from a higher level of awareness and is not necessarily something that is orchestrated it is it is something that is this random series of interconnected things that are completely beyond coincidence or chance anybody thinks that these things are chance I mean you know good luck because you're not going to roll bass and get these kind of sync ups by accident as far as I'm concerned it's far beyond randomness but to a very left brain person it would be a it would be what what I would call a hard swallow for a left brain person you know that's it well I appreciate your time I appreciate your insight on it your information i Debbie follow up on it and I'm looking forward to your conference in April I'm glad things are back on track again yeah it's looking pretty good and I'm looking forward to a lot of the speakers we're going to have a roundtable discussion panel at the end of the night on Sunday we're also going to screen Suzanne Taylor's new documentary on the crop circle phenomenon on Saturday evening she put a great documentary about the crop circles together called what on earth inside the crop circle mystery and we're going to be screening that film on Saturday evening at the conference so 7:30 will be a great event we're going to have vendors downstairs we're going to have tons of books and pamphlets available in DVDs and it should just be an overall good time for people to come out and really educate themselves about what's really going on yeah I like the crop circle topic as well I've been listen did a lot of that all true frequency with Chris Evert and he did a guest on their show that's been pretty good the last thing I wanted to ask you about Mark ISM and I don't know if it's as you know or not it is is anyone I'm out michael sterian caesarian is he going to show up or um I have not gotten any word on that I know you know I haven't really told people that because I didn't want to get anybody's hopes up we were attempting to get Michaels sorry on to come you didn't tell me that you didn't tell me that rumors that he may walk I let a few people know that I had been in contact with him and it looked like it may have been a possibility I don't think it's going to be but maybe I will just attempt to you know see if at the eleventh hour we might be able to pull something together but I I would say probably not but we'll see we'll see what I can do oh you know what Adam it's a great lineup I really look forward to it mark thanks so much you got it Chris thanks so much for calling good night bye-bye okay here we go ah we were just I was just speaking of this gentleman here we go Kevin tinfoil from caution tinfoil hat area you're on what on earth is happening how are you doing my friend hey Mark how's it goin I didn't know you're talking about me that thank you very much I noticed that you're speaking about the synchro mysticism and such and I have not gotten yet a hold of the guy who's supposed to be my guest like a full confirmation on it but I had planned on either this Friday or Saturday to have an episode on my show once incra mysticism once again so if your previous caller is interested if he could just keep an eye out for that I would appreciate it definitely definitely I you know the last show that you did on the topic I think was great you had Jack Copsey on there you brought me on there I got a chance to speak with Jack and go back Jake I'm sorry and go back and forth with him and I think that was great yeah I really appreciated your contribution to it because it's strange it as it is and not it's not that I would say that my wife didn't already understand the concepts behind say 9/11 and so on and so forth yes good but it's as unfortunately I would say that she did not um fully grasp the occult aspects of it until you described it the way you had done so I'm glad I was able to help with that understanding because um even I missed it when it first happened in with my background into the occult I had to go back into the symbolism to understand it myself that's how much swept up in the whole experience of the event I got myself back then I I feel like I should have grasped all that on day one and at my level of awareness I still did not and it took a while it took until probably about 2002 for me to really understand what the event was all about maybe even ended you know late 2002 early 2003 uh but but um you know uh the synchronistic aspect of that it there is a synchro mysticism element involved in the 9/11 event I think it's highly involved when you get down to looking at what happened with flight 93 now we're talking about a high concept and an occult number and you know when you look at the numbers of the planes which again I won't get fully into all of this tonight we'll do this when we go into this topic in in several weeks but I think the flight 93 aspect is the biggest example of sync or mysticism in the 911 event because I think that's an example of a pilot who refused to stand down order and in doing so he engaged the concept of Thelema or the use of willpower toward the higher will and this prevented building seven from being hit because that's what I believe the intended target of flight 93 was which crashed in Shanksville Pennsylvania or was shot down over Shanksville Pennsylvania um and in in doing that of building 7 which represented the Middle Pillar you know which we talked about in Kabbalah and we will talk about also when we get to the symbols of

Freemasonry and other occult traditions that that pillar couldn't remain standing as part of the ritual and therefore they needed to bring that down anyway even though no no plain text rutting and that's the the lynchpin is the key of the entire 9/11 truth movement as it is now called Middle Pillar as we saw its importance I hear the intro music for this first great length when listening from one tap into hell [Music] Holly are you still paying your credit cards and so-called ankle loans thinking that you owe the money do you feel like it's your moral obligation but can't see an end in sight well what if I told you that in truth you don't know a single penny and that the bank smoothest and hope you don't find out here's where we come in we to prosper calm specializes in a profound debt repudiation method which challenges the validity of your so called decks morally frees you from the burdens and protect your property our system is often superior to settlement bankruptcy or consolidation which often review in a war situation if you feel the moral obligation to take care of yourself and your family then I urge you to consider taking action right now the economy will not wait if you want to know more so you can prosper through the economic collapse almost an honorable and true to yourself then call eight seven seven four one seven eight three nine three that's eight seven seven four one seven eight three nine three or visit free to prosper calm right now [Music] hey Shepherd he hosted the Intel hub check out my life gel every Sunday at 4:00 p.m. Central Standard Time you can check it out from my website B Intel hub radio comm join me Joe Joseph John King and AC Griffith Thursdays and Sunday evening at 8:00 p.m. Eastern for the Mike radio on the inside of news a [Music] very wealthy US citizen is predicting that in 2011 we will witness the most important day in America in more than 50 years he says it will change everything about our lives the way you shop travel invest educate your children and even how you take care of your health and family now this man has made some outrageous predictions over the years but the crazy part is he's usually right we see he predicted the collapse of GM Fannie Mae Freddie Mac and America's biggest mall owner General Growth Properties a few years ago in fact Bironas called his work a dire prophecy now this has nothing to do with the stock market but it could have a huge impact on almost every aspect of your life and recently he created a video which you can watch online for free detailing the biggest and most important prediction yet and it's a real eye-opener I can't stress this enough you should at least watch the free video online today he explains everything you needed including simple steps you can take to protect yourself you can find the video at WWE Diva merica eight.com although this video may be offensive to some audiences it's worth checking out again that's WWE end of America the number 8 comm watch the free video at WWE em of America eight.com you are listening to the Intel Hub new Network impression you will compete by P [Music] all right welcome back you're listening to what on earth is happening I'm your host mark passio right here on the Intel hub News Network before we went to the break we were talking to Kevin from Philadelphia and we were talking about synchro mysticism a little bit Kevin I know you want to talk about a specific topic about you know who's the right people to trust with their information and you know how we could I guess discern good information from this information but before we do that or maybe after we do that I'd like to bring up something because I just recently ran into it at the new screening of zeitgeist 3 it was like guys moving forward and I wanted to get your take on what you thought of the film and what you thought of the dislike based movement here in Philadelphia in general that's actually part of what I was kind of going to ask about with this whole thing about who do we trust because sure at this moment I am involved with the guys that work with the zeitgeist movement in Philly you were on the show that had like two the guys one was from jerk one was a Jersey coordinator one was the Philly lead chapter lead um you like Salvi Fernando and James Babb from we won't fly and I guess part of where I'm going with all this by mentioning these guys is that we're all kind of like that the show I had was for liberty leaders and like not to give too much of a plug for my old episode but having you guys one really meant something to me like I trust all you guys including the zeitgeist guys who I hear is like I said an NWO thing and then I've heard that the NWO also doesn't want us to fly so that makes like James's Pole we won't fly thing kind of like which direction are we going and then I hear like again like I with a mic selfie about this he his hole and the Fed thing is now being like now obviously not glenn beck has not come down from on high off of foxnews and said hey i support Mike Salvi sadly it would be nice to actually have those types of it have anyone aware enough to actually know what's going on sadly I don't think that as Mike's Alvey and I even talked about it like there is because of the globalist agenda and the fact that guys like Glenn Becker then following the globalist agenda pretty much verbatim if he if Glenn Beck is now saying and the Fed is a good thing which he I've seen a couple clips on YouTube about it it makes me wonder are are we all useful idiots like are we all being played by the system or are we actually doing something that we feel is the right thing to do because it's just flat-out the right thing to do I mean I'm actually at a point where like it's a miniature moment of crisis where like I mean all of my life is pretty much okay around me but I've got this like thing I'm trying to figure out and I'd really just love to have your input on it well I think that revolutions can be co-opted that's something that we have to be aware of and people can twist infusions of energy to suit their agendas now I'm not saying that that's what's happening in this case necessarily but I think it's something that does have to be watched for without being paranoid and you know my take on the whole thing is and as I mentioned on your show was I'm for a resource-based economy as you would call it just resource-based living however if that is done forcibly I'm not for it okay it would be how you would implement it if it is implemented from a higher level of consciousness and awareness that simply there are people and there are resources and these this is what people need to live this is what people need to thrive too Road to live amongst each other to develop their own consciousness and awareness and they need to be supported in the physical world that they live in in order to do those things and that is chosen that I'm for it if it is forced okay by violence then I'm not for it at all because that's called communism or socialism or whatever you want to call it the forced redistribution of resources uh based on you know the state saying you must do this you must do that it can't happen that way if you know I wouldn't support anything that were to happen that way okay I'm for I'm a voluntary in every aspect of the word I don't believe in the authority of man period people need to make their own choices and understand that they're not the only people in the world nor are they God okay that's what it all really comes down to you know people are living as if their God you know this rich super rich you know less than point zero one percent of the population that basically owns all of them important resources of the world okay that needs to stop but at the same time I don't believe in communist or socialist values to a point where I think the state should take over the resources and say you only get this you only get this you only get this you only get this and that's it you know I think we can all have what we want and still be happy and thrive as long as we don't have this reptilian brain a directive impulse that says I always have to have more more more you know it's about living within one's means and necessities as far as do I need to have five cars and you know ten mansions in different countries do I need to have that you know I mean look at I was just walking with a friend through Philadelphia and we pointed out the home of a celebrity and my friend happen to know who the celebrity was that owns this huge home that takes up half of a block in the I'm trying to think the section of the city it's in a it's not Northern Liberties it's a an old city ok so in the old city area and I won't mention the celebrity's name but uh you know it is a well-known movie actor ok and he was telling me yeah he had this house made and he never goes there it nobody's ever in it there's an alarm system they have lights that are automated that go on to make give the appearance that something's there he might come there once every other two years stay for a week and that's it and yet you know this takes up a huge amount of resources energy land etc you know but he just has that just because if I happen to be in the area of Philadelphia that's where I'm going to stay I'm going to have my you know luxury place built with like you know it's probably probably has a you know a movie theater inside there and you know a gym you name it I mean it has all the amenities that you could ever possibly ask for want without ever leaving you know the complex that you built so to speak but you know do I think that uh that that's you know how you know people need to use resources no but again that's that's that person's level of consciousness it's always more to what I can do for me what could he do with the money that was spent to build that home this this celebrity okay what kind of contribution could he have made that to to help hunger or to help poverty or disease or homelessness or any other affliction you know could he have given it to the truth movement to try to just put out information because you have contributed to conferences that talk about you know opening up one's mind and awareness no he decided I'm going to build a house with the extra money that I've made as a result of my career as long as were in the me me me mode of consciousness doesn't make a difference what kind of monetary system is out there it's going to fail and it's going to result in suffering this is what I just don't hear from the freedom movement people they go want to talk about consciousness and causality causal factors they want to avoid that because they want to be able to point the finger outward instead of turning and pointing at their of them their own selves because that's where true transmutation and change takes place in one's own consciousness in one's own mind in one's own heart and in one's own actions and most people not all but most people in the world will kill or die to avoid looking within most people that's the sad fact of the matter and the reality that we live in that's what the human race has become that's not what our true essence or nature is but unfortunately that's what we have become and most people alive today would rather die than to look inward now I'm only here what you're saying there -

actually that's my take on the whole freedom movement in general and that's my take on things like zeitgeist and the The Venus Project etc I don't have a problem with the idea I think it's a beautiful idea the question is is how will it be implemented you need enough people behind that idea from a philosophical and moral perspective in order for it to be successful attempts to name and rather than coercion stay with me on the line through this break I want to talk about this a little bit more and I'll get your take on who we should listen to thank you this is what on earth is happening we'll be right back [Music] hey Mark mark passio hey Tom how are you I'm doing well I just wanted to let you know that you have a chef on the blog talk line which by the way people can call toll free at eight seven seven five nine eight eighty five forty nine I brought to you by the Intel huh news network Bob I'm 100 hold Kevin over a little bit after this break and then I'll go right to that call I'll tell you we're taking time with Kevin chef also wants to talk about The Venus Project he claims the Rothschild fund it and that they fund The Venus Project and I talk to them a little bit off there you know I keep it up in mind but at the same time I don't want to make accusations that are not true I mean well if you're going to make a claim like that you're going to have a little bit more information than just oh they from The Venus Project or whatever you know so I'm interested to hear what he has to say about that I'll be listening in to the program when we get back from break I'll let you wrap things up together your other caller and we'll get to the next caller eventually you got it thanks so much what on earth is happening with Mark passed you on the Intel hub news network my life stellar Sunday at 4 p.m. Central Standard Time you can check it out from my website the Intel hub radio.com [Music] join me Joe Joseph John King and AC Griffith Thursdays and Sunday evenings at 8 p.m. eastern Pacific radio on the internal bug news a very wealthy US citizen is predicting that in 2011 we will witness the most important day in America in more than 50 years he says it will change everything about our lives the way you shop travel in best educate your children and even how you take care of your health and family now this man has made some outrageous predictions over the years but the crazy part is he's usually right you see he predicted the collapse of GM Fannie Mae Freddie Mac and America's biggest mall owner General Growth Properties a few years ago in fact Burrell nuts called his work a dire prophecy now this has nothing to do with the stock market but it could have a huge impact on almost every aspect of your life and recently he created a video which you can watch online for free detailing the biggest and most important prediction net and it's a real eye-opener I can't stress this enough you should at least watch the video online today he explains everything you need to know including simple steps you can take to protect yourself you can find the video at www.americanoutback.net the number 8 com watch this free video at WWE end of America a calm you are with Cuba Intel hub network rational or p YP [Music] okay we're back on what on earth is happening before the break we were talking about the zeitgeist movement and The Venus Project and kind of the level of consciousness that would really be required to put something together like that I think it's an idea that is far far ahead of its time unfortunately because the human imagination is so stifled by the monetary system people think that money is the lifeblood of creation of life on Earth that we need a monetary system that we could not live there wasn't such a thing as money and this elevates the concept of money to godhood because that's what it is intended to be it is indeed really the root of evil and you know they you know the love of money is the root of all evil but I would say attachment to the idea of money is the root of all evil and this is what really the whole zeitgeist movement is attempting to struggle against and and and break down you know break down this meme which is an entrenched mean with incredible amounts of power over the human mind I spoke about this the last and the Fed rally and my lecture was about the alchemists philosopher's stone the idea of the Philosopher's Stone and what that was actually created from and it was ultimately distilled from the human imagination hey this is what ultimately creates the stone okay the higher awareness and higher consciousness and sadly that's deadened it's crippled it's devastated the human imagination is devastated in most people sadly that's just the case I asked people in that lecture in that of presentation whatever you want to call her the speech could you imagine a world without money and I would probably say even in that end the Fed rally where people want to go against this huge corrupt banking institution I'll bet you 90% of those people cannot imagine a world without money now maybe I'm just being harsh or nasty or maybe I'm just thinking that you know people are just in a more a more Venna greated state than they really are maybe I'm just overtly that overly negative okay that could be but I guarantee you if you really pressed even those individuals for their true beliefs on this topic what they really feel most of them would would give you the answer ultimately I feel money is necessary and that one couldn't live without it and that's why do I think something like The Venus Project is we're going to see that happen in our lifetimes more likely than not we're not going to see that in our lifetimes maybe in future generations if we continue to get this information out about consciousness and causal factors of what we're creating it might be possible but I think it's a long long long way off sadly you know I think the idea is a good one I think if it's done in the right way and if it's done at in a higher level of awareness it's where we really need to go as a species but I think so few people are ready for that that they will come up with whatever jabs at it that they can to justify the the same existing immoral monetary system or to prop a new one up in its place that would become just as immoral that's just my take on it keV what are your thoughts on that I'll hold you over for another couple of minutes and then I'll go to some more callers give me your thoughts on that well I originally back in like 2003 started having some issues with money um I got a decent job so I lost the issues but I didn't lose the drive to figure out a way to live without money and I become very enamored by the whole concept of earthships and I only see The Venus Project is like as above so below this like giant extension of the earth ships all the same systems are in place such as being able to make your own energy make your own food have all of your own basic needs taken care of without the need for money I am NOT a greedy person I really don't need much I mean I'm very happy with the like couple hundred our computer I have that i realistically paid very little for comparison for getting a deal through AT&T but uh that's kind of beside the point but the point I'm trying to make is that if we managed in my opinion if we manage the resources of the planet better than we do now and if we took a global systems approach to it I think we would have a much better chance of not having the issues that we currently have such as before some people are concerned with overpopulation I however am NOT I've seen some research that shows that we could probably have about 25 billion on the planet I agree but that being that we're at 7 I think it's a holistically smart idea to just consider that future and get ready to be prepared to take care of that number now right and I don't think that we can afford that in the future considering like I've seen a lot of economists say recently that something like 60% of or we're going to raise taxes like 60% in order to get to where we need to be able to actually start paying off any debt at all with quota suspend your number like that the way we're living now not the way we're living now exactly zombie porn just nature yes some people are using so much and causing so much pollution in just using so many vast resources and I just always wonder like is it just their whole divide and conquer scheme that pretty much allows them to get away with this I mean that and why isn't it that people aren't willing to just set aside their egos and work all together I mean III the reason why I even did my last show with you and the other guys is it I knew everyone that sat down at that table was about and the Fed the two zeitgeist guys as well as all the other guys that were on the other side of the table they all understood that we need a new monetary system and a lack of one that could actually provide for all using a fully functioning resource-based economy I think would work really well myself it's the best of all worlds provider I saw prints for starch and we're not paying attention to this gift that's there because everybody seems like they're afraid that they're going to be fooled by some NWO agenda and we end up in Logan's Run and well you know what Oh IIIi I'm not afraid of that like I I see the potential here and I I think that if we were twisted enough at that point after creating such a thing that we became that sort of authoritarian and closed him less tightly I can we put it'll make me stop and look removing out my idea about why there's so much hesitation toward even pursuing something like The Venus Project and again there's some synchronous toises Amrit in there right in the word the words the Venus Project right Venus is the next planet closer to the Sun from where we are just think about that from its symbolic perspective okay it's up one chakra closer to the crown chakra in the chakra systems as related to the planets as we've shown on this show and look into those symbolic connections okay so it's it's not uh going toward Mars which would be going down the chakra or going farther away from the Sun but it's the Venus Project Venus is also a name of the goddess okay this sacred feminine energy okay so again it's also named after the goddess herself one of the names of the goddess that we looked at when we talked about the Tarot tradition was Venus okay and and this is associated her name was associated with Venus in the Roman tradition that's just an interesting synchronistic connection okay because the idea is one that takes us up a notch and takes us up to a higher level of consciousness but the main resistance to this idea okay is people are thinking about it from the same level of consciousness that we are now that we are dwelling in now as a species that's where their viewpoint of this comes from they're not thinking if we moved to a higher level of awareness if we move up in consciousness and we no longer dwelled in the base brain and dwelled in it with an imbalanced neocortical brain okay if we didn't have all of this imbalance within toward the male side okay toward the the yang energy okay if we embrace the sacred feminine energy if we combine the left brain with the creative and nurturing power of the right brain and we moved up to a higher level of consciousness that's how this would work and only the only way it would work we cannot talk about building a non monetary system in general without talking about a fundamental shift in human consciousness and this is what is completely left out of these discussions almost completely left out of these discussions and that's why I got kind of almost not upset but almost depressed when I was you know on the show that night because no one was bringing up consciousness they were just talking about the mechanics of it and the the logistics and you know that's all that was being brought up but what wasn't being brought up is the quality of mind the improvement to the human psyche that would be necessary to implement something like that and the reason that this is often not brought up and again I may I may be taking a jab here or even a stab here and there is the people who are discussing these ideas aren't at those levels of consciousness and they're quite unread about a lot of this information they're quite unread about what would be required to change consciousness and to have a paradigm shift in awareness they're quite unread about the occult itself and about how these are tools for improving consciousness they think naively and childishly that they're going to get from here to there without going through the steps between and that it's not going to take any real hard work on the ground to get that done and this is why I'm not very popular this is why and I'm not here to be popular I'm not here to make friends or it's not a popularity contest I'm here to explain to people just how much work is going to be involved to make this transition and and not to depress them or make them fearful but to make them aware it's harder than what what you're even thinking now to change truly from within and to change your mind and to get out of the barriers of mind that have been put there by the existing systems of conditioning and social engineering the you have been born into from the minute of your birth and that your parents and grandparents and great-grandparents on back through the generations have been born into but exactly how I feel like I'm going through right now - it's because it feels like I'm getting all this information from all these people saying that what I'm doing is ineffective and all I'm doing is trying to actually do something and they're all just telling me that oh that's not going to work that's not going to work that's not going to work and I'm like you know then what will tell me you you tell me what will and no one had then has an answer for me so like I just I feel like if I'm going to be damned I'm gonna be damned for who I really am and I hope everybody can appreciate that and understand that I'm just going to keep moving forward myself and and hopefully that's right homage or so I I'm not the only one and I hope someday he'll join us that's right that's right and that's what I ended that's what I ended my I know with yes at the end which with me so well and it resonates a man with the other people too and the imaginary why going it will you have - thing people who can't imagine true change coming about from a higher level of awareness how their imagination is dead and my suggestion would be attempt to move Vaughn and and just put those people off to the side in in your life so that they don't drain your energy because they're not going to be part of a solution and they are nothing but part of the problem and you can say that's as harsh as you want to call it and there's the tagline again for the show good as offended about that as you like these are the people who the dark occultus of this world called the dead it's quite frankly that's who they are so keV yeah unfortunately we have to let go of those people and chalk them up sadly that may sound harsh but that's the case they're not going to be part of this problem they are attached they are attached to means they are attached to mind control and they're not going to come out of it because that's their safety net that's their little comfort blanket and they're going to stay there probably until the day that they die because they don't want to turn the finger inward and point at themselves tell I want to thank you for calling in man I'm going to move on and try to take another couple of calls and I you always have great insights to bring to the table my final answer would was far as who we should listen to my final insight I guess you could say on that is find the people who you can see an active imagination in who are actually willing than to take action based on that quality of imagination and those are the people that we should really be giving you know credence to their message and and listening to and then partnering up with thank you mark I really appreciate that it's it's nice to have a friend that I can come and talk to I thank you for letting me I have this bring this all up on your show I appreciate you gotta man it was good seeing you the other night at the I was like ice cream you take care of man tinfoil from caution tinfoil hat area always a good call when he calls in and always a pleasure to hear from them all right Bob you said you had a caller on the blog talk line you can go ahead and put the caller through let's see here we have chef welcome to what on earth is happening with mark ASEA hey how are you yeah I love how's it going I'm good I'm good mark is it yes now mark you know about Airways man I'd try to keep it that way due to the business I'm on right but I go by conspiracy chef and I believe your last callers the one that posted your link that you're ready to serve on and then on my Facebook page all sorrow on this fateful days narcotics and Murphy and and you know and I know it's always good I want to preface this all up all this what I'm about to say what it's always good to me like wanded await people right I mean we might not always breathe on everything you know I mean but that's life that's life not just how things go now when users jump right into that I want to assure cut their time when I logged in and I heard you guys talking about that guys and then you got a little further into it you know sure I have a concern with the zeitgeist movement um I had and I had some as well I could tell you you tell me what some of yours are I'll tell you what some of mine are because I have some as well yeah yeah no no no and my concerns which is like a Susan this is just one ending or the house did watch out the Rothschilds fund the Zeiss tighten the Zeiss got smoothly through shell companies right and one of them shell companies is the Venus Project the Rothschilds are one of our D major funder of The Venus Project and then that alone gives me enough reason pause for anything that they do underneath right with the Venus Project it is Nike topia I'm not gonna lie initially I was brought up in solution to the mix of things you know really what a lot of Venus Project everything looks pretty I think it looks futuristic I think it's it's it's all of these and all that you know but I member wouldn't want to think that everyone else listening the way to show is that you know you're you're against communism yeah I am as well absolutely news project and it's based resort sorry redistribute the wealth in a way that is communism everybody within lives underneath that little bubble you know I mean the Chinese building right now by the way for building mega cities completely uninhabited and one of those mega cities are is a city much like what you'll see on the zeitgeist website you know but so just following the money what I like to do right now I don't I don't like I'd films The Venus Project for the

Rothschilds I don't have a cropped out I don't have knowledge of where the money for the Venus Project work of where Jacque fresco gets his funding I don't have knowledge of that funding now I saw as I can't speak directly directly to that I don't have to research that on my own um if you want to send me any links about it the Eternity yeah I'd lied like to research some of it absolutely you know whenever you when I hear when I just say when I hear Jacque fresco talk uh he seems like a high consciousness person what I would like to hear more about what I would like to hear more about I agree he seems they have a lot of courage too but what I would like to hear more about is the actual methods that would be used to use the resources and how that would be acquired how that would be done because again by pause right pauses how it would be done the idea is great if it's done through force and violence I want no part of it if it was if it was done from a higher level of awareness and voluntary operative I'm all for one I think it's wonderful let me tell you what some of my pauses about zeitgeist as a movement in general or not not as a movement I shouldn't say that because the movement doesn't actually put forward specific tenets that everybody has to have to agree with I've been asked to speak at z-day which is coming up in New Brunswick New Jersey I'll be making an announcement about that in to look brother ok I'm going for my money I'm going to the last conquer I'm going to go and speak at it because I'm Concord I'm going to talk about the occult origins of money which is not addressed in the films okay the the maker of Peter Joseph while I like many of his ideas seems to be an atheist which you know I think that that is a candy a problematic ideology because at the at the point where you really become deeply atheistic of social Darwinism starts to kind of being something that people go down the path of now I don't think he's a social Darwinist I'm not saying that but when you get into atheism and you think that man is the highest force that is operating here that's when when I have to step back and say then basically there is no ultimate of truth there is no ultimate right or wrong there is no actual objective morality and we get to make it all up okay so that's the path that you go down when you get into true totalitarianism we talked about this extensively on the show the idea of Solace ISM and the idea of moral relativism now I'm not saying he's a moral relativist either but I the if you don't think there's an objective truth and an objective right or wrong okay and that's placed there by natural law okay now I believe he does believe in the concept of natural law or know that natural law exists I think Jacque fresco also understands natural law and he has spoken about this in interviews and and documentaries as well so I you know the atheism part kind of makes me take pause the other part that I think that is something that concerns me a bit is that he downplays the UM occult aspects of this and that's where I have to completely go in the opposite direction because there is a small hidden cabal of dark occult as' that are calling the shots and this is the reason that I will make that statement and just completely say he's simply incorrect about that it's not my opinion is because I have experiential knowledge of that it's I don't have that from reading about it in books I was involved I've been involved for years of my life in the dark occult before I had my transformation in consciousness and came up to a higher level of understanding about what was really going on on this planet so I developed a conscience I understood morality I understood natural law and moral law and started to live in accordance with those laws and understand that there is no authority in man and man isn't the highest force in the universe or even in our local neighborhood okay and I came out of that base level of consciousness that I dwelled in when I was helping these people these are cultists so my experience in that capacity is not in books or reading about it it's living it and there is no replacement to that experience this is where someone like Peter Joseph simply does not have this experience I don't think he can be totally faulted or blamed for that he just hasn't been involved with the dark occult and with the people who are operating it I have okay so um he's simply incorrect about that I'll state that unequivocally okay but he's entitled to his belief because he doesn't have that knowledge okay so he's entitled to say I don't think there is such a thing as dark occult is running the show or what people have turned the Illuminati you're perfectly entitled to continue to believe that and continue to try to convince other people of it but I'm letting people know that's incorrect it's wrong okay so that's where I have to part ways with what he puts out in the third film and I think he's deliberately doing that because he doesn't want to alienate people he wants to make it purely about the sciences and purely about the left-brain aspect because that's what he knows people are trapped in he knows people are trapped in that level of left brain consciousness and only by keeping it to that narrow bandwidth that Clutton that narrow playing field are inside that box Kenny appeal to more numbers of people let me tell you it's effective because more people were at that zeitgeist screening in Philadelphia at the ethical Society than I've seen at any meeting having to do with the truth or freedom movement in this whole region in the last couple of years and it's sad that sad because you know I think there there are as many worthy groups working toward true change in this area and they don't have the numbers and you know someone someone like myself and other people who are really truly conscious about what's really going on and have experiential knowledge to back that up again I'm not very popular because I speak my mind frankly I don't sugarcoat anything and I'm not here to engage in a popularity contest I'm here to try to create some true change in our consciousness and again that's the puck and I break some muscle a different route changes so it's a lot of your listeners loves you know my name is being a conspiracy Shepard the reason that the chef is in there because I do cook and I do like to grow my own food I do like a feed my family healthy food because I know what's out there I know what's in the supermarket and salute lee you know and when one of my things is a one of your calls I think attention photograph it said he doesn't believe what was you so you don't believe in overpopulation right I agree I think you know why there's two problems right when a problem is is that we all now been programmed to go to a shoe or to buy our food yep that food is being shipped from we get shrimp from Thailand even though we get turns in the Gulf Coast of course you know like I go when we're about to buy shrimp I'll have for my shrimp is from you know then in an old bottle store and it's unfortunate because I love sure you know but you can make a hydroponic system with less than 50 dollars but you can grow strawberries lettuce tomatoes any sort of vegetable food that you would like you can go to a nursery for crying out loud and a hydroponic system you know you can grow potatoes in your garbage can you know and it'll be an old garbage can full of potatoes so these are things that we can all personally hey chef you were coming up to a break hang with me over through the break and I will continue this on the other side these Delmon you're listening to what on earth is happening right here on the Intel hub News Network we'll be right back [Music] okay mark hey Bob how are you marked yes hey good man listen I'm going to take off here but you have a few other callers on standby and I want to make sure that you're able to navigate them and bring them on air and any chance I can supply you with the login information and Amanda lend that to me on skype and I'll log in to blog talk because I want to get to their log log into the blog Chuck and I already screen the calls we have Bob from Cincinnati Arctic all right Anton and we also have a great call from Philly on the line our friend Joe Bri so we got some great colors and we'll get back from the break I'll bring you up and I'm going to log in here you guys you can bring up the rest of the colors great all right mark stand by thanks so much for great open lines program Thank You bomb the economic collapse all while standing honorable and true to yourself then call eight seven seven four one seven eight three nine three that's eight seven seven four one seven eight three nine three or visit free to prosper calm right now hey Shepherd we hope that the Intel hub check out my lifestyle every Sunday at 4 p.m. Central Standard Time you can check it out from my website you Intel hub radio.com joiny jiang Joseph John King and AC Griffith Thursday and Sunday evenings at 8 p.m. Eastern and freedom live radio on the Intel above blue they very wealthy US citizen is predicting that in 2011 we will witness the most important day in America in more than 50 years he says it will change everything about our lives the way you shop travel invest educate your children and even how you take care of your health and family now this man has made some outrageous prediction both of the year but the crazy part is he's usually right you see he predicted the collapse of GM fan-made Freddie Mac and America's biggest mall owner General Growth Properties a few years ago in fact Bironas called his work a diner prophecy now this has nothing to do with the stock market but it could have a huge impact on almost every aspect of your life and recently he created a video which you can watch online for free detailing the biggest and most important prediction yet and it's a real eye-opener I can't stress this enough you should at least watch this free video online today he explains everything you need to know including simple steps you can take to protect yourself you can find the video at WWE end of America eight.com although this video may be offensive to some audiences it's worth checking out again that's number eight comm watch the free video at WWE end of America a.com you are lifting to the info hub network Russian [Music] [Music] alright everybody we're back on what on earth is happening we were on the line with caller chef chef are you still there if there Gary yes okay so take another couple of minutes and then I'm going to move on to another caller you were talking about growing the fresh wholesome foods on your own as opposed to the relying on ah foods that were provided with in supermarkets because I've been breakfast I said because of the fact that the one of the arguments of overpopulation is that there is not enough food you know and I think that less is more you know I think that one of the things that in Pete I didn't necessarily call up to the attack The Venus Project I got true we have it right because then in the purse I love it I do I really do it look beautiful it's a great thing but we might need to get there sometime you know I think you didn't know in the head used that it's not going to happen in our lifetime what will happen to future generations and you just hope that people do it right well I wouldn't say I would say as long as we remain in the state of consciousness that we're adding what happened in our lifetime I don't I don't think anything is impossible I think if we develop the imagination develop higher consciousness it could happen very quickly actually but right from where we're at now well doesn't seem likely to me i I think the meme of money right now is still so ingrained that it seems unlikely to me from where we stand at this point to clarify but continue you Scheffer you still there and looks like we lost them ladies and gentlemen but if you want to try to call back in try to get back in no problem I'm sorry about that arm let's see we have two other callers here all right okay Bob from Cincinnati here we go you're on what on earth is happening how are you Bob hey Mark I'm fine how about you tonight good how are you doing Oh wonderful hey I'm a great show lots of great callers you know me I'm interested in your knowledge of alchemy you know once again I'll praise you mark as I've done many times but you you have clarified things that people spend a lifetime trying to discern and that is these chemical processes or you know cut straight to the chase you know the classic Temple of Solomon you know even to this day is and you're starting to really pound it in your your presentations and I appreciate that you're doing that because a lot of us out here hear that term the Temple of Solomon they built the Temple of Solomon the temple was destroyed they built it again and now they're seeking these dark Mason's are seeking to build the temple again in Jerusalem and and once again maybe they are physically but you have clarified that the Temple of Solomon is the unity consciousness is the unifying a begin and yang a solar and lunar principle the male and the female principle in our consciousness and I can't stress how important that was for my transformation of understanding alchemy and the processes of alchemy and also just your wonderful presentations over the last few weeks of the Kabbalah the stages of the Kabbalah and also the correspondences of the chakras that your comment on that mark um that really makes me feel good because I'm really glad that some people are deeply grasping these concepts and that's really what we need again I feel that it is critical for us to really move to a mature understanding of these concepts and symbols because that's what really opens up the consciousness and that's what really helps us go into deeper levels of ourselves and our own psyche to become better and more moral individuals and it just it makes me feel great that you have gray understood those concepts to a deep level as it sounds like you absolutely have and I I'm glad that I was able to take part in helping you to make that that shift in understanding and I'm glad that my communication skills were effective enough to help assist in that process that's that's what I will say and I really thank you you know for for coming on and voicing that oh but it once again my pleasure around market it's my pleasure to to share that this is this is what's going on in and I want to recommend to people if you have yet to listen to mark marks on is a forty fourth or forty fifth week of broadcasting here go back and I'm still going back to the earlier broadcast on natural law and sorcery versus magic once again your your clarifying and and once you grasp it once you get get the mystery and the secret of the mystery schools has to do with consciousness then and the within what's going on within each one of us because that's the one thing we know nothing about is what's going on inside each one of us we know about the television and the major events in the news and whatnot but the one thing they are desperate to keep us focusing on is the internal conflict the duality that's going on the checkerboard floor so to speak that is going on inside each of us in debate you continue to keep us divided and schizophrenic to use that term but a schizophrenic consciousness in each one of us they'll continue to manipulate us until they get their dark a police state that they're shooting for mark I've got a question sure and once again I'm just going to say to the people remember all of the mysteries of this the great secrets that they lived at the Manley peoples of the world aliens that they know it comes down to knowledge itself that's right repeat that it are a mark Cassio ladies and gentlemen all the great mysteries the secrets of masonry the secrets of the mystery schools work Mark's going to lay them out right now through the voice of Bob and the voice the voice is saying it has to do with what's going on with the self I'm sure one of us inside and inside of our our transformational process and that's our consciousness our awareness and and once you grasp at it's a life changer it is a life changer the Temple of Solomon is consciousness it's got nothing to do with a building and and don't seek it in Jerusalem belt simple mysteries in some blessed be a book and or a magic spell that's right it create energy to give you power it's nothing to do with that other magic is internal like you said mark even the great teacher yuxuan jesus said the kingdom of heaven is found within that's right and Bob Bob you gave me the chills because I I can only hope that most of us will get to that level of understanding as soon as possible you're totally on point totally on point my friend you had a question though right go right ahead well it's thanks to you that I am on point and my question is mark I'm intrigued by all these bond alchemical drawings and you know where I'm going with this these are medieval drawings of strange beasts and creatures and you're alchemists and there's one it dip dip that keeps coming into my my view and I've yet to discern it it's it's Club the squaring of the circle just and you'll probably know it if this alchemists standing in front of a brick whoa and there's a circle on the brick whoa oh yeah pointing it yes I know this wrong yeah and this is sticking when I'm just yes go ahead suppose I was just going to share the game I was just going to share the image with the audience and I'm going to step back and let you explain it sir that it's an alchemist in robes and it's an evil kind of Renaissance feeling and you standing in front of a brick wall that has a circle on it you look strangely like a globe of the world inside the circle is a triangle and inside the triangle is a square perfectly flood inside the square is a circle and then he is pointing to the top of the circle and inside there are two people I guess a minute it's not figure in my image here but it's probably a male and a female and I grass now since you've shared a lot of this what what part of it is but if you could share with us the meaning of the squaring of the circle thanks mark this symbol that you're referring to and I will probably bring this up when we go into the symbolism section is one of the keys of alchemy of the alchemical tradition it is a symbol known as the Philosopher's Stone okay and on some some chat programs it's funny that you mentioned the symbol I actually use it as my avatar you know the little icon ease for for your chat picture okay this represents the lower world okay and the upper world so this represents the physical world and the world of spirit and it represents how the physical world mood attempts to reach upward towards spirit and how the the spiritual world tries to reach downward to pull the spiritual toward it so that they that they come together okay and what the the the circle represents that goes around this square okay is basically coming to an understanding of natural law and coming to higher consciousness and in doing so one is ruling ones base awareness or base instincts or animalistic nature the physical identified consciousness the physical world identification and they are understanding they are part of the divine all okay the higher level of consciousness that is the creative force that indwells everything in nature so this is also symbolized in some of these symbols of Freemasonry which we'll be getting into over the next many weeks but um the square in if you're familiar with the compasses and square in Freemasonry okay it's one of their major symbols okay you'll often see this on Masonic buildings or temples or lodges you'll see just put on emblems on the back of cars you know the the magnets or whatnot that you know people will drive with on the back of their cars on the become via square at the bottom there turned upward represents base consciousness okay base consciousness is rigid it doesn't really change form okay it's not flowing and it traces a square okay what our task is is to actually raise that up raise up from base consciousness so that we turn the square over okay but moreover that we transcend the square completely so that the inverted square we're exploited upward okay toward the heavenly realm is the symbol of the the the the master of the lodge who has governed his base instincts so the square is upside down it is inverted okay or I should say it's right side up the way that you'll see it on the the symbol of the compasses and square is upside down with the point pointing downward okay but it is governed it is ruled by compasses the compasses come down over top over top of the square this is a indicator that we need to govern our base consciousness govern our animalistic instincts so to speak okay and in doing so we are circling them we are circumscribing them because the compasses trace a circle just as a square traces a square the compasses are the tools that that draw a circle so we are we are circumscribing our base desires and our base instincts through reaching the level of awareness called compassion the compasses it is this is a wordplay compasses represent compassion okay umm feeling together coming together in emotional qualities so this it's also these are flexible they're not rigid they can be moved okay they are of there's a left part and a right part and they meet together at the apex this represents the left or solar consciousness in the right or lunar consciousness left-brain right-brain coming together but coming together at the highest point the apex of the compasses which is the fulcrum or the balance point of them and it exists it's a brilliant allegory and this is also depicted in the Philosopher's Stone with the square and the the circle being the major archetypal symbols inside that symbol now the triangle represents the threefold nature of reality it represents thought emotion and action it represents body mind and spirit it represents father son and and spirit etc okay the Sacred Feminine the sacred masculine and combined with the creative force the generative principle coming together in the chemical wedding these are all concepts we've briefly touched on and you go back and form of podcast I'm glad you mentioned that Bob but these are the basic archetypal symbols that are in our ancestral consciousness our ancestral awareness and the alchemists put these together in this thing called the Philosopher's Stone what I would suggest Bob now that you have become aware of this symbol and that you've looked into it on your own a bit attempt to actually undergo the exercise of drawing the philosopher's stone okay it is one of the hardest things to do and there is a secret to the drawing of the Philosopher's Stone which I will not give on the air this evening maybe when we talk about it in the symbolism part maybe I'll encourage people to do that when we get to the symbolism section and then a future week after that I'll give I'll give that answer but if you can find it by searching but I would suggest for you to try to attempt to do it on your own as just an exercise using a compass and a straightedge that's all you need to really do this and if you find that secret on your own an incredible revelation would come to you in in mind okay in understanding what the secret of drawing that symbol actually is and it's absolutely beautiful and magical so it's a exercise I would encourage but you know don't get too frustrated if you can't do it immediately you can research it and there are places even though that will you know show you how to derive the symbol with a simple compass compasses and a simple straightedge excellent and and mark now that I look at this figure you're right he is holding up it's very smile on my screen and he is holding the compass that's right it's a giant compass and a pointed do you know the apex is pointed towards his heart brilliant so it's very very internal thank you goddess for that madam solutely awesome man Bob always a pleasure it's an honor to speak with you and I'm so glad that you're getting so much from these shows keep it up and go back into the archives share the shows with friends you know tell them to put them on their mp3 players are really encouraging thank you so much man my pleasure and Mark I'll say it again you are an agent of change out here and thank you for once again for what you're speaking about I don't even think you understand the the depth of what you're speaking to us I know that you know it's important but I don't think you understand the rippling effect now and in the future what this means thank you sir good night gentlemen you got it man thanks so much Bob all right Bob from Cincinnati always good to hear from him here we go who's up next all right Joe from Philadelphia you're on what on earth is happening we have for us tonight I do and thanks for taking my call kind new to your show so I hope this isn't a little off-topic I don't think it is but there we go a Jordan Maxwell says quite eloquently quite elephants okay he didn't evolve the monkeys were evolving into monkeys don't you guys my call abducts and this is kind of currently what I've come to so please let me know where I've gone wrong according to many Terp rotations of the Bible key from God's perhaps the mythological fall in English there were similar people but I have additional powers you know such as telepathy enormous strength etcetera now supposedly these gods needed or blended genes with things from Earth after the genetic manipulation these news being godlike powers but also have earth-like animal instinct now over time the genetic manipulation got a little watered down and continues to be so however the elite tried to maintain this genetic code of the original gods gods by way of teens Pope's etcetera so I was curious enough organize exterminations and genocide that were currently witnessing our tents by cultists to eliminate what are interpreted to be inferior genes compared to those of the original gods absolutely that that is exactly what's being done because these people are eugenicist you need to understand eugenics and what this agenda is and what it means and indeed you know I don't get into that aspect in my wall on earth is happening presentation because it is specific to a human freedom and mind control in general are the the principal concepts that I lay out in that presentation and on this show however I have done extensive research in these fields I think what the basic storyline there that you outlined is a quite on point and this does point to the ancient ancestral lineage of Kings that ruled by divine right is where the divine right of kings and queens comes from and I encourage people to look into ancient human origins okay to look into human origins as a concept in general I've said before on the show I don't believe in creationism nor do I believe in in a microbiological I'm sorry macro biological Darwinian evolution okay this is the middle ground between those things and it explains so much about what's going on in our world the reason I don't get into it on what on earth is happening that much I have spoken for on different on different topics such as this as part of ufo-related conventions and and symposiums but I have a presentation called don't count on disclosure that I've given in the past and touches on all of these topics I separate it out as a separate presentation because not many people are ready to hear information like that they're not they're not ready for it they're not ready to hear there's such a thing as mind control let alone something beyond that because it does paint a dark picture of what life on this world is about you know I tell people you want to hear a very accurate allegorical picture of what's really going on in the world my closest thing I could suggest to somebody if you want the broad picture of what's really playing out here and don't expect it to be something that's comfortable it's quite disturbing it shows us really where we're at and what our work that lies ahead really is watch HG Wells's Time Machine movie the movie and specifically not you can read the book the book is great too but watch the movie the newest version of the movie not the old film from I believe the 60s or maybe the 50s watch the 1990s version of The Time Machine which got terrible reviews didn't play very long in theaters but I'll tell you why that's the closest thing that I have ever seen made in a movie - what's really going on on this planet that in the movie they live John Carpenter's they live from the mid 80s okay but Brooke HG Wells is Time Machine it's about the human race essentially being food for other races that basically being farmed here and and called from time to time and they just think that it's you know these people just live and think it's normal when he goes into the future you know he confronts these people and they say uh this is just the world as it is and he says you know I refuse to accept that you know he's a freedom fighter in the in his future time and it's a great movie but I love the underlying underpinnings of concept of the movie the past is already done the past exists it's in the record book okay it can't be changed whatever may have happened in our ancient past happened then it's done okay you can't change the past but you can do something to change the few if you have enough courage and you're willing to get involved well I ask one more questions you're into that yes I'm if you explain the significance of Aldebaran and serious I don't know why but I run into Venus sometimes when I'm trying to decipher all these and what their connections are to the human quote unquote mission Alda baron and some mystical traditions is uh you know there's different pronunciations of I I just call it Alda baron um they are different mystical traditions think that this is some sort of ascent central spiritual hub it's like a star that that acts as a central spiritual hub for a wider portion of the galaxy now I don't know whether I subscribed to that necessarily I'm just telling you what some people's interpretations are of it and what was the other one period area Sirius is there certain people claim that certain uh other races descended from that that general vicinity of the sky that we call the Sirius system uh you know the dog star okay and that they came to this system from that area of space whether that's true or not I don't have direct first-hand knowledge on but there are certain ancient cultures that that brought this up and said yes this is where some of our you know ruling classes claimed to be descended from now hey you you could say maybe that's the case or maybe they just claimed that that was the case maybe we just did all happen to come from here but they're claiming okay we're gods who came here because they had advanced technology that may have been left over from other cat another Cataclysm that happened here and then when they went to try to rule these uh indigenous people who were you know I've also left over from the Cataclysm who didn't have access to their advanced technology maybe they just tried to convince him that they were gods from other places in the universe it's quite feasible as well so you know both of those are our possibilities I don't claim the note though the exact truth about that or be an authority on any of those things I'm seeking those answers like anyone else when people ask me what you still really want to know as far as factual knowledge one of the first things I always say is what really happened in our ancient past and what is the true story of human origins I mean the real you know fundamental true story of it we have fragmented pieces of this puzzle we need to work together to bring these pieces to the table and assemble them okay that that's my take on that okay thanks a lot I appreciate absolutely great call and a great topic so I think they're all very important and really we should you know discuss those things and we should come together try to and provide answers to those questions so I don't when you see if anybody else yes here we go caller from Southeast Pennsylvania you're on what on earth is happening my good friend mark Patsy how are you eirick G what's up man I'm good you know what dude I had I would really had chills when you mentioned the film time machine because I was just thinking about that film like two days ago there's a 1978 version yes TV film version my grandmother showed that to me in like 1989 1990 and I remember watching it and I kind of didn't really pay attention to the end but I kind of remembered some of it I was thinking about the end the other day I was like man I hate to watch that movie again because man was really freaky and then you just mentioned it now that was just really bizarre I enjoyed the old version as well the new version I think was much better but I don't you know I think that certain film critics discourage people deliberately from watching certain films they're pressured by their higher-ups to say don't bother with this film and I think that's what happened with the new time machine I highly encourage everyone to check out the 1990s version of the time machine inspired by the book HG Wells this movie is absolutely brilliant and the concepts in it are actually very high-minded if you really take it in as an allegory and don't just try to watch it as just the standard science fiction of you know even a super high budget one although there's some good effects in it special effects you have to watch it as an allegory from a higher perspective and if you do that this is one of the best science fiction allegories out there so I highly encourage people to check out the new version of The Time Machine definitely right cool some other thoughts I had two different directions I don't know what you want to start with but I'm just going to throw this out there hopefully you won't go on too long of attention about it but fear is my control I mean I was just thinking about how powerful fear really is like if you were walking down the street and a group of five guys walked up to you with knives out and ski masks on you would be really scared I mean that's a powerful emotion you're feeling right there's nothing that's really quite like fear is there I think it's the basis of all mind control ultimately the most powerful one by far sure you have to dwell in a base modality as far as consciousness is concerned on fear to really be affected by any of these techniques if you're not in fear and the force that conquers fear ultimately is courage which then brings forward love a higher level of consciousness okay none of these techniques can ultimately touch us that's what it's alternately about and the only way we really arrive at those higher states of awareness is to go within understand the self and conquer fear that's what the underlying mode of consciousness that makes all of this manipulation possible is absolutely and you can end up becoming completely fearless after a while if you just confront the stuff head on eventually you're not scared of anything because you know how to deal with fear so well I mean because like piece of cake you don't feel fear anymore if we get out of body identified consciousness if we get out of $0.05 identification right and we understand ultimately then what our consciousness is that what we truly are is essentially connected with the all it's connected with that which always has been is now and always shall be what is there to fear but how few people are in that state of higher consciousness that's that's the problem that we're up against here so many people are giving in to these lower vibratory states of consciousness which are governed by fear ultimately what our task here is to it yeah exactly ultimately what our task here is is to help those people conquer their internal fear by explaining concepts and ideas to them that will help them to look at themselves reevaluate themselves it's about self-respect again the word respect comes from the Latin real meaning again and SPECT Oh SPECT re meaning to look at we need to help people to take another look not only at the society that they live in but to take another look at themselves and that gaze needs to be directed inward not outward because inward is where the causality the causal factors are ultimately arriving from what we bring out of us from our generative Center which is ultimately the heart which is ultimately that which we care about and direct our focus and attention toward what we pay attention to what we use our time and resources to imbue with energy I guess you could say and if we assist people help people to gain more courage that's how we're going to defeat these forces of fear and ultimately the forces of manipulation and mind control good good point one more thing that you would talk weeks ago about colors and using greeting that's nationalizes trust well that's why the money's green that's right that's and that's why they were always talking with the environmental things Oh be green because right if you green is the color of trust then subconsciously you're going to just you know the first thing you subconsciously think when you look at it or think green is trust the first thing so you're starting off at a premise of trust to begin it green is also the color of nature and balance and love energy okay it's the color of the on a hot - chakra in the chakra system a heart chakra okay it is the balance or focal point of everything the color green okay this is why they use it to UM take people into the the fake green movement which is based on carbon and carbon taxes etc it's all there just Institute more authoritarianism and control and get people to live you know in ways that are completely based basically you know to get them this you know live in the most wretched of ways you know not even to have heat or lighting or anything like that you know because they were were as people destroying the earth one of the biggest danger to the earth because of resources that we use I agree we need to re-evaluate the way that we live and you know basically I have more respect for our living planet which supports our life but this fake environmental movement put out by people like Gore Al Gore and and who's the other guy for our UN Maurice strong etc this is all done from that means of tighter authoritarian control that's it an implementing of new taxes that will be paid you know to these elite bankers that's absolve it's there for and there they are co-opting this through the color green we need a true green revolution not one that's based on carbon taxes and this you know eight idea of carbon dioxide being a dangerous greenhouse gas when it's only you know it's it's it's a pittance next to a water vapor being the biggest greenhouse gas of them all we're going to do in try to eliminate water on the plant that's going to be the next big evil right carbon dioxide has nothing to do with the warming it follows the warming the solar cycle has a great deal to do with that and water vapor is the biggest greenhouse gas so good luck with eliminating that but to go back to the point they co-opted this idea with the color green the true green revolution is the revolution in mind in consciousness and that is the balance between the left and the right brain hemispheres Reds the symbolizing the left brain hemisphere blue symbolizing the the right this is also why police use these colors you know the red and blue flashing in in quick succession it's it's a colors that represent imbalanced consciousness now and that's how they're being used I'm going to get into that deeply in my lecture at the free your mind conference actually um and talk about the the visible spectrum of light and how this is uh co-opted and used in different forms of occult mockery that's going to be my topic at the free your mind conference occult mockery about how they mock the police with these colors and their uniforms and symbols and the military you know and how its put on money for these very very topics you know and how they mock the average person that understands nothing of this Oh mark it was nice talking to you getting on show again and uh how's everything going with the with the mind control conference is it getting booked up it's pretty good yeah um it's better than it had been I was kind of in a funk about it for a while but uh you know some people have stepped up and you know we had a good response for the last fundraiser we're going to try to put one more fundraiser together on the 18th that's not completely confirmed yet so I couldn't announce it tonight but over the next day or two I'm going to try to have some information up on the site about that and hopefully we could just bring a little bit more money to help offset costs for bringing in speakers because it's expensive but we've been getting some more help and we're in crunch time now so anybody that can help out in any way if you can make a donation or contribution now is the time to do it I'll get your tickets in advance that will help a lot as well so yeah that's where we're at with that and thanks for bringing that up Eric won't they want more quick thing sure Lance to put it on DVD um we we are going to have somebody film I don't know if that is going to come out high enough quality we'll see afterwards and see what kind of footage we end up getting hopefully it will be and we'll do some DVDs of it we're going to try if we can get the screening to work properly from inside the venue to broadcast some of the speeches and presentations are over-the-air as well through streaming and more will be announced on that in coming weeks Eric thanks so much man I think that's about all we have time for this week but I always appreciate you calling in man and uh you know keep it keep up putting the good word out there man well we did that Marc take care buddy thank you bye-bye take care thanks man alright alright ladies and gentlemen that's about all we have time for here on water on earth is happening this week I think it was a great calling show is a lot of fun we'll have to do this again in the future think what I'll just going to jump into next week is mind control methodology number 13 the usage of subversive symbolism the language of symbolism that we need to become literate in if we're going to break these mind control methodologies so this is a big one and I'll spend many weeks on this and we'll be getting into specific symbols over the next many weeks so with that having been said I want to thank everybody for listening even listening to what on earth is happening right here on the Intel hub news network my wet unmarked passio my website is what on earth is happening calm the networks website is the Intel hub news network calm I'll see you here next week folks thank you and good night you

What On Earth Is Happening Show #046

Topics: *Mind Control Methodologies, Subversive Symbolism, Solar Symbolism, Life Force Symbolism, Astro-Theology Symbolism*

[Music] you're listening - what on earth is happening right here on the Intel hub news network I'm your host mark passio today is Tuesday February 8 2011 my website what on earth is happening dot-com the network's website the Intel hub news network com I'm hearing some background noise on the network and not sure where that's coming from but uh this show is live every Tuesday evening from 8:00 to 10:00 p.m. Eastern Time tonight we have a real good show lined up for you on subversive symbolism in modern culture and this is part of our ongoing series on the methodologies of mind control we've been covering various techniques of mind control that are employed in the modern world that go back into the ancient world as a matter of fact and symbolism is one of the biggest this is technique number thirteen out of the 14 that we have outlined for exploration on this radio show and we'll be delving into a bunch of different kinds of symbolism this evening but specifically we'll be focusing on solar symbolism which is symbolism that employs the Sun as an archetype of image we will look at lifeforce symbolism and we will look at symbolism that employs concepts and ideas of Astro theology so we looked at Astro theology as tied in with religion as a method of mind control formally on this show and Astro theology is also employed in some symbolism that is uh is used to basically subvert consciousness we're going to look at some forms of symbolism that basically get into the subconscious mind and of course these are used through advertising and product placement they're also used in certain groups and orders symbols and they go right past the conscious mind symbolism is a language in and of itself it is something that we need to understand as a language because it is a language that is not based in words as we consider languages to be it is a language based in forms and forms often of strike notes with us that are much deeper than any words ever could it's the foundation of everything that we perceive forms are art types essentially and that's what symbolism has as its basic building block so we will be looking up deeply into many symbols I want to direct people up to my website at what on earth is happening calm and they're on the radio listen page if you click the button on the left hand side for the radio show you will see that there are many images posted for tonight's show there's a section underneath the player called images for tonight's show February 8 2011 and you'll see the three kinds of symbolism there that we're going to explore tonight you could follow them as I get into them from from that page so with that having been said I'm going to give the calling numbers and read the event announcements and then we'll jump right in okay call in numbers feel free to call in at any time there's no tableau topics on this show there never are I'd like you if you do call in tonight to talk about symbolism a little bit you could bring up other things if you want but if you have any comments or suggestions or symbols that you want to explore or would like you know analyze or like my interpretation of feel free to call in and talk about that so the calling numbers there's two you could take your pick if you're listening on the talk show Network you can call in two seven two four four four four seven four four four once again on the talk she'd Network callin to seven to four triple four seven triple four and put in the call ID number for this show which is eight three five one five once again the call ID number eight three five one five if you're listening on the blog talk network you can call in two six four six seven two seven three three eight seven that's six four six seven two seven three three eight seven okay a couple of event announcements for events coming up in the Philadelphia area truth freedom prosperity and activist group local to this area is hosting their free documentary screening and discussion evening tomorrow night February 9th that's Wednesday February 9th at 7 o'clock p.m. at media Bureau Studios media Bureau Studios is at 725 North 4th Street that's the corner of 4th and brown in Philadelphia it's in the northern Liberty section of the city they will be showing the documentary melt up the beginning of the US currency crisis and this is kind of an ongoing thing with true freedom prosperity showing some financial related documentaries a discussion will be will be uh will be held following the documentary it's not that long so there'll be plenty of time for discussion afterward so for more information on this group and their activities please visit www.gfi.com/webmonitor 9th and Sunday April 10 2011 at rubra hall 414 green street in Philadelphia PA the doors open at 9:00 a.m. on both days and the program begins at 10:00 a.m. on both days admission is only $20 per day in advance and $30 per day at the door for your mind is a unique two-day conference scheduled for April 9th and 10th 2011 in Philadelphia featuring multiple speakers and diverse educational materials for the purpose of raising public awareness of the critically important topics of mass mind control techniques the covert and subversive influences upon our consciousness and behavior trauma based and ritualized abuse and the practical mental and emotional healing methodologies available for those affected by these devices the featured speakers Aaron McCallum alfred Weber Andrew basiago Bob Tuscan Sauer your dozous Freeman fly Yan Irvin John Nicholson Joseph Maura Larkin Rose Laura Eisenhower mark motika mark passio Michael Kelly Paul Marco and Suzanne Taylor 16 speakers and all will also be screening Suzanne Taylor's film what on earth which is a journey that explores the crop circle mystery it's a very good documentary on that phenomenon will be screening that on Saturday evening and then on Sunday evening following the speaker lineup there will be a roundtable panel discussion of whoever whatever speakers are still there at the end of the of the night so that should be quite interesting for more information on the free your mind conference please visit www.rkphotomagictrix.com as you will save money and you'll also help us to cover travel expenses for the great lineup of speakers that we have for this event so go up to the site get your tickets early if you can consider making a donation instructions for doing so are there on the website so that's the event announcements let's jump in with our topic subversive symbolism as a methodology of mind-control we have already looked at 12 methods of mind-control in detail on this show over the past weeks if you aren't familiar and you haven't listened to those shows you can go back into the archive by going to what on earth is happening calm and clicking on the podcast tab of the website and there you will see the past 45 weeks of shows listed there all of the podcasts are free they're all in mp3 formats so you can easily download them and put them on any digital music player or phone and listen to the mat at your leisure so we're going to delve into now the thirteenth method of mind control out of our 14 that we originally outlined and what we need to understand about symbolism as I've said already is that it is a language in and of itself that means that we need to become literate in this language if we are going to understand exactly how symbols are being used in our culture in our environment if we are illiterate in this language just like one can be illiterate in the language that of the country in which they live and therefore not be able to read not be able to write essentially okay that puts you at a distinct disadvantage in any culture if you don't know the given language for that specific geographical location of course you're going to be at a disadvantage similarly with symbolism if you are illiterate in this language you're going to place yourself at a disadvantage when it comes to understanding what is actually being said through this occult language and that is indeed what subversive symbolism is it's an occult language so as we've talked about before on this show the word occult simply means hidden for people who hear that term and respond immediately with a instinctive reaction of oo cult means evil that's a mind control technique in and of itself surrounded by the connotation of words okay when people hear the word occult and immediately think associate that with the word evil it means that they don't understand what the occult is number one number two it basically means that they're under a form of mind control through language because the word occult simply means hidden it comes from the Latin verb occult RA occult RA means to hide or to conceal occult simply means that which has been hidden from sight and reserved for a select group that has been initiated into said knowledge when that happens that knowledge could be used for great good or for great evil and indeed the occult encompasses both sides of that equation we need to become more mature as I've said in past weeks to understanding that there is a light side to the occult and most certainly there is a dark side to the occult over the last few weeks we've been kind of initiating people into a few different schools of occultism we looked at the tradition of Kabbalah Kabul ism is an ancient uh Middle Eastern occult philosophy and indeed it has made its way around the world and we looked at Tarot in past weeks the tradition of the Tarot and the tarot cards we analyzed in depth the symbolism of the Major Arcana of the Tarot Dec and this was an introduction into symbolism when we looked at the Tarot symbolism and broke down each card in the Major Arcana and understood how this related to the symbolism of Kabbalah which is its main symbol being the Tree of Life the sefirot ik Tree of Life and we broke that down in previous podcasts in detail as with any language which is what symbolism is it is comprised of basic building blocks so take English as an example if you're going to understand connotative lis okay meaning how the words are being used what is being said in English you first need to understand the vocabulary of the English language so you need to know what words mean to be able to understand what someone is saying okay that's fairly obvious should be extremely obvious to anyone but if you're going to understand words you have to understand the letters that comprise those words so there's a prerequisite for understanding words or basic vocabulary terms and that is to understand the basic building blocks which the words are comprised of and those are the letters of the alphabet achill system which is used for that particular language so you have to know your ABCs before you build up a vocabulary and can speak fluently in any given language okay it follows quite logically it's very simple to understand the same is true for symbolism you have to understand basic symbols the most basic of symbols before you could begin to understand more complex symbolism okay so the study of symbols or symbology is to go into the very basic forms that symbolism takes and to learn those basic building blocks first and in doing so then we can work our way toward an understanding of more complex symbolism so what will do here today is we're going to begin to break down some very basic symbolism okay and this will follow a progression it will follow sort of a logical linear progression as we do this because we don't want to get ahead of ourselves because then we're going to be attacking symbols that are a little bit too complex to grasp without the prerequisite understanding of the basic building blocks of simple symbols okay so let's see the three kinds of basic symbolism that I've then I've prepared for tonight's show and you'll see them listed there on the on the website on the radio listen page our solar symbolism lifeforce symbolism and Astro theological symbolism now we've looked in depth at Astro theology when we talked about religion on this show in peat in previous weeks again I highly recommend people to go up to the website go to the podcasts if you're not familiar with astra the ology by listening to the show or by reading about it through other sources there is extensive information listed in the podcast section on Astro theology several weeks back I'm going to start with solar symbolism okay so this is symbolism that employs the Sun as a basic building block okay it can have lots of other aspects of symbolism within these symbols because in many cases they are complex they're not just simple symbols but we're going to actually look at how the Sun is used in affecting consciousness of the viewer of specific symbols symbolism is all around us in our culture it's everywhere it's omnipresent you can't go anywhere without seeing it you can't go anywhere without it being employed without it being used and it's being used for specific purposes okay and those purposes in general the number one purpose of subversive symbolism before we get into the breakdown of the solar symbolism the number one purpose of symbolism that is being used to subvert consciousness and to place it at the mercy of some other force or some practitioner or some business entity or some military entity or some government entity okay the main way that it is used is to specifically target a need and this is very critical to understand okay those who employ symbolism for targeted purposes are targeting needs in society needs they are looking at specific needs that for the most part are not being met or that need continuous meeting that need continuous replenishment okay so energy we all use energy and need energy to live so this is one form that symbolism will target specifically solar symbolism will be used toward energy okay it will also be used and there's there's reasons for this which we're going to break down reasons which may not be that obvious at first but once you start breaking this down it becomes pretty apparent and it's actually simple to understand why they would use solar symbolism for these reasons okay anything that is associated with necessity to live food okay money sadly necessity to live in today's society we've talked about how money is an illusion on former broadcasts here on what on earth is happening it's not actually real it's its effects are made real by the mind control of the people that believe in it therefore it can be the determining factor of someone's life or death in this sick mind controlled society that we live in ok so solar symbolism will often be used in situations in which money is being highlighted it will also be used in scenarios that are stressing information okay and the importance of information to a person alright so the most effective forms of subversive symbolism are those that target a need that is not present now this is another thing to keep in mind when we do not have something when we are deficient or lacking in a particular area whether it be physical psychological spiritual symbolism will be used to convey to us that the product or service being advertised through this symbolism okay is what we need so it is selling back to the person through the symbol something that the person selling it knows that the person who they're attempting to sell it to is lacking okay I'll say this again the most effective symbolism out there that is subversive against the consciousness because it is being done in an occult way in a way that is not readily known or observed by the person who it is working upon the most effective will be selling this product through the symbolism and the symbolism will target a need okay to the person that they're trying to sell it to that the the person who is actually attempting to sell this product or service knows that the person does not have so if you know that the people you're trying to sell something to are unenlightened you're going to use symbolism that employs light because subconsciously the being knows that they are unenlightened whether they know it at a conscious level or not they know that they lack knowledge they know that they lack spiritual insight which has always been symbolized by light mystical traditions this is an archetypal symbol and our typo image light the Sun okay this is specifically how solar symbolism is used in our culture so let's start looking at some examples and you'll understand what I mean is we break each one down and I'm going to take my time we're going to you know spend time on each one and look at it in depth and then understand what's being done through the symbolism the first image under the solar symbolism section is bp's logo british petroleum okay and everyone has seen this symbol probably everyone in the united states has gotten gas at some time or another at a BP station okay and quite simply this is the this logo portrays a sunflower okay it's not any other flower it's a sunflower okay you could say okay and before we even get any further let me preface this whole show and the future shows on symbolism clothes I'm going to be spending a few weeks breaking down different symbols maybe many weeks depending on how it goes and how quickly we make our way through this material but I think this is a critically important section symbolism and understanding it so I'm going to spend several weeks on this topic and we're going to be doing pretty much nothing but breaking down symbols over the next many weeks um if you're going to approach this listeners who are listening to the show if you're going to approach this from a left-brain perspective turn the show off right now don't bother okay it's not worth it it will not be worth it to you you will not get anything out of it you will not understand what's being said and you'll not come away with anything that really benefits you so if you want to stay in a mathematical purely logical left brain perspective as we go through the whole symbolism section best of luck to you but for those who are going to say oh there this is just all simple marketing nonsense okay and you're welcome to that opinion but that opinion is wrong okay I know how this symbolism is being used I worked with some of the people that formulate symbolism like folks sorry about that I dropped off stalks you there for a moment I'm going to try to get back into blog talk now give me a moment please y'all called again welcome to blog talk radio if you desire to speak to hope keep us one at any time and the host will be notified there is a caller in Chi otherwise people they need to be able to look at the show playing on your sub-conscience folks to continue to be consumers in this decade wavery based system they print the money so that they can keep you occupied enough so that you go over them so that you're not hungry for that hey Mark hey I uh I dropped off of all both talks you and blog talked there for a moment so a little bit of technical difficulties but I'm back in okay yeah I'm gonna go ahead and bring you back up okay I'm sorry about that not if I'm sorry and I don't have your number I was wondering what happened I think it just may have been it may be a temporary glitch there on my Skype connection all right Allah give you a quickly I'll apologize sitting on air and bring it back up kit thank you very wealthy US citizen it is predicting that in 2011 we will with the most important day in America in more than 50 years he said it would change everything about our lives the way you shop travel invest educate your children and even how you take care of your health and family now this animates an outrageous predictions over the years but the crazy part is he's usually right he can predict the collapse of GM and makes an nack and America's biggest mall owner General Growth property together years ago in fact the Romans called his work entire property you know this has nothing to do with the stock market but it could have a huge impact on almost every aspect of your life and we created a video which you can watch online for free detailing the biggest and look important forget your necks and it's a real eye-opener I can't stress this enough you should at least watch the free video online today it claimed everything in the mail including simple steps you can take to protect yourself you can find the video at www.indiegogo.com audiences it's worth checking out again that www.mwuclinics.com are you keeping your credit cards in so-called bank loans even all the money you feeling it's your moral obligation but can't see a name in sight but what if I told you that in truth you don't know it's in the penny and that the bank's wounded hey Mark hey tomorrow yes so I'm back I'll just try to bring you up after break okay sorry about this great no problem thank you to take care of yourself and your family and I urge you to consider taking action right now the economy will not wait if you want to know more so you can prosper the economic collapse all while staying honorable and true to yourself then call eight seven seven four one seven eight three nine three that's eight seven seven four one seven eight three nine three or visit we can grow so calm right now Kevin covered in water here okay we're back on what on earth is happening and we had a little bit of technical difficulties there before the break but I managed to get back into both talk show and blog talk so here we go we were looking at the BP logo before I dropped off there and we were looking at how it is a sunflower and I was basically saying that for people that want to attack this from a left brain perspective all the best to you but you're probably not going to get anything out of this and you're probably going to just continue to think that all symbolism is just used for clever marketing and that there's never any more subversive usages for it that could basically affect consciousness or behavior and that simply isn't the case but you're welcome to that uninformed opinion so what we really want to do here is look at this from in the best case scenario is look at this from a holistically brained perspective we need to understand forms and those can often be analyzed from a left brain angle however if we're going to look at meaning and the real reason behind some of the ways that this symbolism is used we have to come together bridge the gap between the left and right brain and we have to understand things from a holistic perspective and that incorporates the right brain hemisphere which is the creative side of the brain which is the Sacred Feminine aspect of our consciousness and it is the one that helps us to think outside the box it helps us to think non linearly and holistically so that is what I would suggest would be very conducive to helping us to understand this symbolism okay so as we go forward please keep that in mind the BP logo is a sunflower here we see the Sun being used symbolically to represent energy of course this is an energy company it sells gasoline ok petroleum products and these are seen by us as necessary to our ability to move and travel okay movement is something the solar symbolism is continuously used to relate to okay this is because movement is of course associated with life as is the Sun the Sun is the main symbol of life in almost all esoteric or mystical traditions the reason for this is quite obvious to anyone because we couldn't live without the Sun the Sun provides the energy the heat the light the warmth that we need to live on this planet it helps our crops to grow okay without which we would not have food and would not be able to sustain ourselves um it basically makes life on this planet possible and without it there would be no life on this planet quite simply it is the solar system it is 99.9 percent of the mass of the solar system and it is the life force energy that drives this region of space quite simply so this is why this symbolism this is why the the Sun is used in this form of symbolism it wants you to relate their product with all of those things that we inherently know the Sun provides so you're not just going to think of it as gasoline you're going to think of it as the thing that makes life possible okay because without life there isn't movement and what they're basically selling you is something that makes movement across the earth possible in the limited forms that we're using it right now and in limited types of technologies you know that we have for transportation clearly this isn't the only form of technology that would be able to get us from point A to point B as many of those advanced technologies that we could be using are being suppressed actively by people in the big oil industry okay so um the Sun here being used as a symbol for life energy okay again we'll look at different a different form of this in the next section when we talk about life force symbolism okay but specifically here this is how we're seeing the Sun employed on the BP logo now we'll see this repeated over and over again in different logos and again I'm only putting a very small portion here just a few to give people an example and then you could do further research on your own but the best research is just to observe symbolism in our culture you could just see it all around you once you understand the language that's speaking okay then you understand how it's being used in different circumstances so look at the shell logo this is image number two in the solar symbolism section shell we'll okay so you would initially think okay that's just a shell okay like a seashell okay because it's shaped like that right but if we really look at the symbol from a perspective of remove the outline or make that bottom piece of the outline like a horizon so that it's like a shell shape the window that you're looking through to the outside world okay we would see that there is something that is yellow that is bright that is raid okay it has raised emitting from it this is a son on a horizon okay it right in the symbol you have to just shift your perspective of how you're looking at it instead of looking at the whole thing as outline and all you need to look at it as if you were looking through that red of a thick outline to what's behind it which would be a symbol of a Rising Sun coming up over the horizon again they're using the Sun connected with energy okay and life force something that is necessary and that you cannot live without which we know is not the case when it comes to gasoline okay but this is what they're the idea symbolically that they're planting in your mind this is the reason for that okay the reason that they're using the Sun in conjunction with an energy company okay specifically gasoline okay it's the idea is you need this you can't do without it it can't be done away with because if it were done away with life would be done away with that's the idea here okay let's move on to the third one and look at the Gulf oil logo okay so this has a bright orange disc this is another arc type of symbol the solar disk associated with actin in the Egyptian cosmology or Horus okay as we saw images of Horus when we looked in the Astro theology section and we broke that down okay again this is quite obviously the Sun here okay so the same idea so you obviously you know can see the progression here and understand it's being used in a similar context to associate the energy resources that they're providing you blue gasoline with the life force giving energy of the Sun okay we look at symbol number four here on the solar symbolism section it's the Sunoco logo another gasoline company and this is very obvious because here we don't even have actually a symbol that is specifically associated with the Sun we have an arrow going through a yellow diamond but the word itself Sun oil company they actually chose the word Sun for their name son Sunoco was short for Sun Oil Company okay so right there it's very obvious in that one and the reasons for it are equally as obvious once we get a little bit deeper into the psychological motivations for using solar symbolism in conjunction with energy companies so I'm going to take a break right there we have a caller on the line it's our friend Kevin tinfoil from Philadelphia Kevin you're on what on earth is happening how are you good mark thank you again for taking my call you've got a no problem man I want to spout out two quick little things um that had to do with what you're talking about and how the symbolism is used in a way that is uh kind of redefining things and such fashion as to implant suggestions as your suggests as you as you've mentioned and when they implant those suggestions they take in a couple of different formats one of that when I was first starting to study this sort of thing kind of popped out at me as I was driving around I saw a yield sign and that's the clack feminine symbol and the downward pointing triangle and it has like the border around it and it says yield inside and that classic sentiment feminine symbol is very suggestive when you've got that red and white and it doesn't have a black in it but I know the red white and black has to do with some hypnosis and mind-control effects as well specifically stripes and such and just in general the whole yield in general right there is like a suggestion that the Sacred Feminine should be doing and that's very twisted and people don't I think notice that sort of subtlety absolutely the others don't design the yield sign traditionally is also yellow which is used in conjunction with the solar plexus chakra as we looked at the chakras in previous weeks and saw that the colour associated with the solar plexus chakra is the color yellow the frequency yellow this also has an effect on the mind when mind when looking at that sign and yes the symbol is the basic Sacred Feminine symbol of the chalice as we looked at that archetypal symbol in the past related to the Sacred

Feminine or yin energy which is of the right brain energy and that's what the right brain typifies it is passive or submissive or yielding it is uh it is um essentially a plastic and uh it molds to the accommodation of the you know the sacred masculine side I guess you could say but in this in this context they're using it to basically subvert the left side of the brain or the the will and get you to take a passive role in yielding to oncoming traffic or emerging traffic and that's those are specific specifically chosen symbols to do to do just that to get you out of the left brain mode and to put you into the passive right brain modality absolutely a great example the other one that I noticed that was a again once you learn the language of the symbolism it became very glaring to me but all of my life up until like the last couple months when I first noticed this one I'd never noticed it at all and that's news news9 sweat south so now all of a sudden you've got directions right in there this is a very in my opinion subtle but deep level of programming that they feed into people and by calling it the news and telling you that it's new well it's not really that new it's just what's going on now and and news again when you break down the letters it has that starting letter of each one of the different directions and I think that is it speaks volumes of this whole paradigm and how they can have the ability to twist sacred symbolism into something that's obviously no longer sacred and quite like again it's being used against us sure now but their DNS is just what to do with the news like that that's the whole point is like there tell you they're giving you directions there they're right helping you become pacified to what's going on just be apathetic here here's what it is that's it when we see the letters and ews we often see them on a compass and exactly is telling us which direction to go in so they're telling you that this is your compass for direction in life this is what you need to pay attention to to get to where you're going and that is a very subversive usage of a word of you know directional symbols or markers particularly in today's culture when we know that the news is completely owned news media companies in the mainstream media at least are completely owned by globalist entities and by people who are really looking to subvert the freedoms of the people of the world through um you know a big banking corp Asians intelligence agencies these are this is who owns the news throughout the world but specifically in the United States I mean it is it is own lock stock and barrel in our cricket of own I noticed that the O W and the Oprah Winfrey Network spelled backwards and they can't even do it during their commercial where they like spin the word around the letters around L o WN and that made me think that like wow NW oh isn't that interesting when I spin the words around like it's just kind of like made me scratch my head a little and made me think that like maybe a brand new network is not really what we need as a species maybe maybe people need to turn their TVs off and start listening to more podcast like like what you're doing and stuff do absolutely it's an interesting word reversal there that you pointed out in Oprah her Network and how NWO reversed spells own you know because that's what they're looking to do they want to own everything including the the people and their souls which is what I you know get into talking about on this show that's what this is alternately a war about people would have a hard time you know acknowledging that specifically the left brained or the atheistic event among us but that's what this is real really all ultimately about that's what they want to own and I would also look at another reversal that's in there the word now and we talked about present moment awareness a little bit we will as a solution to this problem the power of now you know getting into true present moment awareness is one of the keys to getting out of this situation understanding the power of the present moment and getting out of time bound awareness which we talked about as number ten of our methods of mind control when we looked at the illusion of time so interesting that all of that you know in that in those three little letters one uses an anagram but those other two words are also contained in the anagram NWO well you have any other ones for us Kevin um not at all unless you like my me tossing out minor little plug for tomorrow night sure go right ahead Minh thank you sir tomorrow night I'll be doing my show caution tinfoil hat area also here on talk show and we will be discussing synchro mysticism with the guy that's made a couple of different videos and he also works with like Jake I see that you've mentioned before in conjunction with synchro mysticism he's been on my show before to do a show that you that you are also on air but this is going to be the other guy that I had wanted to have one or that show that what they will make it fantastic that sounds like a really great topic I will try to listen as I come back from the truth freedom prosperity documentary night I'll be there because I'm helping to set up the projection system through like my computer so hopefully what time's it start 10:00 p.m. yes again it'll be podcast 2 just like yours anyway but like if you happen to be able to call in please feel free I love to have your input let's get cool I'll try to do that if I get a chance if I'm not back from the CFT night too late thanks again mark I appreciate you having done you've got a Kevin always a pleasure have a good night all right Kevin tinfoil from caution tinfoil hat area okay so let's move along with more solar symbolism and let's look at a different application of it if we look at image number five we've gone through the first four images so far if we look at image number five we'll see the goal food logo okay so the dole foods logo also has a Sun coming up through the O in the dole logo so of course this is associated with food food is something we can't live without so to add more appeal toward that toward that idea they are putting the Sun in there and of course yes this makes perfect sense because the Sun is necessary for food to grow so that's a that's a pretty obvious one but nonetheless it makes the the advertising and makes the logo that much more effective because the Sun symbol is speaking directly to the subconscious mind of the person who's buying these products you'll see the Sun on tons and tons of food symbols just about everything it's used continuously now look at image number six here which is the shop right logo okay this is one of my favorites because of what it implies okay and there's a very significant implication in this logo if we look at the ShopRite logo we see that behind the shopping cart full of products you would go to this supermarket to buy chopped right is a supermarket I'm not sure if everyone has them in their area but that's what it is um we would we see that the Rays of the shining Sun are coming out right from the supermarket basket okay so behind the food there's the Sun what this is psychologically implying is that you can purchase light you can purchase lifeforce energy you're not just purchasing food and yes food is not necessary for life but you can actually purchase the Sun and the energy it makes possible by coming here and shopping at our supermarket so um the shop right logo very very interesting and it's one of my favorites because it also is spelled RIT right as a ritual okay not ri ght right the right way but right as in a right or a thing that is done ritualistically okay so one of my actual favors their shop right look at number seven which is the discovered logo discover credit card okay and there we see the Sun on the coming up over the horizon on the Discover card money is another form that the Sun is used continuously in in different logos I neglected to put one in here a Conestoga Bank has a interesting one that is supposed to look like a wagon wheel but is also a Sun symbol maybe I could add that in you know for the podcast but discover clearly right in the middle of the oh there again the Oh with a dot in the middle this is an ancient symbol for the Sun use them in a park title in its art type or form the dot would be circle around so here we see that in the discover logo okay image number eight Sun trust again right there in the word and the symbol and this is a mortgage company so implying that you know money your home all of these things here's the things necessary for life okay money constantly emphasized as being indispensable and absolutely being needed for being able to live at all okay not just in the context of our society but uh in an absolute sense okay so we see this repeated over and over again when it comes to anything having to do with money there it is in SunTrust logo very prominent and they're they're associating it with the idea of trust okay is a mortgage company anyone you should really trust no it's called a trust however okay uh and that's putting that idea in there connected with the Sun you know we trust that the Sun is going to come up every day see how these ideas are combined they're always tag-teaming different ideas and symbols to put a message into the mind without really speaking it that's why this is a language it's a language symbols are worth a million words they're not just regular pictures okay look at city banks logo here an image number nine in the solar symbolism section and you see the word city in bold okay and then Bank okay and then we see the Sun coming up over what looks like a horizon with two pillars on either side of the tea we also see the cross of the tea okay it is a Stroh theological symbolism by the way okay the cross as we saw played in significantly in zodiacal symbolism because it is the quartering of the zodiac wheel into the four squadrons that represent the seasons okay we'll see that in the next action the word 50c ITI is formed from the same basis as the feminine sex organ Cetus okay so this is this is also putting in there the combination of the male solar with the feminine CIT I okay the root for the feminine reproductive organs okay and then associating all of that with the word Bank so it's saying money our bank these are this is solar energy this is what's necessary for life and this is also representing the merging of the male and the female which it knows everybody ultimately once deep down inside because that's the way to enlightenment and that's the way to higher levels of consciousness and getting out of the situation that we're in as far as what's playing out on the earth goes and it's putting all of those things together in this in this logo we also have the three pillars symbolized again as we saw in the Kabbalistic tradition and we will see in the free Masonic tradition when we eventually break down that symbolism but there's the three paths the left-hand path of severity the right-hand path of mercy and the middle path of mildness that we saw in the Kabbalistic tradition so look at how many different archetypal symbols here are combined in the Citibank logo and if you think that they're not thinking of this when they come up with these logos you're kidding yourself okay people will pay millions of dollars to have logos design for the archetypal symbolism that they contain and the effect that they know that they will have on the viewer that doesn't make a difference whether you don't understand these different are esoteric symbols they are going to have a subconscious effect simply by being view anything here's the intro music for the next break ladies and gentlemen will be back shortly I'm your host mark passio you're listening to webinars on your credit cards in so-called Bank alone till you get your the money you feel like it's your moral obligation but can't see an end inside well what if I told you that in truth you don't know a single penny Bank for this then hope you don't find out here's where you come in we to prosper calm specializes in a profound debt repudiation method which challenges ability that this so-called X quarterly plead you for the burdens and protects your property I want should sit this off in superior to settlement tank up to the consolidation which often lead you in a real situation if you feel the moral obligation to take care of yourself and your family tonight I urge you to consider taking action right now because you're not yet if you want to know more so you can possibly the economic collapse almost an honorable including yourself then call eight seven seven four one seven eight three nine three that's eight seven seven four one seven eight three nine three or visit think across the got down right now hey Shepherd be hopefully in come check out my life chart and Sunday opium simple salmon time you can check it out from my website the Intel Hubbell a narrow comm one of these changes is John King and a secretive Thursdays and Sundays and tasty and research privilege radio on the inside of food a very wealthy us within is predicting that in 2011 we will with most important day in America in more than 50 years he says it will change everything about our lives the way you shop travel invest as you give your children and even how you take care of your health and family now this man is made from outrageous predictions over the years but the crazy part is he's usually right he he predicted the clapping GM MBA Freddie Mac and America's biggest mall owner General Growth Properties of few years ago intact Burrell dish called his work and dire prophecies now this has nothing to do with the stock market but it could have a huge impact on almost every aspect of your life and we believe he created a video which you can watch online first week detailing the biggest milk important prediction yet and if they're real eye-opener I can't stress this enough you should at least watch this leaving your arm line today he explains everything even no including the steps you can take to protect yourself you can find the video at www.americanoutback.net NW back end of america the number eight comm watch this TV deal at www.viki eight calm your listening to the Intel hub network impression by piece [Music] [Music] okay we're back on what on earth is happening on your host mark passio we're into the second hour of the show now so let me give the callin numbers again feel free to call in at any time be calling numbers for the top shoe Network seven two four four four four seven four four four once again that's seven two four triple four seven triple for the call ID number is eight three five one five if you're calling on the blog talk number that work feel free to call in two six four six seven two seven three three eight seven I was analyzing solver symbolism we were at the Citibank logo which is number nine on the list up there on the radio listen Paige at one on earth is happening if you want to follow along with these images they'll be also posted they will also be posted to the podcast when I get the podcast up um number ten is target target is a kind of like a superstore similar to Walmart um and there we see the main symbol of the Sun that the dot with a circle around it symbolizing the solar system okay it also there you see of course it represents a bull's eye okay it represents like the center of a dartboard and this is critical because becoming enlightened is coming to one's true spiritual center okay it is reaching one's target okay oh the words are specifically chosen to go along with the symbol they're putting things together in a psychological map so that these ideas are all associated when we look at that logo immediately by the subconscious mind as I said before the break it doesn't matter whether you even understand this at a conscious level it will have an effect at the subconscious level before we move on to the next one there's one thing I neglected to mention about the Discover Card LoVo which employs the Sun coming up over the horizon discovery is made possible by shedding light upon something okay so they're associating the concept of discovering something new which you know the credit card might make possible getting new things okay so this is another association in the psyche that is that is being put together through the symbols of shining light upon something enables discovery okay so it the words are also being used in conjunction just like we see in the Citibank logo the SunTrust logo the ShopRite logo and the target logo okay moving on the image number 11 the NBC logo NBC network okay television network here we see it's the famous NBC Peacock logo okay and there are the six colors of the visible spectrum of light okay employed in a radial design which basically form a radiant Sun coming up over the horizon again this is a symbol we see over and over and over again the Sun on the horizon or coming up over the horizon okay in the middle there is white is a white teardrop shape okay and this white one represents the balance between all of them it's in the middle okay because it represents the Enlightenment of coming on line to one's true center or spirituality it also contains the alchemical symbol of the peacock which we briefly alluded to when we talked about Astro theology and looked at the peacock used in the court of the pinecone at the Vatican which symbolizes the balance between the left and right brain and the activation of the pineal gland okay so this this symbol is connected to ancient alchemical symbolism of the peacock which represents the third stage in the alchemical process called the great work so all of these things put together in this symbol and it ultimately represents light again the visible spectrum of light broken down into its constituent wavelengths these colors look at image number 12 now the sun microsystems lovo sun microsystems being an information technology company okay and we see the word sun used repeatedly throughout the design name of the company is sun and their logo says sun every way that you turn it no matter how you turn it it still says the word Sun it's comprised of these eight view shaped lines okay which are formed into a diamond pattern which if you look at it looks strikingly like a swastika okay now the swastika is a symbol that we know from Nazi Germany most of us but most people don't know or who haven't studied symbolism will not understand that the swastika itself is a symbol of the Sun it was also a symbol of good fortune it was used in the Far East as a symbol for good fortune the Nazis took this symbol which represented the path of the Sun upon the zodiac and because they were a male Dominator solar energy cult okay of Oh cultists and Psychopaths and they turned the logo into its inverse they reverse the direction of the arms of the swastika and turned it into a symbol of ill-will and hatred and you know rising masculine only energy solar only devote divorced from the Sacred Feminine lunar energy okay so it represented the yang energy only divorced from the yin energy now that is not necessarily how I'm saying it's being used here in Sun Microsystems logo it is being used to portray the idea of the Sun as representative of having knowledge because this is an information technology company so another way it's solar symbolism is news we saw it used in energy and food in money and of course now we see an information these are all things that we associate as necessary for life and living and prospering okay life prosperity okay so these two concepts often put together this is why solar symbolism is employed here the next logo lucious lucious trust this is a publishing company that published a lot of New Age books again the symbol of the Rising Sun were at image number 13 now the Rising Sun coming up over the horizon okay and the name lusus means light and again the word trust in there again associating all of these ideas where information information enlightens lusus means light it's where the word Lucifer comes from meaning Light Bearer in Latin okay looks fair eh so uh and then the word trust time all of these things together saying trust our information and we'll make it we'll make you have the light see the light the enlightened etc okay image number fourteen in some some books that were published out of there have some validity to them and some I would say are putting people off the path to true enlightenment the New Age movement is it is kind of a tricky one and you have to be very wary of the sources as we talked about before when we looked at controlled opposition the image number fourteen we see the central intelligence agency the CIA official seal okay having a shield with the Eagle over it with the Micheel having this a sunburst pattern on it okay and we also see the cross there which is astro theological symbolism again so de Vil symbolism the quartered zodiac okay but on the cross the Sun with its rays of light and of course this represents total awareness as far as information goes that's what when CIA's goals and job allegedly are supposed to be a warehouse of just data and information and knowledge storage of that about everything and everyone okay so they're putting the Sun there on that logo that shield as well okay associating this with a concept of protection that you need this to be there for protection for life and so that we have the necessary information there to provide that protection in that life see how health these ideas are associated through the symbols these are specifically chosen symbols to invoke those specific reactions if we look at image number 15 now here we rounded out full circle okay image number 15 is Obama's logo Barack Obama's logo that he was campaigning with throughout his campaign before he became the president of the United States we see that it is the Sun coming up over the horizon okay it is the Sun that the sky is behind it we have a white bright Sun coming up that it's the colors of the US flag the blue with the with the red and white stripes with the red and white stripes form a hill or you know a curvature of land and then over that we see the Sun rising and this is supposed to be at an own for Obama with the colors of the US flag in it but clearly what we're really looking at here is a Sun now this is done for very specific reasons this is done because Obama was put positioned as a saviour figure he was positioned as someone they would come in clean up the mess that had been happening in the United States before 2008 and he would save everybody nobody would actually have to really take decisive political action were actually changed themselves okay he would just come in and do it for every everyone as some kind of a savior or Messiah and as we've seen that the Jesus figure is associated with the Sun in the asteroid Thea section I won't go into repeating all of that but look listen to the podcast on a Shore theology read the books that are linked there in the podcast on those topics and we understand that in the Christian tradition which is basically a theology Jesus is the son who is the savior of the world not son som as in son of God but son su and had the Sun in the sky who continually brings life he is the light he bring as the bringer of life and he continuously rejuvenates the world by rising again after he has died and gone into the underworld the dark of night conquered by his brother set of course we saw he was associated with the Egyptian god Horus and many other son savior figures throughout antiquity so the astro theological tradition as related to Christianity is all about solar worship it is all about the ancient cults of Astro theology Astro theology of the ancient world namely the solar cults and this comes down to us in its modern form in the religion of Christianity and the Saviour figure known as Jesus so um Obama is being associated with a Christ figure or a hero figure this is another archetype okay being used and it's being employed through his logo and associating that logo with his name and this is a clear example of subversive symbolism if we just look at this it's very easy to understand that Obama was being positioned as the one who would come and save us from ourselves that's why so many people grafted onto him they positioned him as a template for whatever change anybody envisioned he was never real super specific about what kinds of changes he would want like he's trying to push for this ability to shut down the internet like they're doing in Egypt he's trying to push for this new emergency network you know giving the present president even more new emergency powers all utter nonsense all more power grabs all trying to further enhance the power of the executive branch out of proportion the other branches of the US government but needless to say what how they accomplished his psychological grabbing of the psyche of the American people was to get him to put forward the idea of change and to be vague enough about it so that anyone could graft onto that and associate with that idea their ideas for change and in doing so he would act as a savior figure to anybody and that's why he was so extremely successful during his presidential campaign in 2007 and 8 so this is the this is how this solar symbol solar symbolism can be used in political situations as well so let's move on to the next form of symbolism which is life force symbolism now this is very similar to the solar symbolism as we will see because of what it tries to relate to ok it's relating to things that are necessary for living and it's also associating the things with energy and money as we saw with the gasoline logos associating with the solar symbolism so um the first one here is Luke oil Luke oil is a Russian gasoline company that operates in the United States as well I don't know if you may have them in your specific area I know we do have lots of them here in Pennsylvania so Luke oil there's their logo here is an example of life for symbolism ok being used in a subversive way to associate an idea in one's mind with the product that they are selling to you something that you need for life ok and something that they want you to continue to think that you need for life but it's it's confusing all of these ideas simultaneously in in the one logo ok so you'll see the Oh in Luke oil is a droplet small droplet okay and what that is supposed to represent is ostensibly it is supposed to represent oil a droplet of oil but oil is black in color okay crude oil okay we're fine gasoline is a clear or a yellowish type color okay a tannish it's not red their logo is always red this draw regardless of what color that the logo letters may be written in is always red there's a reason for that it is not a drop of oil it's a drop of blood and we'll see this red drop repeated over and over again in certain symbolism and this is done deliberately this is done because they are associating their product with life force energy life force is considered to be carried by the blood in mystical traditions you couldn't live without blood if you were if you were cut and bled out you die um so I thought I heard the intro music there there it is so we will continue and pick up with some light force energy symbolism on the other side of this break be back in a moment focusing [Music] are you still paying your credit cards in so-called Bank alone if you ignore the money you feel like it's your moral obligation hope you can hear me hello yeah hi so I didn't we did knock you out with that music and little greeting of this board there it was supposed to be an inch or break it said to blind it was hardly that I'm trying to run you wanna be running with her spot spot at 40 in well yeah that's funny usually does it at 20 and 40 okay all right sorry about all the difficulties man you know you're gonna make sure it's bad okay no problem thanks then call eight seven seven four seven eight three nine three that eight seven seven one seven eight three nine three or visit three can crusher calm right now hey Shepherd we hosted the info hum check out on my live show every are they opium crystal Anaheim you can check it out from my website the Intel double-a do calm tiny changes of counting an AC Griffith Thursday and Sunday evening at 8:00 p.m. eastern Pacific radio on the inside box news they really want to us and is bigoted we met in one um even with the most importantly in America in morgan's fifty year he said it will change everything about our lives the way you shop travel invest educate your children and even how you take care of your help and family now the examination count rages projections over the year for the crazy part is he's usually right he predicted the collapse of GM and Mae Freddie Mac and America's biggest smaller than General Growth Properties years ago in fact erroneous called it work a dire propagate now this has nothing to do with the stock market but it could have a huge impact on almost every aspect of your life and we've included a video which you can watch online for free detailing as biggest and most important mission yet it's a real eye-opener I can't stress it enough sure that we watch this video online today we played everything even more including simple steps you can take to protect yourself you can find the video at www.americanoutback.net interview doc end of America the number 8 comm watch the free video at WWE at America stay calm we are to the Intel hub network compression order P five kings okay we're back on what on earth is happening under host mark passio before the break we were talking about symbolism that is associated with life force energy and how it basically sells its products to us by associating them with that concept and the blood okay is considered to be life force in many mystical traditions and it's very clear why without your blood you would die you need rope you have reliance on your blood to just sustain life if you were bled out life would be gone with it this is why many ancient traditions consider that the life force was carried in the blood so if we look at image number two in this section we see this theme repeated with a blood drop associated with a gasoline company again um and of course you know they can make the drops black but they're not they're always red always red okay so this is a this is the main gasoline company of Mexico Pemex okay and there we see it associated with a Falcon which is also a solar symbol or a hawk okay if we look at image number three we see more teaming up of these are typo symbols we see the blood drop in the getty gasoline logo as being red okay always red you'll notice this all the time you can find the Getty if you have a Getty in your area you can find the getty gasoline logo and may be written in different colors but guaranteed that that drop is always red always okay and then in the middle of the blood drop there's the solar disk so now we have to our title symbols combined here the Sun and blood okay associated with Daddy gasoline uh on the final one for this section we look at Commerce Bank now commerce I don't believe is around any longer I believe that they were merged and it is now part of a bigger Bank whose name seems to escape me at the present moment but the commerce was really big here in Pennsylvania years ago up until recently when they were bought out and merged but you think a bank takes its logo seriously you think they do a lot of research and go to graphic designers and marketing executives and psychological experts before they put out a logo that's going to be seen by thousands hundreds of thousands if not millions of people you better well believe it okay so they're not going to just come up with something random and yes people will say that's a C standing for commerce and I understand they're intending you to see that but just look at it it's a droplet and it's a red droplet and again this is associated with blood lifeforce energy being associated with money and commerce and a bank right there in the logo symbolically being used to get into the subconscious mind to associate different ideas and to merge them in the subconscious so that they are one in the same so when you think of life force energy and you think of vital forces that are actually needed for you to live you will think of their bank you will think of banks in general you will think of money in general hey this is what this is done for that's the reason that this is done okay so that's the life force energy section let's go now to the third and last section that I was planning on breaking down this evening which is Astra theological symbolism okay so we're going to break this down into three distinct sub sections okay so there are 23 images in this section images 1 through 7 are going to be general Astro theological symbols more specifically they're going to be associated with the zodiac these are symbols that are used in association with Astro theology but specifically these first seven or so vehicle symbols okay and we'll see images we'll see examples of how zodiacal symbolism is used in images 8 through 15 we are going to look at planetary and stellar cult symbolism planetary and stellar symbolism so this is the cult of the stars and planets used in different product placement ok ah in images 16 through 23 we're going to look at specifically one House of the zodiac namely pisces pisceanas embolism we are now in the Age of Pisces okay and Pisces is in what that means is that the Sun rises in the spring equinox in the house of Pisces there's no vehicle house of places so this is the age of the great year that we are currently in moving toward the house of Aquarius but still strongly in the house of places there for a solar symbolism will be often associated with Pisces the symbol of the two fish and religious symbolism will often be associated with placing symbolism before I break down this entire section I see that we have a caller on the line so here we go caller you're live on what on earth is happening what do you have for us this evening hello caller are you there taller on the top shoe Network we go call on the talk-show network you're live on what on earth is happening are you there going once going twice gone perhaps he's just listening in or you got nervous either way if you want to come back in just type something in the chat and let me know all right so let's go into the Astro theology symbolism section image number one shows the BMW logo famous car and the famous designed here of the their logo being a black wheel and then the BMW letters displayed on the top and then under with in the center of that black circle is a quartered circle with a checkerboard pattern of white and blue within those quadrants now as we saw before this equal armed cross in the Astro theology section lonely broke it down will see this come up over and over again in different forms of symbolism we already saw in the cia's logo in the solar symbolism section that we looked at earlier but here is this equal armed cross the wheel of the zodiac around it Hey another archetype of symbolism crosshairs with a circle around it representing the sun's path throughout the year symbolically again it's associated with life and movement movement this is the important part of this section it's a suit associations with life and movement and energy these are symbols to come up over and over again related with these three concepts okay the cia's logo is image number two we saw that previously and we talked about the equal armed cross there and its associations so this is also an Astra theological logo not just the solar symbolism one an image number three we see a metal and this metal is a United States metal with the the obverse side of the Great Seal or symbol as from the adverse side of the Great Seal on the on the metal representing the Phoenix and he's holding the the olive branches and the arrows so it says eat Orvis unum which means from the one many but this this crest is put in the center of a equal armed cross and this cross is known as the maltese cross because it is a representative of the symbol that is associated with the order of the knights of malta ok malta being a a small island off the coast of italy now this um this is also solar an astral theological symbolism ok we see the solar disk there on the cross of the zodiac that's what this symbolism is portraying an equal armed cross associated with the cross of the solstices and equinoxes of astro theology of the zodiac with the solar disk on it the Phoenix also a solar symbol just like we saw the hawk on the Pemex logo or the falcon we see the Phoenix here which is the American Eagle it's used interchangeably originally it actually was a Phoenix on the Great Seal they change it to the Eagle arm and this is associated with the Sun and it's regenerative and renewing properties because it makes everything grow when it comes back up in the spring season ok so it is the continual renewer of life and that's what this symbolism is supposed to ultimately be about if we look at image number 4 we see the Knights of Malta symbol itself again the Maltese Cross ok this is a secret society it goes back into the ancient world that is connected with the Templars it is connected with ancient solar cults ok so this is a secret society insult in so many terms in basically boiling it down that's what it is at its highest levels and here we see the equal armed cross of the zodiac employed in their rudimentary logo therefore the Knights of Malta now if we look at image number five this is a very complex symbol it's acidulous self this is the symbol of the 33rd degree of Freemasonry so this is an honorary degree that is conferred upon a masonic initiates when they are essentially deemed worthy of it and it is an introductory degree to what is known as the illuminated degrees of Freemasonry we'll talk about that when we get into the Freemasonry section later on on these podcasts but this symbol shows the dual crosses of the zodiac we saw that there is the equal armed cross pointed up and down and left and right which is the cross of st. George these are the solstices and equinoxes and then the the X cross formed by the swords okay is the cross of the galaxy the Galactic cross that's formed by the four fixed signs of the zodiac being lido Aquarius Taurus and Scorpio and look at that in the Astro theology section we also touched on it in the section where we talked about abhava related with its symbolism so here this X cross is known as the cross of st. Andrew so this is this symbol is ultimately based upon astrological symbolism the symbolism of the the dual cross or the eight-armed cross okay just to very briefly look at this further it says the word SAP entia which means wisdom on it it has the serpent which is also a solar symbol and it's a symbol of the stellar cult as well solar and stellar coax the serpent eating its tail we're actually growing I should say from itself it can be viewed in two different ways it can be consuming itself or it can be generating itself this is a the symbol known as the Ouroboros but it is also symbol of this constellation Draco in this in the stellar cults okay so in side that we have Ordo ab KO the words meaning order from chaos okay representing concepts associated with natural law principles but also in its dark sense associated with chaos sorcery which we'll get into in coming weeks when you see the scales we see the illuminated thirty-three we see the crowned eagles the double-headed eagle as a matter of fact representing the left and right brain coming together we see the symbol of the compasses and square Freemasonry with the G inside which I briefly touched on last week a little bit which we will extensively breakdown in the Freemasonry section but this is a sigil this is not just a symbol so not to get too hung up on going into this in depth because signals are much more complex than basic symbols where I put this in this section for is just to a lead to how the basic symbols are then combined with other symbols and it's layered and layered and layered to create different concepts of course we see ultimately around the entire design here over the whole design a nine pointed star for each letter of the words each letter in the word SAP entia so um behind all of it is the crosses of the solar cult the cross of st. Andrew the cross of st. George this is the eight-armed cross of the zodiac Wheel essentially is what I put this in here to display and it is associated with one of the higher degrees of Freemasonry um image number six is the over as an overhead shot of the Vatican this is the st. Peter squareds known as even though it is an oval shape it's called st. Peter's Square in the Vatican and here we see these two crosses once again combined we see the equal armed vertical and horizontal cross which is the cross of st. George and then we see the X cross representing the four fixed signs of the zodiac the four Gospel writers four angels of the corners etc the Four Seasons the midpoints of the four seasons we see this eight-armed cross pattern again at the Vatican with the obelisk in the very middle there you can see it by its shadow because it's pointed straight up at the middle but you see the shadow pointing I believe toward the east okay because I I would assume the Sun is toward the west when this photo was taken um and that that obelisk in the middle is a symbol for Osiris which is the Sun God of course Christianity in Egyptian cosmology of course Christianity is the solar cult religion it is based upon the Astro theology of the ancient solar religions and that is why in the middle of its most sacred place in the Vatican we have the symbolism of the Sun Osiris's phallic symbol representing the rising of the Sun okay and we see the solar cross symbolism combined there right in the Vatican will look at Vatican symbolism in more depth later on when we break down symbolism but clearly the solar symbolism is used extensively in religion as well coming up to another break you're listening to what on earth is happening I'll be right back after these messages [Music] and we'll wear glasses and all Iraqis control population ee Remy the monstrous verminous demanded that on our shoulders mobile crime index known as the you world war together you're all one together hey Mark hey hello we had a call from Eric hey we got a call from Paragon he saw I don't think he's here switchboard I tried to patch him in but he was going to try to call back I tried to tell him you know I can't really talk to you on the air so I don't want to just drop my phone call on you can you put a meeting hall back can you put him through right after the break I'll I'll tell you to put him through after the break okay yeah he's found on anymore he dropped off but he was I told him to wait I try to game on you know about he dropped off so well I got a call I got a caller through uh I got a call her through talk show I'm gonna put him on after the break I'm gonna look at one more image and then I'm gonna put on a call right you got it yeah sorry about your intro music I just couldn't find it man I Bob's got a hundred video audio clips in here I could have I'm still funny but now go to the show hey in there that's not a problem I'll just add it to my podcast when I clean it up all after the show okay it looks like he might be back here he's at three six seven I'll bring him up okay but it could have a huge impact on almost every aspect of your life and once again we created a video which you can watch online for 3d telling the biggest and most important prediction yes and it's a real eye-opener I can't stress this enough because it we've watched its leading you online and they explained everything even millipedes simple steps you can take to protect yourself you can find the video at www.americanoutback.net America the number 8 comm watching a TV lat WWWE end of America 8 calm the artist to the Intel head Network Russian Vikon secure your future dip your non-hybrid feet back now the loonie economic crisis food shortages and other topics disasters now is the time to be ready just click on the area organics banner at the top of our BlogTalkRadio each day here's your future teachers the family in hard times heirloom organic [Applause] [Music] [Music] [Applause] [Music] okay some festive festive music there to come back in for the last segment here on what on earth is happening this evening I'm your host mark passio we have a couple of callers on the line before we get to them I just want to break down one more symbolism related to Astro theology we looked at the st. Peter's Square at the Vatican in the last section but image number seven if we look at that as an image of the Pope that's trope John Paul the second the previous Pope not a Joseph Ratzinger which is the current Pope Pope Benedict but here Pope John Paul the second we see him laden with the symbolism of the Cross now of course this is the symbol of Christianity but we see the equal armed cross used repeatedly in the symbolism that he is employing he's holding the cross of Jesus this arched cross at the base of which is a pinecone because of course this represents the pineal gland being activated to turn us on to the Christ consciousness that's not how it's obviously used in Christianity but they're alluding to it because they know this esoteric symbolism that's why he's holding this in his left hand here and you see the pinecone with his thumb right on the pinecone there but on his head he's wearing the mitre we'll look at that when we look at the Piscean image imagery the Piscean symbolism next week we won't have time to get into that this week but it has an equal armed cross pattern right on the front of it and then on his sachet there you see another equal armed cross pattern if equal armed cross weren't so prominent and so significant to religion why would it be employed on all of the symbolism that the Pope and Software's because it's all about the Sun it's all about the symbolism of the zodiac and ultimately in this section this zodiacal symbolism what I'm trying to highlight here is that these are all used in powerful institutions okay all used in powerful institutions things that are calling to mind Authority and power and that's critical to keep in mind where that's where they employ this symbolism because it is related to the Sun which is the ultimate power in this solar system because it is the giver and bringer of all life and everything that grows and is a necessity for everything that that exists within this system so with that having been said I think I'm going to hold the analysis of symbolism here at this point we'll look at we will look at planetary and stellar based symbolism as well as Piscean symbolism symbolism related to the constellation of Pisces in particular we'll look at those two forms of symbolism next week among some others but I'll hold the breakdown of symbols there I think I hit the audience with plenty for a food for thought and let's take a couple of calls to go out tonight so we had a call on the blog Talk network you could go ahead and put that call her through come on hey Eric how are you gonna um yeah you know it's interesting that these all the Sun symbolism because pretty sure everybody loves this fun yep every time you look at a commercial and you see this on some consciously you're happy thinking like that if you love the Sun I mean what you're setting there were for life absolutely greed what better thing to show you Sun all companies yeah what better thing to associate your products with then the thing that you know is necessary for all life that no one would say oh let's have that let's not have any of that you know people feel better when the Sun is is up when it's a bright sunny day they feel more energy because they do have more energy the light energy that comes down charges our environment it charges us up people feel better they feel more energetic of course they're going to put that symbolism in to associate their product with something that is as powerful as the Sun nor Sylvanas gonna use that to market himself as well she's the giver of all life you know mama the Obama Messiah that's him the Obama SIA as he was called by sir you think he thinks that Freemasonry is for religion uh no I don't think Freemasonry is specifically a religion per se it is what I would consider it in its true essence maybe what it has come become resembles a religion now in its true essence it is a philosophy it is a way of living uh that helps us to understand natural law stay in understanding natural law we understand how the generative principle works which is basically how we create the scenario that we are getting in the physical reality in which we live what Freemasonry ultimately is is a code it's an encoded system which is allegorical and symbolic which helps us to understand how those basic laws of nature work and how to work in harmony with them so that we can create that which we do really want now that being said it's not it's not specifically a religion however it is a system that can be infiltrated and has been infiltrated by people who may have had the intention of learning this to promote their own agenda while keeping it keeping its true essence from other people and in doing so have turned it into what resembles a religion now so you know my answer is a little bit complex but I would say in its true essence Freemasonry is not a religion but what it has become in the modern day can be considered a religion it's one of the reasons I belong I mean it's one of the reasons I will not affiliate myself or join any official Masonic institution on the earth while I you know consider that I live the principles of Freemasonry in its true form okay I will not become any kind of a official Lodge Mason because I understand the level that the lodge system has become corrupted in the modern world and tons of Freemasons warned of this in the past most notably Albert Church Wars you if you read the origins or and the origins of Freemasonry his is his book he warns that the the institution of Freemasonry would be one of the things that could help to resurrect the world and resurrect America in particular from the horrible circumstances it was going into being socialism fascism bureaucracy etc however he said if Freemasonry did not reform himself in the earlier part of the 1900s and you know moving into the 20th century that it would become something that would propagate that officious of bureaucracy and socialistic forms of government and that is what we do see happening our church woods predictions have largely come true in the modern day sadly okay well I guess we'll appeal a call come in now but I appreciate it and I'll help you soon thank you Mark Eric thanks so much man always a pleasure to hear from you all right we also tonight we also have a caller on the talk show network here we go okay caller your name in the talk-show form is non-member your live on what on earth is happening what do you have for us this evening hi markets bye up from Cincinnati can you hear me yes I can Bob how are you oh great I was the caller earlier I'm trying a new system and I apologize I have a comment or a question and a comment yes the firstly the question on your image number 5 Astro theology which you kind of dug into a little bit that sigil case if you'll note as you already know I hear to be cross swords but one of the sword tips seems to be a pointing hand and it appears to be and I'm sure and that's what I'm asking my question what is this strange pointing hand I know that in the Jewish tradition it's called a Yad or a Yad and it's a little pointer but can you share with us the deeper cultic meaning of this thing and my comment is if people think this is just a purely Jewish symbolism I would disagree because mark in my studies I've run across of course the whole German Nazi thing the the they dealt heavily with the cultic symbolism the eagle grasping the swastika in a circle circle the swastika said inside a circle that circle can be transposed as the disc with wings and that's amazing unto itself going back to the ancient Egyptian but um the Hitler himself in his giant headquarters that is the inlaid the wood inlay there was some occult symbolism and that gives some crossed swords a spear and a sword is the wood inlay the next door on the left hand side there are two pinecone two Spears with pine cones atop them over the Greek symbolism the last piece were these two yad these two hands on top of spears what does this mean mark why do these high occultists in the highest realms of government and and high religious orders why do they gravitate we know the pinecone what is this hand pointing thank you mark okay Bob a phenomenal question and while I would say that I cannot offer you a definitive definitive explanation for this hand I will do I will do my best to explain it in the way that I understand from combining multiple forms of occult thought and multiple symbolism one of the reasons that I almost hesitated to include this symbol is is because it is very complex there's so much symbolism all over it and I didn't necessarily want to confuse initial listeners now into this section who are just starting to study symbolism but I put it there because it is so emblematic of Astro theological symbolism now what this hand represents to me is just one of the things that you said is very accurate the Hebrew symbol Yoda means hand it is the first letter in the name of God in Hebrew tradition yo cave of hay which we derived when we transliterate those characters Hebrew characters into English we get YHVH which then we would pronounce Yahweh or Jehovah okay so um the the the letter Y ode in Hebrew actually means hand the word yo means hand in Hebrew okay so each each symbol in the Hebrew alphabet is actually associated with a word and yo this hand okay so it is the guiding force okay it is the force that actually guides the universe it is essentially natural law itself and what this sword pointing in that direction represents is that we need to move toward the rights and this is another word play toward being in the right meaning the moral aspect okay understanding natural law and moving toward that which is right or is within the boundaries of natural law which is that which is moral it forms incidentally a 45-degree angle now with the two other arms of the vertical oriented cross vertically oriented cross now this is a big idea in Freemasonry when you specifically start to get to the illuminated degrees again a lot of Freemasons think that Freemasonry ends at 32 degrees because that's where the Red Lodge stops the White Lodge begins degree number 33 and progresses from there and many Freemasons will even not acknowledge that there is such a Lodge that there's only the Blue Lodge and the Red Lodge and that simply isn't the case on these illuminated degrees make use of higher-level symbolism we see the 33 above the eagles the double-headed eagle is crown illuminated with light this represents also the activation of the pineal gland and the capstone of the pyramid okay it's the Christ consciousness it is the the bringer of light it is the the way the truth the light natural law okay it's all of these concepts underneath if you were to actually be able to see what's printed on that of that sachet that the Eagles home you'll see this on other versions of the 33 degree emblem it says dais my own Quaid juice which means God and my rights and this means that God is the guiding force the the sacred intelligence that underlies everything the universal field is the guiding force that is leading us toward higher levels of awareness and ultimately to acting in unison with natural law which is morality and that's my best attempt to explain that hand there we can go into this more next week but for now that's all the time we really have time for on this episode of what on earth is happening I want to thank everyone for listening and I'll see everybody back here next Tuesday night at 8 p.m. I'm your host mark passier this is what on earth is happening a website what on earth is happening calm the networks website the Intel hub news network calm I'll see you here next week folks good night you

What On Earth Is Happening Show #047

Topics: *Mind Control Methodologies, Subversive Symbolism, Astro-Theology Symbolism, The Fasces, Natural Law, Right vs. Wrong, The Pentagram*

[Music] welcome one and all you're listening to what on earth is happening right here on the Intel hub news network I'm your host mark passio my website is what on earth is happening dot-com and networks website the Intel hub news network calm and we have a great show lined up for you here tonight um we have we're going to continue talking about symbolism on the show this evening we went into symbolism pretty extensively on the last show and we covered various forms of symbolism including solar symbolism and Astro theological symbolism we also looked at life force symbolism last week and how these forms of symbolism get into the subconscious mind and how they are used to subvert consciousness to essentially exorcise a form of mind control over people to reach into the subconscious mind to manipulate at that level and to prey upon the person because symbols again often fulfill needs that the person who's using them understands that the person they're using them against actually lacks in their own life so that's what we looked at last week and we're going to continue to do that this week with a pretty ambitious array of symbols I don't know if I'll get through them all but we're going to take a look further into Astro theological symbolism we're going to look at the symbolism of the fashions the symbolism of the pentagram with a five pointed star symbolism of the pinecone and the symbolism of the all-seeing eye so we will break down a plethora of symbols here on the show tonight and we'll be probably be I'm carrying this over into a second show with all these symbols hopefully we get through most of them though I want to I'll give the calling numbers for the show and then I have a couple of event announcements for events coming up in the Philly area and after we do that then we could jump right into the topic so the calling numbers for this show seven two four four four four seven four four four once again calling number 724 triple four seven triple four and the call ID number which you will be prompted for when you call in that number is eight three five one five you could also call the blog talk call-in line which is six four six seven two seven three three eight seven once again if you're listening on blonde talk you can call in two six four six seven two seven three three eight seven event announcements in this area we have two for tonight and the first one truth freedom prosperity presents their monthly documentary and discussion evening they had one last week which was a rescheduling from a couple of weeks back they did not have one in January due to snow conditions here in the city so last week it went very successfully they showed melt up it was a good turnout a lot of great people came out but most of all the the venue just was was great it was a nice upgrade from where they have been having them they were doing at the ethical Society not that that's not a great building and uh you know serves the purpose but the media Bureau Studios is a very comfortable environment and kind of a more intimate environment for a movie setting and the screen is bigger and it's got a nice overhead projector digital projector and uh you know some comfortable seating so it was a it was definitely a success and we're looking forward to more documentary nights at media bureau so next Wednesday will be the February screen February 23rd Wednesday night at 7 p.m. the location is media Bureau Studios that's 725 North fourth Street that is the corner of 4th and Brown in the northern Liberty section of Philadelphia and next week on the 23rd Wednesday night 7 p.m. truth freedom prosperity will be screening end of America the documentary film featuring Naomi Wolf and it's a great film we encourage everybody to come out and check it out if you haven't already seen it encourage new people to come out that's what it's all about and for more information on this group and their activities please visit truth freedom prosperity org that's truth freedom prosperity 0rg finally the free your mind conference less than two months away a conference on consciousness mind control and the occult Saturday April 9th and Sunday April 10th at liebe hall 414 Green Street in the city of Philadelphia the doors open at 9 a.m. and the speaker program begins at 10 a.m. admission is 20 dollars per day if you get your tickets in advance 30 dollars per day at the door for your mind is a unique two-day conference scheduled for April 9th and 10th 2011 in Philadelphia PA featuring multiple speakers and diverse educational materials for the purpose of raising public awareness of the critically important topics of mass mind control techniques the covert and subversive influences upon our consciousness and behavior trauma base and ritualized abuse and the practical mental and emotional healing methodologies available for those affected by these devices the featured speakers Aaron McCallum Alfred Webber Andrew basiago Bob Tuscan Bauer your dozous Freeman fly Yan Irvin John Nicholson Joseph Mara Larkin Rose Laura Eisenhower Mark motika Mark passio Michael Kelly Paul Marco and Suzanne Taylor at the end of each day we'll have a special event at the end of Saturday toward the end of the program will be screening Suzanne Taylor's documentary what on earth inside the crop circle mystery a great documentary on the crop circle phenomenon and at the end of Sunday we will be having a roundtable panel discussion with whatever speakers are left at the end of the day on Sunday whichever one whichever of them are still there and want to partake in the panel discussion will be welcome to do so so for more information on the free your mind conference please visit www.flexsim.com ok sorry for that folks a little bit draw me a drink of water here ok that's better so we were talking about symbolism last week and we're going to continue our discussion into symbolism over the next probably a few weeks because it's going to take a while to even get through all the different multi-faceted kinds of symbols that are employed as a language to basically subvert the subconscious mind and we will be I guess you could say taking a divergence but it's not really a divergence in the middle of talking about symbolism we will be looking deeply into the philosophy of Freemasonry and this will be part of the ongoing series of breaking down different cult traditions on this show to help people to understand the philosophies that are contained therein and how the occult is a essentially complex way of seeing all the different facets of oneself that's what it really is all ultimately about and it is not one thing the Pope is not one thing just like symbols are not one thing nor is the occult one thing people have this misperception that the occult is all about evil that's the connotation that it is often perceived with when that word is heard and that's a form of mind control in and of itself because the word occult simply means hidden and as we've been labored to try to explain to people on the show the occult is simply hidden information about the human psyche it is ancient human psychology and it is encoded into symbols and allegories often to conceal that information from those which the group that is concealing them doesn't want the information to fall into the hands of or doesn't want other groups to understand that they are teaching ok so for example the symbols of alchemy maybe in were in fact encoded into the forms that they were because during times throughout history you couldn't teach this in the open because you would have been you know in heresy of the path of Church and you would have been done away with often in an extremely painful and torturous fashion so the initiates of this tradition would have often encoded the symbols into uh into uh drawings allegorical drawing and in effect they would be telling the teachings of alchemy without actually speaking or writing it because as we've said last week symbolism is a language and we have to start with the basic building blocks which is what I endeavored to do last week and we're going to continue with that this week and once you get the building blocks those are like the letters okay then you start forming words with those letters to get a little bit more complex with the symbols okay and then eventually we form sentences from words and that's how we communicate thoughts and that's what symbology is like it's a language that you have to get the basic building blocks in order to build the vocabulary in order to then build the syntax of the language so in studying symbols like any occult study and this is a study into the occult because this is hidden knowledge not many people are symbol literate and that's sad because they're being controlled through symbols all the time in our culture in studying any system like symbolism you have to understand it it's very rare that symbols ever mean one thing in fact they hardly ever do symbols are often dual in meaning or have more than two meanings even okay and we have to understand that many people have a overly simplistic interpretation of symbols and say oh no this only means one thing when in fact that's not the case as we will see hopefully I will be able to communicate that to people listening to the show and get them to understand that symbols can be a little bit more complex when they are looked into a little bit deeper than at first perception of them and the people who very often make this mistake are the same people sadly who have the misperception that the occult is all one thing as well and it is not there is a light side to the occult it matters what matters ultimately is what we do with said hidden information it isn't the information itself that's good or evil it's just information what we do with it gives it its value to the to the overall consciousness of humanity and it can be used as an uplift and it could be used as a moving humanity forward in evolutionary terms and consciousness or it can be used as a weapon and what we're really doing here in this symbolism section is attempting to explain how symbolism when it is not known when the language is not understood and people are not literate in it how those who do use these symbols and are literate in them and do understand the connotations that they convey to the human psyche and to the subconscious mind they will use them in fashions that that serve them and that repress and subvert the consciousness of the people that do not understand that language so that's why it's important to expose this and to help people to have a better understanding of symbolism in general and that's the whole purpose here so let's jump in where we left off last week and let's talk about Astro theological symbolism what we did last week is we went through some basic zodiacal symbolism used in different logos and emblems and sigils okay and we looked at the symbol of the equal armed cross is pretty much where we left off we were looking at the knights of malta logo we were looking at the 33rd degree emblem of Freemasonry we were looking at a st. Peter's Square in the Vatican and we were looking at the regalia of the Pope and some of the symbolism that he employs on on his religious regalia and we saw that this is all silver and zodiacal symbolism and it is often used in association because it reflects the Sun and the power of the Sun and of light okay and of energy and life all things associated with the Sun okay it is used in conjunction with institutions that are attempting to convey inherent of authority okay they want to say we are authority figures then often these are holdovers from solar cult worship and sects of the ancient past just like Christianity comes down to us today as an astral theological religion based in Sault solar cult as theology okay so there's a reason they choose the ego armed cross there's a reason they choose symbols that are associated with the zodiac okay the equal armed cross of the zodiac there's a reason that these symbols are employed connection with the Sun and you put that together with an institution that is claiming authority okay we saw the CIA uses this on their shield on their uh emblem as well okay this is what it conveys to the subconscious without even the person doesn't have to be consciously aware of the symbolism see that that's what I also want to convey about how symbolism works symbolism is working it doesn't make a difference if you don't understand it people say well I don't believe in that or in that interpretation of that symbol it doesn't make a difference you don't need belief for our type of forms to be consciously recognized by the subprime sorry subconsciously recognized by your subconscious mind these things are inherently recognized by us we don't need to be consciously aware of them for them to be having effect once we do develop conscious awareness of them then we can begin to I guess you could say desensitize ourselves to the effects of these symbols at the subconscious level and bring them up to the level of the conscious mind so then you can say oh I recognize that I understand its many possible interpretations and I understand in the context how it's being used therefore I'm not as affected by that symbol in this connotation in the context that it's being attempted to be used and against my subconscious mind so that's why becoming symbol literate is so important so let's look at some let's look further into Astro theology in symbols and corporate logos etc okay now we saw in Astro theology there are three basic cults the solar cult the lunar cult and the cult of the stars and planets or the stellar cult so we're going to basically look at stellar cult symbology without the rest of this section on Astro theology symbology okay so if we go up to the website if you go up to my website what on earth is happening calm okay you will see listed on the radio listen page if you're not already there you will see listed on the radio listen page that button on the left hand side you click that it will take you to the radio lesson page and you will see a long list of symbols numbers that are links to different images that I'm going to talk about tonight and probably into next week so you can you can see the Astro theology there is the first section and we went through the first seven symbols in the Astro theology section last week we ended it number seven out of twenty three I believe total okay so that last one was the Pope with the with the cross and The MITRE and he has the Eagle armed cross on his forehead on his miter on his sachet there okay it's all about the symbolism of a cross now we ended there and we looked at again the reason that the cross or so vehicle symbolism is used so widely in authoritarian institutions now we're going to move on to image number eight in that section okay and if you click into image number eight in the national theology section on my website you will see the logo for the car mercury now mercury is the first planet out from the Sun now transportation companies and information companies as well love to use the um asteroid theology aspect of symbolism okay um cars you'll see it on many different kinds of cars okay um there's a reason for this okay the idea of freedom of freedom to travel is embedded in with moving off world okay going off of the earth okay ultimately we subconsciously recognize that earth is a prison hey that what's going on here is control and what has been going on here is control and it's about controlling our consciousness controlling our mind so ultimately we end up living as slaves and therefore our body is ultimately controlled okay and power and influence flows into the hands of fewer and fewer people who then have the power to centralize that even more but it's all perception of power because it's all Authority isn't real it's all a claim of authority and other people who aren't conscious wreak knowledge incluso now when you take that into the realm of the subconscious mind when you understand that everybody knows this they just don't understand it at a conscious level the reason there's so much denial out there in the world is because people know they're under control people know male dominators owned and run this entire world this culture as it stands right now they don't really own it but they're basically in control because they enact violence against other people who try to challenge them and they get people who are actually under their mind-control to enact the violence against other people who are also under their mind-control to said pitiful situation and it's going to come down it's going to come to an end but the question is just how bad it will have to get before that happens just how much suffering will have to be endured by humanity before that occurs because it's going to happen whether we want it to or not because it's not really our will as to whether this control system comes crashing down and breaking apart eventually that's that's not up to us and the only thing that really is up to us is how much pain we choose to experience during that process and subconsciously everybody really knows that so they know we're living in a prison society that's why there's so much denial that's why their eyes go glassy when you mention a lot of this stuff you know it's um it's something that they recognize inherently but not at a conscious level okay they know that that's the case and they want freedom from that they want to be free their true self their true nature wants to be free but they're in such fear that they they won't do the work necessary to bring that understanding up to the conscious level and face it because of the horrors that are pretty much associated with that knowledge when you understand how bad of a place this really is and that essentially it's like a hell world okay so not that many incredible wonderful good things don't happen here and there are wonderful people in this world but as a whole it's not a great place to be as far as evolutionary a possibility goes we are limit limiting ourselves from our true potential and people know this so what a advertiser would want to do here what a smart marketing genius with somebody who wants to get into the subconscious and tap that um that desire they know that desire is there they know a desire for freedom is ultimately underneath but they want to sell you a product they don't they can't sell you true freedom true freedom can't be bought or sold okay it's something that is lived it is something that you know it is within ultimately and they know that they can't sell that to somebody they need to sell you on the idea of freedom so they're going to put symbols of outer space of objects that are beyond the hell world that we're living in beyond the earth realm beyond the floor of the house so to speak as they call it in Freemasonry okay and they they want to sell you on the idea that you're going to get in your car and you're going to it's it is mercury okay it is Saturn okay it is another planet you're going offworld now of course this isn't literal okay they don't literally believe that you're going to believe that or accept that it's it's a symbol it's getting it's resonating with an idea it's making an association that's what symbols do and again I said this last week and I'll reiterate it this week if you're going to take this entire thing and try to approach it from a purely purely left-brain perspective turn off the show now close the browser window and good night because you nothing will be understood as a result of that kind of thinking you have to put your brain into a holistic understanding lista commode allottee which is looking at things from a slightly different perspective and from a creative and an intuitive perspective and that's right brain awareness that has to be combined with looking at the forms and understanding at a conscious level what they're basically speaking to at the subconscious level okay so if again throw the left brain thinking on the back burner and look at this from a creative perspective okay you have to understand they're equating it's all about equating the symbol with an idea okay this is called Association okay symbolic Association this is done constantly in marketing constantly in advertising okay so numbers 8 & 9 these are ashford theology symbols mercury and Saturn the names that they have chosen and the imagery that they have chosen is Astro theological in nature and it is tapping that subconscious desire for freedom to get out of the situation that we're in and again that associates with with actually getting offworld into space into the heavens so to speak okay into heaven which is a better place all right this is all symbolic thinking we're not talking literally here of course all right now we look at number 10 and 11 okay images 10 and 11 in the Astro theology section we see that here more Saturnian symbolism is used this is the Direct TV again the communications company and Nike okay and that's also associated with the idea of travel or running okay so we see the ring of Saturn being used here and just a part of it so it looks like the swirl or a swoosh okay but really this is this is an archetype this is Saturnian imagery it's it's ring symbol lism okay that's employed constantly again well I'm only showing a few examples here just to paint a picture in people's minds this is you will see this repeatedly over and over like a theme that runs throughout symbolism you can discover this in all kinds of logos all kinds of symbols that we are surrounded and inundated with in our culture okay we are moving on the image number twelve now this is another interesting one and again now remember always a need being fulfilled here but not the real need at a mental at a deep subconscious level the need the need is being responded to and then hand it a proxy a proxy meaning it's not the real thing it's something that is given in replacement of the real thing okay so the Dodge truck logo okay and now this is asked for theological symbolism but it's much more okay so let me explain that we're looking at image number 12 now on the Astro theology section the Dodge truck logo which is a huge

Rams head now this is the symbol for Aries they Aries the RAM all right now that's Astro theology symbolism Aries being the first saw sign of the zodiac that the Sun enters when it enters the spring season at the spring equinox however if we really look closer at the Dodge Ram of head-on this shield this red shield incidentally okay we will see that really what it is is it's the uterus it's the exact same shape as the feminine uterus and the fallopian tubes that come off of the uterus so this is the female reproductive system so what they're doing is to the you know macho guys if I want to go out and buy dodge trucks right they're selling to that to that marketing potential okay their target audience right they're selling uh to that target audience which is predominantly male predominantly middle-aged younger to middle-aged men there they're putting something of sexual desire at a subconscious level okay we want to reproduce okay we want sex all right the feminine sexual reproductive system right there on below though and you can actually if you do a search on google you get a comparison I should have put one up there but I put this together earlier today um and didn't get a chance to but if you type in dodge and you know uterus I'm sure you can get a comparison image there that shows just how similar these images actually are so that's again association and and playing upon a subconsciously held desire and then fulfilling it through proxy okay the next image image number thirteen is the McDonald's logo okay red and yellow often in very many cases used in conjunction with food these are colors that resonate in general with food and with the desire for food but moreover again this is Astro theology symbolism because we again see the double arch of the arm of the RAM so this is Aries symbolism here okay um also the color being associated with gold okay a Sun energy okay as food is what we need for energy um that's a relatively simple one moving on to image number fourteen the star ATM logo again here's more stellar cult symbolism and you see the Saturnian ring there again and all the name of it is star okay so this is um associated with money monetary flow again associated with Astro theology image number fifteen now we're combining a whole lot this is almost like a sigil again 15 is the Starbucks logo everybody knows this one very popular coffeehouse and we see many images many symbols kind of teamed up on this one now I'll be repeating this one in a few weeks when we look at goddess symbolism because this is a depiction of the goddess we see the crescent moon okay so this is again there's some lunar symbolism in this one as far as Astro theology the goddess herself is the goddess of the night sky the goddess of the moon it represents Isis or Mary okay um and again it's like a mermaid as well okay if you look at it like yours what you're seeing looking at it from either side is the noir maids tail okay so this is associated with the goddess of the waters again water being the sign of the Sacred Feminine we looked at all of these associations when we looked at Kabbalah and Tarot and and the goddess symbolism contained in the Tarot now the name of the coffee company is star box okay Starbucks okay right in the name there's a show theology again the cult of the stars and we see three stars on the Starbucks logo and one of them is actually in her crown again representing illumination or enlightenment none of these things you will get at Starbucks but they're selling you on the idea the goddess of truth that's what the goddess represents the Sacred Feminine care all of these things subconsciously resonating the crown want enlightenment the queen of heaven the crescent moon stars are often associated with sovereignty that's why they're used on the American flag we'll look at this a little bit later tonight when we talk about the five pointed star and why it's used in extensively throughout these logos okay so that's ash basic Astro theology symbol is leading up there to one that a lot of different symbols are teamed up on again really effective marketers don't like to just go for the one symbol they want to team up different mental associations and combine them in in their logo or their or their emblem and all of those things will resonate together simultaneously so the next section of the Astro theological symbolism that we're going to look at as I said last week is Piscean symbolism or the symbol of Pisces so these images are images number 16 through 23 in the Astro theology section taking this to the end of that section and the first image is just a representation of the symbol of pisces with the two fish they're symbolically depicted that is what places is it's the house of the two fish okay that's the symbol of Pisces two fish often going in different directions as you see them there in image number 16 okay what that represents is really the two interlocking circles of the main symbol that we're going to look at known as the vesica Pisces okay now it's called the vesica Pisces for a reason because it is connected with the fish it looks like the fish a body of a fish and it's associated with the house of Pisces this is the age of the zodiac that we're in it's B we're in the Age of Pisces what that means is that when the Sun rises in the eastern eastern direction every morning if we were to see the constellation that is directly behind the Sun as the Sun is rising we would see Pisces Sun essentially comes up in Pisces now that is at the spring equinox I should say that is how the age that we are in is determined at the spring equinox we look eastward on the horizon sun's rising coming up inside of a meaning in inside meaning it is visually in front of a zodiacal house if we were to see the stars of the zodiac band behind the Sun we would be looking at Pisces if we look behind the Sun okay at that time that's what we mean when we say in the house of Pisces now um image number 17 is a perfect example of Piscean symbolism and again this is connected with the Sun okay again all of the things that are connected with the Sun you're going to actually is actually going to go into the subconscious mind by looking at symbolism that is derived from um astrophys Astro theological forms and in this case we're looking at the vesica Pisces now let me explain what the vesica pisces is if we take two circles and we begin to merge them to disks okay in two dimensions and we just begin to overlap them okay the space in which they overlap will form a tapered oval or a double-ended teardrop shape I guess you could say a shape like a seed okay um this seed in the middle of these two circles is known as the vesica Pisces again it looks like the body of a fish if we look at it from either direction we can see that there's also a thin at the end if we put like an imaginary line between the tops of the circles okay now this is sacred geometry this is known as sacred geometry now you can look this up and you'll probably spend you know you could spend years looking into sacred geometry if you're not familiar with the term sacred geometry is basically geometry that is based upon circles which is the sacred shape ultimately it's based on circles and spirals these are the shapes that really are completely derived from natural forms the circle being the perfect shape and then we have spirals which are found in fractal patterns that underlie nature and all natural forms so to go back to the vesica Pisces it is based upon this sacred geometry essentially the entire world is based upon sacred geometry the vesica Pisces being one of the primary forms of sacred geometry when we look at it because it represents the seed it represents the womb because you you start with one thing and as you cut you know as it basically divides into two you have if we look at the MasterCard logo as an example of this let's say the red circle on the left that is let's say that's the primary object the one thing okay as it then divides into two okay we have duality so now we have the we have the orange circle there on the right but the space in which they overlap forms this womb and it is a womb ship if we look at it okay it is the female reproductive organ shape okay this is um it's a vaginal shape okay and this is played upon as we will see okay we'll see that in the next logo that's coming up the chanel for men a perfume um but to stay on the vesica pisces for just a moment longer that shape in the middle is the place of potentiality of creation that exists between the two of seemingly opposites or lower um essences the two circles okay and it represents the synthesis between those two so that's essentially what the vesica Pisces is is ultimately about and we will see how it is used in different symbols in corporate and religious symbolism in a moment let's move to so there it is in number seventeen the MasterCard logo and the word master is used in conjunction with this baby cause ultimately mastery comes from the combination of the left and right brain that's what this also is an allusion to is it is these two poles coming together okay to form this synthesis again and ultimately that's all about the awakening of the third eye and we can obviously see it's an eye shape okay this is a shape of an eye okay not the letter eye but an eye human eye okay this is the coming together of the left and right brains to open up the eye and we'll see how the eye figures into this tonight as well it's about mastery when that happens it's mastery so they're using this all in this logo it's that none of this is accidental I can assure you of this okay it is specifically chosen because of the connotations that it carries I hear the music for the first break I'm mark passio you're listening to what on earth is happening on the Intel Hub News Network we'll be right back after these messages folks stay with us in a world where telepathy and all they don't keep control of the population come here any amongst us the burden of humanity left on our shoulders be on the way out if you expose the mobile time limit a known Adam world order together we are all one together you know Intel Rogers the battle for the humanity and since June us in the fight the amount of calm a very wealthy US citizen is predicting that in 2011 we will with the most important day in America hit more than 50 years he says it will change everything about our lives the way you shop travel invest educate your children and even how you take care of your health and gamble now this man has made some outrageous predictions over the year but the crazy part is he's usually right you see he predicted the collapse of GM Fannie Mae Freddie Mac and America's biggest mall owners General Growth Properties a few years ago in fact Bironas called his work a dire prophecy now this has nothing to do with the stock market but it could have a huge impact on almost every aspect of your life and we he created a video which you can watch online for free detailing the biggest and most important prediction yet and it's a real eye-opener I can't stress this enough you should at least watch this free video online today he explains everything you need to know including simple steps you can take to protect yourself you can find the video at www.att.com/biz video may be offensive to some audiences it's worth checking out again that's the WWC end of America the number 8 calm watch this play give you at WWE end of America 8 calm you are listening to the info hub network compression by P secure your future get your non-hybrid feedback now with the loonie economic crisis food shortages and other toxic disasters now is the time to be ready just click on the heirloom organic banner at the top of our BlogTalkRadio page today secure your future and the future of your family in hard times heirloom organic seed join me Joe Joseph John King and insecure Thursday and Sunday we are a big concern hidden already made in the intro hub news network okay ladies and gentlemen were back on what on earth is happening on your host mark passio before the break we were talking about Piscean symbolism and the symbolism of the vesica pisces we were looking at the MasterCard logo and we were looking at the connotations that these symbols and words are teamed up with to employee to the subconscious so again we see that the vesica pisces is actually a symbol of synthesis is a symbol of creation it is a symbol of the union of opposites is a therefore a sexual symbol and not just at a physical level but at a level of blending the male the masculine I should say and feminine it exists within each of us in the process known as the chemical wedding and that is what creates enlightenment that is what truly opens the mind that is what truly gives access through this gateway of sorts to higher levels of consciousness which is also what the vesica Pisces represents a gate as well it's all of these things it's the pineal gland it is the all-seeing it is the eye okay it relates with the all-seeing eye because that's what the pineal gland ultimately is um it is the womb of creation okay and it is the union of opposites or the blending of opposite polarities to create a synthesis between them and they're using the word mastery in conjunction with that master okay because it does this shape does imply mastery so image number eighteen shows you an even more subversive use of this the Chanel perfume logo the two interlocking C's now ostensibly that's for Chanel yes but they're put together in this very specific fashion forming the vesica Pisces and again this is the feminine reproductive organ and it says Chanel for men now the subconscious reads things differently than the conscious mind does so if there's one end you could substitute two ends and see that word is channel it's the same phonetically as the word channel so we would have symbolically in symbolic language yes in left brain awareness it doesn't indeed say Chanel but in holistic brain awareness and symbolic awareness that word is channel okay whether it has one N or two it's the same phonetic a combination of sounds and what they're saying here is the channel for men and that you know speaks for itself this is sexual symbolism used in a almost overt way you know it's almost hard not to see it one you know once you know a little bit about symbolism so um again always selling something to you not the actual thing they're not going to sell you sex but they're going to sell you the idea of sex we see this used all the time in in our television commercial commercials and beer commercials football qamar you're doing during football everything you know the the car car commercials that we see on television always trying to sell people on the idea that you know our product is sexy you know you have this you know sex will follow okay it's all a proxy all selling people subconsciously on an idea so that then they will associate that idea with the product the thing that they want okay they know everybody wants sex it's an innate human need okay they will then associate that that in they need with their product and therefore that creates desire they're latching onto an existing desire and associating that with their product same thing with cool-cool cigarette logo cigarettes logo on image number 19 they're the vesica Pisces employed okay same idea associated is ire with their product and indeed desire is associated with cigarettes for certain I fortunately never got into that habit but I know how difficult it can be can be one of the hardest to break you know people who I seal attempted to quit many times in their life attempted being the key word a very difficult addiction cigarettes and you know tobacco often gets the rap for it but tobacco is a naturally-occurring plant it's all the additives in tobacco to creates all the problems we pretty much looked at that would look into the food section I believe I alluded to that but the cool logo here clearly employing the symbolism of the vesica Pisces in a association with desire now image number 20 in this section is the CBS logo and as a television network they're employing here the all-seeing eye and indeed that's what we do we watch the television okay the eye being used here symbolically and this is the vesica Pisces again and it is associating their product with again the all the things that go along with the vesica Pisces desire enlightenment union of opposites um solar symbolism as well and all of these things they're associating with their product which is the the programming that they hit people with through the television through the hypnotic device and again an eye is often a symbol that is used in conjunction with hypnosis as well the way one looks into one's eyes and here this eye is wide open with the large pupil in the middle with two large lids you know looking almost sinister being that it's one eye and we'll look at the symbolism of the one eye but here again vesica Pisces symbolism clearly displayed now let's look at religious symbolism when it comes to the vesica Pisces or Piscean symbolism and a good reason for this is because one of the most powerful institutions in the world the Roman Catholic Church derives its symbolism from the scent the astrological symbolism of Pisces and there's a reason for that and we talked about that when we covered our theology on this show and it is because precisely the Sun is in the house of Pisces in the age that we are in presently and in order to pay homage to the Sun which is what this Astro theology cult is ultimately all about it is the worship of the Sun it is not the worship of the man that they call Jesus and that is a another proxy or symbol and it all represents the Sun being the savior of the world we went into this enormous Lea and at length in the Astro theology section if you didn't catch that please go back into the podcast archives on my site go to the podcast tab and all of the archives are there you can go back to the shows on Astro theology and check that out and arm here in image number 21 we'll start looking at the Piscean symbolism when it comes to the Catholic Church so we see again an image of the Pope wearing the mitre he has the mitre on his head and if we look at the mitre from the side as the scene in this image now we saw the Pope's mitre in image number seven okay from the front or from a front at an angle slightly but here we see it completely from the side and you can clearly see that that is a large fish head okay it is placed upon the head of the pope it even has you know that that sash coming off the back forms like the tail of the fish because what it ultimately is representing is the Pope here as the fish God okay I know that sounds strange to people who have not looked into Astro theology but the image number 22 will clear that up a little bit and when we get to the symbol some symbolism of the pinecone um we will also see some of fish and bird symbolism employed in a solar Astro theology cults and cult worship of the ancient past being that Christianity is a remnant of that is a holdover from those ancient days of solar worship and it is still it still does represent the solar cult in the modern world here we see the the Pope as the The Vicar of the Sun God okay of the Christ on earth showing that indeed this age is all about the fish the places Jesus is alleged to have been a fisherman okay this is all symbol symbolic it's a stroke theology it means that he is the God the Savior hero that is brought in at the Age of Pisces and this is the story of the son Savior during this age and the story is the same no matter what agents in doesn't make a difference as we were in the house of Ares then it would be a story of you know the Abrahamic religions of you know we see you know it based upon RAM and of in we see ransom was employed in Judaism and we go back to bowl symbolism when we when the son was in the house of tourists which is before Ares okay two houses before Pisces arm now when it was in Taurus again it was about the worship of the bull and we see bull symbolism used in the in the ancient Middle East we see the bull god Molech being worshipped we see the Old Testament stories of the people making a golden calf to worship which is essentially it notes a bull and you know that being said that that's sinful that's blasphemous don't do that no longer do that because the Sun you know the old age was ending and the Sun was moving into the house of of the Aries and now it's we're moving on to RAM symbolism under Moses you know Rameses ram Moses Ram Abraham Abram this is it's all it's all about asteroid theology the whole thing is about astrobiology and how these words all fit into place and words fit in with these symbols it's a tapestry you have to understand that people who understand this have been using these things against us as weapons for thousands of years and until we learn their language we're going to be powerless to defend ourselves against this we don't even know the symbols that they're using out in the open in the open and people buy into this and accept it readily some of the most you know wicked people associated with high religion you know completely uh traumatizing children sexually abusing them and then it covered up at highest levels you know the current Pope I highly recommend people watch the documentary sex crimes and the Vatican if anybody listening to the show has an high opinion of Christianity especially in an organized sense again if you want to talk about the esoteric underlying true essence of the Christian tradition that was beginning to gain steam around the 1st century AD I'm all all ears and let's talk about it let's delve deeply into it but as far as organized religion in the modern day goes when it comes to the so-called Christian tradition it's all Astro theology and at the highest levels it's being run by evil people you know the Pope right now was the Cardinal during all the reshuffling of these priests that that abused children in horrible sick twisted depraved ways and he just signed papers and you know of did all the bureaucratic things necessary to just move these priests over into other parishes so that they can continue to do the same thing over and over again to different children instead of actually working in conjunction how these people are put away where they where they really belong which is sequestered from the rest of the top human population where they can't do any harm but you know that's a whole nother issue maybe I can link to that in this section since we're talking a little bit about a show theology and tonight's show and how that fits into Christianity when it comes to symbolism but he has sex crimes in the Vatican a great documentary and I highly encourage it if you have the stomach for it because it is quite disturbing but look at image number 22 and now we'll see where this fish symbolism is derived from so this is a Syrian and I believe Acadian symbolism this would be the cult of Dagon da gon fish God and this is you know a middle-eastern symbolism of the ancient world going back I guess five six thousand years and it is again a representation of a fish God now they claim that their gods were scaly or had feather like us the scalish or feather --is-- skin okay now this can mean a lot of different things symbolically it could be symbolic but it some people also suggest that maybe these gods were hybrids of some sort and they weren't actual gods they were some sort of hybrid being like maybe a extraterrestrial mixed with human and these qualities were depicted okay maybe their skin qualities were depicted by feathers or depicted by scales and because of the way their skin may have appeared so that they people when they were depicting them in their renderings dreaming like this some people claimed it was because they came from the sea maybe from an advanced civilization after some sort of a Cataclysm and they looked at them as fish people maybe they had flying technology they looked at them as bird people there's a myriad of explanations but indeed we see bird gods and fish gods often used in conjunction with solar cult Astro theological worship in the ancient world okay dayvon being one of them but there were many others um so you can see clearly this depiction of The MITRE on his head okay but it's an actual fish head with the body and tail and all okay and you can see clearly that this is a what we're seeing in modern Christianity the trappings of the Pope are clearly a holdover of this ancient silver religion okay so I would highly recommend looking into Sumerian mythology and Akkadian and Assyrian of mythology to understand some of this so I might post a couple of book links this week to the podcast archive I didn't get a chance to do that last week but I have a couple of good books on symbolism that I'll probably link to this week as well moving on to image number 23 this is the last one for this section and we'll move on to a different topic regarding symbolism but just to wrap up and the Astro theology section this is the popular symbol of Jesus as used in the modern world when it comes to symbology this is how Jesus is symbolically depicted as the fish and there's it should be obvious by now listening to the show as to why because the Piscean symbol represents the age that we are in as far as the Sun is concerned as far as the procession of equinoxes the Sun is in the house of Pisces at the current time that we live in therefore the Sun Saviour mythos must be must be associated with fish or Piscean symbolism now this symbol is actually much more ancient than being used in conjunction with Jesus it goes back to Egyptian cosmology and it goes back to the disciples of Horus Horus being the Sun God of the Egyptian methis the golden Falcon we talk about this in the Astro theology section many weeks ago but Horus being the Sun God of Egypt and again this looks very much like the Eye of Horus in this configuration put on its side in the original of followers the religion of Horus his followers were known as the Shem soon hor this means the disciples of Horus okay and uh if you simply turn the Jesus fish the vesica Pisces or the I which is what it is okay you just turn that I up right in other words rest it on its tail so that the point base is up in the air you essentially have the symbol of what was known as the disciples of Horus and the Egyptian tradition it's one of the symbols of the Shem succour now um what I would also say is it is a reflection of the direction that humanity has gone that this symbol which was originally upright okay it was originally erect or pointing upward okay we have now tipped it to the left and that is very very symbolic and telling me because Humanity is largely in a state of left brained imbalance that's why we can't see the total pictures we're trapped in Evo the ego barriers of the left brain and identification with the physical world and this is a reflection of the direction that religion in general has taken now religion is a right brain imbalance but I should say that's it it's an indicator of the direction that consciousness has taken as a whole of people on the earth and we are moving in the Sinister direction the fish is so to speak symbolically here okay we need to make that the upright once again okay because that forms the Gateway that forms you know the all-seeing eye up above the pyramid if we look at it in a negative aspect okay Stargate opening up the pineal gland the the Gateway out of these the ways that we are controlled the gateways out of the limited ways that we are thinking in the modern world because ultimately all of the control is predicated upon mind control we need to open our minds we need to free our minds from the types of limitation that were trapped in which is made possible only by being limited into the left brain way of seeing the world instead of a holistic way which incorporates Sacred Feminine and the creative capabilities of the right brain so balance is what we're looking for and I would say that uh that symbol would be better represented as being balanced and by being upright rather than tilted to the left there but I understand what they're going for here it is also a symbol of an eye in that configuration and again it is completely tied in with the Eye of Horus because Horus is the same Sun Savior that Jesus represents so that is astro theological symbology explained in a nutshell but again it is simply my interpretation and it is very limited because we could sit here for days discussing all of this these different forms of symbolism again I want to give people a basic overview and then they can do Studies on on their own further so let's move on to another another topic or another form of symbolism let's look at the fashions okay so we can look at image number one in the fashion section now what the fashions is you will see it depicted there an image number one is a bundle of rods or staffs okay that are tied together off and lashed together with leather or some other form of material and they are lashed around a central ax the ax is sometimes depicted in the middle of them or is sometimes lashed directly to this a larger bundle of rods or score staffs now what this is and this derives out of the ancient Roman culture ancient Roman Empire this is a symbol of centralized authority centralization of power and we'll see how this is used in the modern world has been used in the modern world it represents the the ax represents the central authority okay it represents um the empire so to speak it represents the the larger centralized government okay and the smaller staffs are representative of the satellite of states or satellite nations that form the M Peyer that are ruled from the central authority of an emperor or a king or a pope or leader etc so essentially the cutting blade of the axe keeps all the other satellite nations so to speak in line okay it represents the greatest power and then all of the other things are subservient to it so they are bound by it they are bound to it okay you can clearly see where the symbolism is going as far as concepts and ideas of authority it's an authoritative authoritarian symbol and it represents greater centralization of power meaning once you have people recognizing your claims and acting on your behalf and doing what you are telling them to do you then develop you then acquire more of this capability and it becomes easier to centralize even faster and build up and build up and build up and that's what we're seeing the march toward globalization in a march toward ever increasing centralization of power whereby fewer and fewer people make decisions that control other people's lives and try to tell them what they may or may not do regardless of whether they are harming anyone or not of course this is completely antithetical to natural law to the concept of principles with the concept of human rights and the concept of right versus wrong okay and the perpetrators of this node know this ultimately at the highest levels because they're psychopathic man men completely imbalanced to the left brain basically don't really have a soul like you and I do and as we perceive the human soul label they don't have those qualities because they're psychopathic and really can't experience human emotion and they use this symbol wherever authority is demanded or commanded wherever they say we are the authority and this is the symbol that's going to show you that we're the authority that we're in charge we're the boss what we say goes but again this is all utter nonsense it's utter crap it's utter BS all authority in this domain in the three dimensional space-time realm anywhere you go within it is illusionary and it's a claim that exists and I don't care who claims to the contrary you're wrong the end the end you're wrong there is no authority in the three dimensional space-time continuum that we call the physical universe in the flesh doesn't exist isn't going to exist never has existed it's a claim it's a claim that exists only within the minds of the people making the claim and those accepting the claim and that's all it is because there is no authority here in this space-time dimension there is no innate Authority no inherent Authority it's an illusion it's all a claim to try to control other people when somebody says says the phrase I have the authority or this entity has the authority you know what that's called it's called mind control ladies and gentlemen and that's all it's called and that's all it is and if you actually believe that claim you're under mind control the end you know cry about it pound your fists on the desk bang your head against the wall all you like nothing will ever change the fact that that's the truth that's all it is okay no one has authority over anybody else in point of fact reality meaning objective reality and there is such a thing again we get into the ideas of more relative relativism and solipsistic you know there my truth is different than your truth and you know of what you are saying about Authority you know maybe true for some people not for no it isn't there is such a thing called right and wrong it exists objectively if you understand natural law by studying it and its ramifications you will understand that which right is and that which wrong is and I do clearly understand what those things are and it's very simple right is any any action you do have a right to take which doesn't harm another period you're not creating physical harm I was talking about this with a friend we were boiling day and we were talking about the natural law transgressions the the traditional things that are looked at as being wrong or going against natural law and this is just an aside to symbolism for a minute for a moment but uh you know people have boiled them down to for murder rape trespass and theft now that's a quite a simplification but I said we could go down and simplify it even further and really it's all ultimately one thing one there is one ultimate wrong that you can do that you can take if you really think about it and boil it down okay and many very aware and conscious spiritual teachers have actually made this observation okay people who if they do make this observation listen to them because they know what they're talking about okay I won't give any names but I could think of a couple off the top of my head that I did hear this from in the past and um it's a very astute and profound observation when it comes to natural law when we're talking about what is harming people we look at murder okay you can extend that into assault or taking physical violence against somebody without cause without the right to do so would use it it's the initiation of undue force you can have a right to use force but only if someone is employing undue force against you which is called violence okay so violence essentially is number one okay then rape and that's a form of violence of course it's sexual violence okay and then theft okay taking something that doesn't belong to you and trespass which or which you could boil down to destruction of property or being in someone's space that they are actually imploring living and using without you know the right to be there you know they they've staked the claim to this space that's their living conditions and environment and you're going in into their you know unwarranted Lee so you could boil all these things down to one thing and that's fact and that may sound strange to some people but if you think about it if you're telling someone you're taking their life and you didn't have the right to do it if it's murder okay you're beating them you know we're taking physical violence in some form against them and you didn't have a right to do it you're taking their health or their physical well-being if you're taking their things that's self-evident that's self that's very obvious you didn't have a right to do that that's the straight theft and if you're um you know taking they're damaging their property you're taking their right to to basically um you know be secure in their environment you know and you know that extends to damaging the product of their labor or thieving from the product of their labor that's called taxation which is theft it's all set in one form or another theft is the ultimate transgression it's really everything else every other transgression every other form of moral law is another variant effect if you really think about it and get down to it okay so the reason I was talking about this is because we were getting into the idea of authority as represented by the fascist symbol and of course this is the symbol that represents fascism that's what it that's what fascism is named after this symbol okay because fascism is totalitarian authoritarianism meaning there is absolute control by the state and there is no rule room for argument what we say goes and if you don't agree violence is going to be carried out against you that's called totalitarianism that's rapidly what the United States of America is moving toward a totalitarian form of government and people think there's a big difference between fascism and socialism and this is another artificial dichotomy they're the same thing they're total control in the name of violence saying if you don't do what we say in the way we say we will conduct violence against you that's it that's what all Authority is if you really boil it down that's it it's somebody saying I mean I'm in control you're going to be subservient to me and if you don't do what I say I'm going to be violent against you when I don't have a right to do that and that's what all of our Italian ISM is which is why I believe in none of it because I'm not on their mind control because that's all of all of that is this whole argument that there's any such thing as Authority is ultimately what the entire the entire world view of mind control is built upon claims of authority in the flesh when no such thing exists because you're not God that's why won't it really come down to it okay the institution of governments is an idea that even is predicated upon the idea that man is God okay because if that authority doesn't exist in any individual how can multiple individuals combine non-existent Authority the Korea Institute governments it's all mind control it's all trying to get people to accept the idea of Authority which does not exist you believe in illusion you get an illusionary world to create suffering the end that's it you want to take anything away from the show that's it you want to continue to believe in illusion things that don't exist and continue to act upon them you're going to continue to get more suffering I don't know how much simpler I can put that but there it is so this is the fasces symbol and what it represents in the eyes of control freaks control freaks you know people who hate themselves so much than what they really want to do is just make the other people's lives miserable by conducting violence against them in some form that's it that's all it is these are self loathing people and always have been why because they've never really turned inward and understand what real power lies they've never found that place of power within themselves and the connection to the true source of creation they don't have that capability maybe some of them you know and instead of seeking healing which our society should do you know all they do is they seek control so this is one of these sick twisted notions and this is a sick twisted symbol and what I would say is indeed this does represent kind of almost a 1 a unit dimensional way of looking at a symbol I don't know of any other interpretation for the fashions itself it's a complex symbol you can look at the acts a little bit differently the acts is used in ancient astronaut the Sun God again ok but um the fasces itself is a multi-tiered symbol it's combining multiple smaller symbols into a larger one so there's a pretty clear understanding of its representation symbolically an image number 2 here in this section we see the fact she's used on the Italian flag during uh Mussolini's reign okay clearly an example of fascism as Mussolini running a fascist government on image number three here's more fascism oh we call the Nazis fascist well they're National Socialists right it was a National Socialist German Workers Party the Nazi Party well here's the symbol of fascism right on our postage stamp from 1938 I believe okay so with Hitler on it the fashions they're depicted on the left now we're also where we see the fashions role in some pretty surprising places connected with government and monetary institutions we look at the house chamber in image number four a this is where the house meets the House of Representatives and you have two fashions on both sides of the main seat where the speaker of the house sits in the image number four there all right two fashions I thought this was supposed to be a republic well it's supposed to be a republic we clearly have fascist symbolism in the main house of the republic of the United States there's some mixed symbols there I would say mix the mixed messages maybe so if you think this is actually a republic but if you know what this government really is that symbolism is totally appropriate I would say if you know what any government is you understand that that symbol is very appropriate all right so moving on we see a close-up for those who may not you know see that clearly enough there in the smaller image there's a larger image it's in black and white it clearly shows the image of the fash YZ uh in between two pillars there next to the American flag and five-pointed stars overhead to ionic pillars and that there's a symbol of the mace there which is uh also a solar cult symbol image number six the United States Senate seal okay with the US flag shield design a Liberty Cap of the olive branch and what's that we have there below - fascist over each other in annex configuration okay the United States Senate supposedly a body of a Democratic Republic yet there's two symbols of centralized Roman authoritarianism also known as fascism on the Senate arms there you do the math the next image image number seven this is an image of the inside of the Lincoln Memorial Lincoln seated on the throne okay and that's what this is supposed to represent a throne chair he's supposed to be a king because indeed you know this is a Empire that we're living in if we're honest with ourselves we live in an empire with an emperor the emperor is a plutocracy ruled by the extremely extremely rich but ultimately the real plutocracy that's really ruling the show behind the scenes the real oligarchy I should say it's really ruling the show behind the scenes is a class of Oh cultists and understand how all of the symbolism works they combined it they gather in different occult orders and they're doing a number mentally emotionally psychologically on the human race and they pretty much have us right where they want us until we wake up to this and I've said it before and I'll say it again and I'll say it repeatedly over and over again until it sticks until the occult is no longer the occult the world will be enslaved meaning until people understand what these ocultist s-- understand and how they're employing this information and what their methodologies are and they integrate that knowledge into who they are confront it and then rise above that and understand that knowledge cannot be occulted that it's owned by the people of the world is that it's owned by all of us we share it and we don't occult it and we come up to the level of consciousness where that can be done you will be essentially a slave whether you're free in mind or not bodily you're going to be essentially have violence conducted against you anytime you go up against these people who actually believe that they are authorities and it's done through mind control through the occult we'll be right back after these messages folks we've got a half an hour left be right back [Music] are you still paying your credit cards and so-called bank loans thinking that you are the money do you feel like it's your moral obligation but can't see an end in sight well what if I told you that in truth you don't know a single penny and that the banks move this and hope you don't find out here's where we come in we to prosper calm specializes in a profound debt repudiation method which challenges the validity of your so-called decks morally frees you from the burdens and protect your property island system is often superior to settlement bankruptcy or consolidation which often leave you in a war situation if you feel the moral obligation to take care of yourself and your family then I urge you to consider taking action right now the economy will not wait if you want to know more so you can prosper through the economic collapse almost being honorable and true to yourself then call eight seven seven four one seven eight three nine three that's eight seven seven four one seven eight three nine three or visit three to prosper calm right now hey if ye Shepherd he hosted the info hub check out my lifestyle every Sunday at 4 p.m. Central Standard Time you can check it out from my website the Intel hub radio.com [Music] join me Joe Joseph John Cain and AC Griffith Thursdays and Sundays evening at 8:00 p.m. Eastern freedom League radio on the inside of news they very wealthy US Edison is predicting that in 2011 we will witness the most important day in America in more than 50 years he says it will change everything about our lives the way you shop travel invest educate your children and even how you take care of your health and family now this man has made some outrageous predictions over the years but the crazy part is he's usually right you see he predicted the collapse of GM Fannie Mae Freddie Mac and America's biggest mall owner General Growth Properties a few years ago in fact Bironas called his work a dire prophecy now this has nothing to do with the stock market but it could have a huge impact on almost every aspect of your life and recently he created a video which you can watch online for free detailing his biggest and most important prediction yet and it's a real eye-opener I can't stress this enough you should at least watch the free video online today he explains everything you need including simple steps you can take to protect yourself you can find the video @ww end of America H calm although this video may be offensive to some audiences it's worth checking out again that's wwm of America the number eight comm watch this free video at wwm of America a calm you are listening TV Intel hub news network Russian border by piece [Music] that's what you're listening to the Intel hub news network where we're crushing the dark new world order piece by piece and we're going to build the light one I'm your host mark passio you're listening to what on earth is happening we were getting into the symbolism of the fasces as connected with government institutions and one of the main symbols that we see in Washington DC is the Lincoln Memorial it faces the phallic symbol of masculine energy known as the Washington Monument which is the symbol of the phallus of Osiris in the Egyptian cosmology if we look at I want to spend a little bit of time on the Lincoln image itself which is image number seven on the website are four images for tonight on the radio listen page under the fascist symbolism we see that Lincoln is actually seated on this throne because he represents the emperor of the symbolic emperor of the ruling class the the ruling elite the rain over the ignorant masses to think they're free and he is holding two fashions right there it's supposed to be a symbol of emancipation and freedom yet on either side Eddy the Emperor holds two fashions on the left hand side he has a closed fist okay on the left hand side he has a closed fist representing government authoritarianism representing violence okay on his left I want to emphasize his left so if you're seated in that chair your left hand so you have to envision okay his left hand is made into a fist and it's on top of the fashions we see that on the right hand side of the image when we're looking at it but that's his left hand so that represents left brain control typify by government violence on the right hand side he has his hand open grasping the fashions but open nonetheless with an open palm okay and his right foot is forward this represents handing somebody control in the name of righteousness or in the name of doing the right thing or putting the right foot forward this is all symbolic it's all very very specifically chosen symbolic language okay you call this form of control is religion the right brained form of control and symbolically what they're telling you is that we control both of these institutions we control government and we control religion we control at all as the occultists who owned this place who owned this place and own you because you don't understand your rights you don't understand natural mall you don't understand our language then we're telling you this right in the open in the place that you think is the seat of your government is a place that you think typifies human freedom and emancipation we're telling you this right in your face and you're not intelligent enough to figure it out and I'll say again there's very little other interpretation for this okay this is clearly subversive symbolism in this instance the fasces means essentially one thing centralization of power and they're telling you how they're doing it openly in the form of mockery that's what this is this is a form of occult mockery because this country was on lock stock and barrel in Lincoln's day and even before and it's one of the reasons they murdered him in the murdering of a king because he's their symbolic king or Emperor just like they murdered Kennedy in a ritual killing of a king it's an Osiris ritual and he's looking at the phallus of Osiris the problem is you have to understand so many different forms of symbolism to decode this most people think it's crazy when you even talk about it or try to help people understand it but to the initiated this is telling an exact story in specific encoded language that 99% of people are too domed comprehend quite frankly I mean you know just to say it unapologetically because it's the truth I think people have a long long long road ahead of them until they really start grasping this and they're going to suffer an unheralded amount an untold amount quite frankly you know I don't know if the earth is really going to put up with this you know that this level of denial and you know what we're doing to her you can't read some of the things that we're doing to the body of this planet and it is it's just unfathomable but uh you know we keep letting these occultist do this to us because we don't want to learn and we don't want to admit that we're wrong we can't admit when were duped that we were played hardest thing for anybody to do this in a deep ego state is admit they got played you didn't see it coming the problem is most people have been played since they were in the cradle you know uh you know it's a the game is rigged because their programming people with all of this stuff from the moment they're born and the brain soaks up everything like a sponge in the first seven years you know we're on automatic download mode mentally and in the way we you know build our worldview when we come into this world and they count on that that's why the symbolism is everywhere starts to work as soon as you're born the next image image number 8 I'll try to wrap up the fascism section and then maybe we'll stop there and move on to other symbolism next week but we have the administrate the Administrative Office of the United States courts their seal we see a feather pen a scroll and what's this behind it a gigantic wonderful rendering of a fascist there in our court building symbol of fascism in the United States courts hmm interesting we this represents total justice the court system doesn't it fair balance justice you know truth coming to light is not where our court system represents they're telling you out in the open out in the open there's a building I didn't post it here maybe I'll get a chance to put it up on the website in Philadelphia there was an old court building that has clearly fascist symbolism on it there's a man you know this big Greek god looking figure he seated on a throne in these holding of fashions with the axe coming off of it and you know this is right there on the on the side of a court building on its own Nathan Nathan Chestnut streets in Philadelphia and there's very encoded symbolism just behind his throne where he's sitting you see two small lightning bolts but clearly there's their spelling SS it's the two sig runes that the Germans used during the Third Reich the Nazis I should say used on the Third Reich are representing the Schutzstaffel the SS secret police and it's right there on a court building in the United States out and open in the middle of a major city in the middle of the city where the Declaration of Independence was written and signed right out in the open hidden in plain sight image number nine is the logo or the seal of the Knights of Columbus this is a Christian affiliate organization connected with it's an affiliate of Freemasonry and it is an affiliate of the the Catholic Church uh the Templar cross here is represented the equal armed cross again and in the middle of the logo there you see a sword we see an anchor and of course overlapping them both we see a symbol of the fasces arm in image number 10 we see a fashion on an old United States dime so right on our money printed by the Federal Reserve System of course another fascist entity a fascist institution that is uh has been a oligarchical um rulership of the United States since its inception basically the Fed basically dictates to our government not the other way around um right there on the money that they print on the US dime leaf ashes and it says EEP Orbis unum from the one from the many one in other words centralization of power of the state from the many nations we're going to form one a one-world government essentially so the fashion is omnipresent in symbolism of the United States and we saw it used in in a Nazi Germany as well there in that section so I think I'll continue we still have a little bit of time let's get into the symbolism of the pentagram and this is an interesting one and this is one that many people will go into and break down but I hope to give a little bit more comprehensive of an idea of what the five-pointed star symbolism represents from different angles so the first thing I want to do is approach it from a truly occult philosophical perspective and help people to understand what the five pointed star in general as a symbol of occultism is used to represent will look at a deeper example of that a little bit later on if I give a couple of basic examples of where it is used so looking at image number one in the pentagram section we can see uh the the upright five pointed star and we see here depicted in different colors okay each each triangle section shown as a different color and on the points of it were showing different alchemical symbol associations so if we start at the bottom left there in green and we see an inverted equilateral triangle with a line about two-thirds down from the top cutting it up you know into a 1/3 and 2/3 sections of in green there that is the out chemical symbol of Earth okay so we see the four colored elements symbolically depicted earth being green okay now if we then would go to the left to the yellow point we see an upward pointing triangle also sectioned in a similar fashion and this is the alchemical symbol of air okay so earth again is our resources the innate talents mean we may come in with that are somewhat developed the circumstances we are surrounded by resources and talents okay that's essentially what you have to remember when it comes to earth what what it represents as far as what is with within us and around us now the air symbolism yellow here and the alchemical symbol of air represents our intellect so this is actual intelligence okay and again it's largely that left brain form of intelligence that um you know the capacity that we have to actually learn things and retain things and you know understand things so that is air then to the right side of that we see in blue the alchemical symbol for water which is simply the inverted triangle or the chalice um this represents our emotional capacity okay so what we feel and how we act upon those feelings then is our actions which is symbolized in red there at the bottom right by the alchemical symbol for fire an upward pointing triangle and this represents will the plane of will and actions what we do in the world now all of these four qualities or elements within the individual ultimately should be governed by higher-level consciousness an understanding of natural law morality rights etc and this is the spirit the governing spirit okay in which we do all of these things in which we think feel act and operate in the world through our circumstances and resources and affiliations etc okay therefore that symbol up at the top there in white above the white arm of the pentagram the five pointed star represents spirit or ether okay this is the fifth element and ultimately it is you know the higher will or love energy okay higher consciousness it is spirit itself potentiality and it is the source of creation it's a starburst pattern again there the eight-pointed star okay representing the two crosses the cross of st. George and st. Andrew we've gone over this in the Astro theology section and then the symbolism section we talked about the cross but there it is so that's like a solar symbol starburst pattern or a rays coming out of a central source so that's what this represents source spirit itself okay and it is put in the highest position because this is what the true governing factor is not the authority of man the physical world okay but the authority of spirit that exists within and all around us okay it's not in the flesh it's a higher quality and we need to be supplicant to that that is the authority of this Rome not anyone in the flesh excuse me one hey how are you Bob yes what that the eyes Dylan's how you doing tonight I'm sorry to interrupt ah you've been going over a lot of the symbols and some of the people wanted to be caught up in maybe just tuning in as to where the images are that you're going over and if you go to one on earth is happening calm and you click on his radio link to the radio show on that page now you'll find all the links there right yes on the radio listen page right underneath on the player you will see something that says images for Tonight Show for February 15 2011 and there you'll see five sections of symbols we are going through the third one which is the symbolism of the pentagram I'm going to wrap up on this tonight talking about the pentagram we'll get into more pentagram symbolism next week but you'll see you'll be able to click on all of these images and they will also be included with the podcast for the show counterclockwise sure who I'm wondering I was trying to jog my memory the other day I know somebody knows what this is it would be you what is it exactly that the chance for graduation you know those flash hats yes um what did you I heard from that told me it's to symbolizes something yes uh when when the gradually indoctrinated are given their reward for passing through the left-brain indoctrination system they will be dressed in a black robe and on the top of the head is a black square this is Saturnian symbolism okay Saturn is the disciplinarian and the the the adversary in a way that represents base consciousness or being kept in the dark since black color okay so this is associated with the base chakra or the root the mooladhara chakra and the black collar and square represents a Saturn as the inhibitor so what is big this is a form of occult mockery this is saying uh-uh you think you're enlightened but in fact you're on the black square and now the black square in the free Masonic symbology represents darkness or the lack of light the checkerboard floor is what the earth represents the earth represents that we are Wanderers in a desert of ideologies and if we stay in that form of base consciousness we are that we live a chequered life never really knowing truth from falsehood never really knowing light from darkness never really knowing a right from wrong because ultimately in its true essence in its original essence Freemasonry is about teaching those principles and it is encoding those principles into symbolic and allegorical forms umm so the symbolism of the black square been used in graduation or gradual indoctrination is indeed a form of mockery through symbolism and it's saying they're placing it on the top of the head on the crown chakra they're taking a symbol of the base chakra and they're putting it on the crown chakra it's unbelievable I mean it's it's pure mockery and in the open of people who think that they have achieved the height of knowledge but because they have achieved only a left-brain form of it in the universe and systems that we have set up that the occultists who ultimately run this form of indoctrination know exactly what it is they're they're getting a little bit of satisfaction through a subtle form of mockery by taking again a symbol of base awareness and a symbol of being a wanderer in lower consciousness and symbolically placing it on top of the crown chakra that's what it is Bob are you still there I am here and I knew you would have the perfect answer and I was thinking about that the other day because you know we were talking about graduation here at the University as you know I live near the University of Florida and I'm a student finishing the indoctrination in which I use it to study philosophy and spend my time producing and listening to shows like yours and I hope that wasn't a complete distraction but I was I was curious because it came up and I knew that that you would have the answer for me so thanks so much Bob that's fantastic thanks for all you know bringing that up I think I see a call on the blog talk switchboard let's see if is this song is this it's not you is it father is that the person is calling me oh that is you okay so I was going to take that call but that's great since we didn't have any our apologies my impatient all and thank you very much you got it Bob thanks so much for bringing that up great question so we have a little bit of time we have about four minutes left so I'll continue a little bit with the pentagram symbolism arm again this the five pointed star again is about the four elements combined with the fifth element which is spirit okay and in its upright configuration spirit is in its proper aspect it is in its proper orientation it means that that has to be the foremost thing okay and from there everything else proceeds okay we're not giving prominence to the physical realm we're understanding its importance and its associations but we're not saying that that is the authority or the source of everything we're saying that that all derives from something higher okay so in its upright form that's what we have to keep in mind about what a pentagram and in in the case where it's upright meant most times it is called a pentacle to differentiate okay but it is still a pentagram a five pointed star okay now we see this being used in different forms of symbolism and next week we'll look at what the reverse of this is all about or an inverted pentagram which is a subversive symbol we saw in religion if you look at image number two this is an Islamic symbol the sovereign and divine okay and again sovereignty is often represented by a five pointed star that's why we have 50 stars on the flag of the United States suppose they're supposed to be sovereign states ultimately they're supposed to represent the sovereignty of the people instead of the you know fall that we've had as far as the understanding of freedom and natural law is concerned but here it's used in Islam and we see it used in conjunction here with a lunar cult symbol in image number three we see star ATM again we talked about that as Astra theological symbolism and they're against are connected with money we looked at the Starbucks logo this is a repeat but you know we looked at that earlier in the show and there we can see the upright star is used again and I talked about that related with sovereignty and ultimately it's because we only really understand our sovereignty when we put that when we put the spirit in its proper upright orientation above the elements of the physical domain so I'll leave it there for now because that's all we really have time for and next week we'll continue looking at pentagram symbolism and then we will branch off into looking at symbolism of the all-seeing eye and the associated imagery of the pinecone connected with the all-seeing eye so for now we'll leave it there I want to thank everyone for listening you've been listening to what on earth is happening I'm mark passio we'll see you here next week folks thank you and good night no more happiness pop am i dead we no longer play yes we've been effective yeah affirm again unless it's a more colloquial situation with a few mobile friends everyone custom the robot and the robot again oh yes kind of doctor robotic in the world [Music] you

What On Earth Is Happening Show #048

Topics: *Mind Control Methodologies, Subversive Symbolism, The Pentagram, The All-Seeing Eye, The Pine Cone*

[Music] ok ladies and gentlemen you are listening - what on earth is happening right here on the intel Hoth news network I'm your host mark passio this show is live every Tuesday evening from 8:00 to 10:00 p.m. Eastern Time and tonight we're starting in a half an hour late there was some there was some confusion on the network end I'm not really sure what happened there I tried to get in touch with with Bob Tuscon who hosts truth be told radio that comes on right before me it looks like it appears that a rerun of that show was airing on truth be on the Intel hub network I'm not really sure why that was the case but I have not been able to contact Bob so I tried to get ahold of him over the last half an hour and what I just did was disconnect from the IH and then feed and I'm just going to do the show live to talk to this evening so not a problem we will just continue with our discussion on subversive symbolism as a methodology of mind control which we've been talking about for the last few weeks and we will be going into several more weeks of discussion on symbolism because it is so vital and it is so important to understand the building blocks of this language if we are going to understand the methodologies by which human mind is controlled in our culture now let me give the calling numbers if anybody wants to call into the talks to network this evening and going with just that one call-in line the number to call in is seven two four four four four seven four four four once again the call-in number seven two four triple four seven triple four and put in the call ID number which is eight three five one five once again the call ID eight three five one five the topic will be symbolism but again there are never any tableau topics here on what on earth is happening so you could talk about whatever you like my website what on earth happening.com I want to direct you there and you can find the images for tonight's tonight's broadcast right up on the radio listen page for those who are listening on talk-show you're already on that page so there will be images for tonight February 22nd 2011 listed right on the radio listen page on my website those are the images were going to discuss tonight I have a few event announcements I'm going to read first and then we're going to jump right in with the three forms of symbolism that we're going to discuss tonight which is the symbolism of the pentagram which we began with last week but then get very far into the symbolism of the pinecone and the symbolism of the pyramid and all-seeing eye now event announcements truth freedom prosperity we'll be hosting their monthly free documentary showing and discussion night this is tomorrow evening that's Wednesday February 23rd from 7 to 10 p.m. at media Bureau Studios media Bureau is located at 725 North 4th Street in Philadelphia that's the corner of 4th and Brown okay and it's actually on 4th Street the entrance and you'll see a sign on the door you go up to the second floor which is where the screening room is at this week they're going to be showing the documentary called the end of America by Naomi Wolf and it's a good one and it's a good introductory documentary for people to bring friends to and that's what we hope people will be to get them involved people who may not really be too aware this is a good beginning introductory documentary by Naomi Wolf the end of America for more information on the free documentary screening and discussion nights that are hosted monthly please visit www.behr.com fronts racing toward us a little over a month way for your mind is a conference on consciousness mind control in the occult it's a unique two-day conference scheduled for April 9th and 10th 2011 in Philadelphia featuring multiple speakers and diverse educational materials for the purpose of raising public awareness of mass mind control techniques the covert and subversive influences upon our consciousness and behavior trauma based and ritualized abuse and the practical mental and emotional healing methodologies available for those affected by these devices this is Saturday April 9th and Sunday April 10 2011 at Liuba Hall that's at 414 Green Street for one-four Green Street in Philadelphia the doors open at 9:00 a.m. the speakers begin at 10 a.m. on both days admission is only $20 per day if you get your tickets in advance through the website $30 per day at the door the featured speakers are in McCollum Alfred Weber Andrew basiago Bob Tuscan Bauer your dozous Freeman fly Yan Irvin John Nicholson Joseph Mara Larkin Rose Laura Eisenhower mark motika mark passio Michael Kelly Paul Marco and Suzanne Taylor for more information on this great conference coming up in Philadelphia please visit the conference website at wpri.com that's free your mind conference calm finally coming up in late April April 23rd 2011 truth freedom prosperity brings you fed stock - it's the end of Fed rally for Philadelphia turn your back on the Federal Reserve there's a no band's announced as of yet but there will be many bands scheduled to play in Philadelphia for as part of Fed stop - on April 23rd 2011 for more information please visit truth freedom prosperity org or Philly end the fed calm that's pH I ll Y and the Fed com all right those are the event announcements for tonight so let's get going with the show we talked about symbolism over the past few weeks we're going to be doing this a lot more in coming weeks and not to belabor the topic but I want to briefly explain what we're going to be getting into in the next few weeks and probably into about over a month on this show at least because I feel in my presentations specifically in the ones that I give on my website that I don't cover this topic in enough depth and when I race through it because I have a limited amount of time to make a presentation in person you know at a live event which is where those presentations are filled that it's difficult to create a true tapestry when it comes to symbolism because you have a limited amount of time in which to do so on an ongoing radio show like this I can get in-depth on symbols and help people to understand this language in a greater amount of detail so I just want to briefly outline what symbols we will be looking at and generally how many more weeks we're going to be going through this topic before we get to something different so we've already looked at solver symbolism we take a look at life force symbolism Astro theological symbolism and we've looked at the symbol of the fasces we started looking at last week the symbol of the pentagram which is where we'll pick up on this week we will also look at tonight the symbol of the pinecone and the symbol of the all-seeing eye next week should I be able to get through in the next two hours these three forms of symbolism and take a few calls on it we will be looking at goddess symbolism and the goddess symbolism that I will be discussing will be broken down in three basic parts we will be looking at the symbolism related to the goddess of the illuminated torch the symbolism of the owl and the symbolism of the Dove two symbols that are related to the goddess and the third of course being the illuminated torch but those three forms of symbolism are in fact goddess symbols as we will take a look at next week after that I will be kind of taking a break from symbolism but not really because we will be looking into the tradition of Freemasonry over the next couple of weeks after we look at goddess symbolism from a perspective of its symbols okay Freemasonry is an allegorical tradition and its symbols are one of the main ways that it teaches its lessons so we will be looking at what real Freemasonry is all about and we will also be looking at dark masonry so we'll be looking at Freemasonry as a dual tradition that teaches a true pure message but then that can be perverted and taken over and infiltrated and used in a perverse way by those who want to hoard that knowledge and use it as an a mechanism for controlling others and indeed both of these forms of Freemasonry exist and our practice in the world today so and I would say one of them is Freemasonry and the other is simply masonry or what I call dark masonry these are two very very antithetical traditions they are they're polar opposites in fact when you understand what the real tradition of Freemasonry being illustrated by its allegory and symbols really is you understand that it is attempting to do the true great work of elevate human of elevating human consciousness now I know that will be considered controversial by some people listening to the show but again of people who don't understand that the occult has two sides to it and think that it is all negative and all quote evil don't really understand what the occult is and they're responding and figure to something that they don't understand and that's what I attempt to do is dispel that fear by explaining to people what some of these traditions originally are intended to be versus what they have come down to us in the modern age as and those two things can often be quite different and often polar opposites as I've already said so we'll be looking at Freemasonry in depth probably over a couple of weeks as we looked at Kabbalah and Tarot over a couple of weeks okay after that we will look into talismanic symbolism this is symbolism that is imbued with power by being carried on the person okay so we will look at how symbols get into the subconscious by being carried continuously okay that's called a talisman something that is complex and biology that is that is carried in order to to have it work upon the subconscious mind and we will specifically be looking at the talismanic so that is on the dollar bill here in the United States we'll be looking at the Great Seal of the United States specifically the obverse side of the Great Seal I'm sorry not the obverse side the reverse side the reverse side of the Great Seal which is the pyramid with the capstone missing and the all-seeing eye above it we'll be looking at the all-seeing eye symbolism tonight but I won't get into the seal on the back of the dollar bill I'll be mentioning it I will not be breaking it down tonight that will actually be a show in and of itself where I break down that that symbol in its entirety so after that we'll look at something called gematria and this is another occult tradition this is a tradition of numerology connected with form okay so it is merging math form and number and it's called gematria gdm atri a geometry combined with mathematics so gematria plays a role in how a cultist employee different strategies and the times that they enact certain events and carry out certain certain machination x' so they are very much into numerology dark occult isn't specifically our and we need to understand a little bit about gematria to understand why that is so important in the occult way of viewing the world okay now for those again who may be listening the show and have been for weeks or even the last couple of weeks or even just new to it what I'll say about symbolism I've said before and I'll repeat if you approach this from the left-brain perspective a purely logical left brain perspective okay what I mean by that is that you're not looking deeper into the creative and intuitive aspects of how these symbols can be employed okay and understand that these are employed and meant for subconscious viewing meaning that when the eye looks at something it is not immediately recognized in its connotation by the conscious mind but the subconscious mind is essentially all-knowing and in order to get down to the root meanings of some of these symbols and how they are being used we have to look at them from a holistic perspective not a purely left-brain scientific you know a Western worldview this robe is all there is as far as the flesh and the materialism of it goes okay we have to employ more broad thinking okay broader thinking to this topic and that involves using the right brain okay which again is the creative side of the brain the Sacred Feminine aspect of the of the consciousness in order to understand how these symbols really work okay because again they're working at a subconscious level not at a conscious level once we understand the language once we understand the building blocks of the language and then we can read the language we're going to bring that subconscious awareness up to the conscious level but again if you take the approach oh I don't believe in that that's just you know somebody else's belief and that doesn't affect me you're missing the point entirely symbols do not have to be believed in for them to have an effect other people believe in the type of worldview or the type of ideology that goes hand in hand with some of these symbolism of the symbolism and they are using those symbols to affect different kinds and modalities of consciousness in the general population who is unaware of how those people are using them and it has effect whether those people are unaware of it or not it has effect the only way that you can start cursing that effect is to become fully conscious of what this language is saying and therefore you bring up out of the subconscious mind to the conscious mind what this language is actually saying to you so then you can understand it it's like someone talking behind your back in a foreign language that you have no idea what they're saying okay they can communicate information you to somebody else they could insult you in front of other people who may understand that language and you would be affected by it yet you would be completely unaware of exactly how you would be being affected by it but if you then learned the grammar the building blocks the grammar and the syntax of that language then you would understand as soon as they open their mouth what they were saying about you that's how symbolism works okay as a language so just to continue giving a very brief outline of things that we'll cover later after we look at talismanic symbolism we will then look at symbolism employed in architecture meaning in buildings that are around us not only do they use in the product placement on paper or on television things like that but they also use them actually in architecture and I mean in the actual ways that buildings are built to represent different things and ideas so we'll look at architectural symbolism and then finally we'll wrap up with a piece of complex symbolism that's kind of abstract yet it is very difficult of symbology and that is the symbolism of the hypercube and it's important to understand the symbolism of the hypercube because it is used in various applications that specifically address mind control and it is a symbol of mind control as we will see later on on this in this program not this one but programs that are coming up so that's just to give people a brief outline I'm thinking this will take up at least another five to six weeks minimum maybe longer and again not that this is going to become a show all about symbolism but I think it's particularly important to understand this and understand it well and spend time going into it in depth because it is used so pervasively in our culture that unless we become symbolically literate these things are going to continue and they're going to continue at a subconscious level and that means we are really have no defenses against them until we bring this knowledge up to the conscious level so um what were ultimately moving toward is to get finished talking about all this the negative stuff okay we want to turn and shift this show into a show about solutions to all these problems but in in looking at subversive symbolism in looking at mind control methodologies we are we are doing something positive because knowledge is the beginning of helping to reverse our course as a people we need the knowledge of how these techniques and tactics work if we don't have that knowledge we're powerless to defend ourselves against them and that's why we're exposing these things here on the show so let's look at let's jump in and start looking at where we left off last week and I direct people again to my website go on the website go to the radio lesson page what on earth is happening calm and go to the show links of the show images for tonight's show February 22nd 2011 you will see links for the three types of symbolism I'm going to discuss here tonight so if we go to the pentagram we will see in image number one this is an image that I had people look at last week and we started to break it down on a pentagram as a basic five pointed star it is used in different occult traditions specifically the pentagram represents the four forces of nature and then combined with the fifth element which is spirit okay so we have the alchemical symbols there in red at the red arm of the pentagram the alchemical symbol for fire the blue arm is the alchemical symbol for water the green one the alchemical symbol for Earth and then the yellow one the alchemical symbol for air and their associated colors then in white representing purity and source we see the symbol for spirit or ether and there we have the dual armed cross the eight-pointed cross inside the circle representing the fifth element ether or spirit and in there are two configurations of the pentagram which we are going to see this evening the upright pentagram which places the spirit in its proper position in its proper place raised up above the forces of nature that the the forces of matter the the elements of matter I should say okay because this is the force that ultimately governs them all okay ultimately they all are derived from that source which is spirit and they are a manifestation of it therefore when a cultist would draw this five pointed star they would place the top pointing upward representing the prominence of the spirit okay raised up above and given elevation or given preference or importance that's what it's signifying here okay an inverted pentagram does the opposite it downplays the spirit it puts the spirit on the bottom and it raises up above it before elements of the material plane the material world earth air water and fire so that's a general pentagram there with the elements attributed to it to each arm now of course the pentagram is also connected with the planets specifically the planet Venus so being a star it is connected with the stellar cults as we've talked about when we talked about Astro theology on this program three cults of Astro theology being the solar cults the lunar cults and the stellar cults the stellar cult its symbol is star okay because it's about the stars and the planets and paying homage to these gods or goddesses as the case may be Venus has an orbit around the Sun that when viewed from the earth traces a pentagram traces a five-pointed star so this star five-pointed star shape has traditionally been used in astrobiological circles to represent the goddess Venus the planet Venus okay and in her goddess aspect that is one of her names Venus this is also the goddess Diana it's Semiramis it's um Mary it's um Isis you can go on and on but the pentagram in this configuration has been used to represent the goddess okay and that this is kind of segues into what I'll be talking about next week when we look at goddess symbolism so in image number 2 here we have a flag from a Muslim country and it is a called the sovereign and divine the star and the crescent moon again we looked at how Islam as a religion is Astro theologically based upon the moon and ancient goddess cults when we looked at religion as Astro theology by the way for you know possible new listeners please go and visit the podcast section of the show of the website that's it what on earth is happening calm and click the podcast tabs if you're new to the show you can go back and listen to archives all the way back to when we started almost a year ago okay so the star is often used in connection with the idea of sovereignty okay which is self dominion over one's own thoughts emotions and actions true self-respect true self-love okay knowing that you are a free and sovereign being and living that way okay understanding your own thoughts your own emotions your own actions your own motivations your own desires and ruling them from within self mastery being a being that as you think so you feel and so you act and there is no contradiction between those three aspects of consciousness within you okay so non-dual consciousness this is sovereignty this is what the star is often used to represent okay which is the goal of all true occult philosophies not ones that are subverted and perverted and used as mechanisms of control but all true wisdom really that is attempting to free people by helping them to raise their own consciousness to the point where they respect themselves and others understand that they are one understand that as one suffers all suffer and understand that they are indeed sovereign under the the creator and no one has a right to rule them externally as long as they are not harming other people and doing things which they do not have the natural law right to do okay we're within our natural law rights we exist as sovereign beings and as such no one else has authority over us all claims of authority again are illusion they're simply that claims and then people recognizing claims to which there is no foundational basis for because if I don't have the right to rule someone else and keep them as a slave no one does okay and that includes trying to combine forces and say well this group of people say that we're allowed to be rulers and we're going to enslave you and that's called government that's called coming together and constituting what's known as a government which is basically saying all of our non-existent Authority is going to be combined and now we're going to create a thority out of something that really doesn't exist and then exercise it well we don't have the right to do so but you know that's the end of the spiritual understanding the spiritual journey so to speak not many people are really there we'll be talking about true cooperative spiritual anarchy as the ultimate goal of spirituality really of the evolution of consciousness on this planet that's what it's altom utley about but very few people are of a high enough level of consciousness to even comprehend that idea sadly my point here is in this image that the star represents that awareness that knowledge that wisdom that level of consciousness okay it represents true sovereignty and therefore controller's profit ears advertisers they're going to want to use this symbol as much as possible that's why the star is used continuously they know they know that deep in the subconscious mind the subconscious itself knows what this symbol ultimately represents it has been used to represent that in human civilization for thousands of years and therefore they're going to take advantage of that so you know we see in the next three images how it's using these are just small examples we can go on and on and spend days looking at where star symbolism is used in uh in advertising but we see it in the next three images three through five in some advertising logos so star ATM's again we have our cult symbolism the name of the ATM on the sheen of money currency distributor here okay is star right in the name then it has the Saturnian swoosh representing a partial ring as we talked about we looked at Saturnian astra theological symbolism previously okay and then we have a star pointed upward in the next image Starbucks coffee the Starbucks logo again the name star Starbucks okay with the goddess depicted there okay it's three stars in the logo the crown on her head because she is the queen of the heavens the crescent moon can be seen if you look at the the sub circle which just contains her if you look at the other circle you know the inward circle and just then remove the circle that contains just the goddess in her air and body you can see that it's actually a crescent moon so we have star and Moon symbolism here in corporate logos on image number five the Texaco logo this is actually a complex symbol is we have the circle we have the star inside of it again representing sovereignty which of course you're going to go get at the gas station right there's always selling you something you don't have you'll get it at the ATM you'll get it at the Starbucks you'll get it at the gas station right but don't look within for that you know heaven forbid you do that um this I say is a complex symbol because there is also symbolism of the Tau cross in here and people will say oh yeah that's just letter T that is an ancient art type of symbol it's a hammer it's a symbol of authority okay that's what the towel is the capital T and it is situated at the top of a pyramid there if we look at the reverse and read that is where the T rests on top of a mound this connects with ancient archetypal symbolism of the primordial mound and it is also a symbol of authority and a symbol of divinity okay so all of these things combined in this to make this a powerful symbol when it is just viewed by the subconscious also the use of the color red in there okay connected with needs and once you'll often see red used in things to instill desire or simple longing or wanting okay in image number six we see the logos of the two parties here in the United States the two parties that really ultimately form one party which is globalist fascism and socialism all two sides of the same coin we see the elephant which represents the Republican Party and then we have this farce right on there the three stars and they have chosen to place them with the point downward in an inverted sense we'll be getting to that in a moment on the right there you see the Madonn key which is used to represent the Democrats and that has four upward pointing stars they're in the top half in blue star is often used in conjunction with a blue field as on the American flag of course which is supposed to represent the sky of course you know astro theological symbolism that's all about the gods in the sky and again connected with the idea of sovereignty in which is what the stars are supposed to represent on the US flag again sovereign states however here we see them used selling the idea of sovereignty through identifying yourself as part of a party of a political party so let's look at some deeper aspects of the pentagram from an occult perspective all right in image number 7 & 8 we will see and look at other examples of the pentagram and how they are drawn in certain occult traditions now the image number 7 is often used in a Wicca or in other magical traditions and it is an upright pentagram which is often called a pentacle okay a five-pointed star placed upright and you see the words Adam and Eve written in the arm in the inner circle of the pentagram and you see a being with his his / her body with the feet at two points of the entacle the hands at the other two points and then the head at the fifth point so the pentacle is tracing the outline of the human body around the outside of the the inner pentacle okay there is another circle and in between the two circles we see Hebrew characters Hebrew letters where it starts okay is at the right foot okay now that's if you're looking at it if you were the person it would be their left foot so it's that small little character at the bottom there on the right of the image and that's called Yoda okay that's the Hebrew character Yoda if we then go to the right and up we will see the Hebrew character um I'm sorry if we then go to the yes we will see the Hebrew character Hey okay and I'm incorrect about the no that is the correct order so we're going up and to thee and to the right okay so it would be the right hand if you're looking at it and it would be that person's left hand okay that is the Hebrew character hey then at the top of the head we see another Hebrew character and that is the Hebrew character shin then we're going to the left now in the image and it would be the right hand of the person okay if you were that if you were placing yourself as a person that's the Hebrew character Vaughn and then we go down to the left hand side bottom okay which would be at the right foot of the person if you're placing yourself as the person on the pentacle and that's hey again so we actually get a Hebrew word there which is yo hey shin Bob hey and this is derived from yo nave of hay which we talked about before we looked at the Kabbalistic tradition and the Tarot tradition okay yo hey Bob hey is the Tetragrammaton it is the four-letter name of God in Hebrew it is if we transliterated it into English it would be Yahweh YHVH or that could be also pronounced as Jehovah Jehovah or Jehovah these are two names that we transliterate out of Hebrew to get words in English okay based on the sounds of the letters in Hebrew but if we place that Shin character in the middle to get yelled hey Shin Bob hey Shin is the character in Hebrew which means light light and it's placed at the head of the person because in this configuration with the fifth point pointed upward okay the person has received light they have become illuminated they have become enlightened because they have placed the spirit in its proper orientation ruling of of the four physical elements earth air water and fire represented by the other letters there okay and spirit rules their consciousness and their demeanor and their understanding hey this is a person who has wisdom and they are putting the letters for Adam and Eve the names for Adam and Eve in this configuration to represent the chemical wedding which we talked about as being the coming together of the left and right brain hemispheres okay so Adam would represent the left brain and Eve would represent the right brain the sacred masculine coming together with the Sacred Feminine and therefore these two have combined in this image so we're not looking at a male on this star we're not looking at a female on the star we're looking at a combination of the two because we're not really talking about the body we're talking about the inward qualities of consciousness and that's what this is a symbol of okay so this is a powerful positive symbol actually okay this is showing that when the male the masculine and feminine forces within us come together our emotions and our actions will unite them through principle through wisdom because we have lights represented by that Shin character at the top and it is the primary focal point for our actions and it is the primary guiding force for our actions in life okay then we have become like the divine operating in the physical world not saying that this being is God or anything like that saying it is embodying the divine okay it is aspiring to be like the divine and it is acting in that way all right it is it is basically ruling one's own aspects of consciousness a being in this condition rules over okay has dominion of their own thoughts their own emotions and their own actions and they're not in conflict they're unified as they think so they feel so they act they so powerful unity symbolism here in the upward-pointing pentagram and from those characters okay from yo Dave Ave we then put the Shin character in the middle right representing balance and what does it then spell it then spells notation Bob hey which is Yeshua or the name of Jesus in Hebrew some would pronounce that yahushua or uh joshua okay but it's essentially the name that is given to jesus and that is you know placing the light character in the middle of the Tetragrammaton the four-letter name for God or Yahweh or Jehovah and then putting that fifth element right in the middle representing the light so it's the light of the Creator coming down and inhabiting the body of man okay powerful symbolism if it is understood and indeed that is what the arm the man Jesus represents in the original esoteric Christian tradition whether it is an actual historical character a historical personage or not that is the whole idea behind the true teachings that are um come down to us as Christianity the original teachings of that religion and again in the modern world that comes down to us as a stir of theology and the main points are being missed about what the ultimate deep esoteric teachings about the human spirit are as part of that the original tradition of Christianity and I think that needs to be we've discovered sadly religion isn't helping anyone to do that move to the next image image number 8 and this is dark occultism now now we're looking at the inverted pentagram okay so this is a satanic or a dark Luciferian pentagram not a pentacle and it's inverted configuration is most traditionally referred to as simply an inverted pentagram okay so we see now that it is pointed downward representing the downplaying of the spirit okay representing thrusting the spirit downward into the ground or into the grave and uplifting the material world up lifting materialism uplifting the the for physical material elements of earth air water and fire represented by the other four points of the pentagram inside the inverted pentagram we see a goat's head and this is a depiction of the god Baphomet now Baphomet is also a dual symbol it can represent again the chemical wedding the coming together of the male and female because this hermaphroditic and in a dark way it can also represent pure will divorced from the

Sacred Feminine and it can represent pure materialism raised above spiritual spirituality and that is what it represents in this configuration in an inverted pentagram it does not represent the chemical wedding when it is used like this okay we see the two um names Samael and lilith okay these are the two out of balance hemispheres the two out of balance um consciousness the masculine aspect of consciousness gone awry okay and the feminine aspect of consciousness gone awry so Sal mile would be the left brain out of control in other words going into a Dominator modality control okay too much pure logic without compassion knowledge without wisdom all of these things represented by the out-of-control left brain hemisphere which will be represented by psalm al a demonic a name which is used to represent this left hemispherical imbalance the right hemispherical imbalance Lilith okay this is the dark goddess okay this is the right hemisphere gone out of control okay desires overwhelming oneself okay addiction it could be self-loathing it could be um no not having self-respect but ultimately it's the right brain in a state of severe imbalance and you know this is depicted in different traditions in different ways you can all you often see a dark goddess a Haggard woman a witch type you can often you'll often see as like Medusa isn't as an image of this extremely dark goddess figure okay um let's see in Alice in Wonderland you know it's a good allegory about the dart goddess principle you'll see this as the the the Red Queen okay um it's depicted in many different ways symbolically and allegorically alright but it's being Sacred Feminine force gone completely out of balance okay which is the right hemisphere living too much on the right hemisphere and being overwhelmed by emotions being ruled by the emotions not ruling your emotions but letting them rule you thinking from the emotions which can be extremely dangerous because that will lead to cognitive dissonance states where we can see something that we can logically prove is true but we still don't want to acknowledge it because of the emotional impact that it will have upon our psyche and therefore we just decide to uh you know refuse to accept its existence this is right brain out of balance thinking another way that this comes up this form of right brain and balance can be the idea and uh my friend Darrell just recently sent me a good blog post on this which was about how people will not acknowledge information if they don't like the format that it's put in whether it's true or not they say I don't want to hear that because I don't like the way you said it you know you I perceive you have an attitude or you have you know some kind of an ego but I won't look at your information because it doesn't make me feel good how you said it I would rather feel good rather than be given information regardless you know of whether it's true or not I don't want to look and do the work to decide whether what was said is true and pay attention to what was said okay I get this all the time ladies and gentlemen you know people will say well sometimes you get angry or upset or overly emotional and therefore what you're saying has less of elyda t no it doesn't see myself I can listen to someone dressed in a clown outfit you know um that's uh juggling and uh you know looks like the craziest person you could ever imagine and if they're speaking wisdom I'll hear the wisdom that they're speaking now maybe that's just me and it probably is but my point here is an out of control emotional aspect or right brain hemisphere will make someone simply want to feel information instead of really reasoning information okay really deciding whether it is true this is a function of a holistically functioning brain being able to gauge information based on whether it is true or not delving into it finding out whether it's true reserving emotional judgment in order to get at the truth if your right brain is completely out of control it's often impossible to do that and that would be the liveth principle at work okay so the Samael and Lilith this is beyond holy marriage you could say okay and if we want further confirmation about what God this symbol represents we have it in the form of the name around the outside now again around the outside of the upward-pointing pentacle which was crowned by light the light character shin in the former example in image number seven we saw the name of God and Jesus depicted in the image okay and again this is not in the s in the exoteric Christian tradition okay this is in this is down to the esoteric roots of that religion okay which is why it is occult it and used in symbols such as this we're not talking about you know uh the ways that they use those in modern religion it's it's altogether different qualities that it's representing you know um the the tetragrammaton represents the all okay it represents the source it represents the divine guidance that we can all get into touch with the Jesus name represents following the light okay it represents being sovereign understanding one's divinity okay understanding that we are sovereign to the creator and acting living that way that's what that represents it's symbolic this is not about anthropomorphized gods okay and their actual physical so-called sons living on the earth that's not what it's about this is again Astro theological principles that are brought down through ancient astrobiology cults into the modern world as a religion what we're talking about here is the esoteric going deep into the symbol understanding what it means when it represents symbolically that name those names okay so now on the inverted pentagram we see the inverse of that principle and we start at the right hand side at the bottom I'm sorry scratch that we start at the very bottom of the pentagram for the name here okay and that is the character la med which is basically L in Hebrew or at the bottom point of the pentagram is where the name starts and then it Hebrew goes left to right so we're going counterclockwise okay so we started the base which is the downward point again representing spirit thrust downward into the ground or buried above the weight of the physical world and that is the character love net oh okay then we go to to the right okay bottom point and that is the character evolve so that's a V so we have L V okay then up to the top right point and that's the that small character again it looks like an apostrophe that's a yond okay so that's like a y so we have lvy okay then we go to the top left point and here were the a and M and Samael is that right and that's the Hebrew character uh Tov okay so that is a T in Hebrew so we have L V Y T and then we go down to the bottom left point okay well we have that long character and that is the Hebrew character none the final none okay that represents n that translates the end so we have have L V Y T n Leviathan Leviathan the Leviathan is a demon the spoking about as being the beast okay this is the consciousness that is completely uncontrolled by oneself this is the out-of-control left and right brain this is the dissolution of the chemical wedding all right this is someone who does not rule themselves they're not in Dominion the material world rules them because their spirit is buried under it under its weight you see the symbolism here if you can follow this through and you can understand what it represents symbolically you understand what the symbol is saying okay all of these ideas now you have to try to transcribe everything that was said about these two symbols but look at how simple it is to just put two symbols down on paper and all of these ideas are put right there into it but it's predicated upon understanding the building blocks of the symbol and once you get more familiar with symbolism you can read it because you can say I understand what that represents in conjunction with this in conjunction with this and then it becomes very clear what it's saying symbolically and why the people chose certain images all right so the inverted pentagram ultimately it represents being not sovereign okay being controlled being a controller being out of control within ruled by the material world the spirit in a state of destitution or being dead essentially okay will without wisdom intelligence without wisdom all of these things that's what the inverted pentagram ultimately represents symbolically okay and it's the breakdown of the balance that truly creates the chemical wedding so it is an out of control left brain in and out of control right brain all very appropriate to the symbol because that's what happens when we take spirit out of the equation all right so we see another variant on this inverted pentagram in image number nine and this one is one that I know very much because I was involved in the organization that uses this symbol this is the official sigil of the Church of Satan so they're they use the same inverted pentagram with the same letters but they do not place the name Samael and lilith upon it and this is the Baphomet that was actually used as the official emblem of the Church of Satan by Anton LaVey who was the high priest of the Church of Satan from 1966 until he died in 1997 and that is a stylized rendition of the inverted pentagram with the goat's head in the middle of it okay let's look at how this is used in the world and we're going to look at three examples of inverted pentagram now if we look at image number 10 here it is chock full of symbolism okay this is the Medal of Valor okay and this is given to military and other military and police essentially and receive this medal for meritorious service and we see that it has goddess symbolism on it which we would initially perceive as the Statue of Liberty but that's another representation of the goddess we'll look at that next week if we get through all the symbols this week we're coming up to the top of the second hour I'm going to give the call in numbers again and we're going to be going till 10:30 tonight because we've got a late start some confusion on the network end so we'll be going till 10:30 deceive me all right the calling numbers once again seven two four four four four seven four four four the call ID eight three five one five we're going through symbolism of the pentagram on what on earth is happening calm in the radio listen listen section okay you'll see the image is listed there we're on image number 10 in the pentagram section the Medal of Valor and we see the inverted pentagram down at the bottom which the main metal is made of we see the starfield above that inside of an octagon now the octagon is connected with the image of the hypercube the symbolism of a hypercube which we won't be getting to for a while but I'll just put that I throw that in that that is hypercube symbolism up above it and hypercube symbolism in general represents mind control being controlled when you don't know you're even being controlled that's what the image of a hypercube represents someone who is under mind control the Octagon someone who is completely out of balance and is willing to do things for other people whose intentions they know nothing little to nothing of and that is who this metal is given to because they're giving metal they're giving strength it's valor Valarie strength see they're giving that to somebody they're giving them something that they lack spiritually that's what this metal is a substitute for it's given in place of it I know military people will be loath to hear this understanding if they've been handed something that's satanic this is a satanic symbol the goddess is placed in the middle of these inverted pentagram this is an another symbol representing the death of care and often the people who are given this had to prove that they killed their care to get it to go off into war to murder other people okay and get as offended about it as you like and there's the tagline again I'm gonna have to make t-shirts with that on it okay because the whole point here is once again I'm not here to be anybody's friend or to make you feel good I'm here to tell you the truth about what's really going on in the world that's it that's all I'm here to do and I don't care what happens to me as a result of doing it because I don't care about my life I've given up my life to do this because I understand that if we don't get this information and message out we're all going to slaves forever and there's not going to be any opportunity to grow spiritually at least not here so get all nuts about it get it out of your system and then grow up and be a big boy okay so sorry to say it that way but hey let's just cut right to the chase and not not pull any punches you know if you're totally on the other side and you know where you stand as far as evil goes then be on that side and wonderful and I'm going to continue to do what I'm doing as long as I'm in the flesh okay so continuing to break down that symbol we also have a trapezoid behind the pentagram in the way that the metal of the ribbon that the metal is attached to is folded okay now this is also a satanic symbol and if you actually look into organized Satanism some order the Church of Satan's brand of Satanism the trapezoid is one of the main shapes if not the main shape or the main symbol of that religion and there's a reason for that the trapezoid is a pyramid with the capstone missing and they dismissed the capstone for a very specific reason which I'm going to talk about while we get into the pyramid all seeing eye symbolism okay so there is satanic symbolism all over this figure if you look at this configuration of the starfield as well it ultimately represents three chevron shapes okay these are male symbols if we connect the configuration of stars okay there are three upward pointing blades this represents the male aspect tripled okay there's no feminine aspect in that in that symbol the way these stars are configured you can also tend to rearrange if you put a final star at the bottom of that shape okay you see that it could also represent two interlocked squares which is also hypercube symbolism okay that's a little bit more complex and again we haven't gone into the hypercube yet but all of this symbolism is cleaned up on this metal and again the goddess is placed in the middle of the inverted pentagram representing that care has been destroyed because that's what that the goddess really represents that's what the upright tentacle represents so they're there again this is like a total occult mockery it's an occult mockery of the goddess and it's an occult mockery of the person that this is being handed to saying thank you for doing our bidding for us slave thank you for doing our bit as bidding for us mind-controlled slave that's what it is and people who receive this think it's something so wonderful and they can't even understand what's being said to them because it's being said in a symbolic language which if you don't understand what that language represents you're going to think oh great I'm young I'm being rewarded here you're being mocked is what's happening and you're being mocked by Satanists who are ultimately running these institutions handing you something with hypercube symbolism trapezoidal symbolism which is ultimately rooted in Satanism and inverted pentagram symbolism with the goddess right in the middle of the inverted pentagram representing the destruction of one's feminine qualities and care all combined in one image in one emblem which is a talisman again it's pinned on someone image number 11 is the emblem for the Order of the Eastern Star okay and again we see the four material elements and then they're raised above the fifth element now I'm not going to say that the Eastern star is anything that is like pure evil or anything like that I completely disagree with a couple of things about the eastern star okay well I would say I would espouse the true teachings of Freemasonry if one really deeply understands the allegorical tradition and what it's saying through its symbols there are things about the eastern stars logo I don't like now you'll see you know the book of sacred the sacred volume of law representing the Bible they're laid out okay and then you have the four physical elements again and you have the fifth one pointed down I don't understand why they would do that if they're truly trying to espouse the tenets of Freemasonry okay again this comes down to us in the modern world in this woman's order that's a Masonic affiliate order another thing I highly disagree about that order in general is why is it segregated why are you separating male and female and Masons will go on and on about why this is done and how old you have to respect tradition and it's a good idea to keep men and women separated so that they don't you know aren't distracted by sexual concerns or you know other petty concerns when there in the lodge and I would say all of that is nonsense you're saying that this order is only for men and this order is only for women and that's symbolically segregating the left and right brain by keeping people apart maybe maybe there are women who would bring incredible insight into the launch system if it were not segregated like that this is an example where an institution is cutting off its nose despite its face just to keep in mind with so-called tradition and it's another reason why I refuse to be involved in an official capacity with modern Freemasonry one I know it's been polluted and turned into an old boys club and has been infiltrated by institutions that are totally bent on control and to UM they continue to employ ridiculous nonsense like segregation of the sexes and there's other reasons as well look I take notes to any worldly institutions I take an oath only to the truth herself that's it that is who I serve in this world I don't serve an earthly institution of any kind ever okay so while I will work with some true Freemasons who really do understand the tenets of Freemasonry and I'm friends with such people and who are really trying to spread the ideas of natural law and true you know concern for others and true compassion and true sovereignty and true self-knowledge I'm not going to take any oath to any worldly institution and I understand they'll say oh that's even symbolic well there are people working through institutions like this that are perverting it's true ideals and therefore I think that just as an institutional body that's based on hierarchical structure it ultimately is something that is fallen it is it is fallen and people like Mason like church ward warned us about that I highly recommend reading the book origins of Freemasonry by Albert Church Ward and he told us what would happen if the trend that he saw in his day would continue into the modern age and it has it has he said what the Masonic institution was going to become and I would agree that it has become that to a large extent and I'm not saying that from just opinion either I'm saying that because I know what goes on inside some of the large systems that are that are operating and it's not entirely good it's as a matter of fact some of its pretty bad because people who understand what this knowledge is about who go to it and have been accepted into it often without many prerequisites just because they can contribute dues see that's where money destroys everything okay they open up their doors something that was once cruelly esoteric and reserved for people who really wanted to understand this they open it up because we have to take people in we need money to continue operating and then they're taking people in who this is their world view money is their entire you know system of values and then they bring in their friends and you can see where the trend leads from there and the easter stars some more example that this word fatal around this Penta the Pentagon in the middle of the symbol means fairest among thousands altogether lovely FA tal and what that represents is the star Venus okay and perhaps that is why they invert it because Venus is configuration when viewed from Earth does resemble an inverted star okay its orbit and again this is it's goddess symbolism that's why it's used in conjunction with the feminine order Freemasonry a female order the order of the Eastern Star the Rising Sun okay I just think that it's still something that should have been greatly considered with coming up with an emblem for your organization that you're using something that is traditionally been used to represent dark occult ISM I don't believe that's what the eastern star truly represents down at its foundation and it's deep principles it is teaching what true Freemasonry is trying to teach but it's a it's a poor choice for a symbol when you understand the deeper esoteric connotations of what the inverted pentagram represents moving on to image number twelve in this section we have the Victoria Police emblem uphold the rights and here we have a plethora of symbols okay we have the P out the bundled wheat okay coming up on the left and right sides holding the inverted pentagram in its arms then they come together to form the crown okay we have the symbol of the equal armed cross above the crown we have the symbol of the equal on cross in the middle of the pentagram okay Victoria is another goddess connected name okay and uphold the right what does that mean are they upholding the right of the people well I would say absolutely not they're upholding the divine right to rule because the crown and they claim to serve the Queen okay the crown represents the Queen the Queen of England all right Victoria being in Australia and that being a police force that is basically under the jurisdiction of the Queen as a province equal armed cross with the five stars upward pointed stars again connected with the goddess principle and I would say the dark aspect of the goddess used here and the inverted pentagram in the behind the Victoria police circle there again thrusting the spirit downward into the ground saying uphold the right of the Queen the divine right to rule and it's being upheld by the material elements see the Queen's crown is between the two upward pointing to upward pointing points okay and then the the sash there is held by the other two and all four of those put the fifth element into the ground bury it pure subversive symbolism again used in conjunction with police you see how it is actually used in the Victoria Police in the next image number 13 showing what looks to be a captain's hat police hat and there you see that emblem as a badge placed on the forehead right in front of the third eye chakra the Ozma chakra which we talked about representing the coming together of the left and right brain and the awakening of the pineal gland and there you see it right in front of the third eye chakra is where that would end up when the person puts that hat on its head and not only that but it's combined in other words they're telling you this is a person whose brain is out of balance they're serving our agenda they're upholding our so called divine right to rule the British crown okay and they're using Astra theological symbolism connected with the the the the badge they're they're using inverted pentagram symbolism which is purely overtly satanic to anyone with a trained eye okay and they're putting it on the third eye chakra in conjunction with the checkerboard floor band okay the checkerboard band which is a representation of the floor of the house it's called the floor of the Temple of Solomon okay this is lower consciousness this is the ark complex this is the out of balance brain that closes consciousness down and does not allow one to see whether they are in light or in darkness that's why it uses the the alternating black and white squares representing one's checkered life and checkered decisions it's a play on words in addition to being a symbol you lead a checkered life you don't have whiz you don't understand anything you know you don't know whether you're you're going in the right direction or the wrong direction you're completely confused you don't know whether you're going in the direction of light or darkness and that's what that symbol represents and that's why it's called the floor of the house the checkerboard floor of the house it represents base consciousness lower awareness not understanding sovereignty not being a united person being dual being dual with yourself because you're not a person that as they think so they feel so they act you can be made to do anything you can make the manipulated to do someone else's bidding it's a symbol of mind control and they're wrapping it around their brain they're wrapping it around the brain of the policeman and then on the third eye which is the prefrontal cortex that is at the same level as the pineal gland right on the third eye chakra the Ozma chakra they're placing an inverted pentagram with a Queen's crown over top of it okay that's not subversive symbolism though and for the police here in the United States you say oh we don't wear anything like that well you wear an an octagon on top of your crown chakra which represents the hypercube which represents mind control and right on top of the crown chakra they're putting that which is the highest level chakra awakening the true cosmic awareness and they're putting a black octagon on top of that chakra so it closes that form of consciousness down to you symbolically and you're being mocked symbolically in that way police symbolism is chock-full of dark occultic symbols chock full of as is military symbolism this is what I'm going to talk about at the free your mind conference and I'm going to go in depth in it and explain to people how they're completely being occult eclis mopped and they don't even know it they're because they're unread they're unread people police are unread people in general and even those who are read don't read the right things to really understand much of anything at all and I'll tell them that to their face sad it's sad dumb people are being completely mocked to their face because this is like someone coming up and speaking French to someone who never studied a word of French in their life and telling them how much they hate them they load them they think they're an idiot there are more on they're stupid they would just completely you know wipe their feet on their face okay that's basically what they're saying and you can imagine what else they would say to them okay and yet the person would have absolutely no idea what was being said they could even say in a nice sweet pleasant voice but they would be completely mocking them to their face and that's what they're doing with this symbolism and yet the other person not versed in that language has no idea what's being said yet they continue to do their bidding for a paycheck because that's their God money is their God I'm just doing my job ah no you're doing things that are completely in contravention to natural law which you have no right to do for a paycheck because that's your God that that's my response to quote it's only a job it's just my job yeah well put what the Nazis did and what the Schutzstaffel and the SS and all the other Nazis in World War two we're doing was just their job at the time but because money and power was their God they went along with it and sick depraved agenda just like the cops are doing here 98% of them anyway image number 14 I won't break this entirely down today I'll do this at a later time but this is the a Fraternal Order of Police is emblem and this is a sigil an outright sigil it has tons of symbolism all over it it's got a five pointed star okay a basic pentagram and while it is right-side up there is something else in here that is completely upside-down which if you write that you need to invert the pentagram or if you keep that upside down the pentagram space right-side up which is it's contradictory symbolism and it's done deliberately okay and this is a satanic talisman right here because tons of people carry this all the time you see tons of people with stickers with this all over their cars in the United States that have no idea what this symbol represents and how truly subversive against consciousness it is okay you see I can't truly break this down tonight because we need the understanding of Masonic symbolism to really understand it I wanted to put it in here simply to help people to understand it's pentagonal symbolism symbolism of the pentagram used in conjunction with the police uh FOP stands for a Fraternal Order of Police you have the all-seeing eye there in the bottom left you have a Masonic handshake there in the lower right you have the Temple of Solomon symbolically depicted on the shield you have the two pillars of duality raised up above the pillar of unity and the pillar of unity at the bottom thrusts downward which represents spirit and non-dual consciousness okay and you have the checkerboard floor of the house raised above that and actually acting as a buffer between those two things so this is extreme subversive Masonic symbolism I would call this dark Masonic symbolism okay symbolism of dark masonry which ultimately is what the orders of the police are all about police being taken in to Masonic orders our and and their behavior advocated okay is not being done to try to really help these people be better police it is being that is being done because dark Masons aren't actually putting them under their form of subversive control so that they continue to do their bidding and their there is no look a true Mason okay would never advocate such a thing as police in the first place a true freemason one who really understands the the embodiment of natural law contained in Freemasonry would understand you even creating an institution like that is failure in consciousness its failure because you're trying to put out a fire with more gasoline you're saying we're going to use force taught to undo something that is already caused by people subverting natural law instead of actually teaching them the principles of natural law from the moment they're born the whole idea that control is the answer oh we have more crime well we need more police we have more crime we need more control we have more people doing things that are completely out of hand and against people's natural law right so we need more international law making bodies and institutions to come together and try to create more oppressive laws to try to put that behavior down you'll never put it down that way you're going to get more and more chaos as we explained if you want to go back to to show I believe it was show number 36 on natural law you go back and listen to that one again the presentation I did on natural law I mean people who advocate even starting institutions based on control such as government or police do not understand how natural law functions they don't get it they don't understand you keep responding with control okay you're going to create more chaos you'll never Olay that chaos you will never put quell that chaos you have to add the principle of love and understanding in order to quell that chaos now I am NOT saying if someone who is completely out of control and does not understand natural law is coming to try to take your freedom that you sit there and just say I'm only ever going to respond with a you know kindness there is a time to actually take physical action to put down rebellion against natural ball like that and this is another thing people will refuse that there is such a thing as you know the New Age movement will try to tell you there's never any time to use force and that's nonsense that's absolutely not nonsense there is certainly a time to use force if there wasn't the ability to use it what exists and unfortunately you know there's continuing encroachments into human freedom and and natural law rights happening right here in the United States and in just about every country in the world and we're seeing people start to push back against it in other countries I wish the United States was a quarter as a wake as some of these other countries that are they're refusing to to live under these dictatorships but see you know you get into a whole other discussion about that is it is it an orchestration as well to try to put create chaos and then manage the the aftermath of that chaos you know by putting in somebody that will play ball with you you know so we have to be careful about how much manipulation behind the scenes is going on in these are movements in the Middle East and in northern Africa right now but that's another discussion that's got to go back to the point I was talking about with police all of this is completely subversive against natural law it's being used talismanic Lee okay which basically means in forms that are carried badges symbols emblems on cars emblems on stickers okay to put an idea into the subconscious mind that police are connected with divinity because there's the all-seeing eye on their on their logo they're connected with partnership a handshake they're connected with sovereignty a star and they're connected with none of these things this institution is about controlling people and they're about controlling people because they act as an insulating buffer between the people who are kept down at low levels of consciousness and at low levels of being able to even have access to resources that they need for living okay and and and at low levels of being able to engage in their natural law rights that they inherently possess they're acting as a buffer between that gigantic mass of people that are basically kept suppressed like that in consciousness and in rights and the elite class of people who are actually their owners and rulers and these elitists and I wore I've worked with some of these darker cultists they call these police they call these military who do their bidding and who they completely occultic Lee and ritually mocked through their smock through their symbols they call them our dogs our pets that's what their name for them is and once again bang your fists against the desk bang your head against the wall do whatever you like but that's the best truth that's the case that is what they call you your owners whoever is listening out there that's involved in a control based institution or if somebody gave you one of these podcasts it is crazy and nuts about it as you like I'm telling you and I would tell you to your face if I saw you in person okay your owners and you have owners call you their dogs okay that's what they call you that's their name for you and you think you're a man you think you're a real man you think you're a tough guy you'll beat on people and taser them and you know kill them and that makes you feel like you're a tough guy because you are completely controlled by other people who have more power and influence than you because they've convinced another group of morons that to believe in something called money and to treat it as true value and therefore they have all of this influence and all of this control over other people based on something that doesn't exist and they own you as a result of that and then you do whatever they tell you to do regardless of whether you have the right to do it or not and in return you'll get these little trinkets where they're basically calling you our dog and mocking you symbolically and telling you you're a brain-dead idiot and you can't even comprehend what they're saying to you because you're an unread person have I summed it up and you know hey that's vitriolic I get it I get it it's not pleasant to hear I don't sugarcoat it I'm not gonna sugarcoat it I don't care what you think of it I could care less you know why because it's true and it doesn't matter how the truth is spoken this is mind control right brain mind control is I care whether that person has a crazy-looking sweater on while he's speaking words of wisdom I care whether that person has an accent when he's speaking words of wisdom I care whether that person has a beautiful haircut and a wonderful $3,000 three-piece suit when he's speaking pure deception and vile evil that's all mind control all that matters is whether what's being said is true or not none of the other stuff matters that's all just how we perceive something and perception is not truth and not reality they want you to think that it is and that's called salep season there's no such thing as actual truth there's only what I think of as truth and what that person thinks of as true is equally is true this is nonsense we talked about what truth actually is and it's wave functions that actually collapse down into point particles that form the present moment the truth is that which had existed in the past as present moments and which does exist in the present right now events that actually occurred future doesn't exist yet because the conditions and the choices that create the future haven't arrived yet they exist in future present moments which which don't exist right now they exist as wave functions of possibility we talked about this when we looked at a little bit into quantum mechanics back in the part about barriers to self-realization you go back into the podcast and listen to all of this but perception is reality which is what they want you to accept of as truth is not that is not true I mean you know our perception is just how we see something at a given moment in time it doesn't mean it's true and everybody's perception is not equal you know everybody should strive to get to the truth so that their perception is harmonious with the truth not to just think that perception is reality so speaking of perception let's talk about the true eye the one eye okay so let's get into pinecone symbolism okay I think that's what was next on on the page let me check it out real quick or was the all-seeing eye next to the pinecone last all right we're going to do the all seem 9 X so let's do that let's look at the pyramid in all-seeing eye symbol okay and we have 17 of them here okay the first one shows and says image number one in the all-seeing eye section first one just shows a basic archetypal image and it's thousands of years old of a triangle with an eye inside of it okay now this represents the prefold aspects of consciousness thought emotion and action being the three sides of this equilateral triangle and the eye inside of it is the inward eye it's the spiritual inner self okay and it says its they put an eye in it because you're supposed to equate this with yourself via the eye you are a reflection of this when you get down to the deepest qualities of the self you understand that you have a spark within you of divinity of the divine okay you are created in the image of the creator and you have a spark of that divinity it doesn't mean you're God anybody you know trying to quote me as saying that doesn't understand what I'm saying okay it means you are a part of the all and the always within you okay and that is your true nature and as such this symbol also represents divinity itself and is used very often in that capacity but it also represents the sovereignty of your thoughts emotions and actions coming together in non-duality and being like the Creator in that capacity oneness I the letter I represents one okay a straight line up and down one or the latter I say it's wordplay it's symbolism combined okay putting the eye in the middle of the triangle like the three the three-in-one father son and spirit or mother okay the Trinity that we talked about being thoughts emotions and actions thoughts being the creator principle or father emotions being the Sacred Feminine or spirit and then actions being the son the byproduct of thoughts and emotions which is a male principle because it's an external externally acting principal so this is what the all-seeing eye ultimately represents here you see another stylized interpretation of in an image number two with rays of light coming off of it because it represents the light of the creator and that's a great image of it very nicely rendered okay image number three another stylized interpretation of the eye the all-seeing eye with rays of light shining out of it the source oneness unity consciousness the Creator the energy of the creator all-seeing all-knowing all-powerful etc okay image number four is another representation from ancient Egypt or CEM okay of the Eye of Horus I often depicted as a left eye okay and for a reason okay the left eye is connected to the right brain for the right mind okay the Sacred Feminine principle embodied with this one eye okay it's saying get in touch with the right brain even back then the Egyptians knew the functionality of the brain and that the right brain controlled the left side of the body that's why a true stylization of the Eye of Horus which is the Sun God of ancient Egypt representing true morality and the truth okay a true representation of Horace's I will always be in left eye and that's why so in images number five and six we see the reverse side of the Great Seal of the United States now I will not break this down entirely tonight I'm going to do that I'll have a whole show for that okay where I give my a complete interpretation of this complex sigil because there's a lot of symbolism in it a lot of nested hidden symbolism in it as well but basically here we see the all-seeing eye above an incompleted pyramid now very briefly the incompleted pyramid in this image represents the physical world it also represents the male blade which we talked about the upward pointing triangle that image above it is looking in to the world from a higher dimension a higher form of space-time okay it's peering into this world and the light is actually reaching this world from it meaning that you know the essence of the Creator is not found in the physical world but it pervades the physical world and it surrounds it okay that's embodied by light now our goal is to transcend the chains of the physical world to be sovereign under the Creator so it's to get past that pyramid so there is nothing between us and that light there's no barriers or walls you can look at those bricks as walls being erected between you and the light we need to take them down see a dark Mason builds with bricks those with walls builds with barriers wants to cut people off from their essence it wants to remove the light from the world and again there's some dark interpretation of this symbol because dark Masons they want to be God right darker cultists want to be God they're control freaks they want to be all-knowing all-powerful present they want to be God they want everybody else serving them because their God and everybody else is a slave in their worldview right they have the divine right to rule people so they look at themselves as that all-seeing eye not that it is within them a spark of it not that they can embody it but that they can be it so they want to erect that pyramid so that they finish the male dominator world the blade symbol right and they rule it in secret so then the true light of the Creator would be blocked out of this world and that they would remove it from the hidden shadows as the elite so in that in their interpretation of dark interpretation that all-seeing eye represents the elite as God and many people call that symbol of the scent the eye of the Illuminati and it can equally be seen as that but again it's only one interpretation of it there's a positive side and there's a negative side to it and these are cultists take sacred symbolism and they use it in their agendas they pervert it and use it for themselves they don't create anything new they take existing things the whole idea there is nothing new Under the Sun they take something which already exists pervert it and use it as a weapon something which could have been originally pure and good we have to be more mature about that and understand that symbolism serves dual purposes it depends on who's using it it doesn't mean one thing okay image number seven here we see it used in religion and you know I wonder what people who are are against you know the so-called New World Order symbolism that is depicted here who are also religious think of an image like this here you have a cardinal or a bishop assuming some kind of a high-level priest it looks like he's probably a bishop or something they think that's what that staff represents and he has the illuminated all-seeing eye behind him they had been traditionally used as a symbol for God in image number eight we see it used again the all-seeing eye symbol isn't in a stained glass window in a church and it's beautiful absolutely a fantastic piece of art there with light shine through it I did not take that I wonder you know who did but it's a great image and again used in religion here we see in Jerusalem I believe that this is a Sepulcher or a some form of a chapel and above the length of the doorway we see the all-seeing eye with the rays of light coming out of it again again this is partly solar symbolism because the embodiment of light the light of God coming down to the earth is symbolically represented by the Sun that's why you see light always coming out of out of the the eye symbol as well so it's used extensively in religious symbolism that's the key point of making here in this section all right it's about 10:15 we're going to go till 10:30 tonight um after that we see some examples of it being used in um corporate logos again now look at the next image in number 10 AOL okay which was a really huge online service not so big anymore but still big media conglomerate that deals with information this eye is often used for anything dealing with high amounts of information it will also be dealing with things that involve trust it will also be used in monetary situations okay when we see it in corporate logos but most of all in anything that deals with intelligence okay intelligence media money flow etc okay so here we see a o L used it in their logo that's an older stylized representation of the AOL logo America online image number 11 fidelity investments here we see again I just alluded that it was used in trust in image 11 fidelity okay and you have the trust you could trust in this company folks just like you can trust in the Creator itself can't you tell by the logo and we'll put the all-seeing eye logo above the pyramid there and that's true trust you can trust your investments with us image number twelve Citgo gasoline this is a pyramid as seen from above okay again the symbol this is actually a tetrahedron and it's a tetrahedral geometry is based in sacred geometry they're using this in gas here the pyramid now the pyramid okay this is getting us ready to understand this I symbol in the middle and its shape okay as a little uh shape like the vesica Pisces as the pineal gland okay because the pyramid itself what it's always used in conjunction with the pyramid because pyramid means fire in the middle Tyrel fire like pyromaniac right mid middle in the center the fire in the center again it represents the divine spark at our spiritual center and it also represents the coming on line of the pineal gland the all-seeing eye our Ozma chakra so that true spiritual eye with that true spiritual vision that helps us to discern the truth is turned on is awoken in us when the hemispheres of the brain act in unison with each other and come to a place of balance which is known as the chemical wedding so that's why the pyramid is used here we see the eye and image number 13 by itself image 13 shows the CBS logo we saw that when we looked at vesica Pisces in a show theological Piscean symbolism last week but again it represents the eye you're watching it or it's watching you look at image number 14 it's certainly uh having to do with putting the sittin in the sense of the CBS logo putting things into the mind to shut down the eye actually image number 14 what when it comes to media propaganda image number 14 is the information awareness office which we just saw come to light several years back you know after 9/11 it has a the all-seeing eye with the pyramid looking down over the earth because that's what the goal of this is is to be all-knowing gather information about everything and everyone it says at the bottom there see entia CNTs potentia which means knowledge is power in Latin I believe is a department of advanced projects something something that effect DARPA of someone on the look it up but that's essentially what it's connected with I believe that's what that says up above when you see DARPA is see the acronym represents D ARPA is Defense Advanced Research Projects Agency I was pretty close Defense Advanced Research Projects Agency so this is a this is a subset I believe of DARPA and their job is information gathering total awareness okay and there you see the all-seeing eye used in conjunction with that idea Simo similarly in image number 15 we see British intelligence using the all-seeing eye this is the emblem for British intelligence connected with the British crown which is mi5 okay so this is the Queen's Intelligence Unit herself and you see the eye at the top above the pyramid with the capstone called in acting as the capstone with the eye in it symbol of the eye in and the letter i' mi5 the eye is at the top okay in image number 16 and 17 we see used in conjunction with free Masonic symbolism and again the light of the Creator which which Freemasonry is ultimately about attempting to bring true Freemasonry is about ultimately attempting to bring forward is detected there involve the compasses in the square with the G in the middle of it which we will break down probably in about two weeks okay in image number 17 I won't break this whole symbol down but it is I'll do that when we talk about Freemasonry but I'll just briefly allude to it here this is the first degree tracing board of Freemasonry I have briefly mentioned it before in the past I'll extensively break it down in a couple of weeks we see the the pillars of jocking the light pillar leading to the Sun and Boaz the dark building to the moon and in the middle representing the synthesis of this chemical wedding between left and right brain of hemispheres is the all-seeing eye again at the top of the pillar of wisdom because that is the representation of how wisdom is obtained by combining the masculine and feminine forces that dwell within us to come to the light of the Creator okay and that that is done by climbing that ladder and we need the key in the middle of it which is connected to the green initiate which we talked about the color green representing care or love energy or true nature and you know symbolized by that color that is where uh that is that represents care true care and we need that to cut as we climb begin to climb that ladder of awareness and that key is dangling by a thread which represents care meaning that the world basically the care of the people of the world is dangling by a thread and that is the goddess principle that we need to reconnect with and and reunite with being true care that's why dark occultists always want to crush and kill to care within us and get us to only care about money or power or greed etc so let's let's wrap up tonight looking at the image of the pinecone we could go into this a little bit next week but I'll spend the last few minutes of the show won't take any calls this week talking about the pinecone symbolism as also representing the all-seeing eye as representing the pineal gland coming into activation so we see the pineal glands position in the brain image number one in this section in pot on the pinecone symbolism section on the website we see that it lies between the are complex and the telencephalon which contains the neocortex the higher part of the brain it's it's basically toward the rear side of the limbic system the midbrain okay so it's positioned of behind the hypothalamus um and in front of the cerebellum this is the third eye in lies at the center of the head and this is the glandular activity associated with this gland is truly activated once we balance the left and right hemispheres of the brain which unfortunately the kind of food that we eat media that we take in the opinions that we hold through you know who we listen to and pay attention to all affect this part of the brain the conditions that we live in affect this part of the brain and affect the ability to balance the brain hemispheres and to activate that part of the brain that's what they want to keep suppressed in image number two we see the Pope holding the pinecone we saw this when we looked at Astro theological symbolism there it is in his left hand at the base of the cross of Christ we see the pinecone because it is symbolically representative of Christ consciousness and symbolically represents the awakening of the all-seeing eye that exists within us the Vatican believes that this imagery is so important that they actually created a entire statue with imagery of the pinecone at the

Vatican itself it's called the court of the pinecone and the next one two three images will show you the court of the pinecone there you see it from the front in image number three it has two peacocks that are associated without chemical symbolism on either side of it and they also represent in this image as it is depicted the brain hemispheres one is on the right one is on the left and they are both looking at or pointing toward the pinecone which represents the awakening of the true spiritual center within our consciousness here's a wide-angle view in image number four of the court of the pinecone this is a great clear image taken by tourists at the Vatican and you can clearly see the the symbolism leading up to it how it is elevated on a pedestal there are steps on either side there are Lions on either okay there is a water fountain down below of a like a green man spitting out water okay the the the whole thing forms like a pyramid this whole base that it rests upon and then the Peacocks are at the top and then the pinecone at the very top and this pinecone is about ten feet tall from its base the largest statue of a pinecone in the world at the Vatican they wouldn't put something in the Vatican if it didn't mean a whole lot it wasn't significantly important okay here you see an image number five and I'll let this be the last image for tonight and then we'll continue we'll wrap up with the pinecone image next week and then we'll talk about goddess symbolism but here you see the backside on the opposite side of the the image you can see there's tourists there down below from that other angle and you see a empty sarcophagus now what that represents is resurrection the resurrection of the Spirit okay which was once in the grave but upon the unification of the left and right hemispheres the spirit is activated because the pinecone or pine Neil Glen is activated and indeed this is what the pineal gland actually looks like it is it looks like a little pinecone and it also looks like an eye if you turn it on its side okay it's all connected folks it's about that coming together of the left hemisphere of the brain the right hemisphere of the brain turn on this gland which activates our true spiritual awakening and then raises us up from the state of being spiritually dead which is what the empty sarcophagus represents it's not about the flesh there is no body in that sarcophagus there's not going to be one in there because it's about the resurrection of spirit and the Vatican knows this yet have they told you that's what I thought because it's all about control that's what modern religion is those that symbolic knowledge is reserved for them in their priests class it's not for you you're just supposed to do what they tell you unquestioningly because religion is a form of mind control ladies and gentlemen and it always has been and that's what it's going to continue to be unless we wake up to it understand that they're keeping this esoteric knowledge for themselves while they use it to control us I'll leave it there for tonight folks thanks for listening this has been what on earth is happening on your host mark passio that shows live every Tuesday from 8 to 10 p.m. I'll see you right here next week good night you

What On Earth Is Happening Show #049

Topics: *Mind Control Methodologies, Subversive Symbolism, The Pine Cone, The Goddess, The Illuminated Torch, The Owl, Bohemian Grove*

freedom man that's what it's all about [Music] [Music] welcome you are listening - what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of Earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches it's critical moment of choice and now here is your host Marc Pascal [Music] welcome ladies and gentlemen welcome one and all wherever you may be you are listening to what on earth is happening I'm your host mark passio this show is broadcast live every Tuesday evening from 8:00 to 10:00 p.m. Eastern Time I'm pleased to announce tonight that we are going to have a new format this evening for the show and this is a very good thing because the second hour of what on earth is happening will now be picked up by Oracle broadcasting and the network is oracle broadcasting comm if you'd like to visit that site online check out all of their great hosts this came about because the the intel hog radio show was picked up for oracle broadcasting they're now doing a show two hours every night from 8:00 to 10:00 on the oracle broadcasting network and i'm going to act in the capacity of a contributor to the intel hub radio show on tuesday night for the second hour of the show so every Tuesday night Oracle will be picking up the second hour of this broadcast and that's great news what that means for the first hour is that the first hour will run commercial free there will be no ads and then we will be will be hearing the network ads during the the second hour when we're live on Oracle so I'll be connecting to that network at the top of the second hour and should be pretty exciting should be interesting should probably get some new callers and listeners from from that network so it's a good thing all around what I want to do before I jump into the topic for this evening is I have the event announcements and the call-in numbers for the show so I'm going to give the call-in number first you can call in two seven two four four four four seven four four four once again the calling number seven two four triple four seven triple four and the call ID number is eight three five one five once again the call ID for this show which you will be prompted for after calling the calling number is eight three five one five no taboo topics here on what on earth is happening there never are at the top of the second hour when I am in after I'm introduced by Bob Tuscan and Shepard the host of the Intel radio show the Intel hub radio show I'll give the Oracle call in mind so people will also be able to call in toll-free on the Oracle Broadcasting Network on check out the show the Intel Hub radio.com the website that's the website for the new Intel hub radio show on Oracle broadcasting the Intel hub radio.com is that website I also want to direct everyone in advance if they're not already listening through the talk show interface on my website to go up to what on earth is happening dot-com and click the radio listen page and on that page you will see images for tonight's show March 1st 2011 there you'll find a host of images that you can click on that will come up in a in a slideshow type format and you'll be able to follow along with the symbolism that we're going to talk about on the show tonight tonight's show is going to be an ongoing a segment in our series on the usage of symbolism as a methodology of mind control and it's also kind of an initiation into occult symbolism in general we've been doing this for several weeks and this will continue for many more weeks to come because I'm going to continue to go over the symbolism and depth I have a really ambitious list of symbols to go through tonight we're going to be looking at the remainder of pinecone symbolism which we left off on last week and then we'll be looking at goddess symbolism for the remainder of the show this this type of symbolism may take a couple of weeks to get through we'll see how it goes so with that having them said let's get into the event announcements I only have again this week first of all the free your mind conference racing toward us it'll be here in just over a month and everything is on track for it and looking good a lot of good response all the speakers are are a go to be part of this great event so for your mind a conference on consciousness mind control and the occult Saturday April 9th and Sunday April 10 2011 at rubra hall 414 Green Street in Philadelphia PA the doors open at 9:00 a.m. speakers begin at 10:00 a.m. each day admission price only $20 per day if you get your tickets in advance $30 per day at the door there are still plenty of tickets left people have been asking about that plenty of tickets still available you could order them in advance there's still time to get them up through the mail that way or you could I could also do if you were to order them in advance through mail I see the website I could also keep them at the door we have a will call at the door as well but if you decide to come the day of that's $30 at the door and there are still plenty of tickets available for your mind is unique two-day conference scheduled for April 9th and 10th in Philadelphia PA featuring multiple speakers and diverse educational materials for the purpose of raising public awareness of the critically important topics of mass mind control techniques the covert and subversive influences upon consciousness and behavior trauma based and ritualized abuse and the practical mental and emotional healing methodologies available for those affected by these devices the featured speakers Erin McCallum alfred Weber Andrew basiago Bob Tuscan fire year dozin Freeman fly Yan Irvin John Nicholson Joseph Mara Larkin Rose Laura Eisenhower mark motika mark passio Michael Kelly Paul Marco and Suzanne and tailor for more information on the free your mind conference check out the conference website at WWF raw mind conference calm and get your tickets today second event announcement and the final one is fed stock to the official and the Fed rally for the city of Philadelphia will be taking place in Philadelphia on April 23rd 2011 the theme for this event is turn your back on the Fed and reduce your Federal Reserve Note footprint this event is organized by truth freedom prosperity will be taking place on April 23rd 2011 lots of bands are going to play at this will have a I think they're going to have an indoor location this year I'm not exactly certain about that but last year they had a concert out on Independence Mall park lawn at the Visitor Center so I'm not sure if that's what they're planning on doing again or if it's going to be indoors somewhere after some sort of a March the details are still really to be announced but for more information on this you could check out two websites you can go to WWE and the Fed calm that's pH I ll Y and the Fed calm or you could visit WWE am prosperity o RG truth freedom prosperity org the great organizers of Fed stop 2 and the federales here in Philadelphia those are the event announcements I have for today so let's get right into our topic which is subversive symbolism and symbolism used as a methodology of mind control last week we were looking at the symbolism of the pinecone and we left the show off at the end talking about the symbolism at the vatican of the pinecone namely the court of the pinecone this is um you can see these images up on the site on the radio and listen page pi koan symbolism is listed first and we left off on I believe it was image number five in this section which was the close-up of the rear side of the court of the pinecone with the two peacocks on either side and an empty black sarcophagus at the base of the pinecone statue these are alchemical symbols these are mystery tradition symbols they are symbols of spiritual awakening and the activation of the pineal gland or all-seeing eye the third eye chakra the Ozma chakra the empty sarcophagus represents rebirth to spiritual life and coming out of the grave of materialism and the grave of lower consciousness and physical world all there is all there is type thinking now of course um these are that is what the goal of true religion should be but these symbols are not shared openly to the public and have been kept secret down through the ages the Vatican flaunts this spiritual symbolism openly in the light of day at the Vatican and guarantee you would get no answers if you pressed someone from the church to explain what how chemical and mystery tradition symbolism is doing at the supposed holy ground of the Vatican in what is called the court of the pinecone these this is because these elites and religious leaders who are basically trying to hoard knowledge such as this keep it for themselves so they could use it as a means of control over a populace that basically doesn't know any better and is being kept in the dark doesn't really understand of what this symbolism is speaking to basically is holding though it over their heads and basically flagrantly flaunting it in the light of day and that's how a lot of this type of symbolism works it's hidden in plain sight because they consider that the profane of humanity will not understand it anyway so they can just put it right out there in the open for all to see and it won't even be understood and that is the case if we don't work to build our vocabulary in sacred symbolism and understand how it's being used in the modern world as we've said repeatedly this is a language and to understand a language we have to grasp the basic building blocks or the basic forms in language those are letters in symbolism that's very simple symbolism or archetype and then we move on from there to form grammar words and then syntax sentences connotation and the same is true with symbolism as we move to more complex symbolism specifically symbolism which combines multiple simple symbols to form more complex imagery this is often known as sigils vigils are complex series a series of complex symbols put together simple symbols put together to form a more complex symbol and we'll be looking at those in coming weeks I want to direct your attention to image number six now on the pinecone symbolism section on the website we'll start there tonight and move forward from that point this is an Egyptian relief I believe it's in bronze and this resides now in a museum in Italy in an Egyptian Museum in Italy and you can see two entwined serpents that are they are basically representing DNA they are in these the double helical shape of DNA and then they culminate at the pinecone which is at the top of a long rod or staff which represented Osiris and the power that Osiris as a Creator God in the Egyptian cosmology represented what this ultimately represents is the transformative power of spiritual awakening and its ability to actually change our makeup as a being even down to the genetic level I know some people will scoff at that claim that that is impossible but indeed that is one of the capabilities that lies seemingly dormant in humanity and this staff was known as the staff were the spine of Osiris okay it was what it was considered the Middle Pillar in this form of the Tree of Life which we've already seen the Tree of Life symbolism with its three different paths on it well that's what you're seeing here in a different format representing the Tree of Life which is our genetic structure and is you know all of the the deep essence that ultimately underlies our physical form and that culminates with the rising of this serpentine energy which we talked about as Kundalini energy um in the Vedic chakra system and it culminates with of this coming up the spinal column or the middle pillar that's within us and activating the pineal gland in what's known as a Kundalini awakening I know that some people have heard about this or read about it some people listen may have even experienced the Kundalini experience it's pretty unique it's pretty rare but it's an energy moving up the spinal column activating in in all of the chakras in the chakra system that we talked about previously on this show and then coming up to the top of the head or the crown chakra through the pineal gland so that's what this image represents and again it's connected again with awakening with a deep level of spiritual understanding and coming online basically to true spiritual insight or vision which is what the pinecone ultimately represents in image number seven moving forward we see a depiction of an ancient God and this is from the Assyrian culture I believe this is around the region of Samaria or what was known as Babylon in the ancient past it's also close to the land known as a cod or the Acadian culture of lived and developed I believe this specifically is a Syrian symbology and this is one of their gods depicted as a flying being with huge wings he has sort of a representation of a cone on his head he is depicted as sort of a um an alien being so to speak a being that has capabilities that average humans do not have the ability to fly he is holding this pinecone in his hand the pinecone is there's different interpretations depending on who interprets this image the pinecone is either being offered or it is being taken and I guess that would be dependent upon what type of being this was and what they depicted this being as in the ancient past so was it one of these quote gods with a smaller case G that was offering enlightenment that was trying to share knowledge and awaken people's pineal glands to awaken their true spiritual insight and vision or was it one of the gods who is basically harvesting or attempting to degenerate the ability for someone to awaken and in doing so keep them in control I mean I think that both of those scenarios are probably equal equally as valid because I think there were probably advanced beings that interacted with the peoples of those times and and geographical locations that were probably on both ends of that spectrum and that's a much much more complex and in-depth discussion that we don't have really time to go into here tonight I'll just put that out on the table and you know in in your own research you will probably come across material if you decide of that nature if you decide to look into this further and you can come to your own conclusion based on that but again the pinecone symbolism goes right back into ancient human antiquity in image number eight it's simply a close-up of the same image it looks up to being a little bit better contrast so I included it there for those who may be downloading these images and looking at them on their computer it just shows a little better relief and a close-up of the previous image so let's move on to image number nine this is another Assyrian symbol except now the being definitively looks alien in nature and it looks specifically reptilian in nature birds are related to reptiles there are the same basic family of animals and here we see what definitively looks like a hybridization of some sort between a bird and a reptile with a large sharp beak again huge wings of being symbolic of magical capabilities and also I would suggest flight I mean right there pretty openly it suggested we see a symbolic depiction of again the Tree of Life in the Assyrian culture on the right hand side of this image and then the being is once again with his uh his his bucket I guess that would represent some sort of a could also represent gene pool of some kind okay um I would suggest this made this image of this um a container that he is holding in his hand as you saw in the previous image might represent uh genetics of some kind and the pineal gland here the pinecone again is either being offered or taken so again two different interpretations of that symbolism there but pretty much no question what that the symbol of the pinecone itself represents as it is being used there so if we look at the last two images in this section this is one of the clearest indicators of pinecone symbolism in general being used to represent spiritual awakening and the opening of the third eye and of course this is used in conjunction with Buddhism and Buddhists and symbolism here we see an image of the Buddha or Siddhartha Gautama and of course his hairstyle as he is depicted in many images in the Buddhist tradition as being conical shaped and also having the world pattern of the pinecone on on his head again this is in the vicinity of the brain and the crown chakra of the the chakra system and you see there also he has the bindi there representing the third eye being awakened and again that's what pinecone symbolism is ultimately all about you can see this very clearly and definitively in image number 11 the color image showing a statue a statuette of I believe this is the Bodhisattva of compassion if I'm not mistaken who I think is a named diamond in the Buddhist tradition if if it is some other incarnation of Buddha as he is represented then I'm not familiar way that I believe this is the what is known as the Bodhisattva of compassion statue and again clearly here we have the pinecone symbolism on the head depicted on the statue of this variant of Buddha again the one who awakened is what the name Buddha means and that's what the pinecone symbolism represents spiritual awakening use right there in religious symbolism that one's pretty clear because Buddhism does specifically talk about spiritual awakening and awakening to your true essence and the true nature of self so no surprise that it's being used in that capacity what I want to do now is shift gears and change the topic of focus to a different form of symbolism in general again the pinecone symbolism was a holdover from last week where we are going to begin looking tonight into goddess symbolism and the ways that this symbolism is used and it's um there is basically going to be four different categories of goddess symbolism that we're going to look at tonight we'll be looking at the symbolism of the illuminated torch again another symbol of enlightenment and knowledge okay if you look at the second section of images there on the website you will see the first image in that section is a basic representation a stylized representation of illuminated torch now this symbol is used by light and dark occultists both and it's a dual symbol because dark occult is also considered that they have light because light in basic systems of occultism regardless of whether they are a certain humanity or whether they seek to enslave humanity are always generally depict light in its capacity as knowledge that's what we're when we see the flame on this illuminated torch that's what it really represents is the flame of knowledge of wisdom of understanding okay and um light is a way shower in the darkness okay that's what that's where the symbolism is derived from a torch will show you the way when otherwise you would not be able to see okay so this is connected with goddess symbolism as we will see coming up in the next several images and the way that it's connected with God goddess symbolism to understand how ancient this goes back this symbolism is if we look at the goddess tradition in general which we already have on this show many times specifically when we looked into the Tarot tradition which is all about the goddess and her symbolism but um we also looked at it when we looked at Astro theology because we need to understand that the goddess plays an important role in Astro theology as the bearer of the light of the the god Savior who is the son in a trophy illogical traditions again the goddess figure represents the moon or the night sky I should say and the night sky and we also saw her in her variant as the galaxy or the cloak of stars itself the entire Milky Way galaxy basically she is all of these things she is the void of potential reality the room of creation she is the cloak of night the goddess of night herself she is the the moon and she is the bearer of the Sun at the at the end of the darkness of night and the beginning of the day or the dawn okay she bears the sacred child who after he has done battle with the darkness the god of darkness in different traditions is then resurrected to continually restore and continue to bring life and light to the world and again this is the foundational basis for Christianity as we saw in our studies of Astro theology image number two in this section shows an incarnation of this goddess from ancient times her name in the Sumerian culture was Semiramis Semiramis assume they're depicted in a couple of different incarnations the one on the right shows her holding the small child Tammuz this is not a depiction of Mary and Jesus as one might think goddess symbolism as a protective mother is an ancient archetype this school is nested way into the human subconscious and we see it in many different traditions throughout the ages specifically in Sumerian or Babylonian culture down through Egyptian cosmology into Roman times into the right up into the modern day which will talk about how the goddess symbolism is used in our culture okay so on the left there you see a rendering of the goddess holding the the chalice and the cross and she has the illuminated rays of the moon on her crown there because she is of representing the bringer of illumination okay the Sacred Feminine force which is ultimately opening up the right brain hemisphere to the balance that is required to understand the true essence of self and this is what spiritual awakening is all about hence the goddess being a depiction of light in general or awakening now again we're going to see the positive and the dark side of this symbolism on tonight's show depending on how far we get through it but I want to try to in the next one in the section that we're going to talk about goddess symbolism in relationship to the Dove the Dove you know the white bird the Dove I want to highlight in that section the really esoteric nature of the goddess symbolism or wood and what it really represents as far as the internal qualities of you know of consciousness because that's critical to understand that this is not an external symbol of an actual goddess this is about a quality of being ultimately is what it is about and there are different connotations to that again as I said there's a light side and a dark side to that and that's what I'm going to hopefully get people to understand that symbolism is not one thing it's dual just like the occult is not one thing there's a duality to it inherent to it because it is simply knowledge that can be used for good or ill so if we look at image number three here we'll see a classical depiction of the Statue of Liberty which is goddess symbolism in our culture here you can clearly see the similarities to Semiramis in the image before with the arrays of the moon on her crown there okay and holding the illuminated torch representing the Light Bearer she gives birth to the Sun essentially that's what the torch represents so this is lunar and solar cult symbolism this is all astro theological symbolism now this image was given by Masons by freemasons from France to the United States as thanks I would say as um gesture that what they were basically doing is uh it was it was a nod from French Freemasons to American Freemasons and specifically to honor the the kind of influence that America had in the French Revolution and I don't look at the Statue of Liberty as other researchers do as something that is dark or negative okay now I know some people may find that surprising or they may be disappointed by that I think that this is a positive sign and I think that it represents the light side of the goddess not the dark side of the goddess we'll look at the dark aspects of a goddess later on and I'll point out where I believe dark goddess symbolism is specifically in use this I believe does represent the the the true hope of human freedom in a true capacity that is the way I prefer to look at it and I don't look at this as being the dark representation of the goddesses again some researchers do where I see dark goddess symbolism is in sacrifice rituals the goddess being slain or killed okay so what I would say is one of the things that you might have to watch in the future is some form of a deliberate effort to try to somehow um damage or do something to a symbol like this as a an attack on the essence or spirit of freedom this would be a great place for a false flag to take place which would nest into the human subconscious as it did on 9/11 when they attacked other icons of America and as we will see they attacked the symbolic tree of life okay and human consciousness in general of course it has to be an attack on human consciousness to two-wheeled fear into the public so that they're willing to give up their freedoms that's what all false flag attacks are about but um in this specific example um I think this is a positive image of human true human freedom that is born through knowledge that is born through grasping knowledge connection to the light that's what you're seeing here you're seeing an illuminated one connected to the light okay which is the true nature of spirit okay and she is the the goddess that represents the spirit of freedom that's what that's what ultimately it's about of course that symbolism can also be perverted like any other but um the Statue of Liberty specifically is of course a reference to Semiramis it's a reference to Isis they it's an analog to Isis to marry to Diana and any number other number a host of God goddesses down through the ages if we look at image number four here we will see all of the astrological cults combined in this image we will see all of the qualities of self combined in this image as well if we read deeper into it so we have the goddess herself she represents the moon or the lunar cult of astrobiology as we've already discussed she's holding and bearing okay giving birth to okay the solar symbolism of the illuminated torch representing knowledge and connection to higher self or spirit and the pedestal stands upon a star okay so this is stellar cult symbolism the torch representing solar symbolism the goddess herself lunar symbolism and then the pedestal some stellar symbolism they because again the night sky it's the foundation that's the biggest framework the stars they were talking about huge cosmological um you know groupings of stars here okay that's what the universe is essentially made of stars and star matter okay um then above that you have the the night sky and the moon symbolism representing that which finally paves the way for the bearing of the light or the true essence which is represented by solar symbolism okay which the goddess was always said to give birth to in every ancient tradition about the goddess let's look at some other ways that the illuminated torch is used in modern culture okay so the last few parts of this section the goddess is depicted here in the same colors that Mary is often depicted we see an image number five that's the that's the symbology that the symbolism that is used for Columbia Pictures the Motion Picture Company um the goddess standing again on a pedestal of stairs robed in white robes blue often being via the over garment collar representing the color of the sky dark blue okay and there she's holding the illuminated torch in her right hand similar to the Statue of Liberty another depiction of Diana or Semiramis or Isis or Mary okay and specifically let's look at the name which we talked about briefly before this is Columbia Pictures okay Columbia is named from the French derivation of this goddesses name the Dove is another symbol for the goddess as we've already said and we'll be looking into later tonight the French word for dove is Kalume and it's a very similar to this in other languages as well but kaloumes c o L you MBE Kalume in French that means dove in the French language so taking it over into English that's where we derive the name Columbia okay and we're going to see how the name Columbia is used over and over again in this tradition and we'll look at that little bit more when we get to the Dove symbolism but I want to just talk briefly mention that right now if we look at image number six we see the illuminated torch on the back of a dime okay ah and also this is specifically chosen for its reference to the number ten okay ten is often used in conjunction with the illuminated torch and there's a reason for this and it has to do with another aspect of how the occult works and again people who are looking at this from a left-brain perspective will be sorely disappointed and not really get much from this but I've already given that warning before we have to understand that the occult is all about associative thinking it is not about linear left brained um logical only thinking it is about cross associations okay it is about establishing relationships that is what a cult thinking is about and again it doesn't matter whether you think this way or not people who are in extreme positions of power and influence think this way it's largely how they got to the level that they were at because they see patterns and whether they use the knowledge to do something that's good or to basically take more and more control and subvert human freedom again it's all about the ability in and of itself to be able to see and do things with information and come to conclusions accurate conclusions based on said information that's pattern recognition this is what knowledge is it simply a means it's not an end okay as I've always said knowledge is only the first step putting it into action is what we really have to do and we have to do that in the right capacity on the side of moral right clearly dark occultists don't do that there you know on the wrong side of the equation because they don't really have the capacity that feel they're psychopathic in nature and just highlighting here that the occult is symbolic thinking and it is associative thinking and we have to try to open our minds to this and understand how it works so one way is through associative language or as I called it before on the show is green language now here's an example of how a cult green language or symbolic language is used in conjunction with the dime a dime represents ten okay ten cents okay now ten is a variant of at ten okay at ten the solar God of Egypt as we talked about in the Astro theology section there for solar cult is going to use the symbolism of at ten or the Lightbringer in the Egyptian culture to represent anything associated with ten the number ten okay it is also the two numbers that represent basic binary code on off light day dark light okay day night okay good evil binary or polarized uh forms okay one zero a the mail combined with the female the one being the phallic shape and the zero being the egg shape okay the masculine essence and the feminine essence ten if you look at it on the dime you'll see the illuminated torch look at a ten dollar bill okay there's the illuminated torch next to Alexander Hamilton's face another agent of a compass in the United States during its formative years okay but there is the symbol of illumination put there more likely than not by dark a luminous okay talking about people who look at themselves as those who have the light and they're in control of the monetary system they don't have any real light they're people who are calling themselves they are those who have the light they have no such thing many people who are really truly spiritually awake or those who have the light and who bear it into the world not these darker cultists who are running the monetary system and putting the symbol of their so-called enlightenment on money on fake money at bat you know the fake one eye and illumination well here's here's the symbol of illumination spiritual enlightenment and the opening of the third eye on fake one eye or fake mone i money okay and it represents Aten the solar essence ok the solar disk in Egyptian cosmology um again that's wordplay wordplay falls just as easily into occult symbolism as do the forms ok so we have to understand this as associative language or what is known as green language in the occult um Amoco the next uh logo here in image number 7 amico gasoline American oil company ok using the two colors of red and blue in their logo we've talked about those colors before how red is a player or an associate association with the left brain blue and association with the right brain ok combining those gives you green in the color spectrum of light of course purple and pigment but I'm talking about if we look at the visible spectrum of light all the way to the left there's the Reds to the right there's the blues okay when you go up toward higher frequencies lower frequent below lower frequencies of light you get the infrared and above the visible spectrum toward the blue range you get ultraviolet however um these represent the two opposing polarities with white in the middle here okay representing enlightenment and the torch is in the middle comprised of both of them okay the blue being the handle on the red being the flame alright also depicting that we need to open our minds through the right brain in order to give birth to the flame okay or the awakened self represented by the flame of the torch and this all of this art type of symbolism goes right into your subconscious mind when it's used in the capacity to advertise like this and they the people using it understand this they know it they're there they totally understand how that works and that's why they're selling you something through their gasoline low though that they know you don't have what your spiritual enlightenment it's a mockery ultimately okay okay also selling you on the idea of freedom which is what the torch represents because freedom will only come through spiritual enlightenment so they're selling you that idea but gasoline isn't going to free you from anything as a matter of fact it creates more dependency in war and imperialism and all the other host of problems that go along with an environmental degradation you name it okay so again another example of the capacity to sell you something through symbolism that they know you're lacking in reality a no better example of this than image number eight the last image in this section which is sovereign banks logo now Sovereign Bank here is giving you the image of the illuminated torch bathed by the Rays of the Sun okay the Sun here depicted as the light all of the Rays coming out of the torch the symbol of spiritual illumination combined with the word sovereign or self reign single reign rulership of self rulership of the one being an internal monarch as we talked about in our section on natural law sovereignty true rulership of self of the kingdom of self becoming a being that as you think so you feel so you act no internal opposition between it between the facets of your own consciousness and you exist in a state of true non duality and consciousness okay and they're selling you this as a bank in an imagery representing a bank you're not going to become sovereign by putting your money in in their bank you're not going to become sovereign by interacting with this financial institution in any way you're not going to receive the light by interact thing with them but you'll get all of those ideas subconsciously from the symbolism and that's what it's intended to do again selling you something that they know you don't have they know 99.999% of people on this planet don't hardly ever use the word sovereignty let alone understand what it really is or live that way okay so they're selling this idea back to you through the advertising of an institutional body that has absolutely nothing to do with these concepts in reality and that's exactly what it's designed to do it nests all of those ideas all those relationships and correspondences into the subconscious mind so then people will associate all those things with their institution that's what it's designed to do okay so let's move right along from from there let's go into the symbolism of the owl okay because we have a lot to go through tonight I want to get through at least half of this before we join the oracle Broadcasting Network in the second hour okay so in image number one we see here a very simple depiction of a predatory owl which is one of the favorite symbols of the dark occult and here we're getting into dark goddess symbolism now let me see if I can communicate this effectively so of what the owl is all about and why it's used in dark occultism the dog or the white bird okay of purity is depicted as the light form of the goddess ultimately what the goddess represents within us is care okay it is the Sacred Feminine components of consciousness which is care the heart the right brain compassion okay willingness to accept truth and understanding and and and to seek knowledge that's what the right brain or the Sacred Feminine components of consciousness are all about all right that's traditionally depicted in goddess symbolism as the white dove which we're going to look at in a little bit I want to look at the dark side of goddess symbolism for the moment and that's the owl and this is basically when care has gone dark that's what this represents that's what the owl represents the owl is associated and corresponds with the night or the darkness because the owl is a predatory bird who thrives in the dark its eyesight or its vision what it is capable of seeing is superior to those who had praised off of okay its prey cannot see it in the dark generally while the owl can clearly see it has superior night vision the owl is also associated with wisdom which darker cultists they don't have true wisdom but they have knowledge okay out the wise old owl okay see where we're going with this symbolism why they choose the owl the owl is generally in different cultures depicted as a bird that is wise that is old that dates to antiquity it's been around for tens of thousands of years okay and the dark occult is working with ancient knowledge ancient knowledge of the human psyche and how works and in doing so they are in a position to see things which the general public who is unaware of the dynamics of the human psyche and their psychological conditions and motivations who they do not see the general public does not see any of these facets so therefore the elite look at themselves as a predator predators okay we talked about predators as being predated those who are from the very ancient past that have knowledge from antiquity about how the human psyche works this is what they exploit that's what the occult is okay and that's what the owl symbolically represents a predatory animal that can see its prey in darkness under the cover of darkness when its prey cannot see it in the darkness and that perfectly represents the situation that humanity is in we can't see the the Dominator force that has its in its grip because our sight is not as good as then specifically our sight to see the dark side to see the human capacity for evil and how it has run amok in this world okay um also a bird flies okay now an owl is not known for its superior flight capability all right but generally birds are at a higher level they exist way above the ground this is also symbolic all right they can see a wide area they can see things all around them when people who exist on the ground meaning a lower level of consciousness can barely see in front of them they certainly don't have the wider vision of something like an L or any bird for that matter okay so the owl represents a higher level of knowing okay not necessarily wisdom know true wisdom knowing but at least a higher level of understanding point of view of what's actually taking place all right and a predatory animal that can see its prey when its prey cannot see it and it's also carnivorous its meat-eating okay which means it devours its prey okay eats its prey and that's a perfect example of what the elite of this planet really are a perfect example of the dark occultists that are really running the show and that's why they use it as their symbol here we see the owl in image number two is the logo of the Bohemian Club which is what the B and C represent here now Bohemian Grove is not something we've we talked about a little bit when I interviewed neo as part of the show on satanic ritual abuse which was a divergence from our normal topics of discussion to do that special interview and image number two here shows the Bohemian Club which we talked about briefly during that show I believe that was a show number 17 this is a gathering of elite power brokers that happens yearly in California um about seven miles north of San Francisco at a place uh in a redwood grove called Bohemian Grove okay and the Bohemian Club is a exclusive membership of these power burglars and it includes many high-level dark occultists that meet here yearly to basically hash out plans for you know what what they're going to do in the coming weeks and months and their symbol is of course an owl again a symbol of the dark occult and the symbol of the predatory nature of these elitists in image number three here we see the owl of shown in a stone relief at the Bohemian Grove and around it depicted the in the serpentine Ouroboros symbol but depicted as a belt with a buckle okay in that belt around the owl and the letters BC for Bohemian Club it says the the motto of the Bohemian Club which is weaving spiders come not here this is supposed to represent weaving spiders come not here it's supposed to represent that the Bohemian Club is supposed to be a retreat okay and it is supposed to serve these power brokers in the capacity that they can go there and rest and relax and not deal with all of the terrors that plague them as they run the world for the rest of the year where it's they can just basically get away for a time if you believe that I have several bridges for sale please contact me through my site and I could sell you one for a very good bargain you would imagine that elite power brokers at the highest levels of Finance religion government and every other institution in the world media etc would not if they are getting together all in the same place uh do some weaving as spiders okay would not leave some webs together if you believe that your level of naivete is absolutely dumbfounding and I expressed the word dumb so good luck with that if you believe that doesn't happen at the Bohemian Grove we've already talked about what some of their mentality and mindset and showed some of their rituals and some of the images back in podcast number seventeen which by the way all of the podcasts for the show as all these are up on the website they're always free there's 48 of them up there so far this is show number 49 what on earth is happening dot-com and click the podcast tab great resources and information information on that page dating back to when I first started the show so make use of that as a resource um image number four shows another variant of the Bohemian Grove symbolism with some dates of some big meetings of the Grove and its membership again there with the the owl and the moon behind it again because this is goddess symbolism we're going to get to why this is goddess symbolism I think I'll leave that for the second hour we're approaching the top of the hour and get going to get ready in about a minute minute they have to connect into Oracle broadcasting and then you won't hear me speaking for a little bit just to prepare you for what to expect um because Bob tuscan and sheppard will be introducing we'll be introducing the the show tonight and they'll basically be bringing me on in the in the first after the first segment of the second hour so you'll be hearing the intel hub radio coming up in a few minutes and then i'll then i'll be introduced in the they'll play my intro music again and we'll start in with the second hour of the show just to wrap things up here in image number four in the owl section you again see the phrase weaving spiders come not here and again the moon symbolism is you can conduct conjunction with the owl because in in ancient goddess religions specifically in Sumerian goddess worship on this owl was often a symbol for the dark incarnation of the goddess meaning that care had basically waned or at least true care had basically waned and this form of predation and not ultimately caring took over the being and again as we see this is a perfect symbolic analog for the elites and they do indeed relish it and they revel in it as we'll see in the next section I'm going to make the connection to Oracle broadcasting and sit tight we'll pick up more about the symbolism of the owl in our number two here we go folks you have reached the Oracle broadcasting radio network call-in line after the beep please say your name where you're calling from and the on-air host will take their call momentarily Oh mark passio from what on earth is happening I'd be important obviously we'll do our regular intro thing that we get over anyways uses modern day monetary system and how you can use the perfectly displayed it's fully revealed purchase your two DVD disk copy today and of the first movie calm again that's power of the purse movie calm well done I got a reset this call who's that caller I'm gonna be holy mark I would continue exactly those available train ticket cannot be on the driving force behind the future of humanity again will be unstoppable we all become soldiers that you are lead to be in help of God kept slides an undisclosed location we're inside the region no there was a director there with civilian intelligence agent we shared and Ellie and awesome and welcome back to the Intel hub radio show on Bob Tuscan and I'm Shepherd and oh man that was a great interview on bananas and Bob you know on the Monell issue I got a huger new old anti New World Order D crush on her man she's got a lot of interesting information and talks about stuff that's right up my alley when you're talking about growing a garden when you're talking about solutions when you're talking about Monsanto this stuff is just stuff that I'm interested and I don't know but you guys will forget about you I do this show because I like to interview these people no I'm joking I do these shows because I hope that we can see change in the world in which we live in and I think that these programs are absolutely necessary especially in these serious times as long as we have communications the internet and so so on I'm going to be making the best of them I'm going to be using them until it all goes down and I'm going to be doing everything I can and I say this a lot if I wasn't facing in my lifetime for my children's children the battles that we see today when it comes to false flag terrorism Monsanto you name it I wouldn't have to do this I don't do this for my ego or for fame yeah I do this because I at the bottom of my heart I feel like I need to do something otherwise I would have no hair and as you know folks that you've seen some of the videos I have I have lots of hair and it's nice and curly and it's beautiful absolutely absolutely so you know this whole issue with the chemtrails the aluminum we didn't feed the does food I mean what a what a whole masterminded concoction of you know compilation of stuff then you were ordered it mixed together they're just integrating and integrating you know they do totally plan on dominating society with the ultimate outcome I mean what do you what a question well no but I mean re you know they're they're just dominating uh you know on bang dimin and you know it's going to take like like you guys what I'm not growing your own garden but I need to get out I gotta take a lot more than that Shep I mean let's not let's be real here folks if you think that growing a garden it's going to bring down these sick child molesters you guys whatever do it I'll tell you that I'm not telling you not to do it if the definite step but it's not well it's more like protection for yourself so you don't have to eat their garbage and you know what I mean you want to guarantee that you're eating an heirloom product that's true it's also very healthy there's a lot of nutrition coming up next folks on the Intel hub radio is our good friend Mark past you'll visit the Intel hub radio.com to read his bio he has a program that we bring to our listeners every Tuesday called what on earth is happening with Mark passio what on earth is happening is his website there's going to be a regular thing every second hour on Tuesday on the Intel afraid EO show on Oracle broadcasting not going to be featuring a different discussion on mind control the occult solutions you name it he's an absolute wealth of information I look forward to hearing him every Tuesday and you will as well I'm really looking forward to tonight's show he'll be talking a little bit more about astral theology and they had called and all the good stuff I used to hearing from mark pastors and don't know anyway that's coming up next one on earth is happening I'm Bob Tuscan and I'm several down Lilith and you know we're also going to have other contributors on throughout the Lee Trevino one Scott so you guys are going to have to tune in but don't forget to check out the jack blood interview at the Oracle broadcast and comm archive and it's going to be posted up the info hub calm that I did earlier with Jack blood on chemtrails some groundbreaking information check it out you're looking to the info hub radio show beware collapses and already going at these control population total tyranny is amongst us for Berlin of humanity that on our shoulders be from the way out 50 echoes the horrible crime indicates no and then you will would mark are you with us buddy either yeah yes I am Bob alright I hope the talk shoe audience is looking forward to your debut on Oracle broadcasting a much larger audience we'll start that in just a moment here I thank you all for bearing with us as we make the transition and Mark passio is a wealth of information as I said and Mark you got a lot of good stuff I'm sure you got into on the first hour I'll have to go back into the archives that's the beauty of doing these shows and recording them and I'll listen to that and see what you had to say and I'm sure this hour is going to be great I'll go ahead and be with you on the chat and create your you know I'll give you a little warning maybe that there's a break coming up while we get used to the new break schedule and I think that about wraps it up I look forward to seeing you in about a month it's coming up so fast now and free online yo Bob thanks so much for all your help man Mike not a problem dude my pleasure you know really what was going on wasn't going on I wouldn't have to do this but it is you know we got to step up to the plate as you say that it's not enough just to learn about this stuff that comes a time you can we have to get out there and talk about it and that's what the third part of the Trivium is all about I partially we brought that up in great depth on the show I did recently on the Trivium check that out at the Trivium show that I did on my last official episode of truth be told radios sad but hey Rio's a new beginnings a bigger audience it should be a lot of fun and I think you guys are going to like the Oracle broadcasting listening family all right so stand by we got another 30 seconds here for commercial and we'll get to what on earth is happening with mark nachio now teaming up with the Intel hub radio show every Tuesday for the second hour on Oracle broadcasting I'm Amita muscaria and Pedro cactus salvia divinorum hi gram and much much more so order now to our website toots frequency radio calm by clicking on the banner your order will be shipped securely and your informations always kept safe and confidential and by ordering through frequency radio-cana not only will you get the best customer service on the planet you'll also be supporting the show so don't forget ladies and gentlemen taps the true frequency every Saturday at 10 o'clock central on horrible broadcasting to frequency radio calm alright folks welcome back to the Intel hub radio show and tonight we're joined with our contributor Marc Cassio adds with every Tuesday on the program for the second hour tonight's show is a contribution on the usage of the occult symbolism in modern culture I will he will be explaining specifically the goddess symbolism tonight the goddesses and that's right the goddesses all right folks here we go what on earth is happening there we go we go man that's what it's all about [Music] did not move on welcome you are listening to what on earth is happening this show will discuss the topics of human consciousness mind control natural law the alcohol and all issues that freedom of people over what colour is happening whatever shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches it's critical moment of choice and now there is your host mark has no [Music] welcome ladies and gentlemen and welcome all of the new listeners on Oracle broadcasting it's a pleasure to be here with you my name is Mark passio and this segment is called what on earth is happening I'll be here every Tuesday night at 9:00 p.m. as a contributor to the Intel hub radio show with Bob Tuscan and Sheppard and I want to thank those guys wholeheartedly for inviting me to be a part of this my show is live every Tuesday from 8:00 to 10:00 p.m. Eastern Time the first hour is broadcast through my website what on earth is happening calm and then of course here at 9:00 p.m. the second hour will be picked up by Oracle broadcasting and will will basically be looking at topics that focus on the underlying causal factors of what is really occurring in our world and what creates those conditions that's what this show is ultimately all about for those of you who may not be familiar with my material you can check out my website lots of videos up there 48 podcasts from the shows that I have already done and I hope you guys will follow me and basically learn a thing or two from the website and keep listening here every Tuesday evening at 9 p.m. with that having been said what we were talking about in the last hour of basically for all the listeners who join me through my website and the talk show network was the usage of subversive symbolism and this is part of an ongoing series of programs that I've been doing on symbolism occult symbolism in specifically now when we talk about the word of cult for the new listeners what we mean by that simply is hidden the word occult derives from the Latin the verb occult RA in Latins to hide or to conceal when people hear the word occult they often have a negative connotation of it right off the bat because they have been conditioned into thinking that that word is equivalent to evil and always means evil or negative and that is not the case that is what dark Oh cultists want people to think they want people to think that because if they think that the word occult means evil and associated with that concept always they will never look into what teachings and what information and knowledge occult philosophies do actually contain okay and in refusing to do so they will be more easily controlled by those who do understand that information because what that information ultimately is all about is knowledge of how the human psyche works its knowledge of how we work and operate it's ancient knowledge about the human psyche that's what the occult is now that having been said all is is knowledge knowledge in and of itself is neither good nor evil it is simply knowledge what determines whether it serves us or whether it works against us and ultimately enslaves us is what we do with it so if we learn this occult information and then share it widely the information that has been occulted in the past meaning hidden and we bring it to the light of day meaning we make it not occult we the cloak it we unveil it when we bring it forward into the light of day so that it can be seen understood and integrated by your average human being and in doing so they learn more about their internal makeup in the internal world of the psyche of the human psyche which is what is ultimately creating the seeming external reality that we experience see that's what ultimately this is all about that's why the hidden knowledge that I'm sharing on this program is so important because it's all about what's going on inside of us ultimately as we will see going forward in the weeks and months to come on this show you'll get a better picture of this if you visit my site at what on earth is happening calm and again this show is a tapestry okay so we're picking up in the middle of a very complex topic which we've already explored in depth for many weeks so new listeners understand that that this is a tapestry of information and it would serve you well to check out the podcasts on my site which are available for download for free it's the archive of all my former shows and if you start from the beginning there I know it's a lot of information you will be caught up with that tapestry of information as I have attempted to present it and lay it out to the listening audience and in in going back and listening to those archives you'll get a very accurate picture of what we do here on the show and I will be doing as we go ahead so what I want to do right now is jump right back into discussion of symbolism and what we were talking about in the previous hour was symbolism related to the goddess and ancient goddess traditions we had already looked at the symbolism of the illuminated torch which represented knowledge and wisdom and represented spiritual insight and spiritual vision and we saw how that was used in conjunction with the Statue of Liberty we saw how was used on logos such as a amico gasoline we saw how was a subversively used in in advertising like in in gasoline logos or in a bank logos we also saw how it was used in the movie houses such as Columbia Pictures and what we did is then shifted gears and started to look into a low symbolism and that's what you're going to do right after this break ladies and gentlemen we'll be right back right here on oracle broadcasting you're listening to what on earth is happening only on the Intel hub radio show know the Constitution like the back of your hand you read books listen to podcast hey Mark Richards certainly minds and I don't know if you plan on taking calls but if you could just give out the number for the absolutely I got a radio or for one need six in that way yeah that way we don't have the complication to have it uh to give out the long talk she won no problem I will just run with the Oracle for the second hour from now on fit with that little sound imagine is a demented 490th jamming garden Thank You ruff I'm gonna join it and I think which is going to be good for both audiences absolutely promote freedom this is behind the scenes for the talks you folks are their hopes in the chat listening to show yeah thank you of America not too many I think there's like three people in the talk to Jack so action stuff never got hot did it it's a light night there but uh you know some of you say listen all the time from there in them it is within around the world doctor flying so P well for every listen that's not about where it's about the body of information like together a microbe plan powder power Michael plane powder is reliable tool and biotic yeah we have about a minute left could you hear the music then or I was just about the message I was looking for your you Skype Randy you're glad to hear it when it comes really some fairly low but I can pick up on it exit and just and just know based on the the graphs we constantly expressed see where it's going to be right yes I am totally in math and shipping anywhere and we are shipping on orders over ninety five dollars in the US your next break is that or call 908 $6.99 5908 six nine one three six over the next one after that's 44 and oil can do for you at fifty wants any or that's it - done for extend your life get a good first hour man Cassandra Anderson here's my doctor's tried every other one success what was there not expendable but when I project that GMO crowd this whole thing with Monsanto making it so that the liability from farmers is totally no other there and Taylor Griffin covered it and a few others pretty interesting shell I want you to know that identified waters anyways thirty seconds here we go coming back what on earth is happening you can now is the time to join the growing list of real people benefiting rates for the music to play for a couple seconds before you start talking he's aa nine to eight a take you to that one eight seven seven nine two eight eight eight two two or visit our website at mark draws calm [Music] radio and trio your host gideon found a degree of the oracle block camping network [Music] alright ladies and gentlemen welcome back you're listening - what on earth is happening right here on the Oracle Broadcasting Network as a part of a contributor ship to the Intel hub radio show every Tuesday night and 9:00 p.m. Before we jump into the topic which was goddess symbolism and we were specifically about to look into the symbolism of the owl I want to give the calling number for this show feel free to call in at any time there are no taboo topics on what on earth is happening there never have been and never will be so feel free to fire away any questions or comments and we'll take it from there the Oracle calling line is eight six six eight four one one zero six five once again to call into Oracle broadcasting on what on earth is happening call number eight six six eight four one one zero six five so in the last hour we were discussing the symbolism of the owl and how this was related to goddess symbolism as the dark aspect of goddess of the goddess in general what the goddess represented throughout antiquity was care true terror okay it represents compassion it represents the spiritual insight and understanding of true self the goddess represented getting in touch with the higher self it represented living in natural law with other beings around you because you recognize that as one being suffers all our suffering the fundamental unity of all of us uh makes it a deep spiritual understanding that as there is suffering in any their suffering in all okay so that is the essence of true compassion and this is what the original goddess symbolism in the goddess traditions was meant to represent this is why they often depicted the goddess as a white dove a pure white color okay in in some in ancient symbolism the dark aspect of this is about the destruction or waning of care meaning apathy meaning those who don't have compassion okay the qualities of psychopathy okay are basically not feeling of killing the emotions alright and that symbol the main symbol of what main way that the goddess was used in her dark incarnation was through a depiction of a predatory bird that is not pure or white as a matter of fact it is dark and that is the owl so this is why the owl has become a symbol of the dark occult okay and I say dark occult meaning those who use this ancient knowledge that is taken from human antiquity in the mystery traditions okay and use it in the modern day in a perverted form okay - basically usurp natural law rights wield mind control and it essentially exhibit control over other people through the subversion of their rights okay and that is that is basically the trait that those are basically the traits of the psychopath they're the traits of those in whom care has been annihilated true care all right the bird is of the owl as a bird is used as their symbol also because it is a predatory bird who can see its prey in darkness through its superior vision okay this represents knowledge again the saying of the wise owl is also the wise old owl because this knowledge comes from thousands of years ago it's nothing new it's actually very ancient okay and the bird also sees from a higher perspective not from the ground but from a perspective of well above where it is getting ready to pounce and prey okay it was brought to my attention during one of the breaks that owls feed upon rabbits and rabbits traditionally in symbolism have been used to also represent innocence okay and it's also a symbol of fear in some traditions so dark occult is indeed feed on fear and destroy or prey upon innocence uh this is a perfect symbol as we were talking about in the hour before for the dark occult in general and the elite of the world who basically have destroyed their own connection with the true goddess of compassion and wisdom and instead choose to be completely of this world and revel in the base materialistic instincts and revel in the fact and take pleasure in the fact that all they basically do is pervert true knowledge and use it as a mechanism for selfish control and that's what the dark occult is contrasted with positive forms of occultism that are basically attempting to take this knowledge of the psyche and then distribute it widely and freely to people to the extent that it is within our power to do so to those with open minds and and change the fundamental dynamic of this planet into something that much closer resembles how we were truly intended to live here mainly in in a spirit of truth of the vibrant vibratory energy of love and in true human freedom so with that having been said let's look deeper into the owl symbolism we were looking at how this was related to Bohemian Grove a topic which I'm sure many of the listeners shep of this network knows a lot about but we were looking at the the groves symbolism and we were looking at how they use their their phrase their motto weaving spiders come not here which is basically the opposite of exactly what the Grove is set up been intended to do which is to act as as a networking point for the elite of the world who come and gather on a yearly basis there in the redwood groves of California outside of San Francisco to basically make policy decisions that they're going to implement coming up in the in the future of months weeks and months ahead and I want to direct everyone to my website at what on earth is happening calm there uh if you click the radio listen page if you're listening on Oracle that's fine you don't have to play anything from the player there but if you go to the radio listen page by clicking the listen live button on the left hand side of the site you'll see on that page where I'll put on shows that I discuss something that needs visual representation I'll put that on the radio listen page for that evening so if you go to the radio page you'll see they're listed images for tonight's show for March 1st 2011 and there's a host of images there that if you click a series of them they will come up as a slideshow that you can click and go through and follow what we're talking about by visually being able to see a representation of some of the symbolism so you go to the website go to the radio listen page and under owl symbolism owl symbolism okay we are looking at image number four that's where we left off in the previous our image number four symbol of the owl at bohemian bohemian grove saying weaving spiders come not here and here we see the owl connected with the moon okay the moon is right behind the owl of course the owl is a night a nocturnal bird when it does its best hunting and again the goddess was connected with the moon as well that this is the dark incarnation of goddess symbolism and how they use it at the Bohemian Grove we'll start to see in images five through eight okay in images five through eight we see depictions of the owl at Bohemian Grove the first two images five and six a ritual setting i hear the intro music for this next break so we'll take a break right there we'll jump back into imagery from the Bohemian Grove specifically owl symbolism we come right back after these messages I'm your host mark passio you are listening to what on earth is happening on the Oracle broadcasting that right background Intel hub radio show we all know that murky water purification systems are the most trusted name in water filtration as an authorized Berkey dealer for over five years ain't serving thousands of satisfied customers The Birdcage guy offers amazing specials for berkey water filtration systems the murky light systems include a set of self-sterilizing every cleanable light purification element that purify the water by removing chlorine pathogenic bacteria cysts and parasites two non detectable levels and remove harmful chemicals such as herbicides and pesticides order the murky light system today complete with two black per key elements for only two hundred and nine dollars and the furqan guy will include three sport murky water bottles and ship everything to you free of charge that's right three sport murky water bottles and free shipping an eighty seven dollar value yours free called the burqa guy at one eight seven seven eight eight six three six five three that's one eight seven seven eight eight six three six five three or order online at Dover Keep Calm thanks Gober Keep Calm today the Oracle broadcasting radio network is on a mission to bring you the best in cutting-edge rock radio Oracle broadcasting the true beacon of free speech uncensored news and relevant information with depended a support of listeners just like you you can help us expand our reach and inform the masses promote the networks on building the socialize link on the left-hand side of the oracle broadcasting dot-com website using the simple tool provided it is easy to spread the word about oracle broadcasting on social networking website watch news feed and many other ways with just one click you can all so help by becoming an Oracle broadcasting member today for just $5 a month you get access to the members screen allows you to listen to all of the great shows from Oracle broadcasting in 128 days stereos TV audio quality to find out more go to Oracle broadcasting calm and thank you for listening the Oracle broadcasting radio network [Music] pandas are calm has become a leader in online retail and is a place where people can find and discover virtually any living one block and thought offers thousand products including books movies and music full range of electronics computer in office sports and outdoors dry storable and organic foods health and wellness your vital impactful gear home is garden and much more Amazon not only offers over 10,000 online products but also operates retail websites offers programs and gain we can sell your products online by making your purchases through Amazon or for broadcasting calm in portion of each purchase goes to the Oracle Broadcasting Network find great price to learn hard-to-find items and help support or broadcasting at same time that website in in Amazon Scott Walker broadcast [Music] [Music] okay ladies and gentlemen you're listening - what on earth is happening right here on Oracle broadcasting I'm your host mark passio my website what on earth is happening dot-com we were talking about the symbolism of the owl as dark goddess symbolism and before the break we were getting into how the owl is ritualistically used in Bohemian Grove the retreat of the one of the retreats of the elite in California just north of San Francisco an image number five on the section on al symbolism on my website on the radio listen page you'll see a depiction of the large bowel at Bohemian Grove this is like a 30-foot tall owl that is set up as an altar and what it represents is this dark incarnation of the goddess and this also represents something that goes back to ancient rituals from Carthage and the ancient Canaanite rituals that are connected with human sacrifice what what this represents is what this ritual is actually called is the cremation of care and as we were talking about the goddess represents true care in different traditions goddess traditions going back into ancient into the ancient human past and human antiquity the goddess represents the spiritual qualities within us the understanding of our true nature not as physical beings but as spiritual beings having a human experience and it's an aspect of compassion the dark occultists always want to twist and pervert that and then basically destroy that quality within an individual they're there for what they want to do is emulate compassion they want to burn away someone's compassion or their connection to their emotional compass for true direction or moral direction in life that's what our emotions enable us to do that's why those without connection to emotions basically either are actual Psychopaths without any actual ability to feel emotion there's some high estimates of how many people are in human species actually do not have the capacity to empathize or to feel emotions and don't have a conscience the estimates are as high as four percent which is an extraordinarily high number if you look at in terms of that would be one and every 25 people you come across some more conservative estimates placing it around 1.5 to 2 percent whatever that number happens to be you can be assured there is a segment of people that actually do not are born without this capacity without this normal range of human emotions and then other people can actually emulate their care and destroy it during their life while living even though they once did have the capacity to feel it so these are people who aren't born Psychopaths but they can become psychopathic in nature based on the conditions of their life and how they choose to react and respond to those conditions and who they choose to listen to what they choose to value etc so forth and this is what this ritual is all ultimately about it is about immolating the inner child it's about burning away true terror it's symbolic this is an absolution ritual or a ritual of forgiveness for these dark or cultists they are basically saying we are going to act as God and absolve ourselves of all the wrongdoing that we will do during the course of the year when we come together to perform perform this right this is an ancient absolution ritual or ritual of self forgiveness that's what this is and again for some people who don't know me or my work I was involved in the dark occult in a personal direct experience direct one-on-one experience I was involving dark occult orders in my past four years of my life I went down into a very deep dark path the left-hand path as they call it any occult and I I gathered with and exchanged ideas with very psychopathic individuals because I was quite psychopathic in those days in my in my youth and I basically came to a catharsis and spirit and had to face all of the dark vile aspects of my personality I came to a point in my life where my attitudes and behaviors brought me to the brink of death and if there were two ways to go as I related to people when I talk about this I could have either wallowed in all of that uh those vile aspects of what is not true self' all the lower qualities of consciousness that are not about who we really altom utley are and it's all about identification with the physical and the material okay I could have stayed in that worldly identification which was making me a sick a horrific human being and I would have died okay I wouldn't have uh progressed forward in consciousness in this lifetime or I had another direction to go and that was up from that point which was about as low as you can get okay as low as you can go as far as consciousness goes and I chose the latter direction and I chose the latter direction okay for as a pun on words pun intended okay I chose to climb that ladder to a higher level of spiritual understanding and a higher spiritual perspective and that's what helped me to reverse of the direction of my life and we re acquire the care that I had basically burned away through my dealings with dark occultism and uh and the people involved in it and uh saw the true light of compassion and and reason and true understanding so that's what this ritual is about this cremation of care ritual where they emulate a effect similarly of a baby basically that they make an effigy okay they make a representation of a child and then they float it out onto the water because again the goddess is the goddess of waters okay it's it's a it's about birth okay it's about innocence but they're murdering okay so this is what this child represents it's the inner child within us all and they floated on to this out on the lake there in front of the owl and then they light it on fire it's the immolation or the cremation of care that's what it is known as the cremation of care and that is exactly what it's doing it is it is destroying the essence of care it's named very appropriately it's not an innocent of play on words or an innocent pun or an innocent psychodrama that's not what this is about this is an absolution ritual for the members who are really involved in murder and genocide and uh depraved sexuality often pedophilia you name it goes on there okay and they're absolving themselves of their sin by saying we are burning away care and that absolves us you know we don't need to face the repercussions of our actions within natural law because we're the elite we're basically God here and you know we're absolving ourselves of our own sentence imagine that this hubris of the psychopathic ocultist that take takes place in this redwood grove okay so you see some images of this ritual performed out in front of a lake and the stone ale that is done in front of representing the dark incarnation of the goddess principle which is basically black care it is dark care and yes there is such a thing okay because if you don't think that these are cultists but basically run the game on this planet if you don't think that they have a variation of care you're kidding yourself they wouldn't get up and the evil that they work 24 hours a day seven days a week non-stop without a breath without a respite without a break okay if they didn't care about what they're doing their care may be dark indeed it may be violent may be pure evil but they have a form of care and let me tell you something I've said it on the show in the past and it's not a very popular opinion or a popular approach this is why they're so successful what they do the bulk of humanity who basically underneath their apathy may have a good essence you know an actual desire underneath to do good but if you don't care enough to actually put that into action to put what you know into action or what you feel in action you're accomplishing nothing these people say what they're going to do they hold an intention in their mind they care enough about it to get it done and then they actually work to do it they have the combination of intelligence dark care and willpower and putting those three together dark occult is such as meet at the Bohemian Grove yearly and who are the elitists of the world the so-called elite I mean I should use the word so-called because they're the elite of exactly nothing in my estimation okay they're not my elite they consider themselves really okay I think people should not even call them not I say the so called the lead but they have a form of care and this makes them a non dual being as they think so they feel and so they act that's why they're so successful and that's why it's up to this point they've been kicking our rear ends here the intro music we'll be right back after these messages folks thick stay with us every day you hear the news as an American citizen ensure your concern you may even feel like you have no control of course you can't control things like natural disasters or the real estate meltdown but these days a number of Americans are returned to the practice of being self-reliant by keeping food and water in reserve that one need be food ready awesome show mark ready.com nice offensive aspect and buddy he got a minute and when you when you do the interest in ounces if you could say you're listening to what on earth is happening on the Intel Hub radio show broadcasting live at Oracle kottkatt o'problem and you got it yeah that sounds a little bit cleaner for the eye and so they don't get confused you got actually notes a continuation of the show yeah exactly and then I'll come in at the last few moments of the show there's not a people of you thanks man good show how you can drink six meals for free logon to be ready calm day this is Jack blog host of deadline line for years now I have been cheating the multinational farmer cartels and avoided expensive doctor bills by taking energy products every day these are the products that the power does need not wanting to know about and with Codex Alimentarius legislation are actively trying to bend why because if you take inner food coconut milk powder and switch to all organic music cafe coffee and cocoa mojo you woke needs them go to en ers OoT calm today to learn more about how a daily inexpensive intake of nature's superfood will increase your immune system by flushing out toxins and how this will increase your energy stamina and focus you know you can't take on the new world order from your couch Engr soo-ji calm or give them a call today eight seven six to ninety two thirty eight eight six six seven six to ninety two thirty eight tell them jack blood sent me Oh welcome US citizen is really keen that in 2011 we will witness the most important a number in more than 50 years because it will change everything about our lives the way you shop travel invest educate your children I need a man you take care of your health and your family you see here it into the glass of GM anyway waiting like an American please Mahlon there in the world country a few years ago embankment ovas called in work but now you probably can it's a real eye-opener I can't stress this enough you should at least want to this bring video online very you explain everything you need to know including two concepts you connected which make yourself you can find the video Ketil Meisel UWF of america and back home although this video may be a business from audiences it's worth checking out again that's what you believe them got into Bolivia the number again gem this is Jack Wald your radio bone you're listening to Oracle Broadcasting Network the home of tyranny smashing cutting-edge talk radio all right ladies and gentlemen we're back on what on earth is happening as part of the Intel hub radio show here Tuesday night on Oracle broadcasting before the break we were talking about Bohemian Grove on my website in the owl symbolism section on the radio lesson page we were I had directed people's attention to images five through eight which were depictions of the owl a bohemian grove and I'll probably post some supplemental information about Bohemian Grove on the podcast page when this podcast goes into the archive on my website in the podcast section and I'll maybe post some photos of what some of the activity at the Grove looks like and maybe post some um some pages with some membership of individuals that that actually participate in the rituals that take part of Bohemian Grove so just uh to briefly recap with images five to eight we're about an image tribe you saw the owl illuminated with a fire in image six you see the lake that it's juxtaposed upon representing the principle of correspondence or as above so below in image number seven this is an older photo of this variant of the owl probably from the middle part of the 20th century and then earlier in the 20th century we see an older incarnation of the owl they're depicted a Bohemian Grove so of in image number eight so let's move forward from Bohemian Grove symbolism specifically to talk about some ways that the owl is used in symbolism that surrounds us in our culture in image number nine we see the owl depicted on the one dollar bill this is a much is often made of this basically it's hiding behind a shield represented by the number one there okay and this is a nod to the unity that I was talking about before that dark occult to share with each other they are the money masters they're they're who they consider the elite of the world and the illuminated of the world even though there really no such thing but they're putting their symbolism there in plain sight this is the the adage of hidden hidden in plain sight the dark occultists like to put their symbolism in places where people would see it but not easily recognize it or understand what it is there for their attention is directed upon it and it goes into their subconscious mind but it is never really brought to the surface at the conscious level and they basically get off on that they love that they love that they can throw things right in your face and you won't see it it's as form it's a form of occult mockery okay we'll see other ways they use that in image number 10 you see the Marvel emblem Mazda cars okay and this is Astro theological symbolism here and specifically you can easily see that's an owl's face I mean if you can't see that I don't really know how to make it any clearer just look at the Mazda symbol you're looking at an owl right into the face of the allergist look at the white space as the head and these are the eye crests of the owl with the beak and everything okay this is Astro theological symbolism because ahora Mazda is a Sun Sun solar cult God myth tradition that's what it is it's similar tradition that we talked about in the solar cult Astro theological worship that we have already covered on this show in the past when we talked about religion as Astro theology so who are a Mazda just another variant of the same solar cult myth God okay the same basic variation on this and here uh that is depicted the name is depicted in conjunction with this owl symbolism image number 11 and 12 shows the frost bank building in Austin Texas and if you look at that Frost Bank building a center of Commerce in the city of Austin you will see how it clearly is representative of an owl with the eyes and the crest above the head and you have to look at it from the side of the building from the corner of the building I'm sorry you can look at it from the side you wouldn't be seeing it but once you look at it from the corner from an angle view you can see how this is clearly the face of an owl especially when it's lit up at night as you see there an image number 12 you can see that pretty clearly right here in Philadelphia and the city where I'm from there's a place called Commerce Square in Center City Philadelphia of course the square is also one of the favored symbolism of the dark occult we'll look at that when we look at free Masonic symbolism in the coming weeks here on this program but if you look at the image number 13 on the website under al symbolism you'll see two buildings and they have the ears the pointed ears like an owl okay and if you actually find this image doesn't show it very well but if you look at these buildings there are wings down positioned at the side like an owl holds its wings at its side that's what those small ducks that come out off to the side of the building if you look at an angle that shows these head on you will see that these are on both sides of these buildings and they're down at the side just like wings both of these buildings are basically symbolic rudimentary owls and they're connected with MV vision because this is a centre of Commerce it's called Commerce Square all of the banking institutions because specifically the ones that are instrumental to this city have offices in Commerce Square in Philadelphia Center City so they use it in in architecture because basically this is the representation of not caring about anybody but yourself doing anything for money doing anything for greed and power and influence and control that's what the dark goddess symbolism is all about what they're what they're doing in Washington DC with this symbolism the center of the government of the United States in images 14 through 16 you'll see this in the owl section of symbolism and we'll probably stop after these three images and we'll look at dove symbolism and sacrifice symbolism next week on the show we see that the owl is positioned in the District of Columbia okay Kalume the dog we talked about that before will look at that the symbolism of the Dove next week but Columbia is what the Capitol was named after this is another variant of the goddess specifically the goddess as connected with dove because Kalume in French means dove okay and it's the Congress building is supposed to be about the coming together of the left and right brain hemispheres it's supposed to be about um helping to lead through example of balance Congress is another word for sexual Union okay it means bringing the masculine together with the feminine or the left brain together with the right brain it's another way of saying the chemical wedding okay or as we have seen previous on this show the balance of the brain hemispheres and the opening of the third eye or the pineal gland the all-seeing eye what they're doing here symbolically depicting this at the top of a 13 level pyramid which the owl hears is sitting atop and if you can't see that that's an owl in image number 14 just move on to image number 15 and I actually highlight in red the roads they actually go flow around the Capitol building and if you can't see that that's absolutely pointed deliberate symbolism that they are surrounding the light incarnation of the goddess the dome the Sacred Feminine breast dome that is topped by what is supposed to be the goddess representing freedom or columbian of which the the name Washington DC is named after the District of Columbia they are putting it into the belly of the dark variant of the goddess which is dark hair well that in part I'm looking at the photo right now yes yes Bob I'm sorry I was just going to say I'm at the web site what on earth is happening calm if you missed any of tonight's show you can find the archive there and at our website the Intel hub radio calm thanks so much mark for another fascinating look at the occult and the symbolism that's right in front of our face hidden in plain sight right there for all the see but they're mocking you basically saying even if you did seem you wouldn't comprehend it that's right all right folks every Tuesday second hour of the shell mark patio what on earth is happening on Bob Tuscan on behalf of Sheppard and Bellus our executive producer Alex Thomas and the entire Oracle broadcasting family I thank you for tuning into tonight's show they tuned to leave Rogers coming up free or die next on Oracle broadcasting and I really enjoyed his take on Alex Jones last night in the Charlie Sheen do scandal I was an absolutely a hard-hitting show if you missed it check that out on the archives and we'll see you tomorrow night with another great show called versions and coming up this week still Mike Murphy the list goes on all of our guests and podcasters are at our website the info hub radio.com [Music]

What On Earth Is Happening Show #050

Topics: *Mind Control Methodologies, Subversive Symbolism, The Goddess, The Owl, The Dove, Sacrifice of the Goddess*

we were talking last week about subversive symbolism and we have been talking about this for several weeks and we will continue to do so I don't want people to get the idea that this is just a show about symbolism who are just tuning in this is part of a long tapestry of mind-control methodologies that are employed against the general population symbolism is a hidden language it is a language that is basically reserved for the initiative a specific tradition and those initiates are form the core that understands the language that's being spoken even though it is a wordless language it is a language that is rooted in form an archetype and color and vibration etc okay symbols speak to us at a subconscious level and therefore it becomes all the more important to understand that language because if we do not things are being said to us and they're going directly there bypassing the conscious mind going directly to the subconscious mind and we're not understanding any part of that that information that is actually being put into the deeper recesses of the human psyche without our knowledge once we do become literate of these symbols we can understand what their intent is what the intended message that is being planted is and we can choose whether to take that into us or to reject it at a conscious level but until we become conscious of what these symbols actually do mean and they do have meanings and they are used in very specific ways to elicit those meanings and to then bring about the desired mode of behavior until we do understand that language we're basically powerless to protect ourselves against it to those who may wish to use it as a mechanism of suggestion and control mind control for that matter so last week we were talking about goddess symbolism and how this is used in the modern culture we saw it in symbols of freedom we saw it in symbols of knowledge namely the illuminated torch and then we saw its dark aspect the symbolism of the owl representing the dark elements of the goddess and the goddess tradition or dark terror a the goddess generally represents care it generally represents the ability to recognize truth from falsehood it reckon it generally represents human emotions and the owl is the destruction of all of those things it is basically destroying knowledge for the general public so that a covert group of people can amass all the knowledge and wield it as a weapon it is the destruction of care as we saw in the usage of the owl in the Bohemian groves symbolism last week which is a dark occult group that basically consists of power brokers from all over the world that meet in Northern California nearly usually in July to realize and set forward their intentions for the continuance of their control and oligarchy over the next the course of the next year so the Bohemian Grove symbol is the owl who saw how the owl is used in their major ritual called the cremation of care because it is a ritual that is an absolution ritual designed to forgive them of all of their sins and wrongdoings they're acting as God they'll decide that their sins are forgiven they'll decide that all other wrongdoing can be expunged so that they can go out and do it all over again basically what they're openly doing is cremating care just like the name of the ritual says they're actually destroying the Sacred Feminine within the consciousness so that the people who are affiliated with them and basically do their bidding through the course of the year can just absolve themselves of all cares and concerns for what the negative impacts of whatever they're doing does to anyone else so this is what the ritual is ultimately all about all the cream of care that happens at Bohemian Grove this is an ancient uh analog to rituals that were conducted at Carthage and in in the land of Phoenicia Cana thousands of years ago so this goes back a long way this dark occult tradition and it predates even even those traditions but we also saw how the owl is used on on money in the dollar bill we saw how is used on some corporate logos we saw how it was used in building architecture in bank buildings most notably because of course the Alito cultists controlled the banking industry so these are always we saw it used last week we wrapped up with the owl symbolism last week in one of the ways that is used in our nation's capital which of course is Washington DC we'll be getting into that a little bit more tonight and I want to go back and refer people up to the website to go back to the set of images that we were looking at last week because I want to pick up with image number 14 in the section of the symbolism of the owl so go up to my website at what on earth is happening dot-com if you're not already there click on the radio listen page which is the button at the top left-hand side with the radio microphone and then you're going to on that page see images for tonight's show under the player under the the radio player you'll see images for tonight's show okay and that will say March 8 2011 and you'll see three sets of images the first one will be the symbolism of the owl the second the symbolism of the Dove and the third will say the sacrifice of the goddess so we're looking at the images for the owl symbolism and we're going to pick up with image number 14 in that section okay so image number 14 in the owl section shows an overhead view this is taken right from Google Earth if you have the program Google Earth you can verify that none of the is made up you can just type in Washington DC find the Capitol building and just direct the directional arm a compass east toward the east so that East is pointing upward and you will see this image this is still there anyone can go and do it themselves just by downloading the program Google Earth and finding the Capitol building the Capitol building is a Sacred Feminine dome okay o or what is a breast symbol okay we will look at that in the next section when we talk about null symbolism because what this ultimately represents is the dove inside of the owl or having been consumed by the owl the owl being the dark aspect of goddess symbolism or dark hair having eaten or consumed the positive aspect of the goddess symbolism the nurturing and intuitive and caring truly caring elements which is what Congress is supposed to represent Congress is another name for sexual Union or the coming together of male and female forces masculine and feminine forces and that is the path to true enlightenment is the balance between the masculine aspects of the left brain and the feminine aspects of the right brain or in other words uniting our emotions which is the sacred feminine side of our of our true self with our actions which is the sacred masculine side what we do with what we know that's a process of Congress of Union they call it in different occult traditions the chemical wedding often it is referred to as okay because it is a marriage of solar and lunar forces in this image you can see seated atop what looks like a pure middle type structure which we will go into more in coming weeks I'll look at the extensively the symbolism that is laid out in the street plan of Washington D see we won't be doing that expensively tonight but we will on a future program and you can see that the owl is actually seated atop this pyramidal structure and it is completely surrounding the Capitol building okay it has a symbolic tale represented symbolic feet are representing symbolic ears and wings now in image number 15 if this is difficult for people to see in image number 14 I would suggest that they go to image number 15 which shows an outline of the Owls body and tail okay I've outlined that this is traditionally how this has actually been depicted when other researchers will attempt to outline this and show the symbolism of the owl surrounding the Capitol building um one of the things that I have noticed is that it also has symbolic wings that are outstretched basically to show that um the owl is victorious okay or it has basically uh swooped down and consumed its prey mainly the Capitol building and all of the minds and hearts of the people who make decisions in that building and this is again perfectly expresses the aspects of the dark occult that have infiltrated just about every area of our society in the modern world these occultists put their symbols in a hidden way in a covert way around anything that they have there that they have laid their touch upon you will find one of their marks they never do this in an extraordinarily blatant way they do it in a subtle way in a way that whoever is looking at it would have to have some prerequisite knowledge of mystery tradition symbolism in order to understand the message that is being spoken so to someone who just happened to see this and knows no context they have no context framework for which to understand the symbolism this symbolism is meaningless but for people who are studied in the occult for people without experience in the occult for people who know this language this esoteric language that is reserved for occultists they understand exactly what's being said here and there what is being said here is we own you we own you not only do we own you we've eaten you we've consumed you you're not only owned you're eaten you've been eaten is the message here ok because in the belly of the owl sits the Capitol building itself and they're telling even the people who are puppets at this level of government they're telling the occultists that own those people are telling them you've been devoured because you're serving our agenda whether you know it or not and it speaks volumes to me it this isn't a whisper to me this is a huge shout through a bullhorn right at two inches from your ear but that's because I understand this symbolism and most people do not and therefore they'll readily dismiss it from a left-brain perspective having absolutely no knowledge of what it really means so you know my suggestion to people like that is believe whatever you want enjoy what you have it's the best that's ever going to get and you're never going to see anything in your life improve as long as you remain in that level of pure ignorance but you want to continue to believe that you go right ahead symbols are meaningless they say nothing they don't affect you you're not affected by any of this enjoy what you have that's my only suggestion to people like that because they're stuck in a pure left-brain perspective of the world and they think they have it all figured out and there's nothing that they can learn or understand that that they don't already know good luck with that and enjoy it so that's what I wanted to wrap up in this first section which you know I just really wanted to emphasize what the message is here okay and hopefully people can clearly see that and then you know verify it for themselves we'll be looking more at DC symbolism specifically from overhead images of the street plan in a future week when we talk about how this symbolism is used in different forms of architecture Street plans etc we'll have probably have two shows on that as well again I'm going to spend a lot of time on symbolism because if you don't understand this language you can't understand the mentality of the dark occult and if you don't understand the dark occult you can't counter it you need to know the psychology of the enemy in order to basically counterbalance what they're doing and and and to understand what it is they're doing so tonight we're going to shift gears a little we're going to look at the positive aspects of the goddess symbolism and then unfortunately we need to go to an even darker place and we've already gone and look at how the positive aspect of the goddess symbolism is then ritualistically murdered ritualistically destroyed okay through symbolic world events that are basically human sacrifice rituals done in the light of day for all to see but nonetheless they are they are directed by a covert hidden hand that is basically pulling the strings calling the shots and this is done symbolically okay not only for the fear that it invokes but it is done to symbolically destroy the positive aspects or symbols of the goddess over and over again you can see this and we're coming up to a time when it is particularly important to watch for events as we're going to talk about tonight because we're entering a time period that is very critical for the dark occultists that they revere they hold in high regard it's called the season of sacrifice and it stretches from March 19 to May first and we'll talk more about that as we unfold more of this symbolism I'll probably need to speak on that a little bit next week before we actually enter that season because let's see two weeks from today it will and we will already be in it so I'll probably discuss that in in the first or second part of the show next week but it's a critical time period to understand I'll probably have a couple of slides along with the the show next week to help people to understand that a little bit better this is the time of the year the timeframe of the year known as the season of sacrifice what it is and why so many events that are extremely disturbing and and inspire so much fear in the population occurred during this time period so that will be coming up as well let's start to look at the positive symbol of the goddess the Dove okay so in image number one there I just put the basic symbol a dove a white dove its its wings outstretched and you know illuminated by light this is traditionally been this been a symbol of the goddess okay or the sacred feminine aspects of consciousness from time immemorial this symbol has been used for thousands of years to represent the Sacred Feminine and we can see how many ways that it is employed in religious symbolism in the modern world so what the Dove represents is the human spirit it represents our emotional aspects it represents nurturing care creativity truth um getting in touch with the repercussions of what your actions do to other people knowing that and owning it and taking responsibility for it that's what the Dove ultimately represents this is the positive aspects of the goddess tradition the positive aspects of the whole goddess concept all right now if we look at MA other religious traditions we will see the Dove come up over and over again as well but most notably it comes up in Christianity Christianity has the Dove as one of its primary symbols of its Trinity the Father the Son and the Holy Spirit all right we've already talked about this Trinity many times in past shows and understood how it is but a symbolic analog of thought emotion and action the three manifestations of human consciousness in the world okay the only three ways we can really ultimately manifest or express our consciousness yes we have speech but speech is a manifestation of our thoughts okay so thought and speech and emotions and actions all right these three aspects thought emotion and action are the esoteric meaning of the Trinity in different religious traditions and have been throughout time but the physical personification of these three modalities of consciousness is the exoteric version of the Trinity it's always put outside of the self to represent something that lies outside of you okay to get you to stay focused on the outward instead of turning the attention inward understand what you're made of and to look at your thoughts your emotions your actions and understand standard these are the expressions of consciousness these are the expressions of the divine these are the greatest gifts of the Creator and how we use them is what the whole mystery of life is all about but they always want you to put a take you know remove responsibility from yourself and look outward look to the outside it's only about belief believe in something okay don't don't worry about how you think how you feel and how you act just accept something outside of yourself as something that's going to save you you know from yourself and then you know as long as you believe in that you'll be fine and this is nonsense obviously and this is something that religions want to get people to accept because then they never really live a life of any kind of self-examination they never really lead a life that is truly in pursuit of knowledge that is truly in pursuit of changing one's ways of thinking or or a feeling so that we learn how to really do good works in the world and religion wants to de-emphasize many religious traditions one of the emphasized good works and just say oh it's just about belief or it's just about acceptance or it's just about you know this or that but it's not about actually getting out there and engaging and changing the world through changing your own thoughts and emotions and then applying them through an act of will that's what they don't want you to think about that's what they don't want you to know that's what they don't want you to understand and most of all that's what they don't want you to live because that would truly change the world for the positive that more people did it so in order to a target most effectively the most important component of this they need to remove the Sacred Feminine figure to the extent that they can okay so there's no divine mother in this Trinity right everything happened through male-only aspects okay the Dove isn't considered a woman per se in the Christian tradition oh it's a symbol of a spirit or something that is dead okay not necessarily dead me not imbued with life but a spirit is like a ghost it's something that is not in the physical world it's not present that's what I mean by dead okay the sacred feminine aspect or the Divine Mother of the Trinity has been removed or symbolically killed and is represented only by a spirit the holy spirit depicted as a dumb because in older traditions which is where we talked about Christianity being derived from when we looked at Astro theology in older traditions having this Trinity the Sacred Feminine aspect or the divine mother was often symbolically depicted as a dumb because since it was the lunar aspect of consciousness the moon in its crescent form which we're going to see repeated we're going to see symbolism of the moon and we're going to see crescent moon symbolism coming up okay the moon was was symbolically portrayed as a white dog with its wings outstretched traversing the sky okay the the dark aspects of consciousness meaning those that are internalized not me that they're dark as far as evil see the light aspects are those which we show to others our actions therefore they're solar they're there they're available to see during the day you know for all to see our actions the darker or internalized aspects are our emotions nobody can really immediately you know tell what your internal emotional makeup is upon first meeting it's something that is veiled initially then through your actions they could probably tell what your emotional makeup it is all about but initially it's something that is dark or reserved or veiled therefore it is lunar is something that is analogous to the qualities that represent night or darkness so since it is the symbol of the moon and the Divine Mother all right and we see how the Dove represents the crescent moon okay as it traverses the night sky we saw all of those symbols connected with the goddess in previous sections specifically the section where we talked about Astro theology in the Christian Trinity of Father Son and spirit this has been delegated to a symbol only the divine mother is not depicted so Mary in the Christian tradition is not considered one of the divine elements of the Trinity whereas she has been considered one of the aspects of consciousness and one of the aspects of divinity in every other tradition which uses this anthropomorphized Trinity okay um instead they symbolically replace her with a dub and this is the Holy Spirit again because she is the spirit of the threefold aspect of consciousness our thoughts being the creator aspect okay or the Father God all right that would be mind mental aspects right then the Sacred Feminine or our emotions is the spirit aspect in this mind body spirit connection and of course our actions with her male their masculine in nature we we do them outwardly not inwardly like emotions it is the feminine aspect right the actions are considered a byproduct of thought and emotion which are the father and mother okay and therefore a son a male child is born into the world which is our actions and therefore you have the Son of God and the goddess or the Holy Spirit see so the Holy Spirit is the goddess in the Christian tradition represented by a dove but it is simply Mary in this tradition although the church doesn't officially recognize that because they are masculinizing the Trinity and removing the Sacred Feminine which is the most important aspect of consciousness and if we really want to get to truth or to true care we need to UM hone our emotions we need to actually get in touch with our emotions at a deeper fundamental level because this is what creates true conscience and true understanding of natural law principles if we basically cut this quality out of ourselves who knows what our actions are going to be like they're about not going to be in harmony with truth they're not going to be in harmony with justice or true wisdom they're going to just wander all over the place and basically sometimes they'll be in harmony with natural law and sometimes they won't and it'll be accidental when they're in in harmony with natural law this is what the whole checkerboard floor of the house and Freemason represents until you really advance your consciousness to a higher level you're a wander between light and darkness in your actions never knowing really which is which it means people who cut this part of their themselves out or don't really develop it never really truly know fully whether their actions are in harmony with natural law principles or not whether they are actually acting within their rights or not they don't really know what their rights are and what they are not we talked about that before in our discussions on natural law so understand that the Dove in this context in image number two here is the goddess of the Divine Trinity which ultimately represents our emotions in the thought emotion and action or mind spirit body connection that's what it represents in the esoteric sense okay now in image number three we're going to really understand how this applies and really see how it relates to the human brain physiology which we talked about extensively on the show in the past this is the Christian depiction of Mary the Blessed Mother or the Sacred Feminine aspect of the Trinity okay and this is she is the Holy Spirit in this Trinity but the church would never acknowledge that or or speak of her in such a way because again they want to keep segregated with feminine aspect because this is a male dominator solar cult religion and it's there as a mechanism for control for the continuation of control controlled by the dark cultists that own and control the Vatican and the entire church and continue a pedophile Network which watch the movie uh sex crimes in the Vatican to understand the nefariousness which was with which priests have been shuffled around by high-level people in the Vatican namely the Pope right now the current Pope Benedict okay when he was in a position of Cardinal this guy acted to cover up these sex crimes and basically shuffle the priests around so that they can continue to do the same thing I neglected to post this video in the last uh podcast but I'll put it up on the website this week I'll definitely endeavor to remember to do that so people can watch this one maybe I'll send it out as my file nailing this week I have a file mailing if you get on my mailing list I send it out bimonthly I'm late with it this month because um they usually send it out in the first week but I'm a little late with it because I had a speaking engagement over the over the weekend so um I'll probably send out this documentary I'll put it up on the link to it on the site and send it out in my file nailing for this week let's look at how this goddess symbolism is used in Christianity but what it's saying see if for those who are looking at it from the exoteric point of view this will just be Mary a symbol of Christianity you know of Jesus's mother but they will not really deeply understand the esoteric nature of the symbolism and how powerful it is in what it is actually saying to us so here we see in the left hand image let's focus on the left hand image first okay in image number three on Dougs symbolism alright we see um the depiction of the Father God okay the Creator God God the Father in the heavens okay at the very top of the image bathed in light the clouds are parted he's in another dimension of being angels are around him etc now below that you have the traditional depiction of the Holy Spirit which is the the white dog with its wings outstretched okay and then right underneath that is Mary herself okay now in Mary's heart in this image is the Sun and it says i HS are these are the first three letters of the name of jesus in greek okay Greek in Greek the name Jesus is spelled da de I'm sorry iota a de a Sigma Epsilon Sigma or I us yeah so there's no J per se in Greek as there is no J in classical AK okay so e ASIS or Jesus right ah ei de I'm sorry again now iota ADA Sigma Epsilon Sigma and the first three letters of this are always depicted as the symbolic name for Jesus in Christianity you will see this on banners in Christianity you will see on prayer missiles on hymnals you'll see on a robes of priests you'll see on funerary uh uh cloths that are laid on top of a caskets you'll see on crosses sometimes but most frequently if you notice if you take the time to notice when you receive a host or a piece of Communion it is actually stamped on the communion wafer yhs okay so in most of the time it is some of them have different stylizations on them but you will see this depicted on some of communion wafers so here we see it these three letters on Mary's chest right at her heart level because she is the bearer of the sacred child the sacred masculine child of a right moral action in the world depicted by symbolically representing Jesus were the son she is the night sky the lunar goddess the goddess of the night sky here you see around her ahead is depicted the halo of illumination with stars because she represents as Isis did as Semiramis did okay all names that we talked about in older goddess traditions she represents the night sky okay the heavenly cloak of night and all of the stars within it she is the mother of the stars just like our Sun is a star in this solar system okay she is the mother of it and she is the Bearer because she is the emotional qualities that if they are honed if they are worked with if they are developed give birth to true positive moral action in the world which represents the light or the Sun okay now since she is the Sacred Feminine part of the of the consciousness and specifically she is also physiologically the midbrain of the brain complexes we look when we looked at the brain we saw that the brain stem and cerebellum forms something called the arc complex or the reptilian brain this is the lower consciousness part of the brain that is always reactive is always based in instinct and survival modality only okay never really takes into consideration any higher thought it just reacts okay it doesn't care it just reacts it's fight or flight no doubt it okay if a predator or something dangerous is coming at you you have to make a decision the fight or you run so this is the reactive mode of the brain they are complex above that seats is seated the limbic system the limbic brain this is the million brain were the part of the brain that helps us experience emotion because of the chemicals that it can generate all right so this is the emotional part of the brain and the positive and negative elements of emotion are contained made possible through this part of the brain the limbic system the hippocampus the hypo-thala thalamus and hypothalamus the pituitary gland and pineal gland these are in the midbrain okay so it's all of the sick chrétien parts of the brain all of the parts of the brain that seem secrete any kind of peptides or note or neuro chemicals that basically make up our emotional uh that comprise our emotional makeup so this is what meri represents she is the limbic brain but she is the positive elements of those emotions she isn't the fear element ok then connects down with the r-complex she's the part that connects us with the love emotion the positive side of the emotional polarities which is love and fear ok that's what she represents love all right she represents true care not dark care like the owl represents which devours the goddess in the previous example that we saw Mary represents the pure purity of the dove ok of true care and love and this is what the holy spirit is supposed to represent all right it's the only thing that actually gives birth to through a connection with the creator ok the symbolic representation of the creator okay it's the only thing that gives birth to true right moral action in the world which is symbolically depicted by the Jesus figure okay and has been traditionally represented by the Sun so all of Astro theology is in here is depicted here we have the lunar cult we have the the cult of the stars and planets or the creeks that the cult of the Creator God okay which is the Jehovah aspect here Yahweh slash Jehovah slash creator in general which is depicted up at the top there then the lunar cult depicted by the Dove and then the solar cult depicted by the Sun there in Mary's chest because it's connected with the heart and the emotions now notice that Mary is almost always in different statues that depict her she is standing with a foot upon a serpent crushing the head of a snake okay and in both of these examples we'll move on to the second image momentarily but in both of these examples she is keeping a serpent or a snake or a reptile at bay okay and in doing so she is providing protection specifically in the second example all right we'll move on to that in a minute let's just focus on image number one first on the left hand side I should say you can see that there is a moon symbolically depicted by the way Mary is holding the rosary beads this is a the prayers that are offered to the goddess in Christianity the Hail Mary prayer okay so that's what these rosary beads basically represent Assyria cane of prayers or invocations to the goddess okay they're often used to in the sacrament called penance or reconciliation it's a confession of sins and then you're given to say many of these Hail Marys these prayers invoking the goddess which is your emotions to endeavor not to get you to do the same thing that you did again not to get to get you to stop doing the same thing that you previously did all over again okay and this is the punishment for different sins and as the sins are more severe you get more Hail Marys in the Sacrament of Penance by the priests but anyway that's what this rosary B represents for those may not be familiar with the Christian religious tradition and yes you see the symbol of the cross there at the bottom right next to the snake head that's the bottom of the rosary beads so that's what these beads basically represent is prayers or invocations to the goddess and it's an appeal to the emotional aspects of self to get you to recognize your wrongdoings and not repeat them but it's also they're in the shape of a moon a half moon here okay or maybe slightly less than a half moon if you take the slight dip into consideration there by the top portion of the bead okay so this is a moon um in its approximate of half phase aspect okay she is standing on the serpent the serpent represents the r-complex or the reptile brain clearly okay and as the positive aspects of the limbic system or the mammalian brain getting in touch with the emotions is what will keep the serpent in its proper place in its place as that simply part of the brain that should regulate movement digestion breathing etc and things we need four basic base survival okay and when there is a need to physically um react quickly but to stay in this part of the brain all the time leads to extreme psychopathic thinking and behaviors okay if it's chronic we saw what chronically living in the arc complex of the brain does to the neocortex of the brain we saw actual brain scans on informal podcasts where the the brain is literally devastated the neocortical synaptic firing patterns of the brain are literally shut down and we cannot really engage in higher modalities of thought or in any of the types of thinking that really truly make us human including moral thinking artistic creativity um true intuition or nurturing true scientific thought you know true reason none of this stuff is is possible if the r-complex is ruling the entire brain and what they're what is symbolically being taught here although not out in the open to the to the esoteric initiates it is understood that in unless we really develop the true aspects of the emotional qualities that exist within us we're going to be ruled by the serpent we're going to be ruled by the reptilian consciousness and that's going to lead to basically disorder and ultimately disaster and we're well on our way to that ladies and gentlemen well on our way unless we turn it around by getting out of these juvenile depictions of what these images and symbols really represent thinking that they're actual literal things that these are telling us some kind of mineral story and understand them symbolically for what they really represent and then we would get out of the mind control called religion and out of the mind control called government because we would recognize the reptilian consciousness people that are really ruling us not in any way acting as any kind of servants but rather as serpents okay and we will put that other form of mind control to an end and then maybe we would really begin to think for ourselves because we would understand self instead of being moved by the lower qualities of it namely the r-complex of the brain and reptilian modes of thinking that go along with it reactive thinking so we we see an image number two here or I should say the right hand side of this image and I'll try to wrap this up before the top of the hour we'll connect in the revolution broadcasting in several minutes um we see again Mary depicted as the crowned queen of heaven illuminated she wears in this example the cloak of the stars because she is also the night sky this one is great I mean this one really puts it all together okay she's crowned by the Angels as the Queen of Heaven there put it getting where you put the crown on her head then cloak of the night stars the dark cloak with the pinpoints of light in it okay because she is the night she gives birth to the sacred male child who she's holding it holding in her arms and also is coming out from underneath her cloak at the bottom okay she's holding up a male child and then symbolically burying the male child down at the bottom who represents Jesus or Horus who is coming out from under her cloak or in other words out from the night sky as the son does during the dawn of the big of the new day there's a crescent moon that she is standing upon because she is the moon goddess and she is holding the serpent at bay in the name of protection of the small children which is innocence or care and that's why they want this goddess murdered this goddess needs to be the focal point of true esoteric Christianity instead of being removed from the Trinity this is the worst thing that could have ever happened to this mode of thought which originally was Gnostic thinking in early Christian times which then got taken over by Constantine during a Council of Nicaea and turned into the Sun cult of Sol Invictus but just you know they gave it a different name that's all that's all that happened that's all that the religion the modern religion of Christianity is it's a continuation of pagan solar cult mythology and Constantine is to thank for that through the Council of Nicaea just researching okay that he needed to crush the uprising that was happening because true esoteric Christianity or the gnostic tradition which is about truly knowing oneself understanding one's connection to the divine and getting in touch with all the aspects of consciousness to become a truly awakened person we're starting to catch on and Roman leaders couldn't have that because they would not be able to rule people like that they won't be able to control them so we had to basically denigrate that religion down to the stage of Astra theological nonsense uh again but there you know if you can see through that level and very few can or will acknowledge it because they want their little box they want their box of consciousness to remain safe in if they you know if they can acknowledge that they can see a whole new depth of knowledge and a whole new depth of wisdom unfold right before their eyes through the symbols of their own so-called religion but 99.99 9% of Christians have never even considered any of this in this light at all at all and probably never will because it would they would need to admit that there's something deeper than these that these symbols actually mean it would they would need to admit that they were lied to by the church as it as it operates in today's world and they would need to really acknowledge that ultimately what this tradition is ultimately about in its origins is about the self and changing the self and that's the last thing most people want to deal with or even look at again as I've said before on this show they would rather run a thousand miles an hour in the opposite direction and and meet their death rather than take that true responsibility unto themselves so we have about a couple of minutes before I connect into a revolution broad I'm sorry slip of the tongue there before we connect into Oracle broadcasting I have a caller on the line here we go caller on the talk-show network non-member you're on what on earth is happening what do you have for us hello mark it's Bob from Cincinnati how's it going great Bob great to hear from you all great to talk to you boy you know I'm like Chris who's out there towards you and philia we're all just taking all this in it's it's overwhelming the the amount of depth to these symbols that have been in our eyes for so long but we had no clue of what they've truly meant so thank you again for explaining these symbols to us mark absolutely Bob it's a progression you know it's it's something that really people need to see the tapestry of and it crosses over in so many other disciplines so it takes a wide berth of knowledge in order to put it in its proper perspective but I hope that I've done that in a way that is a somewhat acceptable over the last 50 weeks and we'll continue to do it and break down more and more and hopefully get people to a higher level of understanding about how all of this fits together in the world that they see unfolding around them so Bob I thank you for that and I appreciate you calling in and calling back anytime always love to hear from you okay thanks mark maybe I'll catch you in the next hour I've got a question a deeper question okay no problem just if you want to hold on the line and I'll go back to you when we have some more time I will basically make the transition over to Oracle now and then when we come back from that break I could I could run into some more symbolism and then I can bring you back on a little bit later I will be patient he's not a bob thank you bye-bye all right all right so we're approaching the top of the hour folks bear with me I'm going to connect into Oracle broadcasting right now and you'll be hearing their commercials and announcements until Bob and I'm Shepard put me put me through to the network so here we go is on symbolism and the next many shows will be on symbolism because this is part of an ongoing series and a tapestry of information that we've been discussing for many weeks on this program and the images are critically important they're there you have to really see them to understand what's being discussed here so go up to the website what on earth is happening calm on the left-hand side you'll see a radio listen button okay click that it'll say listen live you click that you're going to be taken to the radio listen page there's a player there if you're listening on Oracle no problem you don't need to use that but underneath that player then will it'll say images for tonight's show and there are three sections owl dove and sacrifice of the goddess okay we're talking about goddess symbolism tonight how it's used the types of things that it's used to elicit what it really represents deep its deep meaning its esoteric meaning okay and we're going to see lots of examples of goddess symbolism and how those two work on the human subconscious mind and what it's really used to represent so we were we covered the owl symbolism last week and at the beginning of this week's show in the earlier hour tonight we're looking at the positive aspects of goddess symbolism than we've been looking at the dumb which represents the goddess in many different occult traditions and we saw how it is used in the Trinity of Christianity to represent the holy spirit we were looking at image number three on the dolphin where we left off and we were looking at how the the symbol of the dog represents the holy spirit in this tradition but it is the removal of the Sacred Feminine that it actually represents because the Sacred Feminine or the mother of the Christian Trinity is the the Mary figure or the Mary character in the stories of Christianity and the birth of Jesus this is because the mum figure represents human emotion okay it is the Sacred Feminine internal quality of consciousness the three qualities of consciousness being thought emotion and action thought being the creator aspect emotion being the sacred feminine aspect or spirit and action being the sacred male aspect or the the things that we actually do with what we know and how we feel what we their into the world through our the combination with a merit of our thought and emotion so we have the Creator figure and then the the sacred mother figure okay giving birth to okay through their union the sacred masculine child of right moral action in the world this is the esoteric or the underlying meaning of these seemingly external symbols that religion gives to us because religion always wants us focused on the external never really turning inward and understanding the internal qualities of ourselves our psyche our consciousness and the ways that we truly work so these are symbolic analogs to qualities of consciousness and moreover they are symbolic analogs to the physiology of the brain we were looking at the second hand side of the right hand side of this image image number three which depicts two representations of Mary or the Blessed Mother in Christian tradition and we see that in each she is holding a serpent at bay or a reptile a snake okay in the left hand image she has her foot upon the head of a snake and the right hand image she is holding a serpent in the sea at bay from reaching these of innocent children okay we saw that the dog is another representation symbolically of the moon and here we see the crescent moon aspect of the goddess because she was in ancient traditions depicted as the moon the delve is a symbolic representation the moon in its crescent aspect at night a white crescent okay depicting the dog with its wings outstretched traversing the night sky here Mary wears the cloak of heaven the dark cloak with the Stars embedded in it she gives birth to the male child depicted underneath their because which is symbolically Jesus it depicts that the night sky bares the Sun into existence at dawn at the break of day okay this is ash crow theology this is basic Astro theological concepts which we have covered in depth on this radio show if you go to the podcast section of my website you will see in them a 50 of the 49 previous podcasts that you can download and listen to to catch up on this tapestry of information will continue with goddess symbolism right after this break [Music] okay we're back on what on earth is happening before the break we were looking at image number three in the dove symbolism section on my website at what on earth is happening calm we find that by clicking the radio listen page and looking at images for tonight's show mark March 8 2011 listed there under the player in image number three to the right hand side we saw Mary as the goddess of night holding a child and symbolically bearing the Sun which is Jesus there under her cloak at the bottom of the crescent moon there and she's being crowned because the goddess is traditionally referred to as the queen of the heavens okay but moreover we want to look at the deep esoteric side of the symbolism from a perspective of what it represents about our consciousness and physiology as well the human brain as I've shown multiple times in the past on this show is broken into three basic complexes the are complex or the reptilian brain which is the lower base instinctual fight-or-flight mechanism of the brain the reactive part and then we have the limbic system which helps us to experience human emotions through the chemicals that it can generate basically it helps us to feel the repercussions of our actions toward other people and then we have the neocortex or the human brain which is controls higher brain functions and truly makes us human because it lets us engage in scientific thought logic reason also the Sacred Feminine or right hemispherical side of it helps us to develop intuition nurturing compassion creativity etc all the things that truly make us human beings so in this image what you're really seeing here is the qualities the emotional qualities of self it's it's about true care okay it's about the nurturing or or intuitive qualities the intuitive qualities of the self and it is about the midbrain or the human limbic brain the positive emotions that we generate through the limbic system which is the part of the brain that really has to be used in conjunction with the neocortical brain okay there needs to be a good two-way communication going okay and that only happens between these two complexes in the brain when we have a balance between the left and right brain hemispheres as we've talked about uh ten fun item on this show in past shows okay so when we do that the limbic brain is operating in its proper capacity to keep the lower base instincts of the reptile complex the r-complex of the brain in its proper place it keeps it at bay so that we don't always chronically live in that flight or fight or flight mode ality and that's what you were seeing here the goddess okay the emotional qualities the limbic system or the million brain the midbrain okay is acting in its capacity to basically generate true err which is the protective quality that keeps us from the extreme negative consequences of the r-complex of the brain which is shown there at the very bottom in both of these examples the are complex ok and you have in in both of the examples the arm the Sacred Feminine is giving birth to the child of right moral actions symbolically depicted by Jesus in this image in on the right hand side and symbolically depicted by the symbol for Jesus on the left hand image which is the Sun within three first three letters of the name of Jesus IHS or in greek that is that is a yota ADA Sigma which is the first three letters of Jesus's name in the Greek language there on the Sun or in Mary's chest the location directly at the heart because again she's the emotional qualities she's the midbrain and she is true care that's ultimately what this represents symbolically and that is a connection to our child like qualities of innocence okay innocence is really what this is ultimately about and if we have those will be protected from the extraordinary negative aspects of the reptilian modality of consciousness which is what we want to alais which is what we want to keep at bay to the extent which is it is within our capability we want it in its proper place to be used when it is truly needed and not to rule us not to rule over the other aspects of our self and personality now let's move on to image number four where we see an image of Christopher Columbus and the Capitol building in Washington DC now what I'm getting at here this is goddess symbolism because we have to look at the names of the of this person in the name of the place which is ostensibly named after him okay we call the the Capitol the seat of government in the United States of the federal government we call it Washington DC Washington of course named after the first president George Washington and DC standing for District of Columbia now ostensibly okay this is named after the founder of the entire land of America Christopher Columbus okay and this is not really why it is named Washington DC as a matter of fact Columbus uh was not actually named Christopher Columbus this is an americanized of variant of this name his actual name was crystal ball crystal ball cologne okay and they took that name and morphed it to make it more akin to the name that they really wanted to name uh the the capital of this country after which was named after the Dove Kalume okay Kalume in the French language means dove and this is the variant for dove in many different languages okay it's basically the Romance language roots of the word for dung in English okay so you can look at it in Spanish and it'll be similar to Kalume in French it is Kalume okay this is the symbol the symbolic name of the goddess because the the goddess who they are naming the District of Columbia after is Columbia and she is named from the Doug Christopher Columbus is named after the Doug Kalume okay it's not named after Columbus in effect they were giving him the goddesses name and then naming the capital after the goddess and atop the Capitol dome which is a feminine breast analog okay it is a sacred feminine symbol of nurturing okay atop of course that is not what is going on in this building I'm just saying that's what it's supposed to be putting the idea into your mind this is the mother okay and Congress as we said before uh previously in the first hour is a a union between male and female it's supposed to be where higher quality minds meet who are balanced to do have the the Sacred Feminine emotion that is balancing their action that is actually guiding their their moral action in the world of course we've fallen horribly from this path the kind of people who are in there are that they have no valence and they are completely selfishly motivated and are just just acting as a pillagers and rapists of this land okay and ultimately they are raping what was originally supposed to be almost like a temple erected to the goddess atop this temple which is the Capitol building there is a depiction of the goddess Columbia they call it the goddess freedom and this is what the original symbolism of the goddess okay the Dove illuminated torch okay the goddess herself depicted as the Divine Mother it is supposed to represent truth and freedom this is what she actually represents in many ancient mystical traditions going back to Egypt going back to Sumer and even predating that she is truth and justice she is the goddess of love and that's what sits atop Capitol building we'll be back right after well that dog will be back on the Intel hub radio show alright folks were back and before the break we were talking about dove symbolism and we were addressing the name that is traditionally ascribed to the goddess which is Columbia it's named after the dog in Romance languages the root of the word dove is Kalume okay so the District of Columbia is actually named for this goddess and this is the positive aspect of the goddess that is the intent here it has become surrounded by the negative aspects of the goddess and used as a mechanism for control in last week's show how the owl which is the dark element of care is surrounds the Capitol building and is actually symbolically of the roads that surround the capital is actually symbolically putting the positive aspects of the goddess or this goddess of freedom inside of the belly of the beast the owl which is used to represent the dark occult okay we saw that last week and at the beginning of this week's show um moving forward to image number five let's look at how main Columbia comes up and this goddess symbolism comes up in modern culture so we're looking at the image for Columbia Pictures a major of motion picture studio okay that puts four tons of of movies in Hollywood all right and we see here the goddess depicted atop a pyramidal shaped staircase okay a platform right she's in the same colored robes as Mary is traditionally depicted because this is the same goddess throughout many different traditions um she is holding the illuminated torch which we saw last week was goddess symbolism and his symbolic of the light or the bearing of the child okay the Sun the light of the Sun and it is also the the wayshower to knowledge okay to understanding what proper moral action in the world really is to understanding one's rights to understanding what one does not have the right to do to knowing what is the action that is required of us in the world okay and understanding has to be built before we can really take any major action in the world but once we have that understanding we need to put it into practice and and not just sit on it not just say okay I know and that's enough that the the final goal which truly brings light to the world is to really uh it has to do with what we do with what we know right action and that's true wisdom that as I've said before on the show I've quoted the Chinese philosopher Yang Ming and he said that to know and not to do is not to know and I would suggest that those are words of wisdom indeed so that's what ultimately that illuminated torch represents its will that is born of the emotional qualities that the true care that has to be born in the heart which Reppert is represented by the goddess okay so again Columbia there you may find that in some a local allegorical movies front put out by Columbia Pictures but they're they're playing on this deep esoteric symbolism to sell their movies make no mistake about it they know the people who chose that symbol as their the symbol of their movie house know what it represents and that's why they're choosing the two basically get you to watch buy and go to their to see their movies we see goddess symbolism in the next image in Starbucks logo which we talked about when we had to talk about the symbology of symbolism of Astro theology on a couple of weeks back so here again you can see the crescent moon just look at the via point of where the the image basically hits the circle where the image of what would be her her tail okay if you're looking at this as some sort of a mermaid again she the goddess is the goddess of the waters in ancient symbolism as well but you can see that there is in uh in the inner circle there a crescent moon shape right around her head okay where the fins and then the crown and star sit and again the moon symbolism is connected with the goddess and the Dove okay if we look at image number seven Columbia Records we see that it is connected with the name Columbia of course Kalume the root of the word dumb okay and this has a symbolic representation this logo of the all I depicted below and we can even see that it has the same lines below that are attributed to the I of course which we looked at as symbolic of the all-seeing eye when we look at the eye symbolism a couple of weeks back so this is a symbolic representation of the Sun that the goddess bears okay we saw that the eye of horus is always depicted as a left eye because it is connected with the right brain okay the right brain hemisphere controls the left side of the body a true eye of horus is always the left eye of horse that never the right eye does the right eye is connecting with the left brain hemisphere and the nurturing intuitive creative qualities which ultimately their proper moral action or conscience into existence into the world through us happens through the left eye which because it symbolically it is not symbolically physiologically it is connected to the right hemisphere of the brain but symbolically that's why the left eye is used to depict the eye of horus the mother of oasis in the Egyptian tradition who are our symbolic analogues in the Christian tradition the the the Sun is of course Jesus and the mother is Mary in image number 8 we see the shield of Columbia University Columbia University ok with three crowns being depicted ok as another representation of the Trinity the Masonic Square the color blue which represents receiving ok or basically right brain qualities in other words receive this it's connected with the Trinity ok it's on the square as a term is used in Freemasonry to basically represent upright action ok uh I would suggest that the square definitely means other things than simply that a specific when it is used in its inverted configuration not in the configuration that you see it there which is pointed upward okay but basically again they're using symbolism of the Trinity and colors and frequencies combined okay to represent something that is supposed to get you to upright action which is your education I would suggest that this aspect of the goddess has also been raped or perverted because of modern university so-called education is basically outcome based education it is not teaching the true Trinity of a true classical education like the Trivium of grammar logic and rhetoric okay which is what those three crowns ultimately represent and it is basically an indoctrination system so if this is another symbolic way that the goddesses is denigrated okay in image number nine Columbia Sportswear here we see the name Columbia used again in conjunction with something that we should wrap ourselves in ok namely clothing it's connected with the Sun symbol here on the left hand side again you'll often see Moon and Sun symbolism used in conjunction with with this name because it's supposed to represent the goddess and the goddess is always connected with both the moon and the Sun she is the moon herself and then she connect she connects with the Sun because that is what she brings into existence again the moon gives way in the night sky to give birth to the Sun at dawn so we see a swastika here a symbolic swastika as part of Columbia Sportswear logo of the swastika is an ancient symbol representing the Sun and its movement throughout the course of the year again the cross okay and then the directional the directional aspects represented by the arms of the cross it symbolically depicts the Sun and its movement on the cross of the zodiac in image number 10 I'm moving a little bit quicker because I want to get to the sacrifice aspect of this before time runs out um this is a great image that's very composite it shows multiple aspects of goddess symbolism tag-teamed on this image of a Visa credit card and what this is symbolically designed to basically elicit through the subconscious mind um this Visa credit card is showing a white house a moon on the horizon and a dove in a hologram there and you'll also see the North Shore credit credit union North Shore Federal Credit Union's logo involved depicting the waters the lighthouse and the square all combined we'll get back to the breakdown of the symbolism in a moment here's another break coming up I'll be right back folks all right folks we're back on what on earth is happening on the Oracle Broadcasting Network part of the Intel hub radio show I'm your host mark passing on my website what on earth is happening comm we are discussing goddess symbolism and we are on image number 10 in the section called of symbolism on my web site we were looking at a Visa credit card and all of the different depictions of goddess symbolism that are basically throughout this this image we see the illuminated torch which is goddess symbolism symbolically depicted as the lighthouse which is basically a huge torch okay we see the moon okay in its full aspect on the horizon okay and the moon is goddess symbolism it is that the goddess is the moon and then we see the Dove on the right-hand side in the hologram in the color blue blue again associated with the right brain of the frequency that says accept this or take this okay see it as something that is good all right that's what blue does we have this hologram there some representing a dove and we see North Shore credit Federal Credit Union and we see above that the depictions of the goddess the goddess of the waters okay the lighthouse light acting as a guide this is all symbolic of knowledge which the goddess represents truth which she represents and the emotional qualities of self represented by the moon there and the Dove okay and of course visa isn't providing any of these things they're just putting the sacred symbolism on something that they want you to take and using symbol using color or frequency okay to basically put the idea in your mind that this is associated with all of those ideas because deep in our ancestral memory deep in the subconscious we understand already what this symbolism represents it's just we need to bring it up to a conscious level so that we understand how it's being used symbolism in and of itself is never positive or negative it's how it's used okay and in this example it's used very subversively against the human consciousness it's selling a product the basic traditional sacred art type of forms okay and that's a form of mind control any way you want to look at it that's what it is in the next image image number 11 the last image in this section before we talk about how the goddess is always symbolically destroyed we see in royalty in specifically British royalty they use the Dove on top of their sectors or wands of power okay and they're basically saying you know we represent the truth we represent the light we represent knowledge we represent wisdom okay we have the divine right to rule they're putting this on top of their sceptre knowing that this is a powerful subconscious archetype so that people will associate all of the positive qualities of the goddess through the dog with them another extraordinary example of how symbolism is used subversively when it comes to people who have no good intention for Humanity but want people to think that they're good okay so we also see the equal armed cross as symbol is on the top different scepters used by the British royal family and we saw this symbolism when we looked at Ashgrove theological symbolism a few weeks ago again those are in the archives section the podcast archive on my website I do specifically want people to go up there make use of that because it's an extraordinary a fountain of information there over the last 50 weeks which I've put together on this show delving into all areas of arcane and esoteric knowledge that I hope people will avail themselves of it's all for free you can download any of them and put them on your whatever mp3 playing device that you have at your disposal so uh please make use of that resource at one on earth is happening calm in the next section what we're going to talk about is how dark occultists who are ultimately running the show always attempt to destroy immolate burn or murder this goddess in some form or another and these are done as sacrifice rituals often in the light of day ok we're going to look at a few examples of this the first image there I depicted I found an example just simply of the the white dove being burned and they burnt this dove to symbolically represent the burning away of peace ok the Dove resents peace because it represents getting in touch with the positive aspects of emotions which is really the only way to lead to peace and this was offered up as a burnt sacrifice or a burnt offering and this was often done to basically bring forward the emotional qualities that were needed to to foster conditions that were necessary for warfare ok they're burning the dove of peace or they're removing it or they're murdering it ok we're going to see examples of this over and over and you have to keep an open mind because this is often something that is deeply mystically connected this is something that the universe may be telling us about in addition that some of these darker cultists okay so we have to understand this could be examples of syncro mysticism and it has been called alright in image number two we talked about this in the first hour the dove being the symbol of the Trinity but it is the removal of the Sacred Feminine divine mother aspect of the Trinity of father mother and child the mother has been removed and told not it is not to be worshiped in the Christian tradition you know it's it's blasphemy if you worship Mary she's just a vehicle for bringing physically bringing Jesus into the world okay and this is a denigration of the Divine Mother okay they're they're making it into a ghost the Holy Ghost they used to call it before they called it the Holy Spirit and the ghost is something that remains only after something is physically gone from the world which they're telling you symbolically the care is physically gone from the world okay they're very specific why the symbolism is used and what it's saying to us if we only know how to read it now the sacrifice element dark occult is ultimately want to destroy care they do this at Bohemian Grove the cremation of care they take a child put it on the water burn it before the owl okay they put the goddess freedom inside the owl at the Capitol dome okay in the owl surrounds it completely freedom is in the belly of the beast the symbol of the dark occult okay then they put the goddess on war memorials you always see a depiction of the goddess often depicted with wings like an angel on a war memorial and different researchers have suggested that they are symbolically sacrificing because war is a human sacrifice ritual let's be honest about it we no longer basically need to force people up pyramids to cut their heart out with obsidian blades like they did in the Aztec empire or they thought that the Sun and shine if they didn't do it they didn't continuously offer blood to the earth but the solar cult that is ultimately ruling things here still does have that belief in general believe it or not as crazy as that may sound they believe that the only way life is allowed to continue is through the offering of blood because they believe that the blood the life force is in the blood as we talked about when talk about life force symbolism represented by blood drops in symbolism and they believe that blood must continuously be offered to the earth in order for life on the earth to continue that is actually one of the other energy vampires mark that's exactly the case that's exactly right so that is just our blood it's our life force that's right and that's what they're stealing and that's what they're sacrificing to their got dark goddess now that the goddess here is not what they are sacrificing - that's what they are sacrificing they are symbolically destroying the goddess of care by taking out all of these physical individuals - the ritualistic act of warfare because that's what it is it's a battlefield as a ritual altar that's what it is sharing these false flag attacks like 9/11 which you've talked about many times and the symbolism at your website what on earth is happening folks that about does it for another edition of the Intel have radio show mark thanks so much for another great what on earth is happening I'm always a pleasure and it's an honor to be part of the in Tahoe radio show here on Oracle broadcasting I hope people will go to my website check out the podcast archives and follow the show in the tapestry that it attempts to provide for a deeper understanding check out my website at what on earth is happening calm and thanks for having me as always Bob sure not a problem really is a wealth of information he has many podcast and you got to follow it all it all connects it's a puzzle if you will and you got to collect those pieces and see when they said when they don't fit so be it but when they do it certainly do fit coming up next lee rogers with live free or die into the Oracle Broadcasting Network I'm Bob tuscan and this has been the Intel hub radio show

What On Earth Is Happening Show #051

Topics: *Sacrifice of the Goddess, Occult Season of Sacrifice*
